Governor Sigler Proclaims January Co-op Month

Michigan and the nation are looking for a way to stabilize their economy from the effects of this country's recent production and domestic service. Various co-operative ventures have been started to handle the problem. They are: the Farmers' Co-operative Federation, the National Farmers' Co-operative, and the Farm Bureau Federation. The goal is to destroy the enemy of the farmer's right to extend his farm business.

Michigan, as a leading producer of agricultural products, has been at the forefront of these co-operative ventures. The Farm Bureau Federation has set aside the month of January for the promotion of farmers' co-operative ventures. This promotion is in line with the national co-operative movement, which aims to destroy the enemy of the farmer's right to extend his farm business.

In Michigan, nearly 80 per cent of the farm families are participating in the co-operative movement. This high percentage is due to the support given by the Farm Bureau Federation, which has set aside the month of January for the promotion of farmers' co-operative ventures. The federation is working to destroy the enemy of the farmer's right to extend his farm business.

Farmers' co-operative ventures have been set up to handle many farm products, including grains, dairy products, and livestock. These ventures are organized to buy and sell farm products, and to handle farm inputs, such as fertilizer and seeds.

The purpose of the Farm Bureau Federation's promotion is to destroy the enemy of the farmer's right to extend his farm business. The federation is working to educate the farmers about the benefits of co-operative ventures, and to persuade them to participate in these ventures.

In conclusion, the Farm Bureau Federation's promotion of January Co-op Month is an important step towards destroying the enemy of the farmer's right to extend his farm business. The federation is working to educate the farmers about the benefits of co-operative ventures, and to persuade them to participate in these ventures. The promotion is designed to help the farmers stabilize their economy from the effects of this country's recent production and domestic service.
COMMUNITY FARM BUREAU ACTIVITIES

By Mrs. RALPH KARKER
Regional Director and Educator

In some reports of recent community meetings, it is shown that the major part of the group, the county, and the state Farm Bureau have been invited to join in the activities. A number of these meetings are being held in the state of Michigan.

While Valley, Atlas—Mrs. F. E. Trotter, President of the Calhoun County Farm Bureau, spoke on the financial needs of the county and the state Farm Bureau. It is hoped to raise at least $10,000 to cover the cost of these meetings.

N.E. Rozell, Ridente—A former member of the Calhoun County Farm Bureau, spoke on the importance of community meetings in the organization. He suggested that the meetings be held on a more regular basis.

Benton Township, Berrien—Mrs. S. N. Kihn, Director of the Michigan Women's Bureau, discussed the importance of women's participation in the organization. She emphasized the need for women to be involved in all aspects of the organization.

Resolutions

The resolution regarding potato distribution was approved by all the resolutions. In his opinion only union members of the potato distribution committee should be received by cooperatives.

HIGHLIGHTS OF JFB 30 DAY BUS TOUR TO FRISCO

J. E. Breckinridge of Michigan, took the group to Frisco, Colorado, on a tour of the city. The group visited the famous Stikor Hotel, and had a chance to see the beautiful mountain scenery.

The Junior Farm Bureau and the National Rural Youth Conference were both represented at the conference. The Junior Farm Bureau conducted a survey regarding the future of the organization, and the National Rural Youth Conference discussed the importance of community meetings in the organization.

With the Junior Farm Bureau, the group went to the city of Frisco, and visited the famous Stikor Hotel. The group then proceeded to the nearby mountains, and had a chance to see the beautiful mountain scenery.

AFB WOMEN ADOPT MICHIGAN RESOLUTION

At the Michigan Women's Bureau meeting, the group adopted a resolution regarding the importance of women's participation in the organization. The resolution emphasized the need for women to be involved in all aspects of the organization.

FARM BUREAU MEMBERS CAN USE THEIR HEADS AND PENCILS

When purchased feeds are high in protein it is a very human reaction to feed less. Why? Any farmer who has not paid attention to this problem is overlooking a big opportunity to make money by feeding less.

When the prices of feeds are high it is a good idea to feed less. Why? Any farmer who has not paid attention to this problem is overlooking a big opportunity to make money by feeding less.

POULTRY FEEDING

A hen outaks about 80 pounds of feed a year-half meat and half grain. If your (grain, which costs about $15-20 per 100 pounds) is worth $0.50 per pound, which is about $50 per 100 pounds, and you feed her $3.00 worth of feed a year, then you are losing $2.50 a year.

DAIRY FEEDING

A good cow eats about 1 ton of grain a year. A ton of grain at $2.00 per 100 pounds means $200.00 a year. By using 500 lbs. of grain at $2.00 per 100 pounds, you can feed her $100.00 worth of grain a year, which is about $100.00 worth of savings.

Using the Pencil...

If you have $100.00 worth of grain, and you want to feed the cow $50.00 worth of grain, you only need to feed the cow $50.00 worth of grain, and you can save $50.00 worth of grain.

Using the Head...

If you have $100.00 worth of grain, and you want to feed the cow $50.00 worth of grain, you only need to feed the cow $50.00 worth of grain, and you can save $50.00 worth of grain.

FARM BUREAU MAXIMA

You make improvements by spending more than you have. You cannot build a farm without spending more than you have. You cannot build a farm without spending more than you have.
Nat'l Legislation of Interest to Mich. Farmers

Background Material for Discussion This Month by Our Community Farm Bureau Discussion Groups

As Negroes and Canadians

The delegates to the American Farm Bureau Convention met December 8 and 9 in San Francisco, California, to shape the policies of a legislative program for the betterment of American agriculture. Every effort was made here to incorporate the combined thinking of the entire Farm Bureau membership into the legislature program for the coming year.

Recognition was given to the problem of surplus food in the world. The problem, it was pointed out, is not one which can be solved by our own efforts, but one which requires the cooperation of all countries. This problem is of the utmost importance, as it involves the world's food supply and the health and well-being of the people of the world. The delegates also recognized the need to address the issue of the need for food and nutrition for the world's population.

OBSERVATIONS OF NEW GOVERNOR AND THE LEGISLATURE

By STANLEY M. POWELL

Michigan's Chief Executive, Governor William E. Miller, is about to make his first appearance on the public stage of the state. He is expected to return to Michigan the community of legislators who, through the years, have made their mark in the world of politics. His appearance will no doubt be watched with great interest by those who follow the state's political affairs.

Michigan's governor is a man of many talents and has been involved in the political arena for many years. He has served as a state senator, a U.S. representative, and a state representative. He is a member of the Democratic Party and has been a vocal advocate for the rights of workers and farmers.

His appearance will be watched with great interest by those who follow the state's political affairs. He is expected to return to Michigan the community of legislators who, through the years, have made their mark in the world of politics. His appearance will no doubt be watched with great interest by those who follow the state's political affairs.

Fee and Load Costs Highest in History

There have been new developments in the field of life insurance. The premiums for life insurance policies have increased, and the cost of living has also increased. The result has been a rise in the cost of living, and a rise in the cost of insurance.

The rise in the cost of living has been attributed to a number of factors, including the rise in the cost of goods, the rise in the cost of services, and the rise in the cost of labor. The rise in the cost of services has been attributed to the rise in the cost of labor, which has been caused by the rise in the cost of goods.

The rise in the cost of goods has been attributed to the rise in the cost of labor, which has been caused by the rise in the cost of services. The rise in the cost of labor has been caused by the rise in the cost of goods, which has been caused by the rise in the cost of services.

This relationship has been described as a "vicious circle," in which the cost of goods, the cost of services, and the cost of labor all tend to rise together, and the cycle continues indefinitely.

The rise in the cost of goods, the cost of services, and the cost of labor has been attributed to a number of factors, including the rise in the cost of raw materials, the rise in the cost of energy, and the rise in the cost of transportation.

The rise in the cost of raw materials has been attributed to the rise in the cost of energy, which has been caused by the rise in the cost of transportation, which has been caused by the rise in the cost of goods.

The rise in the cost of energy has been attributed to the rise in the cost of transportation, which has been caused by the rise in the cost of goods, which has been caused by the rise in the cost of raw materials.

The rise in the cost of transportation has been attributed to the rise in the cost of goods, which has been caused by the rise in the cost of raw materials, which has been caused by the rise in the cost of energy.

The rise in the cost of goods, the cost of services, and the cost of labor has been attributed to a number of factors, including the rise in the cost of raw materials, the rise in the cost of energy, and the rise in the cost of transportation.

The rise in the cost of raw materials has been attributed to the rise in the cost of energy, which has been caused by the rise in the cost of transportation, which has been caused by the rise in the cost of goods.

The rise in the cost of energy has been attributed to the rise in the cost of transportation, which has been caused by the rise in the cost of goods, which has been caused by the rise in the cost of raw materials.

The rise in the cost of transportation has been attributed to the rise in the cost of goods, which has been caused by the rise in the cost of raw materials, which has been caused by the rise in the cost of energy.

This vicious circle is expected to continue indefinitely, and the costs of goods, services, and labor will continue to rise.
