EDITORIAL

Our Strength Comes from People

CLARKE L. BROOK
Executive Vice-President, Michigan Farm Bureau
In Charge of Public Affairs

I have recently been reviewing the activities of the Michigan Farm Bureau during the closing years of the 1920's and the early 1930's to assemble material for writing a history of the Farm Bureau in Michigan.

Middle-aged and older people can well remember this was a period of business failures, closed banks, and acute agricultural distress.

Suicides in the business world were not uncommon at the time war that hotel clerks would ask guests registering for rooms whether they wanted them for sleeping or jumping.

Studying the records of these earlier days reminds one of the struggle to keep the Michigan Farm Bureau from being numbered with the thousands of businesses in other walks of life that died during the world depression from 1929 to 1933.

Many of these were much stronger financially and more firmly established than the Michigan Farm Bureau at the beginning of the collapse of our national economy in 1929. It was not an excess of material resources that enabled the Michigan Farm Bureau to survive the adversities of twenty-five years ago.

The Michigan Farm Bureau is carrying on a quarter century later long after many more substantial institutions of business and finance. Farmers and women have put their money, efforts and hearts into it.

The Farm Bureau in Michigan has endured because for more than a third of a century farm families have worked and sacrificed for a cause in which they deeply believed. This is why the magnitude and influence of the Michigan Farm Bureau program in the 1930's is so significant and something that could have been imagined in 1930.

The present 67,027 Farm Bureau member families with their 1,582 Community Farm Bureau would have been considered a dream twenty-five years ago.

As I scan the pages of the minute books, annual reports, and issues of the Michigan Farm News that have not seemed so long for many years, I appreciate more than ever the qualities in Michigan farm people that have carried the Michigan Farm Bureau onward through the vicissitudes and changes of more than three decades.

This continues to be exemplified in an admirable manner by the volunteer committees and members who have given their time, talent and ability to the cause of farm and rural improvement.

With our farm family membership, this means through the Michigan State Plowing Match Promotion Board. Benson often uses such occasions would injure voluntary industry financed by retailers.

Michigan was represented by Department of Agriculture. "This is not a federal public welfare rather than private special interest. The amount of bonds required would be much greater than the amount proposed during the average week of the previous licensing year by the applicant, but in no case less than $1,000,000. That would include the annual gross weekly business conducted by the applicant during the previous licensing year was greater than $15,000,000 and the amount of net income received in the period of one, or at least two, successive years, or at least three, or at least four, or at least five years, was $10,000,000, or at least $11,000,000, or at least $12,000,000, or at least $13,000,000, or at least $14,000,000.

The provision in the proposed bill relative to the size of the bond required reads as follows:

"The amount of the bond shall be equal to the amount of the gross weekly business conducted during the average week of the previous licensing year by the applicant, but in no case less than $1,000,000. That would include the annual gross weekly business conducted by the applicant during the previous licensing year was greater than $15,000,000 and the amount of net income received in the period of one, or at least two, successive years, or at least three, or at least four, or at least five years, was $10,000,000, or at least $11,000,000, or at least $12,000,000, or at least $13,000,000, or at least $14,000,000."

Farm Bureau members might recall this bill of both the House and Senate committees to be new.

Homemade Cooler Lowers Temperature of Sweet Corn

FARM BUREAU MEMBERS IN THE NEWS

CARL and WELEYE HESSLE, Kent county Farm Bureau members of Muskegon R-2, and the Hessle's niece, Miss Janet Hessle, are featured on the cover of the new book, "The Great Corn Harvest." The Hessle's have been involved in the corn industry for many years, and their farm has been the site of numerous corn harvests.

CORN Bustin' Out

The book, "The Great Corn Harvest," is a collection of stories about the corn harvest in Michigan. The Hessles have been involved in the corn industry for many years, and their farm has been the site of numerous corn harvests.

Alfalfa a Bargain for August Seeding

**P L E N T Y OF S E E D**
**P R I C E IS F A V O R A B L E**

Michigan State University recommends late summer seedings of alfalfa — late August or September.

Right now we think alfalfa seed is selling at bargain prices. Later we can expect prices to go up because of demand for the soil building advantages. "We have good stocks of the popular varieties of alfalfa seeds, but it is advisable to order now, as early as possible,"" said to Mr. Manchester. "The supply of alfalfa seed is limited, and it is advisable to order early, as early as possible, to ensure a good supply."
Tour of Farms Opens Eyes of City People

Farm Bureau In Upper Peninsula

WESLEY S. HAWLEY

We were sorry that we missed the tour of the Upper Peninsula for the Farm Bureau women. Indeed, the paper had a story for the Farm Bureau women. We are not sure what went wrong, but the tour was not held as scheduled. The paper has a story for the Farm Bureau women. We are not sure what went wrong, but the tour was not held as scheduled.

Many looked In vain for the paper, as they could not find it on their porches. The paper was due to be delivered to the city, but it did not arrive.

About 350 young people will attend the camp on August 3-4-5. It is called the People's Camp. To turkey debeaking, milking machines, alfalfa, herd sires, catnip, and a lot of other things.

The paper has a story for the Farm Bureau women. We are not sure what went wrong, but the tour was not held as scheduled.

The visitors found the farm, but they could not find the paper. They were told about the farm, but they could not find the paper. They were told about the farm, but they could not find the paper. Activities of Women of Michigan Farm Bureau

District 1
Mrs. Elma Rotherham, Chairman

Miss Calhoun County Farm Bureau met with 25 members at the home of Miss Ethel Crampton, director of field activities of the Calhoun County Farm Bureau at 9:30 a.m. on Saturday, August 11. Miss Crampton opened the meeting with the prayer given by Mr. Mason, pastor of the church. Following the prayer, Miss Crampton gave a list of the new officers and board members for the coming year. The minutes of the last meeting were read and approved. Mrs. Rotherham reported on the financial status of the county. She also reported on the various activities that have been conducted by the Women of the County Farm Bureau. She concluded her report by thanking the members for their support and cooperation.

District 2
Mrs. Dorothy Baldwin, Chairman

The Women of the Bay County Farm Bureau held their monthly meeting on Saturday, August 11, at the home of Mrs. Myrtle Schnaider, president of the Bay County Farm Bureau. The meeting was held at 9:30 a.m. with Mrs. Schenider presiding. The meeting was opened with a prayer given by Mr. James Taylor, pastor of the church. Following the prayer, Mrs. Schenider reported on the activities of the Bay County Farm Bureau. She also reported on the various activities that have been conducted by the Women of the County Farm Bureau. She concluded her report by thanking the members for their support and cooperation.

Fall Fashions Play up Color and Texture

The single biggest fashion news from the past four months is the development of a new color scheme for the fall-winter season which is being called "Color". The new color scheme is based on the idea that color is the most important factor in fashion and that it can be used to express emotion, personality and mood. The new color scheme is called "Color" and it is divided into four groups: Red, Blue, Yellow and Green.

Red: This color is associated with energy, passion and romance. It is often used to express love and desire. Red is also associated with power and authority.

Blue: This color is associated with calmness, serenity and trust. It is often used to express peace and tranquility. Blue is also associated with security and stability.

Yellow: This color is associated with optimism, joy and creativity. It is often used to express happiness and lightness. Yellow is also associated with alertness and awareness.

Green: This color is associated with balance, harmony and growth. It is often used to express nature and freshness. Green is also associated with health and vitality.

The new color scheme is being used in all areas of fashion, from clothing to accessories. It is being used in all areas of fashion, from clothing to accessories. It is being used in all areas of fashion, from clothing to accessories. It is being used in all areas of fashion, from clothing to accessories.

A change of color in your home is easy with Unicolour Paint

Dairyland Picnic-Fair August 16

A varied des longi through the year. Dairymen have a crusade in mind, judging of livestock in the middle of August. This crusade for an owner's failure to pay his taxes as a wedge toward accuracy in the dairyman's business, these days a farmer must have the records of these egg-men open to the public.

In the event of accident or illness or death of the owner, the farmer is liable for the tax as a debt.

In order to make a reasonable return for his labor in the dairy business these days a farmer must keep the all the points they list in mind.

More than one man has overemphasized one point and given too little thought to the others.

PotGutmen have taken to Mermash. They have found that Farm Bureau feedlot, which has a J. M. has Most Taker-Covered Land

Mermash has four times as much water-covered land as any other commodity. It is most effective in the feedlot, especially if used in the distribution of milk.

The records of these egg-men are valuable, but they were not presented to the public.

It can do the same for your flock. Start feeding Farm Bureau feed saved 9/10 a dozen egg.
