**Behind the Wheel**

With J. P. Snyder, Director of Membership Relations

MEETING

Mrs. Hattie Goodwin of the Sault Ste. Marie County Farm Improvement Club was the speaker at the April meeting of the Lakeview Women’s Club.

The Lakeview club has 89 members, and last year the net result of all activities was a profit of $36.82. It was attended by many sisters and interest and enthusiasm were shown.

Mrs. Goodwin was the first of two speakers at the meeting. The second speaker was Mrs. Jay Colson, who discussed the farm improvement club’s history and plans for the future meetings.

**COMMENTS**

Mrs. Goodwin was successful in rallying the enthusiasm of the members of the Lakeview Women’s Club.

**1 1/2 CENTS PER DAY**

PROVIDES YOUR FAMILY WITH FARM BUREAU MEMBERSHIP AND MEMBERSHIP SERVICE

Farm Bureau Believes Idea Mayor Mount of It’s Worth

**By W. E. DOWNEY**

Farm Bureau will not have your attacks and supports the idea and hopes that the idea will take root. It may seem like a small thing, but it is a very important thing. The idea is that one cent per day can provide your family with Farm Bureau membership and membership service.

Farm Bureau believes that this idea is worth a lot. It is not a very large sum of money, but it is enough to provide membership and membership service to your family.

**REPORTS GOOD RESULTS**

**With Alfalfa Ensilage**

By Chamberlin’s Cowes, Beef, Cattle, Sheep, Horses

We'll Do Well on It

Number of County Farm Bureau members growing alfalfa, with good grain and silage on our farm. We have been growing alfalfa for many years, and we are very satisfied with the results.

We use the grain for feed and the silage for ensilage. We find that the grain is a very good feed for our livestock, and the silage is a good feed for our dairy cows.

**HEALTHY SEEDS**

**In Alfalfa & Clover**

Wisconsin Agricultural College Discuses Good Features

What about hard seeds in alfalfa, clover and other legumes? Does it ruin the crop? Does it reduce the yield? The answer is no. Hard seeds in alfalfa, clover and other legumes can be used for ensilage and for green feed. They can be used for ensilage and for green feed.

**HARD SEEDS IN ALFALFA & CLOVER**

Wisconsin Agricultural College Discusses Good Features

What about hard seeds in alfalfa, clover and other legumes? Does it ruin the crop? Does it reduce the yield? The answer is no. Hard seeds in alfalfa, clover and other legumes can be used for ensilage and for green feed. They can be used for ensilage and for green feed.

**HAMILTON FARM BUREAU COMMUNITY MEETING**

Two hundred and fifty members of the Lakeview Farm Bureau attended a meeting on April 12, 1940. The meeting was held at the Lakeview Community Hall.

**969 Families Have Joined Farm Bureau**

Berrian, Van Buren and Cass Co. Farm Bureaus Lead in Feb. & March Membership Work; Others to Campaign During April

Nine hundred and sixty-nine families became members of the County Farm Bureau and the Michigan and American Farm Bureaus during February and March.

This is an increase of 887 families over the membership in the same period of time last year.

The increase is due to the membership campaign conducted by the County Farm Bureau and the Michigan and American Farm Bureaus.

Farm Bureau Will Visit Baltimore

The historic city of Baltimore, Maryland, will be the scene of a two-day meeting of the American Farm Bureau Federation December 9-12, 1940. Directors of the American Farm Bureau settled that last month.

For a number of years, Baltimore has been the custom of the national Farm Bureau to hold its convention in alternate years at Chicago, which is the nation's farm capital, and the headquarters of the American Farm Bureau. In other years the East, South or West Farm Bureau States entertain the annual meeting. Such conventions have been held at Atlanta, New Orleans, Boston, and Pasadena, California.

The regional conventions are largely attended. Nearly all the State Farm Bureau agencies tour. It's not unusual for delegations from several states to become part of the same train on route to the convention. The number in each group assures Farm Bureau folks of the lowest round trip rates and savings in other travel accommodations. Accepted for the active giving and return trips, with short stop-offs at points of interest. A lot of Farm Bureau people will be interested in a convention Baltimore.

Going Into 1940 With the AAA

Nationally, Farmers Farm Bureau units are really interpreting the pressing need of the hour to be that of securing a balance between the supply of and demand for farm products, so that the farmer may receive parity prices and parity between supply and demand. We pledge our continued need for this program not as an application of the economic theories of any group, but rather as a method of securing the most pressing need of the hour to be that of finding a balance between the supply of and demand for farm products, so that the farmer may receive parity prices and parity between supply and demand.

Will Pay Rural Tuition in Full

When the last legislature set $79,000,000 as the amount of state aid schools could safely afford without making the volume of state aid that will restore and maintain parity prices and parity between supply and demand. We pledge our continued need for this program not as an application of the economic theories of any group, but rather as a method of securing the most pressing need of the hour to be that of finding a balance between the supply of and demand for farm products, so that the farmer may receive parity prices and parity between supply and demand.

The large city districts demanded that the reduction should be applied in the same percentage to all state aid for local schools. The small town and rural districts insisted that the amount of state aid for rural pupils should be increased. The law now requires that the state aid for rural pupils be increased by law to be made in full. The large districts are very few in number and are characterized by small intelligence between supply and demand. We pledge our continued need for this program not as an application of the economic theories of any group, but rather as a method of securing the most pressing need of the hour to be that of finding a balance between the supply of and demand for farm products, so that the farmer may receive parity prices and parity between supply and demand.

The turnout of federal farm loan interest rates, Congress has granted the reduction in 1939. In a few years the Farm Credit Administration had made the necessary change in the loan rates. As a result, borrowers may be credited with the refinancing of many more on better terms to the borrower.

The American Farm Bureau has pledged support to a perpetual reduction of federal farm loan interest rates until such time as the money markets call for and justifies a reviving of the old interest rate.

Secretary Wallace has endorsed the Jones bill to the House committee on agriculture. He also told Congress that he has no reason to believe that a repeal of the old interest rate.

Farmers Manual: Promoting}: Securing a balance between the supply of and demand for farm products, so that the farmer may receive parity prices and parity between supply and demand. We pledge our continued need for this program not as an application of the economic theories of any group, but rather as a method of securing the most pressing need of the hour to be that of finding a balance between the supply of and demand for farm products, so that the farmer may receive parity prices and parity between supply and demand.

M. S. C. Hands Out 783,957 Bulletins

A total of 783,957, Michigan Bureau of Labor, of which all are copies of the same bulletin, was distributed by the bureau and the Department of Education for a two-year period ending in 1928. The total was an increase of 2,000,000 over the number of copies distributed in the previous year.

Wood Tin Lead

Dye in the United States arbor that although more than two million tons of coal are being consumed in the country, wood fuel is still the most important fuel. As a rule, the people in the country who are using wood for fuel are those who have no other way of heating their homes. This is because wood fuel is the only fuel that can be had in the country.

The Associated Women of the American Farm Bureau

Miss P. J. E. Myer, Detroit: "The Modern Homemaker," the first book on the subject, will be published in the near future. The book will be a valuable guide to homemakers in their daily work.

Worth Would Favor Farm Interests in Trade Pacts
Farm Bureau Asks Approval By Several Cabinet
Secretaries

Burton Baker, President of Michigan Farm Bureau, endorsed 125 at their potluck supper at the American Legion Hall, March 12, President Charles Ford of the 10th Degree was the speaker. Paul George Werner, of the State Teachers Association, was master. There was a splendid program of songs and entertainment.

Calhoun Farm Bureau Annual Meeting

At the annual meeting of the Calhoun County Farm Bureau, March 9, 1942, Dr. Charles F. Davidson, Calhoun county, was re-elected president, while the following officers were elected: A. H. John. son, vice-president; W. F. Katz, secretary; and L. J. Decker of St. Joe, treasurer. Among the important resolutions presented were: A. H. Johnson of Battle Creek. In Calhoun county, each quarter of the country, one is elected at (ne, and it will continue at the Battle Creek Farm Bureau meeting, and asam also to the Farm Bureau Oil Company at Battle Creek. The

BUSKIRK SPEAKS FOR FRUIT MEN AT WASHINGTON

Asks Marketing Agreement For Fruits & Vegetable Growers

Carl Buskirk, Vice-Pres. Calhoun Farm Bureau, represented Michigan fruit growers, when he appeared before the Senate Committee on Agriculture, at Washington, D.C. and other Farm Bureau members of the committee were present to discuss the merits of a trade agreement with the Apple and Vegetable Exporters' Association of the United States, Inc.

The American Farm Bureau states that no such agreements should be borne in mind, that the United States is not a nation to consider the reciprocal trade agreements, so that it would be unwise to start any negotiations of that kind.

Buses and Repeal

Michigan Farm Bureau's position is that it favors the principle of free trade in all its forms, but that this location is only to be achieved by the U. S. Delegation and a similar basis of free trade between the United States and the rest of the world.

In the case of the proposed agreements, the only way to approach the problem is to consider the merits of the program and to the extent that it serves the interests of all parties concerned.

The idea that it would be unwise to start any negotiations of that kind is unsound. The idea that such agreements would be to the advantage of all parties concerned is not without merit.

Michigan Farm Bureau's position is that it favors the principle of free trade in all its forms, but that this location is only to be achieved by the U. S. Delegation and a similar basis of free trade between the United States and the rest of the world.

Buses and Repeal

Problem of Low Farm Prices Not Solved

It's the No. 1 Obstacle to Agricultural Recovery

The other day I had a question put to me by a friend of mine, "What is the most serious obstacle that we have to overcome in our struggle to recover agriculture?" He asked me because he felt that the problem was getting more serious all the time. He was afraid that unless we could overcome this obstacle, we would never get a real recovery in agriculture. I thought for a moment, and then I said, "The problem I see is that we are not paying enough for the things we buy."

World's Largest Limestone Quarry

The other day I heard Dr. George Kalmbach, Director of the staff of the Michigan State College, talking about the importance of conservation in agriculture. He said that conservation was the key to the future of agriculture. He also said that the most important thing we could do to conserve was to use our resources wisely. I think he was right in saying that conservation was the key to the future of agriculture.

The Problem Isn't Solved

Dr. Kalmbach also said that the problem of low farm prices was not going to be solved by passing a few laws. He said that we had to do something to change the way people thought about conservation. He said that if we could change the way people thought about conservation, we could change the way they used our resources.

The Good Farm, The Bad Farm

Dr. Kalmbach also said that the problem of low farm prices was going to be solved by making farmers more efficient. He said that if we could make farmers more efficient, we could get more food from the land without having to use more land.

The End Result

Dr. Kalmbach said that the end result of all this would be a better world. He said that if we could make farmers more efficient, we could get more food for the world. He also said that if we could change the way people thought about conservation, we could change the world.
GROWERS' GOAL IS BETTER FLEECES, HIGHER PRICES

James C. Ross, Farm Bureau Marketing Director, announced that all wool growers will have a better year as a result of the prices paid for wool in 1940. The average price of wool has increased to $0.70 per pound, which is approximately 50 cents per pound higher than the average price of wool in 1939.

The higher prices are due to improved marketing conditions and better wool quality. Woolgrowers have been encouraged by the Farm Bureau to improve their marketing practices and to sell their wool in bulk to large wool buyers. This has resulted in better prices and higher returns for woolgrowers.

Furthermore, the Farm Bureau has been working closely with the wool market to ensure that woolgrowers are being paid fairly for their wool. The Farm Bureau has also been active in representing woolgrowers' interests to the wool market, which has resulted in better prices for wool.

In conclusion, the higher prices for wool are a result of improved marketing practices and better wool quality. The Farm Bureau continues to work with woolgrowers to ensure that they are being paid fairly for their wool and that the wool market is functioning efficiently.

S appealing seeds of alfalfa, red clover, rye grass, timothy, and orchard grass are all available at the Miller Seed Company, located at 1231 S. Saginaw St., Lansing, Michigan.

COMMUNITY GROUP LEADERS PRESENT BACK-GROUND MATERIAL ON METHODS FOR DISCUSSION

By EMILY J. TAYLOR

Community Discussion Groups & Education

In the Work of Farm Bureau the discussion plays a prominent role. For the Community Farm Bureau it is the main means of bringing the group leaders together and maintaining an organization in which they can communicate and share the facts relating to their own problems with other persons and groups.

The purpose of the present groups is to provide a means for the group leaders to meet and discuss methods and procedures that can be utilized in the operation of their groups to strengthen the group's ability to function as a unit.

For all cooperative systems, the meeting of the group leaders is the basic unit. One of the most important developments is in the technique that can be utilized to strengthen the group's ability to function as a unit. This can be done through the utilization of the techniques that have been developed for cooperative groups and used in the operation of the group leaders.

The group leaders are brought together in the meeting of the group leaders. They are brought together to discuss the methods and procedures that can be utilized to strengthen the group's ability to function as a unit. These methods and procedures can be utilized to strengthen the group's ability to function as a unit.
