REPORT OF BOARD OF DIRECTORS

TONIGHT'S MEETING: 

THURSDAY EVENING

11:00 a.m. Michigan Farm Bureau meeting at Fairchild Auditorium 

PRESIDENTIAL ADDRESS: F. C. HARRIS Michigan State College

THE DOUBLE TROUBLE AND HIS GARV

Speaker

Grape Growers and Wineries Agree in Part

In recommending a solution to the adverse price situation which faces Michigan grape growers, R. E. Bartlett of Pullman, president of the Michigan Grape Growers Association and the Michigan Farm Bureau, suggested in the hearing before the Senate committee that the Senate pass an amendment to the State Grape Control Act. Bartlett said Michigan grapes could be improved if state wineries were permitted to purchase grapes at prices similar to the prices paid by the out-of-state wineries. He said that the wineries would be willing to pay the state grape growers the local price for their grapes if they could sell their products in state.

The Michigan Grape Growers association has been working very closely with the Michigan Grape Growers Association and the Michigan Farm Bureau to develop a solution to the problem. In a recent statement, the Michigan Grape Growers association said that they are willing to support any legislation that will help alleviate the situation by selling their grapes at prices comparable to the prices paid by out-of-state wineries. They also said that they are willing to support any legislation that will help improve the quality of Michigan grapes.

CREDITS: Mrs. William Hool, Detroit, and Mrs. Alex Courts of Alpena county, chairman; Mrs. George Werner of Lansing, secretary.

THURSDAY NOVEMBER 14

8:00 a.m. Farm Bureau Leaders meeting at Fairchild Theatre. No admission charge.

PRESIDENTIAL ADDRESS: F. C. HARRIS Michigan State College

THE DOUBLE TROUBLE AND HIS GARV

Detroit, December 1: The Michigan Farm Bureau held its annual meeting yesterday at the State Fairgrounds. The meeting was attended by more than 1,000 members from all parts of the state. The program included a variety of topics, including crop conditions, farm safety, and agricultural legislation.

The highlight of the meeting was the presentation of the Farm Bureau's annual report, which outlined the organization's activities during the past year. The report included a review of the organization's accomplishments, including the successful passage of several key agricultural bills in the state legislature. The report also highlighted the Farm Bureau's efforts to improve farm safety, including the introduction of a new farm safety program.

The meeting concluded with a series of resolutions, which were adopted by the membership. The resolutions addressed a variety of topics, including farm legislation, agricultural research, and the need for better farm safety standards.

The Farm Bureau's annual meeting is a major event for Michigan farmers, providing an opportunity for them to come together and discuss the issues that are important to their communities. The meeting also serves as a platform for the Farm Bureau to present its programs and goals, and to listen to the concerns of its members.

The Farm Bureau is the largest organization of farmers in Michigan, representing more than 100,000 members. The organization is committed to protecting the rights and interests of farmers, and to ensuring that they have a voice in the legislative process. The Farm Bureau is a strong advocate for agricultural research, and works to ensure that farmers have access to the latest technologies and information.

The Farm Bureau's annual meeting is an important occasion for Michigan farmers, providing an opportunity for them to come together and discuss the issues that are important to their communities. The meeting also serves as a platform for the Farm Bureau to present its programs and goals, and to listen to the concerns of its members.
Farm Co-ops and the Experiment Stations

By GEORGE H. MCINTYRE

A Proponent of the American Farm Bureau Federation, who is President of the Agricultural Experiment Station System of the United States, addresses the Farm Bureau and MACF Annual Meeting in Washington, D.C., November 10, 1940.

But Farm Bureau Funds

Farm Bureau and MACF Aid in CO-OP Deal

Autumn Days

The nationwide effort on the part of the stability and security of American agriculture has been demonstrated by the cooperation of the Farm Bureau organizations in every state and by the contributions of the MACF. The group has been a cooperative effort to help the farmers through their organizations, and it has every reason to be proud of the results.

Yields

The yield of the nation's farms has been increased through the cooperation of the Farm Bureau organizations. The yield of wheat has been increased from 106 bushels per acre in 1930 to 140 bushels per acre in 1940, an increase of 34 bushels per acre. The yield of corn has been increased from 22 bushels per acre in 1930 to 30 bushels per acre in 1940, an increase of 8 bushels per acre.

Price

The price of wheat has increased from $1.00 per bushel in 1930 to $2.25 per bushel in 1940, an increase of $1.25 per bushel. The price of corn has increased from $0.25 per bushel in 1930 to $0.50 per bushel in 1940, an increase of $0.25 per bushel.

Cost

The cost of production has decreased from $1.50 per bushel in 1930 to $1.00 per bushel in 1940, a decrease of $0.50 per bushel.

Farmers

The farmers have benefited from the cooperation of the Farm Bureau organizations. They have been able to purchase more land at a lower price, and they have been able to produce more food at a lower cost.

System

The American Farm Bureau Federation has been a cooperative effort to help the farmers. It has been a cooperative effort to help the farmers through their organizations, and it has every reason to be proud of the results.

Service

The American Farm Bureau Federation has been a cooperative effort to help the farmers. It has been a cooperative effort to help the farmers through their organizations, and it has every reason to be proud of the results.

Conclusion

The American Farm Bureau Federation has been a cooperative effort to help the farmers. It has been a cooperative effort to help the farmers through their organizations, and it has every reason to be proud of the results.

Safe, clean, convenient, healthy, economical, automatic, dependable

**Hot Water Is Necessary!**

No matter who takes pride in the looks and appearance of your home and the comfort of your family, and how much they spend on heating your home, the one item that is necessary is a dependable hot water heater. Heating hot water is necessary, efficient modern homes and the many public institutions and commercial buildings, requiring hot water. In too many homes the hot water heater is an afterthought, too little energy is spent on this important appliance, and it is little cared for. The modern age has made the ability to heat your home for comfort, do your cooking, and do many other things, more important than ever before.

**How to Get All of These**

With a **Co-op Electric Water Heater**

Look at those features! Quality. Heavy-gauge, patented steel outer shell. Three such tanks are needed for each dwelling. For smaller homes, one is sufficient. Hot water heater is a large electric tank with inner top and bottom, and two thermostats which maintain the required temperature. The Co-op Electric Water Heater has three tanks, one for each of the temperatures you require, and they are all connected to the same water system. The efficiency of this unit is far greater than that of the old-fashioned water heater. In the old-fashioned water heater, you have to heat all of the water that you use, and it takes a long time to do it. With the Co-op Electric Water Heater, you only have to heat the water that you actually use, and it takes a much shorter time. The energy saved by this method is enormous. In addition, this unit is much more convenient to use, and it is much easier to maintain. The Co-op Electric Water Heater is the most efficient, most convenient, and most economical appliance that you can have in your home. It is the perfect appliance for the modern age.

**From the Editor’s Notebook**

Since the days of the Pilgrims, and even earlier, there has been a heart-warming day for Americans. It was the day that the first ship arrived in America. In those days, there was no such thing as an electric water heater. But now, with the advent of this new technology, we can have that day again. We can have a day when we can hear the sound of the water running down the drain, and we can feel the warmth of the water as it flows into our homes. It is a day of great joy and happiness. It is a day of which we can be proud.

**Observations on the Coming Generation**

The British are not only more efficient in their approach to the problem of the potato, but also more enterprising. They are constantly searching for new ways to increase potato production and to make better use of their land. The British potato industry has undergone a series of reforms in recent years, and new methods of cultivation and storage have been introduced. The British government has also provided financial incentives to encourage farmers to grow more potatoes. The result has been a significant increase in potato production, which has helped to meet the growing demand for this nutritious vegetable.
Expanded Farm Bureau Program

Background Material for Discussion in November by Community Farm Bureau Groups

Following the First World War farmers in Michigan, as well as in other states, recognized there were at least three things which they should be doing for the betterment of themselves, their farms and their communities. These were things which they could do together, but which they could not do alone. As these things are just as they are now, many decisions were made to be carried out in legislative ways which would be far-reaching and have long-lasting effects upon agriculture.

Farmers recognized first that unless they were sufficiently well organized their wishes would not necessarily be included in such legislatively made. They recognized that they could not depend on other organized groups to represent the farmers' wishes. A second point which farmers a generation ago recognized as important and which they themselves could do something about was the matter of public opinion. After World War One, just as true now, people everywhere were experiencing high cost of living and it became necessary for somebody to tell the farmer's story. The question in every farmer's mind was, "Who is going to do it?" "Will organized labor do it for me?" "Can I do it alone?" The answer to all of these was no. No organization do it. "How large an organization do we have now?" "Will organized business do it for me?" "Will or­ganized business working for your best interests.

In 1945 the dairy industry in the West was confronted with a proved product, from dairies which belong to the member­organizations in the dairy industry. This product was the All-Wheat Flour.
