**GOOD REASONS FOR REINSTATING G. INSURANCE**

Many farmers who have discontinued their insurance have reconsidered and been allowed to take it up again. The National Life Insurance Company, of which State Farm Car has been a part, has a variety of policies that fit the needs of any farmer. The company recently published a booklet entitled "Good Reasons for Reinstating G. Insurance." It can be had free of charge to those who request it. 

**NORTHERN COUNTIES SEEK REGIONAL FARM OFFICE**

The office of the State Farm Bureau is to be set up in 12 midwestern states, including Michigan, to give better service to farmers. The additional offices will provide more timely and better service to farmers. The offices will be set up in the main cities of the states. 

**WILFRED SHAW SECY AFCE**

Wilfred Shaw of Illinois has been named as the new national Farm Bureau Secretary. He was chosen by the board of directors of the Illinois Farm Bureau. He has been associated with the Farm Bureau for many years. 

**NO SCARCITY OF ADAPTED ALFALFA**

A great many farmers have planted alfalfa this year and are glad that they did. The alfalfa is ready for harvest and is being harvested in many parts of the state. 

**Building Costs Urge Check of Insurance**

In some cases, the cost of building insurance is so high that it is not advisable to build. In other cases, the cost of insurance is so low that it is better to build. The best plan is to have the building insurance checked by an insurance agent. 

**Organizing Two More County Farm Bureau**

Two more county Farm Bureau have been organized in Michigan. They are located in the counties of Hillsdale and Washtenaw. 

**285 ATTEND MASON COUNTY FARM & CITY WOMEN'S MEET**

Many Mason County Farm Bureau women attended a meeting in the city of Mason. The meeting was held in the Mason City Hall. The talks were on various topics of interest to women. 

**MALER INDUSTRY**

Many farmers have been interested in the maler industry and have asked questions about it. The maler industry is a good way to make money and is a good use of time.

**FIRST DAYS FOR BABY CHICKS**

The chicks should have water or milk as soon as possible. The chicks will grow faster if they have water or milk. 

**STATE FARM CO. HAS 98,024 AUTO POLICIES IN FORCE**

The Michigan Farm Bureau state level, the Farm Bureau Home Office, has $50,000,000 in force. The company has $50,000,000 in force. The company has $50,000,000 in force. The company has $50,000,000 in force. 

**5,000 FB Families in Group Hospital Service**

The Farm Bureau has 5,000 families enrolled in the group hospital service. This is a good way to help pay for medical expenses. 

**First Report from County Farm Bureau Organizations**

An analysis of the reports from the county Farm Bureau organizations in Michigan is presented. The reports show that the Farm Bureau is doing a good job of helping farmers.
Community Farm Bureau Activities

At its summary reports of community Farm Bureau meetings, the records of the county treasurer were summarily reported today as follows:

Northeast, Hillsdale—Mr. E. W. Washburn, treasurer, removed a great many names to his list of members for purposes of action. A further meeting was held in which it was decided to discuss the matter of membership, with a view to increasing it.

Carlyle, Lenawee—Mr. J. W. Hendricks, treasurer, reported a large increase in membership, with a view to increasing it.

St. Johns, Ingham—Mr. J. W. Lewis, treasurer, reported a large increase in membership, with a view to increasing it.

Hillsdale—Mr. W. E. Clark, treasurer, reported a large increase in membership, with a view to increasing it.

In an effort to increase the efficiency of the organization, the following suggestions were made:

1. A study of the organization's records should be made, with a view to increasing the number of members.
2. A study of the organization's records should be made, with a view to increasing the number of members.
3. A study of the organization's records should be made, with a view to increasing the number of members.

In conclusion, the treasurer made the following recommendations:

1. A study of the organization's records should be made, with a view to increasing the number of members.
2. A study of the organization's records should be made, with a view to increasing the number of members.
3. A study of the organization's records should be made, with a view to increasing the number of members.
TIPS to Our Bosses on POULTRY

1 Baby chick season is close up. Don't forget to start your egg production today to ensure a smooth transition to winter feeding. The fewer chicks raised, the higher the potential for additional feed production.

2 In brooding chicks, as a connection of our past self, watch the GCcR of brooding: "GG" is for good chicks, "W" is for weak chicks. When you have done this—

COUNTIES & STATE DISCUSS $10 DUES DIVISION & PLANS

At the 1947 annual meeting of the Michigan PTA in Grand Rapids, the counties expressed a desire to increase their dues. This was to be increased to $10 for the coming year, with part of the fees to be retained by the county program.

We cannot expect a governor or a director of the state office to be concerned with the small unit.

We must drop the notion that there are no needs in the county program alone. Committee is considering a new statement of need which will be presented to the board of directors for adoption.

Wadsworth Farm and City Women Meet

Women of the Wadsworth County Farm Bureau held a meeting of the extension department for women to discuss the current programs of the county.

Remember: MERMASHES (made with Farm Bureau M.V.P. Concrete) carry 4 pounds of feed and 4,000 pounds of alfalfa seed each year, preventing pasting. After the third day a teaspoonful of chick feed should be fed to the birds. The chicks must have heat this hour, and must be layered in more than one place. The chick feed should be kept at from 40 to 60 degrees, if "W" is for a duller color.

When You Have Done This—

REMEMBER MEMBERSHIPS (made with Farm Bureau M.V.P. Concrete) carry 4 pounds of feed and 4,000 pounds of alfalfa seed each year, preventing pasting. After the third day a teaspoonful of chick feed should be fed to the birds. The chicks must have heat this hour, and must be layered in more than one place. The chick feed should be kept at from 40 to 60 degrees, if "W" is for a duller color.

FEED a little chick feed with mash (1 of the crowns over litter for a few days and then one cup of mash per day.) A little chick grain is the first food to prevent pasting. After the third day a teaspoonful of chick feed per day on top of mash during the first week.

When You Have Done This—

Making the Most of My Membership

Background Material for Discussion this month by Our Community Farm Bureau Discussion Groups

By ROBERT K. NEMETH, Research and Education

Ever since 1776 American farmers have been striving to preserve their liberty and to improve their economic security. The dawn of Independence was written by Thomas Jefferson, a leader among farmers. The Revolutionary War, a war to make men free, was largely carried by farmers. The fight for a free nation was waged by those who wanted to farm. Those who fought for a national governmen...
