Farm Price Support Situation

Secretary of Agriculture Benson said in mid-April that a $131 million cut in operating costs for the USDA may be only a drop in the bucket compared to what the government expects in supporting farm prices.

The cost of commodities now held by the federal government to support farm prices totals $11 billion.

Mr. Benson said that if "one adds the wheat, corn, cotton and other commodities which the U.S. holds under loan and is likely to acquire, the total comes to almost $3 billion."

March 23 the Commodity Credit Corporation had 110 million bushels of wheat and 239 million bushels of corn. Under loan was an additional 200 million bushels of corn, 400 million bushels of wheat, and 200 million bales of cotton. The CCC expects to acquire practically all of it.

Congress in the year 1952 enacted price supports for basic crops of wheat, corn, cotton, rice, tobacco and peanuts at 90% of parity for the crop years of 1953 and 1954.

At that time the American Farm Bureau warned that it was an open invitation to unmanageable surpluses.

Mr. Benson says that this cannot go on without the application of strict crop controls, to which he is opposed. He says there must be a better way to safeguard farm prices through a support system.

He is looking for it.

Legislature Get Into Final Stage

Proposed Pay Roll Tax Lost as Search Goes On for New Revenues; Take Action on Other Bills Affecting Farmers

STANLEY M. POWELL
Legislative Counsel for Michigan Farm Bureaus

With the wind-up of the main part of the legislative session, farmers are bracketing their brains trying to figure out how to balance the budget.

Thus far their definite accomplishment in the field of increased taxes is largely limited to the widespread, H-40, the proposed tax of 3 1/4% of the gross business of manufacturers and wholesalers died in the House on general tax bill.

More recently the House defeated on final roll call vote H-309 which would have levied a tax of five mills (1/5 of 1%) on payrolls.

This narrows the field of new revenue measures down to about three major possibilities. These are: a personal income tax, a business profits tax and the so-called "package" tax program proposed by Senator George N. Higgins of Ferndale, chairman of the Senate committee on taxation. The "package" includes a variety of minor levies, such as a one-year boost of 1 mill in the corporation franchise tax, a 3% tax on hotel and motel accommodations, a tax on crude oil entering the state through pipelines, and an increase in the state's "take" on beer, horse and horse racing.

Several well-intentioned tax measures on these tax measures have been held by the taxation committees of the Senate and House. Apparently no one seems happy about the prospect of paying any form of additional taxation.

Meanwhile Senator Elmo R. Day of Blissfield, chairman of the Senate committee on appropriations, has been holding back Senate action on a group of major appropriation measures now on the Senate third reading table.

He said that pending appropriations total $353,000,000, which is considerably in excess of the state's anticipated revenue from existing taxes, estimated at $330 million by the chairman of the Senate Appropriations Committee.

Senator Porter maintains that final decision on the state's budget should be held back until it becomes more evident what the state's income for the coming year will be.

THERE has been a little of the old 1947 going on and getting cut, this year it has been a lot less busy by comparison. The reason is quite simple. After last year and the year before this year can be considered an especial session.

April 17 Members of the Michigan Farm Bureau, other state farm organizations, and state officials of most of the major state colleges and universities were in Lansing to attend the Annual Farm Bureau Legislative Day. (Continued on page 5)

Taeger Names Team to Aid FB Management

Ten Have Major Responsibilities

J. F. Yaeger, executive secretary of the Michigan Farm Bureau and five Farm Bureau service companies, on April 6 named ten men as a top cabinet to aid in management of the organizations, development of policies, recommendations to the boards of directors, and the administration of established policies and programs.

"This is a reorganization to some extent, and an assignment of new responsibilities," said Mr. Yaeger to the Farm Bureau management and Farm Bureau service companies.

"As a new cabinet to follow, 

"We must strive for greater efficiency. The trend in business conditions at this time shows that there is urgency, in the matter. We want a large and continuing growth of the Farm Bureau membership and Farm Bureau service businesses.

"This management team and the promotions involved have been under consideration for some time."

Mr. Yaeger said this move is designed to increase the operating efficiency of the Michigan Farm Bureau and service companies, to establish a more direct service to the membership and to make better use of the resources of the Farm Bureau service companies.

The ten men, he said, are selected on the basis of their qualifications and probable success in the new roles, in terms of the farm business management philosophy on which the Farm Bureau is built and the program that Mr. Yaeger has laid down for the business.

Mr. Yaeger said that the Farm Bureau service companies, especially the Farm Bureau Mutual Fire Insurance, Farm Bureau Mutual Automobile Insurance, Farm Bureau Life Insurance, Farm Bureau Mutual Grain Indemnity Insurance, and Farm Bureau Incendive Insurance, are all building programs that are specifically designed to meet the needs of Michigan farm families, that can be carried on more effectively as a result of the reorganization.

Mr. Yaeger announced that he intends to move the agencies to a more direct service to the farm family, through personal mailings, personal contact, and other means.

"We are in the business of selling personal service," he said. "This is our philosophy. It is what we are going to supply to the farmers.

"We are in the business of providing service to the farmers, and we are going to make sure that our service is of the highest quality."
COMMUNITY FARM BUREAUS

MRS. MARGARET GARDNER
Dear Community Farm Bureau Members:

Community Group Total 1953 During the month 21 new Community Farm Bureau Groups were organized bringing the total to 1,103. We set a new record this year for 1953. A state with a total of 7 new groups organized this year. 8 new groups were formed in 11 counties; the largest number in any county. Clinton in Allegan County, and Hillsdale in Hillsdale county, with the largest number of new groups organized this year. 8 new groups formed in 11 counties.

In southern Indiana there were 18 counties with 60 groups. While the number was smaller than expected, the membership was higher than anticipated. And long before our members reached Michigan one might have inferred from these numbers the project's success. As we have seen one springs time is this current year of Grace, and we have new group in the fall. And now we are seeing the start of this new group in the fall. And now we are seeing the results of our work.

The annual Dairy Banquet was held at the Grand Hotel in Traverse City. At last we reached a new high point and our own event indeed we have reached the new high point. And just because our work has been so successful.

S. R. CRapse reported in county Dairy Bureau meeting, that the members of the county Dairy Bureau are ready to get their group organized by working with the County Dairy Bureau and in the future.

Our Big Leaders

DISCUSSION of the topic on "The World's Grain Problem" during the first half of the meeting was held on the 19th at Grand Rapids. The meeting was attended by the Dairy Bureau and a large number of members.

The board of directors has not been able to attend the meeting. As the future of the Dairy Bureau is in our hands.

The board of directors must be present at the meeting held at the St. Mary's Farm Bureau. Secret.

Support for Seaway As Far as Toledo

Senator Homer Ferguson and Charles Potter of Michigan have been listed among 14 Senators who will support a highway program to link Lake Superior to Lake Erie. The proposal defeated last year was one that would cost $2 billion and involve the building of huge dikes along the lakeshore.

Whether it will fare any better in Congress than last year remains to be seen. The battle to Lake Superior and Ohio proposal defeated last year is called the "Seaway to the Seas" plan.

Paint Tricks Help Make Better Job

Paints come in opaque, semi-transparent, and transparent forms. A paint is opaque if it hides the surface well. A semi-transparent paint allows about 50 per cent of the surface to show through. A transparent paint shows the surface almost completely.

There are tricks-of-the-trade for getting good results with any type of paint. This "protection made in order" is offered:

Proposed Funds Short of MSC Agr'l Needs

Pipe-line Co. Wins Right to Proceed

In our April 1 edition we reported that Farm Bureau members in Bay county and others in the north of a proposed 30-inch pipe line for crude oil were before the Michigan Public Service Commission to protest its interests.

They held that because of the extensive investments in mileage drainage systems, etc., they could be damaged. The case was referred to the Commissioner, who has since announced that the company had not been granted the right to institute condemnation proceedings to get a decision on the right of way.

The Public Service Commission has granted the Lakeshore Pipe-line Company, owned by a Canadian corporation, authority to proceed with their extensive investments in a 30-inch pipe line in Michigan as a common carrier. The permit authorizes the company to institute condemnation proceedings under the law.

Ralph Young

Extension and Research Reduced

Donald K. Reed
Agr't Commissioner, State Agr'l Bureau

Funds recommended by the education committee of the House ways and means committee of the legislature fall considerably short of the amount required to fill existing vacancies in the Michigan State College extension service.

Under terms of H-469, introduced by members of the House committee, about $25,000 would be withheld. This would provide about 10 vacancies before the 1953 level of service and without a 44 club director.

The MSC agr'l experiment station would receive an estimated $225,000 less than the amount necessary to maintain the present program effectively. Possibly no new lines of research could be started.

W. I. Adkins, director, presented a plan to the House committee which would provide at least the necessary service at a cost of $325,000.

Why Europe Trades with Russia

Editor, Michigan Farm News:

A year ago you asked some questions concerning the trade with Russia while at the same time hearing aid from the U. S. D. A. to the effect that good can be sold instead of food. You are, I believe, included in the group of people who believe that Russia can be starved into submission.

You were fair in printing my comments that our tariff policies are working against our friend Russia. Starvation is a weapon used against Russia too, and I believe their present conditions are due to their own actions.

Sincerely,

MARCUS T. TANNER

Editor, Michigan Farm News

MAY

Efficiency Pays Off

News reports indicate lower prices for much farm produce. Eggs, however, apparently continue to draw customers and have held firm. Hogs look as if they may prove profitable. If milk production is directed to meet demand, a normal flow of prices will probably hold quite firmly (after the May holidays).

It will take greater efficiency in production to make a good profit. We feel our Farm Bureau members are really in this respect. They are, in our humble opinion, the most efficient group of farmers in the state.

Good feed helps produce eggs and milk, pork, or beef, or turkeys more economically and profitably. Farm Bureau feeds are good as modern research can produce. They are Open Formulas so you can tell just what you pay for.

Milkmaker 34% of the Income

Milkmaker 34% of the Income

Milk producer 34% of the income of all other commercial dairy cattle raisers. Cattle Supplement 46% is producing an average of 2 lacs a day. A day's work, 200 boars of steamers get it as their principle supply.

Creepets

Little pigs get farm Bureau creepets— the thinnest pellet starter. Pigs grow 3% bigger than those produced on the regular stuff.

Marketing Quality Michigan Farm Products

Community Farm Bureau Discussion Topic for May

Background Material for Program in May by Our Community Farm Bureau Discussion Groups

DOROTHY D. EDERBY
Director of Research and Information

"I'll take a bag of those Maine potatoes, please," said the customer, and the salesclerk rang up the proper amount and gave the customer a bag of potatoes. And the customer, obviously pleased, took her bag home and started to cook.

This is how every Michigan consumer should feel about Michigan-grown food products. And how every Michigan producer should feel about the consumers who buy his products.

But too often, consumers are not aware of the care and quality that goes into the production of Michigan food products. And too often, producers are not aware of the importance of the consumer in the marketing of their products.

The Community Farm Bureau Discussion Group has decided to bring these two groups together in a series of meetings. These meetings will be held in the various communities around the state, and will be open to all members and interested persons.

The first meeting will be held in Detroit on May 8th, and will feature a panel discussion on the importance of the consumer in the marketing of Michigan food products. The panel will consist of representatives from the Michigan Department of Agriculture, the Michigan Farm Bureau, and the Michigan Consumer Protection Commission.

The second meeting will be held in Lansing on May 15th, and will feature a panel discussion on the importance of producers in the marketing of Michigan food products. The panel will consist of representatives from the Michigan Department of Agriculture, the Michigan Farm Bureau, and the Michigan Consumer Protection Commission.

These meetings will provide an opportunity for consumers and producers to learn more about the importance of each other in the marketing of Michigan food products.

The meetings will begin at 7:30 PM, and will be held at the State Farmhouse in Detroit, and at the Michigan State Fair in Lansing.
