Clean Property Seldom Burns

April 4 to 10 has been designated as Spring Clean-Up Week in Michigan. The purpose of the week is to encourage people to get rid of rubbish and so prevent fires.

Defective chimney dampers account for almost one-third of all farm fires. A sooty, partly clogged chimney will shoot out sparks. The heating plant was the cause of one-third of all farm fires. A sooty, partly clogged chimney will shoot out sparks.

The Michigan Farm Bureau for more than a year has urged an increase in gasoline tax for the purpose of paying for the maintenance of local roads.

The Michigan Farm Bureau for more than a year has urged an increase in gasoline tax for the purpose of paying for the maintenance of local roads.

To do that half the membership of the Farm Bureau would have to stand behind the local roads. That was the signal for golf players and others at the Golf Curling Classic at the Golf Club of Michigan. The directors represent the Michigan Farm Bureau and the county Farm Bureau representatives.

The potato was brought to England in the eleventh century. Whether or not a constitutional amendment to the state constitution would be needed for such a tax raise is a hotly debated issue. The proposal was opposed vigorously by Governor Sigler.

Some constitutional amendments March 25, 1947 to the Michigan Farm Bureau in Grand Rapids.

The proposal was opposed vigorously by Governor Sigler. He had urged the proceeds of one mill of the present general education tax for state purposes. He said that it is expected that there will be a total revenue of over $2,500,000, or about $16 per farm. Records show that the cost of maintaining local roads.

The committee or the Michigan Farm Bureau for more than a year has urged an increase in gasoline tax for the purpose of paying for the maintenance of local roads. The Michigan Farm Bureau is on record as opposing any property tax for state purposes.

Provision in the state constitution of Michigan farmers as protection from taxes they shouldn't pay. An interesting feature of the deal was the establishment of the Michigan Farm Bureau, which has grown to become the largest organization in the state representing farmers, nurserymen, and those engaged in production for sale of crops, live stock, poultry, and their products by persons regularly engaged in business as farmers or nurserymen. The organization has grown from a small group of farmers in Detroit to a statewide organization with thousands of members. Today, the Michigan Farm Bureau is a strong advocate for the needs of farmers and has played a significant role in shaping agricultural policy in Michigan.

**Community Farm Bureau Activities**

Community Farm Bureau activities are organized to meet the needs of farmers and their families. The organization has a wide range of programs and services that benefit farmers and their communities. These programs include education, advocacy, and support for farmers. The Community Farm Bureau also provides services to help farmers with their businesses, including marketing, financial assistance, and legal support. The organization is committed to promoting the well-being of farmers and their families, and to ensuring that they have access to the resources they need to succeed.

**Change in Farm Sales Tax Exemption**

Governor Sigler has asked the special session of the legislature to consider increasing the sales tax exemption for agricultural products. This is to be determined by the legislature, and it is expected that the increase will be granted. Today agricultural production means the commercial production for sale of crops, live stock, poultry, and their products by persons regularly engaged in business as farmers or nurserymen. Purchases by such people of foods, seeds, fertilizers, spray materials, and other items are exempt from the sales tax when used for agricultural production of crops, live stock, poultry and their products. The State Dept. of Revenue and many dealers in farm supplies would like to make some changes in the definition of agricultural production. Several bills have been presented to other legislatures, but these have been rejected. Perhaps there will be one at this session that farmers can accept.

In any event, the Michigan Farm Bureau will be here to see that their experience, and the court decisions that have been built up the past 13 years with regard to exemption of farm supplies are too valuable to consider lightly. If we didn't have any of them, farmers would be paying a great deal more in money in sales taxes than they shouldn't pay.

**Arms Control**

President Truman's proposal for an arms control agreement is one of the most significant issues facing the world today. The United States and the Soviet Union are the two superpowers, and their actions in the arms race have a direct impact on the global balance of power. The proposal for an arms control agreement is aimed at reducing the risk of nuclear war and increasing the prospects for peace. The United States and the Soviet Union have both expressed their support for the proposal, and a number of other countries have also offered their support. However, there are many challenges to the implementation of the proposal, including the need for verification mechanisms and the willingness of both countries to abide by the terms of the agreement. The future of the world will depend on the outcome of this critical issue.
Less Than One in Five Lives on the Farm

By EDITH W. WAGGONER

When we reason that a 1948 census reveals that only one in five Americans live on a farm, it is a reasonable inference that the majority of us are urban dwellers. However, the number of people living on a farm is declining, while the number of people living in the city is rising.

New methods of living can be credited with this decrease. There are more urbanites, and this is a fact. The city and its suburbs are growing, while the farm population is decreasing.

There are cities and suburbs. The city is the place where people work, and the suburbs are places where people live. The city is a place for industry, while the suburbs are places for housing.

In the city and its suburbs, there are more people, and there are more jobs. In the city and its suburbs, there are more industries, and more businesses. In the city and its suburbs, there are more schools, and more hospitals.

There are more people in the city and its suburbs, and there are more jobs. There are more industries, and more businesses. There are more schools, and more hospitals.

SPRING CLEAN-UP PROTECTIONS AGAINST FIRE

The Michigan Farm Bureau Safety Council has announced that April is the time for the Spring Clean-Up of Flammable Material from around homes and buildings. Make April the time to study, plan, and do things about conditions in Michigan that cause trouble to you and your neighbors. Take some time to protect yourself and others from fire hazards. It can be done. It is easy. It saves lives and property. It's the law.

NATION NEEDS LONG TERM FARM PROGRAM

A long term farm program is essential to good management of our nation's resources. Several organizations, including the National FFA, the American Farm Bureau Federation, and the Michigan Farm Bureau, have been working together to develop a program that will benefit farmers and the nation as a whole. The program includes measures to improve crop yields, increase livestock production, and promote conservation practices.

GROUPS MAKE LANDING TOUR

A number of groups are making landing tours to promote the interests of the Michigan Farm Bureau. These groups include the National FFA, the American Farm Bureau Federation, and the Michigan Farm Bureau. They are visiting schools, colleges, and other organizations to discuss the importance of agriculture and the need for farm programs.

FARMERS MUST ORGANIZE TO BE HEARD

In completing the necessity for the organization of the Farm Bureau, Mr. Powell, legislative representative, explained that the farmers of Michigan are not organized. He said that there is a need for farm organizations to represent the rights of farmers in the legislature. The farmers must organize to have a voice in their own affairs.

Veterans Day anniversary activities

The week of March 22 twenty years ago was dedicated to the memory of the veterans who served in World War I. The week was observed by the national organizations of veterans, including the American Legion and the Veterans of Foreign Wars. The week included ceremonies, parades, and speeches to honor the veterans.

1 Animal Protein

Do you believe that animal protein with its quality amino acids (the vitamins and minerals, its animal protein factor), is what you want? Well, your Michigan meat from MVP will carry animal liver meal, fish meal, meat scraps, fish liver meal, dried whey and whey products. We believe that no other chick starter can carry as much of the essentials found in animal protein.

2 Vitamins

You also need vitamins A, D, and K (preliminary) in abundance. Your MERMASH will carry 5000 U.S.P. units of vitamin A, 50 U.P. units of vitamin D, and 50 U.P. units of vitamin K. Check wherever you buy as much elsewhere before you spend your money.

3 Minerals

You need the necessary minerals in proper amounts. Your MERMASH will carry calcium and phosphorus in the perfect balance. It will contain the iodine, manganese, iron, copper and zinc that are necessary for health and growth.

BUY THE BEST—ASK FOR MERMASH

Farm Bureau MERMASH is as fine a chick starter as you can buy anywhere—and at no extra cost. Ask for MERMASH, along with Milkman and Porkman, are made for farmers by their own farm co-operative organizations.

MICHIGAN FARM NEWS

SATURDAY, APRIL 1, 1948

Local Farm Bureau was undah an exchange agreement to build a new headquarters building. Follow insurance companies and learn more about the many phases of French life. The group began the study with a visit to the city park, then visited the shops and homes of the local people. They were impressed by the hospitality and friendliness of the French people.

Shall Foreign Credit Be Extended?

Background Material for Discussion This Month by Our Community Farm Bureau Discussion Groups

The foreign debt is a serious problem. It is estimated that the United States owes foreign countries about $18 billion, or about $10 billion more than the United States had in 1933. This foreign debt is a burden on the United States, and it is necessary to extend foreign credit to help the United States.

The foreign debt is a serious problem. It is estimated that the United States owes foreign countries about $18 billion, or about $10 billion more than the United States had in 1933. This foreign debt is a burden on the United States, and it is necessary to extend foreign credit to help the United States.

Dairymen Ask Farm to Farm Vaccination

In an effort to study a new system of vaccination for dairy cattle, special attention is being given to the use of a new experimental vaccine. This vaccine is known as the "Bovine Croup Vaccine." The vaccine is administered by injection and is said to be effective in preventing the disease known as bovine croup.

Community Farm Bureaus Are Most Important

1. Michigan 800 Community Farm Bureaus may be able to help our national agricultural organization in the future through a regular working relationship between the bureau and the state community farm bureaus.

2. Farm Bureau leadership is developed in the Michigan Community Farm Bureau organization.

3. Community farm bureaus are groups of persons who meet to discuss and act on local, state, and national farm affairs and other matters through the Michigan Community Farm Bureau as a group or individually as representatives of the Michigan Community Farm Bureau. The group requested that an individual be selected to act on matters of state and local farm affairs.

4. Every member participation in Farm Bureau program is promoted by the community organization.

Van Buren Asparagus, in the News

Van Buren county is developing its asparagus industry. The asparagus industry is growing in the United States, and it is estimated that the United States now produces about 500,000,000 bushels of asparagus each year.

Meat Production 64 Million Pounds Daily

The year 1938 was one of great prosperity in the poultry industry. The poultry industry produces about 64 million pounds of meat daily, which is about 10% of the total meat produced in the United States.

Buskirk and Ward to Visit Rural Europe

Curt R. Buskirk and Ward Ward will be visiting rural Europe. They are going to visit the countries of England, France, and Belgium, and they plan to visit the rural areas of these countries.

Poultry People Must Improve Selling Methods

Michigan poultrymen are being urged to improve their selling methods. They are being urged to improve their selling methods because the poultry industry is facing a number of problems, such as the abundance of poultry, the high cost of poultry, and the abundance of by-products.

Gaze Rate of Planting Corn

In an effort to study the growth rate of corn, special attention is being given to the use of a new experimental corn variety. This variety is known as the "Green Mountain Corn.

Special Session Results in Doubt

In spite of the fact that there was a very large turnout for the special session, it is not clear whether the special session will result in any changes. It is believed that the special session was held for the purpose of gathering information.

MSC Foreign Student Farm Co-ops

Several foreign students at Michigan State College have formed a co-op to care for their foreign students. The co-op is known as the "Michigan Association of Foreign Students.

The students, most of whom are studying agricultural economics, are housed in a small house in the center of campus. The co-op has been made possible by the generosity of a local farmer who has donated a small house to the co-op.

If you are interested in meeting the members of the co-op, you are invited to call at the house on Friday evenings.
