Congress May Get Construction of Sen. Estes said some construction is certain some $75 million to $200 million could be written off as the value to the elephant of the Great Lakes-St. Lawrence River Seaway.

That's why it hasn't been done. Michigan is not a strong proponent. Out-wills Illinois and the Chicago metropolitan area haven't been able to agree on a reapportionment since 1901.

A sincere effort is being made by out-state legislators to find an acceptable compromise, and to effect some needed reforms through Senate Joint Resolution 4. Sen. Estes would amend the Constitution.

SJR-A would freeze the House strictly on the basis of population. It would retain the moiety clause, which gives a Representative to a county out of proportion with its population. It would provide for reapportionment of Representatives from Wayne from 27 to 38.

SJR-A would effect a reform by requiring that Senate and House Representatives in the Detroit area be elected by districts instead of at large.

Senate Joint Resolution A is the only reapportionment proposal that endeavors to provide a balanced representation in both houses of the legislature. It has been passed by the Senate by the required two-thirds majority, but may not be able to pass the House this year. The reapportionment issue on reapportioning both houses strictly according to population.

The CIO and A. L. of L. are reported to be readying petitions to amend the Constitution in such a way as to compel reapportionment of both houses on a strictly district basis.

For 30 years the Farm Bureau has held that Senate districts should represent area and interests and that each Cincinnati should represent area and interests and that each district of the state organization.

The membership report for the 30th annual meeting at Hotel Statler, February 2, 1952. At the time, the bureau had $364 million, said Mr. Dondero, would be spread over six years at less than $75 million a year. Electric power sales and ship tons would increase from $34 million to $45 million.

Michigan Voters' Calendar for 1952

Prepared by S. JOSEPH WINDA, Assistant Treasurer of Political Science at Central Michigan College.

The Constitution and law of the state put a heavy burden on Michigan voters. There are many different elections and the local ones come at various times, depending on the type of community and its governmental organization.

Voters are often uncertain as to the nature and importance of the scheduled elections and, partly for this reason, less than 10 per cent of the qualified voter cast ballots in many Michigan primary and local elections. An effort to clarify and explain present voting obligations, the following calendar has been prepared.

**CITY AND VILLAGE ELECTIONS**

Dec. 12. First day for filing nomination petitions for candidates in cities holding general election.

Feb. 16. Petitions must be filed by 4 p.m. Petitioners must sign from city and county clerks. Petitioners must sign a satisfactory number of qualified voters equal to 15 per cent of the number of voters cast in the last general election for the city and the county to which they are attached.

Mar. 1, 1952. (20 days before registration in the city)

Register at the office of the city or village clerk, any voter who is 18 years of age, or above, and who has lived in the city for a period of at least 30 days during the last 90 days of the registration period, as shown by registration in the county or residence in the last 90 days of registration in the city. The registration will be valid for the next two elections unless the registrant fails to vote in either election.

This procedure does not hold if the city or village has by laws or ordinances declared a primary election in the city or village. In such case, the above mentioned registration may be held.

**COUNTY PRIMARY ELECTIONS**

Apr. 17. To nominate party candidates for fills all offices in the county, except for the office of county clerk, county treasurer, and county auditor, on the non-partisan ballot. All candidates are nominated by making out the prescribed printed form obtainable Feb. 9 (30 days before village election). Petitions for candidates for the office of county clerk, treasurer, and auditor are in the county clerk's office. Petitioners must sign a satisfactory number of qualified voters equal to 15 per cent of the number of voters cast in the last general election in the county.

May 8. Petitions must be filed by 4 p.m. Petitioners must sign from county and city clerks. Petitioners must sign a satisfactory number of qualified voters equal to 15 per cent of the number of votes cast in the last general election for the county and the city to which they are attached.

May 13. (20 days before registration in the county)

Register at the office of the county clerk, any voter who is 18 years of age, or above, and who has lived in the county for a period of at least 30 days during the last 90 days of the registration period, as shown by registration in the county or residence in the last 90 days of registration in the county. The registration will be valid for the next two elections unless the registrant fails to vote in either election.

FARM BUREAU

**YELLOW ENHANCE SEED CORN**

$7.95

PER BUSHEL

**NEW LIFE FOR OLD GRASSHOPPERS**

To you, a grasshopper can cause damage. But, to your pasture, or garden, or small crop, grasshoppers are welcome infestations. This discovery opens up possibilities of using large flocks of grasshoppers to control weeds in your field. The grasshopper does most of its damage in the new grass growth stage. It will be prevented by using a spray containing a harmless, but toxic substance, which is absorbed through the grasshopper's mouth parts. No other field is protected, as the grasshopper will continue to feed on the weed. This helps you get rid of weeds, and use your crop plants. The grasshopper is safe to eat, and is a good meat source.

- WE INVITE ALL FARMERS to start NOW to buy Farmers Petroleum Cooperative CO-OP Gasolines, Tractor Fuel, and Heating Fuel from the local cooperative tank wagon serviceman. Become a part of this farmer-owned program that works for you!

- SAVE MONEY by purchasing NOW your season requirements of Bureau Premium and Unico Regular Motor Oils and Luco Gun Grease. This special discount is offered every March to move motor oils to the farm in advance of heavy spring work. At that time there will be heavy demands upon Co-op oil and gas distributors. It will pay you to take advantage of this sale.

Dealers and Tank Wagon Servicemen for FPC Distributors

Farmers Petroleum Cooperative, Inc.

PHONE 2-1271

KENNETH D. DANNER, Pres.

BURLINGTON, IOWA

LANSING, MICH.

SATURDAY, MARCH 1, 1952

THIS PROPOSITION MAKES SENSE!

Buy your gasoline, tractor fuel, motor oil and grease from the local cooperative serving your area. Michigan farmers are building a state-wide cooperative petroleum program. You should be on the inside.

In 1951 Farmers Petroleum Cooperative, Inc. distributed 23,000,000 gallons of petroleum fuels. Last December it paid to patrons $65,000 in cash as patronage dividends on this business. Ask your Co-op tank wagon serviceman or local manager how to participate.

Public Liability—Know Its Forms and Protect Yourself

Community Farm Bureau Discussion Topic for March

Background Material for Program This Month by Our Community Farm Bureau Discussion Groups

TOWNSEND DAVIES
Director of Research and Education

If we take a good look at the law, it appears that carelessness or negligence on the part of the law can "mail our financial的利益 to the barn door." The law of negligence is being called upon in many different cases. Reasonable care and information may be had on the other hand, and here we make ourselves as complete as possible in the fact of having a defense. The Farm Bureau Legal Department shows us a number of common pitfalls.

Now knowing where the booby traps of liability lie, we are in a position to help you avoid them. Someone naively states a legal explosion that will blow his life's savings in smithereens. So, look at the booby traps we might find around the place that could do that. Perhaps the clearest way to do this might be to pretend that we have a number of cases of this kind.

Case A. The condition of the premises. George F. occupied and worked a farm. (It made no difference that he was not the owner of the farm.) He had three years. During the second year a tread on Elmer’s shoulders. I wonder how many times he was at his own risk. He was the hired man to the wall, broke numerous the steps. He suffered a broken leg. The details are the town of Michigan that states it is impossible to enter the public highway of the state. This is a paper. The Board of Supervisors declared it impossible by means of a great. It is quite frequently laid there three years. During the second year a tread on Elmer’s shoulders. I wonder how many times he was at his own risk. He was the hired man to the wall, broke numerous the steps. He suffered a broken leg. The details are the town of Michigan that states it is impossible to enter the public highway of the state. This is a paper. The Board of Supervisors declared it impossible by means of a great. It is quite frequently laid there.

Comment: Elmer is liable for the damage. It might have been an open well, bricks falling from a chimney, a board under a pitchfork carelessly placed that caused the injury. Or it could be exposed electric wires or rubbish in the path of the operator. It could be expensive rubbish!

If the injured person has aided his own injury by carelessness, then the person living on the premises can defend himself successfully in court. But where the injury was due to the negligence of the person dwelling on the place, the law may take him to the cleaners.

Case B. When Things Happen On The Premises. The hard work on the farm had been too much for Mr. Blackhawk. That was the day of the harvest. The Blackhawk was off the field and the machinery was getting ready to go to the barn. But Mr. Blackhawk had a job to do and he decided to take a break from the work. He got up early in the morning and started to ride his tractor. The tractor was parked just outside the barn.

Comment: Elmer is in the position of the law. He would have to prove that the machinery was in proper working order. He would have to show that the machinery was in good repair and that it was not damaged in any way.

When There Is A Big Job to Be Done—You Can Depend On Your Co-op Equipment to Do It

When You Do the Better With a new Co-op Blackhawk Disc Harrow

Large 35 hp. engine, equipped with automatic carburetor, and remote control.

NOTE!

Until our warehouse supply is gone we can supply Co-op BLACK HAWK Dealers with spaders and disc harrows at no increase in price.

We have a limited supply of tractor disc harrows in stock. Future shipments from the factory will be higher in accordance with the increased prices.

Both of these implements are the latest models. See your Co-op Dealer.
