Behind the Wheel

With J. F. Yaeger, **Director of Membership** Relations

IN THE ARMY

Keith Tanner left for military service July 1st. He is the second of the membership field representatives to join the armed forces. The first was Loren Black who worked with the County Farm Bureaus in northwest Michigan. Keith's work has been with three County Farm Bureaus in central

Michigan and with Community Farn Bureaus all over the state. I saw Loren when he was on a fur-

lough recently. He's looking well and likes army life. He

his

CO-OPS GIVE ODT IDEAS FOR SAVING TRUCK SERVICE

Nat'l Council of Farm Co-ops Asked to Suggest Tire Saving Rules

The Office of Defense Transportation at Washington on June 18 invit ed leaders of the nation's farm co-op eratives to prepare for all trucks op erating in agricuture a set of regulations that will conserve tires and move goods efficiently.

Clark L. Brody, chairman of the national transportation committee of the National Council of Farmers Co-opera tives had advised the ODT at the con-

ference that farmers, truckers, and suppliers were in full accord with the tire saving program and would co-ophas the confidence erate.

The ODT rule calling for a full load superiors one way can be met, said Mr. Brody. who are giving But the application of a single rule him work of a responsible nature calling for 75% of a full load the Says Loren, "My other way is a rule that truckers and farm suppliers cannot comply with in job now is to work with my officers many instances in agriculture because of circumstances beyond their conin making schedules, etc., for the trol.

training of new recruits and to help

The committee headed by Mr. Brody ecommended to the ODT that it issue an order which would require all trucks operating in agriculture to conserve tires, by adopting one of several operating plans for that purpose, as

proposed by the committee: 1. Full load one way, 75% of capac Larry Brandon, secretary of the Indiana Farm Bureau, will speak at the farm organization day program at the

2. Reduce the mileage travelled (a) by reducing the total mileage travelled in each quarter by a certain percentage to be determined as compared to the mileage travelled in the same ities. They are building up a surplus quarter in 1941 (b) or, by reducing of stored crops such as may be very the mileage on a truck miles per ton of property handled basis per quarter by a certain percentage to be determined, as compared to the same quart

er in 1941. The committee suggested that mileage records he kept by quarters rather than months in order to take into ing transportation facilities last, in account the seasonal character of the movement of farm crops and supplies. The co of the Red Cross war fund campaign tions regarding loading and operating was so outstanding as to receive requirements. It suggested that when a truck has moved, loaded to capacity H. Davis, chairman of the campaign. or visible capacity, in the direction Mr. Davis pointed out that of the of the heavy flow of traffic by motor 2,740 Red Cross chapters which went truck, it may return to its origin "over the top" in the raising of point partially loaded or empty, if money, 2,226 were in rural areas. Said there is no property available for Mr. Davis, "In these 2,226 rural Red transportation on the return trip. The committee suggested that the farmer's truck be exempt from these

Farm Bureau Opposed; Favors Making Changes as We Go Along By STANLEY M. POWELL While we have our major attention focused on winning

the war, there are a number of vitally important matters which we must keep in mind or pay dearly for our indifference.

Under the terms of our Michigan constitution, there will automatically appear on the election ballot this coming November the question as to whether or not a constitutional convention should be assembled to prepare and submit to the Court Said Defendants Were voters of the state for adoption or rejection an entirely new state constitution.

At the annual meeting of the Michigan State Farm Bureau last November, the delegates foresaw this situation and y who were connected with the adopted a strong resolution urging a vote of NO on this issue. They said that in their judgment it was preferable that any cuit court at Sandusky the week of changes in the constitution be considered as we go along, and on their own merits, rather than to undertake a general revision of the whole constitution. In this way, confusion A charge of conspiracy was dropped would be minimized and voters would be able to express their desires as to each specific proposal for amendment.

on six months probation. Seven were Few Farmers on Governor's Commission

Late in 1941 Governor Van Wagoner appointed a commission of 32 men and women to study our present state constitution and to issue a report advising the people of Michigan as to whether or not the commission would recom-Judge Boomhower lectured the mend the calling of a constitutional convention to draft a new

constitution, or whether there were certain specific amendstrong morale among soldiers and the same charge. He said that with ments which they desired to propose and recommend to the

Among the 32 members of this commission there were up in such a strike. The court said it only a few having a rural background. Those definitely rural in interests were Clark L. Brody, executive secretary of the Michigan State Farm Bureau, and W. G. Armstrong, master of the Michigan State Grange. Representative Audley Rawson of Cass City was also appointed, but, although he happens to be a farmer, he probably was chosen on the commission because he is majority floor leader in the House of Representatives.

Mr. O'Leary Met The Press

The story which follows was sent from Washington to the nation's daily newspapers by the United Press.

Members of the United Dairy Farmers will probably learn, like John O'Leary, new vice president of the United Mine Workers, that they are men of few words when Mr. Lewis is around. Lewis fired Phillip Murray and put O'Leary in his place. This is the story of Mr. O'Leary's first conference with the press:

"John O'Leary, new international vice president of the United Mine Workers, replacing the ousted Phillip Murray, didn't have too much to say at press conference today-in the presence of UMW President John L. Lewis.

'Being familiar with the UMW constitution, I would say . . ." O'Leary began.

"I don't think Mr. O'Leary would care to discuss the constitution," Lewis interrupted.

"That is right," O'Leary said. "In regard to my new office . . .

"Mr. O'Leary has just taken office and I don't think he would care to discuss it so soon," commented Lewis.

"I think," O'Leary remarked, "that I would prefer to let Mr. Lewis do the talking."

A few hours later O'Leary received the press with Lewis absent.

"Is it true, Mr. O'Leary, that you hold two jobs, one of them outside the UMW?" he was asked. Murray was ousted because he held two paying jobs.

"No, it isn't, and besides I have no statement to make," O'Leary answered.

"Are you not receiving a salary of \$4,000 a year from Labor's Nonpartisan League?"

"No, and I have no statement to make."

War Damage Insurance

Readers Not to Sign Petitions

Mrs. Clinton Ducker of Otter Lake s publicity chairman for the Lapeer County Farm Bureau. She sent the following letter to editors of daily and weekly newspapers in her section of suggestions on the use of present pas- the state in opposition to the reapportionment amendment promoted by 1. Don't let pastures be eaten too the Michigan-Council for Representa-

"To the Editor:

"Petitions for the reapportionment proposal are not being signed as rapidly as its sponsors had hoped.

"This is a very encouraging indication of the basic fairness and intelligence of the American people, and shows a conservative tendency which is badly needed.

"Any proposal which will give complete control of the state to 4 counties, especially when those 4 countles are dominated by radical labor lead ers, will be opposed by Michigan's great agricultural industry.

"It would seem that no constitution complete fertilizer, one containing ni- al amendments should be made without first giving serious study to the interests of all groups concerned. No representative of any farm group was consulted in the framing of this amendment, although labor unions

"There is a mistaken impression it hard to cure your crop, you can that the legislature is dominated by put it in the silo. If you use it within representatives from rural areas. Act lasses according to instructions, or representatives, 18 are farmers. Agricultural is a vast business which should be represented in our state government.

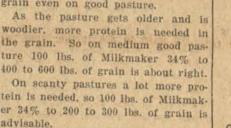

"It should be understood that rural areas are not opposed to a reaportionnent. But no other state in which large cities are located selects its legislature solely on a population basis.'

physical loss on real and personal property resulting from enemy attack or action of our own forces in resisting such attack.

Dwellings everywhere, churches and schools, barns and farm buildings may be insured at ten cents per hundred of valuation. The rate for growing crops is 5 cents per hundred. Mercantile warehouses have rates of 15 to 20 cents per hundred. Live stock and farm equipment is insurable. All kinds of personal property may be insured. The rates are uniform for all parts of the nation.

Insurance companies will be paid 31/2 per cent of the premiums to cover their costs and overhead; insurance agents will be paid a commission of 5% of premiums collected. State Farm Insurance Company agents will assist the WDC in offering the insurance.

Plant Kingdom Beckons To Us

Last month 100 lbs. of Russian dandelion seeds arrived in the United States for experimental planting to determine the value of the plant as a source of rubber.

Some months ago Wheeler McMillen, president of the Farm Chemurgic Council, told the nation that the Russians are getting from 150 to 200 lbs. of rubber per acre from the dandelion. U. S. Dep't of Agriculture men believe the plant may yield from 30 to 50 lbs. per acre here.

The Farm Chemurgic Council is an association of manufacturers, scientists and farmers who are devoted to finding worthwhile industrial uses for farm products. The search for rubber focuses attention on all manner of plants. How many plants there are, and how comparatively few are of present day economic importance is brought out by Mr. McMillen. He said:

"Probably not more than 500 plants are grown as crops everywhere in the world in any commercial sense or quality. Yet more than 300,000 kinds of plants have been classified by botanists; more than 15,000 in North America. Is it possible that only a fraction of one per cent of the number of plants species has value to mankind? Or is it that mankind has learned only a fraction of one per cent of the ways in which plants can be used?

"The explorations of plant substance by organic chemistry have probably no more than reached the state of the Norsemen-with Columbus still to come.

pital.

'No one can grasp the amazing productive potentialities of the plant kingdom without seeing clearly that nations can gain far more wealth by cultivation and utilization than they can ever hope to steal by conquest."

Why Not Ball Parks and Movies?

Joseph B. Eastman, director of the Office of Defense transportation, has called upon the managements of 2,200 state and county fairs to postpone them for the duration of the war in order to save rubber.

Mr. Eastman told the fair managements that all unnecessary use of motor transportation must be avoided if tires and cars are to last. We agree on that. But Mr. Eastman believes that driving to a fair cannot be classed as necessary, and he believes that the total of such driving is not negligible. It would be a deprivation to close the fairs, he said, but not an "intolerable deprivation."

If giving up the fairs will contribute materially to saving tires and to the war effort, we know that farmers will forget the fairs right cheerfully.

At the same time, we say that farmers will expect Mr. Eastman to consider the amount of rubber that an estimated 20 millions of the great American public consume every week in getting to the movies. How necessary is it for baseball leagues to operate and every day tempt thousands of fans to drive to the game? Come September, October, and November, what about the thousands of college and professional football games? Some draw up to 80,000 people.

It takes a mighty big fair to need the parking facilities that many of the college and professional sports events require.

Will Mr. Eastman ask the movies, baseball, football, and comparable events to join the farmers' fairs and close for the duration?

The editor of the Indiana Farm Bur- her best usually costs 3 to 5 cents "There is great need for immediate eau's Hoosier Farmer has this to say action. Will you please call this to about farmers and their organiza-

At the end of the line- the bad end. Thus, it is observed no place is available where farm ers can relax their stronghold of or ganization and remain safe.

"We go all the way now, or forever regret our lack of vigilance. Twelve dollar hogs can become three dollar hogs; seventy-five cent corn can slip to fifteen cents, etc. This everyone knows; this many have experienced. With more farm income from which to draw, now is the time to build an organization so strong and so well fortified that the interests of agriculture may never find it necessary to step from the level of progress and take backseat.

UDF Claims Much, Has Little in Wisconsin

A big heading the June 1st issue of United Dairy Farmer proclaims: "28,-000 in Wisconsin Enroll in Unior Ranks,"

The story goes on to claim that the UDF drive is spreading "like wildfire" through 13 states and "gained new impetus this week with the an nouncements that 28,000 dairy farm ers are enrolling in Wisconsin."

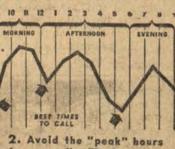

A careful reader who is acquainted with the background finds that the only claim the Union has on these 28.-000 farmers is that at one time they were members of the now defunct Wisconsin Co-operative Milk Pool and that a self-appointed re-organization committee composed of five members has passed a resolution "recommend ing" to erstwhile members and all other farmers in the state that they go over to Lewis.

Neither will we knowingly allow ourselves to dwindle to its level. As I see it, red blooded farmers never needed a strong state and national organization l

What's a musical comedy got to do with winning a war?

PLENTY! We're building an army of men-not machines. And men have minds. And minds need freshening *** change ..., relaxation.

So one of the biggest undertakings of the USO is its sponsoring of free entertainment, through the cooperation of the movie and theatrical industries, at army camps, naval bases—wherever the fighting men of the USA go to train or dig in.

USO Camp Shows, Inc. is actually the biggest single theatrical enterprise the world has ever seen. It books 264 shows for the boys every week, which play to an average nightly attendance of 50,000.

It contacts movie stars, theatrical headliners, big name bands and their leaders. It routes all these ... plans their itinerary ... arranges the most convenient times when soldiers and sailors can take time out to sit and be entertained. For it realizes that the one great advantage of the American fighting man is his ability to think for himself, to make the most of any situation, to fight as a liberty-loving individual.

And this is one of his great differences from our enemy.

To help carry on the all-important work of maintaining the morale of our fighting forces, the USO needs your help ... it needs your contribution.

Your dollar has many demands on it this year. Many of these demands must be met-others deserve to be met. And among these latter, the plea of the USO for whatever sum you can contribute merits your earnest consideration.

For we have a war to win, and the USO is directly concerned with the men who must-and will-win it.

Dig deep-for the men who are digging in!

Send your contribution to your local chairman or to USO, Empire State Building, New York City.

ALFALFA NEEDS POTASH AND PHOSPHORUS

FOUR

Tanua bloga a

Apply at Seeding Time and Every Two Years for Life of Stand

Alfalfa draws more heavily on the soil reserves of phosphorus and po tash than any other crop included in the usual Michigan crop rotation. It takes from the soil more phosphorus and three times as much potash as would be taken by corn on the same field. While alfalfa's great network of roots with their nodules is gathering air nitrogen free to make alfalfa the great protein feed, so popular with livestock men, those roots are sap ping the soil of phosphorus and po tash to such an extent that often this "soil builder" starves for lack of these two elements. For this reason, farmers are more and more adopting the practice of applying such fertilizer mixtures as 0-20-0 or 0-20-10 on heavy soils and 0-12-12 or 0-8-24 on sandy loam soils. And right now, after the first cutting is removed, is a good time for its application on established sods.

Over the State With the Junior Farm Bureau

Juniors Are Planning a \$10,000 War Bond

Will Ask Farmers for Bushel of Wheat to Purchase Bond to Establish Rural Leadership Training Fund

The Junior Farm Bureau has announced a proposal to raise \$10,000 for investment in a war bond as its second war time project.

July 17 it will close its first war project when it presents easier for some members to leave \$1,500 to the American Red Cross for the purchase of an ambulance. The Juniors raised that money by collecting and selling waste paper and junk, and through entertainment and other enterprises.

The proposal being submitted to the County Junior Farm Bureaus comes from a committee authorized by the state the Junior council of the Junior Farm Bureau. The state council will act Farm Bureaus upon it at its meeting July 17. Members of the committee are: Earl Seybert, chairman, Isabella county, Russell Johnson of Isabella county, and Alvin Johnson of Saginaw county.

It is proposed that the Junior Farm Bureau canvass farm- Bird who is being called into the ser ers in their locality for a bushel of wheat for the purpose of purchasing a war bond in the interest of a future educational program for rural young people through the Junior Farm Michigan Farm News be sent to each College Farm Crops Dep' Bureau.

Machinery will be set up whereby the wheat collected by the groups in each county will be assembled for marketing through farmers' elevators. In communities where wheat is not grown, an equivalent can be asked for in the form of apples, potatoes or other products which can be handled by the Junior Farm Bureau.

The campaign will have the immediate effect of enabling Juniors and the farmers co-operating to buy a \$10,000 war bond.

Later on, it is proposed that the bonds, in the hands of for the coming election of officers: trustees for the Junior Farm Bureau, will assist rural young people in college through scholarships. It will assist the Clark and Howard Kropf; second Junior Farm Bureau with educational enterprises.

FARM BUREAU **BACKS DAIRY ADVERTISING**

For Effort to Expand **Our Markets**

An open letter to Members of the Farm Bureau:

sociation of Michigan. Briefly the program is to increase the consumption of dairy products; to maintain present markets now and after the war and to create new mar kets for dairy products through a comprehensive merchandising and advertising program, Five million farmers in eleven states are now cooperating with the program. We are glad to report that the pro-

gram is progressing very nicely and No. Cedar Street, Lansing, Michigan that most of the major farm organiza tions in the state, either those who are processing milk and those who the desirability of farm life, etc., but are not, have likewise endorsed the these points must be associated with program.

We wish to point out that dairy products are being purchased and con-United States. Each of these units is a market for increasing the consumption of dairy products. The problem

of education in the value of dairy products as a food is not the problem of one group within a state or even one state alone, but it is the problem of all dairymen in all states co-operation ting together in an advertising and educational program

At present the production of mill has been materially increased, and no doubt, will be increased further The time may come when we will find ourselves confronted with a large production of milk but not sufficient markets to absorb the increase. Now we feel, is the time to do what we can to prepare ourselves for what may come in the future. The American Dairy Association

the national organization, is composed of farmers or representatives of farm ers' organizations. Likewise, th American Dairy Association of Mich igan is controlled by farmers. Nine

of the 16 man board are farmers. farmer signs the checks for the state organization. The cost of this program is small It is based on one cent per pound of butterfat produced and marketed dur butterfat produced and marketed dur-ing a 15 day period of the year. It is estimated that the average cost to the individual producer will be from 9 to 11 cents per cow per year. 9 to 11 cents per cow per year. A ten cow herd will cost approximately \$1.00 for a whole year's advertising. The advertising dollar of the indiidual would not make much of a show if distributed over all the markets of the United States. However, the picture changes when you get these advertising dollars working to-

fall farmers should be interested, and urged all Farm Bureau members to contact the first handlers of butterfat in their territory and urge their co-operation.

Makes Suggestions for Handling It Michigan farmers will cut for hay

and alfalfa-grass mixtures, the great est acreage of improved hay crops ever cut in the state. In addition there is to be an estimated 1,300,000 acres of clover-timothy mixed hays cut in 1942 for curing.

Hay is gaining new importance in war time. Feeding more of better quality home-grown roughages saves on grains and protein supplements which must be bought. Good hay is

Windrow curing is the best answer to labor-saving and quality, according to H. C. Rather, head of the Michigan State College farm crops department. The windrow system permits use of the fast-working side delivery rake Ford. The election was scheduled for hay loaders and sweep rakes or field balers.

Even better hay can be cured in hay ocks, but this process requires 24 hours longer to be safe for storage and also demands extra hand labor. Swath curing 24 hours or longer effects no saving in labor and makes only a slight shortening of the curing period. At the college it was found swath curing was but three hours

quicker than the windrow system. Too many farmers use the swath curing system. Tests show they lose A P 0 111 rom 15 to 30 per cent of the hay

compared to windrow curing. The

Some Trends That **Affect Farmers**

Background Material for Discussion in July By our 295 Community Farm Bureau Groups

By O. ULREY Department of Economics, Michigan State College

FOREWORD: "Without Vision the People Perish." The future trends in farming will depend much upon the vision, foresightedness and responsibility initiated by the farmers themselves.

"Things Just Don't Happen; People Make Them Happen!" is a challenge to all community minded persons. The manner in which things will happen to farming rests heavily upon the part you, as agricultural leaders, take in studying, analyzing and acting on the problems of agriculture,

ing the farm business and farm life. facing them. Training in the social sciences-in the sciences of human relationships-in group relations, techniques and action-training through out life-is necessary to enable the farmers to fulfill their mission as producers of food, fiber, and children, and as citizens of a modern, industrial, democratic society.

Price level-The rises and declines prevent inflation and the subsequent deflation - with unfavorable farm prices and income.

Urban business situation-Fluctuations in business activity have become more violent as society becomes more commercial-as a larger proportion of the people are in urban life. The income of the American farmer is becoming more dependent upon urban business conditions-as farmers produce more to sell and as farmers constitute a smaller proportion of the nation's population. The supply of urban purchasing power and its distribution among the people affect farm prices and income.

Since farm production changes slowly, changes in urban business condi- production costs? (2) Should there be tions are immediately reflected in a higher price for the use as food, farm prices and income. Farmers are and a lower price for industrial uses? (3) Who should own and obtain the

WHOOPIE!

There has been a tendency for a

larger proportion of the national in-

come to go to management, organized

labor, organized professional groups,

pseudo monopolies, and organized tax

groups-through legislation, monop-

oly, custom, agreements, contracts and

bargainings. Thus, a smaller percent

is left for the less well organized

About 46 percent of the people, or

45,000,000, received family income of

less than \$1,000 in 1939. Their con-

sumption of food averaged 5c a meal.

If the incomes of all of these families

had been up to \$1,200 a year, their

groups, as farmers.

SOME FUN !

NOW

Forces outside the farm have become increasingly important in affect-Training in farm production alone is not sufficient to enable farmers to cope with the multitude of problems

in the level of prices have been the most important factors causing variations in farm income during the past century. Prices have risen to high levels during the past four wars and have fallen afterwards, to the disadvantage of farmers. If prices rise materially above present levels (June 1942), there is danger of collapse later. Farmers are concerned with assisting their organizations and their congressmen to obtain legislation and to adopt national procedures which

Industrial uses of farm products-Expansion of industrial uses of agricultural raw materials has been a very slow process in the past-but expanding research may speed up the process. We have been depleting many of our exhaustible resources,

buting the milk in the cities.

Farmers are concerned with savings

and short-cuts in distribution-for ex-

FERTILIZER FOR ALFALFA

Alfalfa is a heavy feeder on phosphorous and potash. It responds profitably to fertilizer heavy in phosphorous and moderate in potash. Farm Bureau fertilizers use the highest grades of these two vitally needed plant foods for top yields of alfalfa. They are free running and drill perfectly. We advise drilling deeply into soil before or at time of seeding, or broadcast and work into soil. Remember, it's not more acres, but more per acre with Farm Bureau Fertilizers.

> LIGHT SOILS 250 to 300 pounds of 0-14-6 or 0-12-12 per acre.

HEAVY SOILS 150 to 200 pounds of 0-14-6 or 0-20-20 per acre.

AGR'L LIMESTONE Agricultural limestone sweetens the soil and increases the yield of alfalfa and other crops. Place your order with your Farm Bureau dealer NOW.

*** ALFALFA & BROME GRASS.

... You Can Sow Them This Summer !

Sow alfalfa and brome grass this summer. Sow 5 pounds of brome grass with half bushel of oats per acre together with usual seeding of Farm Bureau alfalfa for the most luxuriant and nutritious pasture or hay crop you have ever had. Long lived, too. Alfalfa and brome grass hay cures more quickly than alfalfa alone. More tonnage per acre. Careful buyers select Farm Bureau brand seeds in sealed bags because they have known records of performance. Insist upon Farm Bureau brand for best results.
