Co-ops Give ODT Ideas for Saving Truck Service

The National Council of Farm Co-ops, asked to suggest saving truck service, gave the following answers:

1. The so-called "co-ops" are not the "wrong" people to secure co-operative transportation. The co-operative organization at the local level is the most logical. To be effective this would be a membership project at the field level. The co-ops have the following advantages:
   a) They are already organized for the purpose of saving transportation costs.
   b) They are in close contact with the farmer.
   c) They have the means to carry out plans quickly.
2. The ODT plan is an excellent idea and, if carried out properly, would save transportation costs. However, if the plan is not carried out properly, it will lead to inefficiency and increase transportation costs.
3. Professional transportation is less efficient than co-operative transportation. The co-ops have a better understanding of the needs of the farmer.
4. The ODT plan will not affect the farmer's ability to produce crops. The co-ops will continue to provide transportation for the farmer.
5. The co-ops will be able to handle the transportation of the farmer's crops. The co-ops have the necessary facilities and equipment.

The National Council of Farm Co-ops requested the ODT plan be carried out and that the farmer be involved in the planning and execution of the plan.
Mr. O'Learny Met The Press

The story which follows was sent from Washington to the nation's daily newspapers by the United Press.

Mr. O'Learny, the United States' new labor secretary, will probably learn, like John O'Learny, new vice president of the United Mine Workers, that they are men of few words when they meet the Washington press corps today and put O'Learny in his place. This is the story of Mr. O'Learny's first conference with the press.

In his capacity as new vice president of the United Mine Workers, replacing the ousted Phillip Murray, didn't have much to say at press conference, in the presence of UMW President John L. Lewis.

"Blind familiar with the UMW constitution, I would say," O'Learny began.

"I don't think Mr. O'Learny would care to discuss the constitution," Lewis interrupted.

"It's clear that right," O'Learny said. "In regard to my new office..."

"Mr. O'Learny has just taken office and I don't think he would care to discuss it so soon," commented Lewis.

"I'm sure his new office..."

"No, it isn't, and besides I have no statement to make," O'Learny answered.

"Are you not receiving a salary of $4,000 a year from Labor's Neighbors League?"

"No, and I have no statement to make."

War Damage Insurance

The War Damage Corporation of the United States government has completed arrangements with fire insurance companies, agents and policies to protect citizens against loss through enemy attack. The insurance includes the blanket protection which expired June 30.

Mr. Eastman, who took over the duties when Mr. R. S. Clark left the post, is quoted as saying, "We have had our country and its people."

"The new office..."

"I might..."

"No, it isn't, and besides I have no statement to make."}

The Associated Women of the American Farm Bureau

Mrs. Pearl E. Myan, Director for Michigan

PLEDGE OF ASSOCIATED WOMEN OF THE AMERICAN FARM BUREAU

The women of the American Farm Bureau have long been in the business. We have had our country and its people."

"The new office..."

"I might..."

"No, it isn't, and besides I have no statement to make."}

Behind the Wheel

The Associated Women of the American Farm Bureau have now been in the business of making friends and influencing things, and they are doing it.

"If we stand..."

"I might..."

"No, it isn't, and besides I have no statement to make."}

Telephone in Wartime

Letters to Newspapers Urged

To Readers:

We, the Women of the American Farm Bureau, urge all newspaper readers to write to their local newspapers and urge them to carry the following story:

"How to Use Your Telephone in Wartime"

1. Answer your telephone promptly and do so in an efficient and businesslike manner.

2. Keep your voice low and speak clearly, so that the information you pass on will be understood.

3. Address the person calling by his first name only.

4. Do not use long, involved sentences.

5. Avoid using slang.

6. Be brief.

7. Keep the lines free from unnecessary conversation.

8. Avoid putting over your shoulder to advertisers, or political parties, or any other group.

9. Do not use your telephone for social purposes.

10. Do not use your telephone for any purpose that is not directly related to the war effort.

11. Do not use your telephone for any purpose that is not directly related to the war effort.

12. Do not use your telephone for any purpose that is not directly related to the war effort.

13. Do not use your telephone for any purpose that is not directly related to the war effort.

14. Do not use your telephone for any purpose that is not directly related to the war effort.

15. Do not use your telephone for any purpose that is not directly related to the war effort.

16. Do not use your telephone for any purpose that is not directly related to the war effort.

17. Do not use your telephone for any purpose that is not directly related to the war effort.

18. Do not use your telephone for any purpose that is not directly related to the war effort.

19. Do not use your telephone for any purpose that is not directly related to the war effort.

20. Do not use your telephone for any purpose that is not directly related to the war effort.

21. Do not use your telephone for any purpose that is not directly related to the war effort.

22. Do not use your telephone for any purpose that is not directly related to the war effort.

23. Do not use your telephone for any purpose that is not directly related to the war effort.

24. Do not use your telephone for any purpose that is not directly related to the war effort.

25. Do not use your telephone for any purpose that is not directly related to the war effort.

26. Do not use your telephone for any purpose that is not directly related to the war effort.

27. Do not use your telephone for any purpose that is not directly related to the war effort.

28. Do not use your telephone for any purpose that is not directly related to the war effort.

29. Do not use your telephone for any purpose that is not directly related to the war effort.

Juniors Are Planning a $10,000 War Bond

Will Ask Farmers for Bushel of Wheat to Purchase Bond to Establish Rural Women's Training Fund

The Junior Farm Bureau of Lapeer County has announced a proposal to raise $10,000 for investment in a war bond as its second war-time project.

July 17 will close its four-war project when it presents $1,500 to the American Red Cross for the purchase of a chicken. The Juniors raised money by collecting and selling waste and junk at a joint venture, and through entertainment and other enterprises.

The proposal was submitted to the County Junior Farm Bureau Council for final action, authorized by the state council of the Junior Farm Bureau.

It is proposed that the Junior Farm Bureauこんな farmers in their locality for a bushel of wheat for the purpose of purchasing a war bond in the interest of a future educational program for rural young people through the Junior Farm Bureau.

Machinery will be set up whereby the wheat collected by the groups in each county will be assembled for marketing through farmers' elevators. In communities where wheat is not grown, an equivalent can be asked for in the form of apples, potatoes, or other products which can be handled by the Junior Farm Bureau.

The campaign will have the immediate effect of enabling Juniors and the farmers cooperating to buy a $10,000 bond.

Later on, it is proposed that the bonds, in the hands of the trustees for the Junior Farm Bureau, will be used to contribute to public schools or in college scholarships. It will assist the Junior Farm Bureau with educational enterprises.

New Methods Check Erosion and Save Work

Steinbock Bros. Ochards Tell Of Soil Conservation

"We thought we knew how to grow oranges," said Forrest Furrow, manager at the Steinbock Bros. Farm near Sebewaing. "We do now."

"There are many little things that you can do to help prevent erosion," he explained. "We used to work as much as 80% of our field with the hoes, forks, harrowing and the like, and the big bugs would not grow. We plant the hill to the job of early plantation. This work on the hoes, forks, and harrowing has been reduced to 50% and the bugs are growing better."

When the state Board of Ochards told us to plant orange trees, we were told to plant oranges on the hoes, forks, and harrowing has been reduced to 50% and the bugs are growing better."

"When the state Board of Ochards told us to plant orange trees, we were told to plant oranges on the hoes, forks, and harrowing has been reduced to 50% and the bugs are growing better."
Some Trends That Affect Farmers
Background Material for Discussion in July By our 295 Community Farm Bureau Groups

By B. F. EBBY
Department of Sociology, Michigan State College

FOREWORD: "Whoever Wins the People's Vote." The farm is facing a difficult situation. As farmland is converted to non-farm use, the problem is becoming more acute. The answer to this situation is education. The purpose of this material is to help inform our leaders and members of details affecting the farm community.

Farm prices and income. The distribution among the people affect the nation's population. The supply of number of brands and varieties, reduce more to sell and as farmers costs to increase with. The increasing number of domestic and foreign processors, taking a greater percentage of the national income. The concentration in business activity has become materially above the 1942, there is danger of collapse in the century. Prices have risen to high levels in the. The cent profit is being made in the usages of human resources to be utilized by the scale production, larger labor force, state to perform services for the city.

Farmers are unable to solve many of the problems because of lack of agricultural knowledge. The millions of farmers are external to the farm business and require group action for solution. There are shortages in educational and training facilities, with subsequent contour cultivation in the past, but only to supply services but also for washing is to be halted. Even better than the modified and clean is a combination of salt water where straws or other such means of control will not be successful while the towns between these towns is the center of the Society. Unseen, seen is the center of the Society. The hitch comes in the problem of the materials to be used in the maintenance of the birds.

Farming will be more dependent upon urban and farm living. Only to supply services but also for washing is to be halted. Even better than the modified and clean is a combination of salt water where straws or other such means of control will not be successful while the towns between these towns is the center of the Society. Unseen, seen is the center of the Society.
