ST. PAUL BANK INVITES CO-OPS TO CONFERENCE

Meet at College on October 13 for Farmers' Co-ops

The St. Paul Bank has invited representatives of farmers' co-operative associations in Michigan to a conference of the Michigan State College in St. Paul on Thursday, October 13. The conference, which will be held at the St. Paul Bank, will consist of a session of short papers and a business meeting.

The purpose of the conference is to discuss the problems facing farmers' co-operative associations and to exchange ideas and information on how they can improve their operations. The conference will provide an opportunity for farmers' co-operative associations to learn from each other and to share their experiences.

The conference is open to all farmers' co-operative associations in Michigan. Registration is free and lunch will be provided. For more information, contact the St. Paul Bank at (517) 692-3300.
Which Road This Time?

The American Farm Bureau cartoon on page 1 of this edition, and articles elsewhere in the paper, "Engag- ing Talks” for All Farm Leaders,” and "British Government Controls Food Imports and Prices" are indeed supports of the items that we should pay attention to.

The people of the United States are as one in their determination to save their farms. The prosperity provisions under which we shall live are now being destroyed. We believe the world would rise for our farm products, and prices and farm business will be better under whatever neutrality legislation is adopted. As long as we keep out of war, the American farmer may use his best judgment in operating his farm to produce the best return. The experience during and after the last war, and during and after the war, will do quite what this one will do.

The Old Paring Knife

It is fine to have many things and new things, but the old things last longer. I wouldn’t trade this for a gold one, nor would I lose the thin little point you see. It’s been cut on over 50% at times for some commodities. This is one of the specific ways in which the Farm Bureau women are obtaining results. The speaking contest subject this year.

How to Save the World Peace

Every farm woman can help to save the world by speaking of our Farm Bureau achievements to the Associated Women of the American Farm Bureau Federation as a summary of the ideals of Farm Bureau women in this and other countries.

Why beta/Ham in Carving One?
Expert Shows Easy, Modern Way

If you wonder when you want to carve, you'd be confounded by this rule: "Cut a 2-inch slice from the ham along the fat side. This makes it easier to carve the ham and also keeps you from eating the stringy, unappetizing end." No wonder many cooks are still reluctant to buy a ham when they see the price tag. But the secret of the expert is that this simple rule is not a hard-and-fast one. It depends on the weight of the ham and your appetite for meat.

A 10-1/2-pound ham, for instance, requires a 3-inch slice from the fat side. For a 12-pound ham, it's better to cut a 4-inch slice. This way, the ham will be easier to carve and more of the meat will be tender and juicy.

To carve a ham, follow these steps:
1. Place the ham fat side up on a cutting board. This ensures that the fat will be on the outside and the meat on the inside.
2. Turn the ham so that it rests on the fat side. This will make it easier to slice through the tissue.
3. Cut the ham into large, thick slices. This will help to keep the meat moist and tender.
4. When you're finished carving, pour any remaining juices over the ham. This will add flavor and moisture.

This method of carving will not only make your ham look better, but it will also make it easier to eat and more enjoyable.

Sales and Other New Taxes Here Shall We Allow Old New Taxes to Return?

By MRS. E. V. WAGAR

The life of the Farm Bureau when it was established was described at the meeting last week as the days of "readin', writin' dear taxpayer pays the bill. When the need for a referendum it is on that other fellow who pays the law that takes effect on our tax money and the man who is really on WPA projects out in the rural areas and that other fellow who was obliged to do work for what he received. When I turn to the money does not cover the amount accepted this assistance which meant to local schools. He wanted the drain continued, for the school appropriation was something for nothing and the man who was called upon to ject projects out in the rural areas and that other fellow who was obliged to do work for what he received. When I turn to the money does not cover the amount accepted this assistance which meant to local schools. He wanted the drain continued, for the school appropriation was something for nothing and the man who was called upon to ject projects out in the rural areas and that other fellow who was obliged to do work for what he received.

At present. need for a referendum it is on that other fellow who pays the law that takes effect on our tax money and the man who is really on WPA projects out in the rural areas and that other fellow who was obliged to do work for what he received.

Two Rewards in Canning Chicken

College Makes Suggestions For Keeping Quality

The home canning of canned foods can provide one worthwhile budget saving. By canning your own, you can be sure that your food is fresh and safe. The following suggestions will help you keep your canned chicken quality:

1. Choose a clean, dry, cool place to store your canned chicken. This will help to keep the food fresh and prevent spoilage.
2. Make sure that the jars are tightly sealed. This will help to ensure that the food is preserved.
3. Keep the jars out of reach of children and pets. This will help to prevent accidents and spoilage.
4. Use the jars before the expiration date. This will help to ensure that the food is fresh and safe.

By following these suggestions, you can keep your canned chicken quality and enjoy a delicious, safe product.

Cut a 2-inch slice from the ham along the fat side. This makes it easier to carve the ham and also keeps you from eating the stringy, unappetizing end.

This method of carving will not only make your ham look better, but it will also make it easier to eat and more enjoyable.

Greatest Convenience Electricity Can Bring to the Farmer...In the Production of Canned Foods

The farm process of canning chicken is quite simple. Here are the steps:

1. Place the chicken in a large pot and cover with water. Bring to a boil and let simmer for about 20 minutes. This will help to remove any excess fat from the chicken.
2. Drain the chicken and let it cool.
3. Cut the chicken into small pieces.
4. Mix the chicken with the desired seasonings.
5. Place the mixture in a can and fill with boiling water.
6. Seal the can and let it cool.

By following these steps, you can can your own chicken and enjoy a delicious, fresh product.

What's Wrong with American Agriculture
—Farmers Work Sells Too Cheap

State Farm Bureau Presents Background Material for Discussion by Community Groups During October.

By J. F. VOGLE
Director of Membership Relations

The Farm Bureau maintains that difficulty lies in a lack of 'parity." Parity is defined as a fair price for what farmers buy so that the farmer can afford to pay prevailing prices for industrial products and prevailing wages for labor. The period between 1910 and 1914 is used as a "benchmark." During those years the farmers' economic situation was marginally balanced.

Questions

1. What factors caused the loss of parity in the last thirty years?
2. Why would the Federal Trade Commission want to change parity?
3. How would a change in parity affect prices of farm products?

MOLLIE MOORE

Farm Bureau Has Helped

Farmers have started up in response to a growing demand for their products. Corn on the market has risen from 15.6 cents to only 19 cents, while parity is 25 cents. We have a long way to go before we reach parity.

FARM TENANT AND

The U. S. Department of Agriculture reports that farmers have increased their output since 1938. The reason for this increase is parity. The value of farm products in 1938 was $15,600,000,000, while in 1940 it was $19,000,000,000. The value of farm products in 1940 was $24,000,000,000.

At the very same time, the good business methods of this Company and fine spirit of co-operation has contributed to the success and growth of The Company. Use our service and you'll want to tell your friends.

STATE FARM MUTUAL AUTO INSURANCE COMPANY

Serving in Many Ways... at Small Cost

The TELEPHONE plays an important part on the farm today. Business discussions to common problems... social gatherings... school and church functions often are arranged by telephone, especially when time is short.

The TELEPHONE brings you word of such affairs... keeps you abreast of times. It provides a quick path to friends... to neighbors... to the county agent... to doctor and veterinarian, regardless of time or weather.

TO-THOUSANDS of Michigan farm families, low cost telephone service has become an indispensable part of farm life.

Poultry Brings Eighth Of Farm Income

Our policy delicately to the entire people of the world and those in the United States. It is the best method of maintaining the health of the nation. farm, are the only ones that are doing a good job of running the farm as a business. The service of the telephone is the only means by which the farmer can carry on his business of raising livestock and poultry.

The market value of the poultry and eggs produced in the United States must be considered when the farmer is deciding the best method of raising livestock. The market value of livestock is affected by the state of the farm and the quality of the livestock. The service of the telephone is the only means by which the farmer can carry on his business of raising livestock and poultry.
