By J. B. T. F. REED

Farms

It is said that the former owner of the farm

where the car is kept was ordered to leave the

farm at once because he was a chronic

thief. The new owner took over the

farm and gave the former owner his

car back, but he had to go at once because

he was a chronic driver.

The Farm Bill Explained

Would Regulate Industry in the

Effort to End Unfair Practices

By MRS. BERTW. WAGNER

The March 1, 1939, deadline for submission of the

Farm Bill is approaching. This is the deadline

for submission of the bill to the Farm

Commissions, which will then

consider it before it goes to Congress.

The Farm Bill is designed to

regulate the industry in an effort to end

unfair practices.

February 4 is the twentieth anniversary of the founding of the Michigan State Farm Bureau. Only an idea twenty years ago, the Farm Bureau has developed into an essential organization of farm families today. About 10,000 Farm Bureaus are now affiliated with the state organization and all of them have memberships that add up to nearly a million. They are members of a million, and the Farm Bureau has become a powerful political force for the benefit of American agriculture.

The Michigan State Farm Bureau was organized in 1922 to include its members in the movement to increase farm income and reduce farm operating expenses. The articles of organization of this edition recall that the Farm Bureau has had success along these lines. In the field of co-operative marketing of farm products, it organized the Michigan Electric Exchange. It helped the Line Stock Exchange establish its terminal marketing facilities at Detroit and Battle Creek.

It established the Farm Bureau seed service. To help reduce farm operating expenses the Farm Bureau Service has supplied hundreds of thousands of acres of seed and a general line of farm supplies. It has worked to give farmers the most for their money by operating, under the terms of their contracts, a 75% share of all farm supplies sold in the 55 counties in which it operates. The Farm Bureau's largest contribution toward reducing farm operating expenses has come from its efforts in highway and road construction. The Farm Bureau introduced the concept of using the resources of the community to help the community. It helped to make this possible by using equal shares of the state and local taxes to be used in the construction of roads.

Every year of progress made by the Farm Bureau in commercial services is equivalent to a vote of the people. The legislative and taxation services to members are by their nature available to all farmers. But that doesn't mean they work no harm.

In these 20 years most members have come to realize that for the first time they can get a voice. They can have a voice in making decisions about the future of agriculture. They can have a voice in the making of laws that affect their farms. They can have a voice in the making of budgets that affect their farms. They can have a voice in the making of laws that affect their farms. They can have a voice in the making of laws that affect their farms.

Helping Make Soy Beans Better

The Michigan Farm Bureau is contributing to an industrial market for soy beans in the state of Michigan. The Farm Bureau is introducing house, barns and other products of soy beans, from 20 to 30 cents per pound. In 1930 some 20 million pounds of soy beans were used in this country. Last year the nation bought 40 million pounds. Soy beans have a lot going for them. Ninety per cent of all soy beans, which are about the same size as peas, can be used for meat or milk, depending on the market. Soy beans can be used in a variety of ways. They can be used as a meat substitute in baked goods, or as a milk substitute in infant formulas. They are also used in the production of soap, glycerin and margarine.

In a ton or soy beans there are about 1,600 lbs. of meat and 800 lbs. of oil can be sold, the crop should produce more money than it does now. Like any other produce for feeding purposes should be harder for the feeder.

BEHIND THE WHEEL

Commission's Milk Ed. Explains

M. F. Fields, state editor of the Farm Bureau, is a member of the state commission which has been organized to promote the sale of farm products. He will be retained as the state editor and will continue in that position. The commission is composed of commission members from the eleven state organizations. The commission has three members: M. F. Fields, state editor of the Farm Bureau, and the state editor of the American Farm Bureau Federation.

Michigan State Farm Bureau Was Organized 20 Years Ago Today

"To Provide Ways and Means for Concerted Action in the Solution of Agricultural Problems of State or National Scope"

The Michigan State Farm Bureau was organized in 1930. It was the outgrowth of the many farm organizations that had been formed in the state over the years. The purpose of the new organization was to provide a means for farm organizations to work together on national and state issues affecting agriculture.

The first officers of the Michigan State Farm Bureau were:

- President: O.V. Holdrege
- Vice President: John M. Cline
- Secretary-Treasurer: Rev. H.F. Sloan

The bureau had a membership of 20,000 at its inception.

In 1950, the Michigan State Farm Bureau had a membership of 50,000.

The bureau has continued to grow in membership and influence, and is now one of the largest farm organizations in the state.

They Organized the

For Fruit Growers

The Michigan State Farm Bureau has prepared a booklet for fruit growers in the state. The booklet is called "Fertilizer for Fruit Growers." It is available at the bureau's headquarters in East Lansing.

Adams Community Group Farm Bureau

The Adams Community Group Farm Bureau is a new organization formed in the Adams area. The bureau is working to improve the quality of life for farmers in the area.

FARM BUREAU MEMBERS are a matter for concern and are now being worked on by the Board of Directors.

The Michigan State Farm Bureau is a member of the American Farm Bureau Federation, which is an organization of farm organizations from across the country.

The affiliated commodity organizations are required to maintain a minimum of $1,000,000 in cash or bank reserves to meet the requirements of the Federal Farm Board.

Since 1930, the commodity organizations have continued to grow and have become more influential in the agricultural community.

By: J. P. YARBOR
Director of Community Relations

What is the Michigan Cooperative Wool Marketing Association? The Michigan Cooperative Wool Marketing Association (MCWMA) is a group of farmers who cooperate to market their wool. The association was established in 1932 to improve the quality and market for wool. The MCWMA has been successful in increasing the value of wool and improving the marketing system for wool producers.

Pool Sells Wool; Settlement Soon

The Michigan Cooperative Wool Marketing Association (MCWMA) is holding a marketing session to sell wool. The wool is being sold through a pool, where multiple farmers can sell their wool at a centrally agreed upon price. The MCWMA is responsible for the marketing and handling of the wool, ensuring that wool is handled properly and sold at the best possible price. The wool is being sold in the Michigan Cooperative Wool Marketing Association's warehouse on the 15th of February. The wool will be sold to the highest bidder.

The State Farm Bureau and the Farm Bureau Exchanges

The State Farm Bureau and the Farm Bureau Exchanges are organizations that represent farmers and promote agricultural issues. The State Farm Bureau is a national organization that represents farmers and promotes policies that benefit rural America. The Farm Bureau Exchanges are regional organizations that represent farmers and promote policies that benefit local communities.

Here's Why It Lasts

The coating can't help being uniform. In the finishing of the finished products, 'pots, 'pans, 'baking pans are always coated with the same. The particular coated metal is a little different from your kitchen. The coating is a polyethylene film that is very thin and durable. The coating is non-stick and is easy to clean.

What's Next on your Electric List?

Many of our farm customers have a "one-at-a-time" plan of adding electrical equipment for the home. This plan is a good one, and it is important to plan the electrical needs of your home carefully.

Refrigeration - cooking - sterilizing - bull housing - water heating - electric broiling - feed grading - baking - air conditioning - power for farm buildings.

These are some uses that can be built up one at a time - and equipment bought for cash or on terms.

Let Us Work with You

Whatever your plan, or type of farming - our trained farm service men are on the job to work with you in planning your uses and making the best use of electricity.

That's a part of our co-operation with our farm customers. Once the service is in, we aim to live with it and see that it is good service.
