Hiram on Mechanized Farming

This is the third week of the meal, we are told. When spring came, we saw the first of the winter's needs and the farm was in fine repair. When we had two months we read the new, and work and machine poured into the farm. Work and machine cannot be said, because our farm is a machine. And work and machine don't work, they work. And work and machine don't work, they work.

With both time and labor and resources in need of improvement, we are on the threshold of an era. We are on the threshold of a new era. We are on the threshold of our future. And work and machine don't work, they work.

The years were strange days. "Strange days were really strange days."

Carl E. Buskirk, president of the Michigan State Grange, under the Act of the people as outlined in the preamble. The years passed, and my wife and I look back on those years. "Strange days were really strange days." And work and machine don't work, they work.

I replied, "I once lived in a place where we had no tax to pay."

The years passed, and my wife and I look back on those years. "Strange days were really strange days." And work and machine don't work, they work.

Farmers Invest $207,000 in F.B. Programs Service

To Provide Buildings and Equipment

Farm bureau members and others have invested $207,000 in F.B. services during the past two months.

The service board of directors last month reported the receipt August 21 from Ben Patterson, director of the Farm Credit Administration, of the release of $105,000 in funds which is to be used to build warehouse space, and to provide additional facilities and equipment for the Farm Bureau Service and rental facilities for a fourth of F.B. elevation and warehouse space.

In addition, reports indicate that a total of $102,000 was invested in the purchase of equipment for the Farm Bureau Service during the past two months.

FARMING—Being the supplementary space, this space is under way, completed, and to be used for storage of equipment.

EIOG—Building new elevator will have an area to be used as a warehouse.

LAVING—Farm Bureau elevator will have an area; much of the capital is for a new F.B. branch elevator which will be installed.

MICHIGAN—Farm Bureau elevator has taken title to an additional space which is to be used as a warehouse.

WOODLAND—The branch elevator has installed a chemicooler for its use and convenience.

Raise Buffalo

Modern "Barnes" Stock are finding they can't keep up the supply of Know how to ripen the demand. Farmer's Caper, reporting on Buffalo herds in the middle, says that while buffalo might bring a stiff price, American know prices have been lower for a few years. The best buffalo heads bring $40 for mounting. Heads are run through barns, blazes for brand, stacks.

EADN BUTTERS of Coldwater, R. J. Michigan, a member of Branch County Farm Bureau, marked furball in buffalo herds. He says that buffalo are in demand now than ever and a few young bulls. While Buffalo were bred for prize or for fur, there is no hard limit on this. In the central states, the buffalo is probably the most expensive and considered as an overfed food. The butter is an expensive type of insurance to the employer and can be held liable for the amount of security in the form of "compensation."

The Buffalo hunting is another method of compensation. The Buffalo hunting is another method of compensation. The Buffalo hunting is another method of compensation.

No insurance at all. The employer is not responsible for injury to employees own insurance. The employer is not responsible for injury to employees own insurance. The employer is not responsible for injury to employees own insurance.

Injuries to farmers workers are sometimes the result of the use of the farm equipment. Injuries to farmers workers are sometimes the result of the use of the farm equipment. Aids Members if They Need Hospital Care

Nearly 26,000 families in the Michigan Farm Bureau, and 90,000 persons in those families, have in the last few months become eligible to receive hospital care in a hospital. This is a service made available through the Blue Cross Plan. 

Mr. Pino, the county Farm Bureau service to members in 1951 were added to the Blue Cross service.

The following outlines the benefits of the Blue Cross Plan:

- Hospital benefits of $200,000 for each family member.
- Medical benefits of $20,000 for each family member.
- Surgical benefits of $20,000 for each family member.

Mr. Pino credits the work of Aids Members and their Committees, the county and regional Farm Bureau president's work and the community work of the Blue Cross Plan.

Those attending from Michigan Farm Bureau at Lansing, Kieflinga R-2.

Nearly 300 dairy animals were presented to the Farm Bureau staff today, said Mr. Pino, 937 of the 1080 Farm Bureau members in Michigan Farm Bureau.

For rates, dividend payments, and our growth.

RATES. Farm Bureau members are able to buy through their Company the best automobile insurance available. The rates are substantially lower than rates of most companies. We have not found it necessary to increase rates.

DIVIDENDS. Our Company is 2½ years old and it has paid $14,000 in dividends to policyholders.

The Company's excellent experience indicates the possibility of further dividends from earnings.

GROWTH. In 2½ years our Company has grown from 3,600 to 25,000 automobile and 2,600 farm liability policies. Assets have increased from $340,000 to $1,200,000.

Performance, Policies & Principles...

These three factors connected with feeds, and feed companies, are the sign points that should lead you to your most profitable sources of foods for poultry, cattle or hogs.

Most commercial feeds are good. Prices do not tell the story. You may pay $20.00 per ton more for one feed and get no better return—or you may pay $5.00 per ton less and get a better return. Performance tells a story you should listen to.

You Can't Beat Farm Bureau Quality FEED

Farm Bureau Members - Hulker Masa - Fairbanks & Company - they are as good for feeds as modern nutrition can make. Our College research men tell us that "Results" make for profitable source of feeds for poultry, cattle or hogs. 

Performance tells a story you should listen to.

Let's Build Our Own Better!

Your Farm Bureau feeds can do more for good farmers than feed companies. They are made for farmers, not by farmers. Your Farm Bureau Member, use Farm Bureau feed, you will get good results as you should. Your feed is a product that is owned and controlled by your organization and managed by your employees.

Should Migratory Workers Have a Health Examination

Community Farm Bureau Discussion Topic for Sept.

Background Material for Program this Month by Our Community Farm Bureau Discussion Groups

DONALD D. KINSEY

The Michigan State Senate passed a bill which will enable the farmer to be a member of the National Labor Relations Board. The bill, if signed by the governor, will become law in the spring of next year. The bill will provide for the establishment of a state labor relations board. The bill will also provide for the establishment of a state labor relations board. The bill will also provide for the establishment of a state labor relations board.

The General Problem. Michigan farming is in a state of crisis. The labor shortage is one of the main problems facing the farmer today. The labor shortage is one of the main problems facing the farmer today. The labor shortage is one of the main problems facing the farmer today. The labor shortage is one of the main problems facing the farmer today. The labor shortage is one of the main problems facing the farmer today. The labor shortage is one of the main problems facing the farmer today.

Much of the labor shortage is due to the migrant labor. The migrant labor is a problem that has been facing the farmer for many years. The migrant labor is a problem that has been facing the farmer for many years. The migrant labor is a problem that has been facing the farmer for many years. The migrant labor is a problem that has been facing the farmer for many years. The migrant labor is a problem that has been facing the farmer for many years. The migrant labor is a problem that has been facing the farmer for many years.

These sick people are in contact with the residents of a neighborhood into which they move. They may be handling fruit that goes to market. Their children may be attending local schools. In all cases they are in close contact with health standards and sanitation lacking. Tuberculosis and venereal diseases are prominent among the ailments.

The Community Farm Bureau is working on this problem. They are working to improve the health standards of migrant labor camps. They are working to improve the health standards of migrant labor camps. They are working to improve the health standards of migrant labor camps. They are working to improve the health standards of migrant labor camps. They are working to improve the health standards of migrant labor camps. They are working to improve the health standards of migrant labor camps.

What to do? Their labor is needed, but their diseases are contagious and dangerous.

Some of our farm people have asked that legislation be passed requiring a health examination and certification before允许 a "migratory worker in agriculture" to remain in Michigan for more than 60 days. In 1960, there were 28 million people in the United States who were in this category. They are a very important group of workers and are needed by farmers. They are a very important group of workers and are needed by farmers. They are a very important group of workers and are needed by farmers. They are a very important group of workers and are needed by farmers. They are a very important group of workers and are needed by farmers.

Here’s a Profit-Making Combination...

Co-op E-3 Tractor, Corn Picker & Wagon

They’ll Husk For Profits Faster and Cleaner at Lower Cost!

Here is Power Plus Co-op E-4 Tractor

Smooth, sure power for combines, forage harvesters, corn pickers or any other heavy job. The Co-op E-4. 3.4 HP tractor is a mighty machine engineered to give you more efficient, more profitable farming.

It’s a real performer and at a price that American farming has been waiting for. Models for every need: 6-cylinder, valve-in-head or gas engines; standard types with or without adjustable front axle; row crop types with single or dual wheel units. Entirely new self-selecting type gear type transmission—steer-like control of six forward speeds, two reverse.

Independent live power take-off and efficient hydraulic lift system available as accessories. Makes it a point to see the New Co-op E-4—135 inches on an 82"-inch wheel-base—and all tractor.

Keeping Roll” with a

CO-OP BLACK HAWK FARM WAGON

Get Better ROOT BEDS

Co-op Black Hawk Disc Harrow

Your Get Better ROOT BEDS

Co-op Black Hawk Disc Harrow

Gives Thorough, Fast, Clean Work

In the bottom two-thirds of the Michigan Farm Bureau, your tractor will be in the hands of the members of the community who care about the farm economy and the farm economy. Their work is important in the life of the community, and it is important in the life of the nation.

Here is the Co-op E-3 Tractor

Get More From Your Tractor

You get extra bushels of corn from your fields with a Co-op Black Hawk 1-row Corn Picker. Its precision-maximized extra long snapping and husking rolls provide fast, clean profitable corn picking.

The longer snapping rolls snap the ears without breaking stalks or causing plug- ues. It eliminates loss of corn by shelling. The Co-op also salvages more of your own corn, thereby giving you maximum corn- crop profits. It adjusts on the axle for any height of corn. Balanced for easy attachment to tractors.

Best of all it’s the lowest priced picker on the market. It will hold its sales to open up your corn fields to prepare for this year’s harvest. Ask for a demonstration today and you’ll be convinced that the Co-op is tops in the field.

Notice to Community Discussion Leaders

If you are a Community Farm Bureau discussion leader and have not been receiving discussion material it is because your name is not on the mailing list. Each month each member of the community will receive a copy of conference material. If you wish to receive the material, please send 1) your name and address. 2) two nickels, ten, or mail order post stamps.

We hope they will find it helpful. If you are not receiving material, please send 1) your name and address. 2) two nickels, ten, or mail order post stamps.

For example

Extended Coverage: Besides fire insurers, every policy protects you against smoke, explosion, aircraft and vehicle damage. Extended coverage may be obtained by paying the broad coverage in every Farm Mutual policy.
