SMALLEST

For years, Mr. and Mrs. Heuer have been helping the Department of Agriculture with their potato crop. This year, they harvested only six potatoes, but they were of the best quality. Such a small crop is not unusual as the weather conditions this year were not favorable for potato growth.

Nearby, on the other hand, Mr. and Mrs. Brown had a much larger potato harvest of 100 bushels. Despite the difference in their yields, both farmers are pleased with the quality of their potatoes.

Crimes

The police have arrested two individuals for the theft of a car in the downtown area. They have been charged with grand theft and are awaiting their trial.

BETTER FOR EXCHANGES

The Exchange Board has decided to revise the rules governing the distribution of funds. The new rules will be implemented next month and will be designed to ensure fair distribution of funds among all members.

A Friend in the White House

That yarn test. Red or green or both colors were gray too much, they ay. yet the city as a whole has in supplying New York City with food. If the answers were satisfactory, that was all.

Summers is not a debatable question for President Roosevelt.

The Farmers Power Company attached cutters to a 500-gallon water pump operating on a thousand-horsepower motor on the Paris Wirt Farm at Davison, Ingham county. Water was supplied to the home, where there were four cows, three hogs and 12 chickens. The water supply for 16 milk cows, 32 hogs, 2 horses and a few chickens.

Humphrey was pumped in a two year period ending April 4, 1940, and how much did Mr. Wirt pay for that service? The pump motor reported 248,224 gallons ... or 8,654 days, or 1,284 tons of water, or 11,500 bushels of corn, 7,500 bushels of oats, 15,000 bushels of corn, 15,000 bushels of oats... and that's just the beginning.

Color Blind and Welcome!

Color blind or color blind is not a debatable question for President Roosevelt and the Young Farmers' Associations.

The Associated Women of the American Farm Bureau

The Associated Women of the American Farm Bureau Women's Department and the Associated Women of the Michigan Farm Bureau Women's Department are working together to improve the Farm Bureau Women's Department and Michigan Farm Bureau Women's Department of the American Farm Bureau Federation, which is in such a condition as to continue the work of the American Farm Bureau in the service of the farmer and the public.

The Farmer and New York City

The U. S. Department of Agriculture is authority for the statement that a half million farmers are a part of New York City food supply. A large share of them work full time at it. Even so, the mechanics of the food distribution system are such that while the city markets always have enough on hand ... sometimes, too much, they say ... yet the city has a whole precious little in the kitchen. There aren't any clerks or assistants of any kind for hundreds of thousands of New Yorkers.

When would happen if New York should suddenly find itself cut off from all its sources of food?

The Consumers Counsel Division of the U. S. Dept. of Agriculture tells us: If such a disaster should occur on a day in June, there would be no day's supply of milk on hand for more than 7,000,000 people.

"At the time of the first day most of the fruits and vegetables that are cool, cold and freezing when they have been consumed. From cold storage plants would come a few days supply of vegetables and fruits. By the end of the week we have heard that the first fruits and vegetables would have disappeared, except potatoes, oranges, pineapples and bananas. Poultry supplies would be limited, possibly three weeks. There would be bread for a month, but as other ingredients than flour ran out, the bread would decrease in quality. After two weeks there would be little left."

Nothing short of war and a swift and effective blockade of New York City would bring about such a cessation of food supplies, but the illustration points out that for New York and for all city dwellers the farmer is not a far person, but a fact and person. He is real and he is right at their elbow.

The Way to Pump Water

Many thousands of electric automatic water systems have come into use on Michigan farms within the past few years. When separate electric and water meters are attached to pump and motor, we get some interesting information.

The Consumers Power Company attached cutters to a 500-gallon water pump operating on a thousand-horsepower motor on the Paris Wirt Farm at Davison, Ingham county. Water was supplied to the home, where there were four cows, three hogs and 12 chickens. The water supply for 16 milk cows, 32 hogs, 2 horses and a few chickens.

The first thing you have to do is make sure that your roof is water tight when it rains. This is done by using the correct materials and techniques. The most important thing is to ensure that the roof is properly sealed around the edges. This can be done by using rubberized roofing tar or a similar product. The tar should be applied to the roof deck and allowed to dry before the roof is covered with the final layer of roofing material.

Once the roof is water tight, you can then focus on the insulation. The insulation should be installed in the attic space to help keep your home cool in the summer and warm in the winter. The insulation should be installed according to the manufacturer's instructions and should be the correct type and thickness for your climate.

Finally, you should consider the aesthetic of the roof. The roofing material should match the style of your home and the materials you have already used on the exterior. This will help to create a consistent look across your home.

By following these steps, you can be sure that your home will be protected from the elements and will remain comfortable year round.

Like What We Have
September is Organization Time for Community Groups

State Committee on Community Farm Bureau Programs Makes Suggestions and Presents the Topics

As BETHANY Membership and Educational Secretary, Mrs. H. J. Dunsheath sends this message to all members of the Michigan Community Farm Bureau:

GREETINGS:

Our Community Groups are part of the Michigan Farm Bureau Family which was formed to serve the needs of the rural community and to promote the interests of its members. The Community Farm Bureau is the organization of rural people who live in a rural community and who are members of the Michigan Farm Bureau. It is the organization of those rural people who want to be part of the Farm Bureau movement and who believe in its objectives.

It is the objective of the Community Farm Bureau to increase the social, economic and political well-being of its members and to promote the interests of the rural community. To accomplish this objective, the Community Farm Bureau has adopted the following six principles:

1. To provide sources of information.
2. To advance the social, economic and political development of the rural community.
3. To provide leadership.
4. To provide opportunities for the expression of ideas and opinions.
5. To improve the quality of life in the rural community.
6. To improve the conditions of life in the rural community.

To accomplish these objectives, the Community Farm Bureau has established a program of activities. The program consists of a series of monthly meetings, each of which is devoted to a specific topic. The topics are selected by the Community Farm Bureau, and they are designed to meet the needs of the rural community.

The Community Farm Bureau is a voluntary organization, and it is open to all rural people who wish to be members. The membership is divided into six categories:

1. Junior members: those who are under 18 years of age.
2. Adult members: those who are 18 years of age or older.
3. Senior members: those who are 65 years of age or older.
4. Membership: those who are enrolled in the Michigan Farm Bureau.
5. Honorary members: those who have made outstanding contributions to the work of the Community Farm Bureau.
6. Life members: those who have been members for a period of five years or more.

The Community Farm Bureau is an organization of rural people who want to be part of the Farm Bureau movement and who believe in its objectives. It is a voluntary organization, and it is open to all rural people who wish to be members. The membership is divided into six categories: junior members, adult members, senior members, membership, honorary members, and life members. The program consists of a series of monthly meetings, each of which is devoted to a specific topic. The topics are selected by the Community Farm Bureau, and they are designed to meet the needs of the rural community.

Sincerely yours,

[Signature]
