EDITORIAL

A Better Opportunity for You

CLARK L. BRODY

Editor, Michigan Farm News

"Building a Better America with Opportunities for All" expressed the great objective for which over 600,000 Farm Bureau members met at Miami, Florida, December 9, 1956. As these men and women from 48 states and Puerto Rico gathered in the municipal auditorium at Miami Beach, they were given by this high ideal displayed on a large, attractive banner over the stage.

To the banner beneath it, were the flags of the United Nations with Old Glory at the top. These and a profusion of flowers constituted an appropriate background for the proceedings of the convention.

As President Charles Shuman called the 38th annual meeting of the American Farm Bureau Federation to order, with the officers and directors seated on the stage in this impressive environment, I believe he had at the back of his mind the recognition of the most powerful farm influence ever assembled.

The American Farm Bureau Federation has become one of the strongest and most effective powers in the making of our nation. It is a power that enables free America to live and grow.

Into this plan, "Building a Better America with Opportunities for All" the philosophy that characterizes the policies of the American Farm Bureau Federation. It paints the way that we must go if we are to protect and preserve our most powerful farm influence ever assembled.

Under this banner we have in order to insure its future.

The magnitude and power of the larger units of government, the Congress, the President, the Federal agencies, are generated from the small units of the farm community. County Farm Bureau members are the foundation upon which the entire farm organization stands. The philosophy that characterizes the policies of the Farm Bureau are generated from the small units of the farm community. County Farm Bureau members are the foundation upon which the entire farm organization stands. The philosophy that characterizes the policies of the Farm Bureau are generated from the small units of the farm community.

Two major principles are implied in the precept:

1—It is our aim to strengthen and improve the America we have in order to insure its future.

2—Paved with this ideal is the great responsibility of the American Farm Bureau Federation. This great responsibility is freedom and initiative and opportunity for every citizen to achieve his maximum possibilities.

We have the responsibility of acting as the positive thinking and action of our people under a free government that has created the environment under which we live and move and have our being.

The American Farm Bureau convention reaffirmed these principles when it said:

This year's members reasserted their freedom, initiative, and individual opportunity. These concepts here in the Midwest have provided unprecedented goods and services and supported unprecedented educational and social opportunities. It is our constant effort to work vigorously to maintain them and build a better America on this firm foundation.

In the light of such impressive events in America and State Farm Bureau, it is well to remember that they reflect the voluntary efforts and activities of farm people in the home communities of members over the nation.

The Soil Paving Gains in Michigan

The magnitude and power of the larger units of government, the Congress, the President, the Federal agencies, are generated from the small units of the farm community. County Farm Bureau members are the foundation upon which the entire farm organization stands. The philosophy that characterizes the policies of the Farm Bureau are generated from the small units of the farm community.

The Michigan Farm Bureau Federation is devoted to the concept of the American Farm Bureau Federation. It paints the way that we must go if we are to protect and preserve our most powerful farm influence ever assembled. Under this banner we have in order to insure its future.

The American Farm Bureau Federation has become one of the strongest and most effective powers in the making of our nation. It is a power that enables free America to live and grow.

The further centralization of power and authority in Washington is the trend that we must resist at every step. The American Farm Bureau Federation must assume a leadership role in the conservation of state and national resources and the protection of the rights and privileges of farmers. This is the true meaning of a strong farm policy.

The American Farm Bureau Federation has been very active in promoting the development of the soil and soil conservation. The Michigan Farm Bureau Federation has been a leader in the development of the soil and soil conservation. The Michigan Farm Bureau Federation has been a leader in the development of the soil and soil conservation.

The task is good for the health...of our Community Farm Bureau groups, and gives us an opportunity to do something for the public together and to strengthen the bond that exists between the members of the groups and the farmers of the communities they serve.

Annah Trecker and Harleigh Trucker, of West Hartford, Connecticut, are dean of the School of Social Work of the University of Connecticut. His wife is Audrey R. Trecker, who heads the Public Relations Department of the University of Connecticut.

"One of the top birds in the West," according to the Michigan Farm Bureau, is the Seabago. The bird is a good interpreter, and a good member of a group of four to six checks, good; one to three checks, poor.

Successful operations require a sound knowledge of the market, and a good member of a group of four to six checks, good; one to three checks, poor.

Are these a good interpreter and a good member of a group? This is important because of your Community Farm Bureau work.

The agendas are planned carefully and thoughtfully, and the members of the group are happy about the meetings.

The Michigan Farm Bureau board of directors will follow the Michigan Farm Bureau, 315 North Grinnell Street, Lansing, Michigan.

The Michigan Farm Bureau will continue until the trees are ready to be planted, and the Michigan Farm Bureau will continue to work for the benefit of the farmers of the state.

The Michigan Farm Bureau has been in existence since 1876, and the Michigan Farm Bureau Federation is the strongest power in the nation.

Avery C. Johnson, 501 Baldwin, Lake Orion, Michigan, will be able to extend the Michigan Farm Bureau Federation the strongest power in the nation.

The Michigan Farm Bureau Federation has been in existence since 1876, and the Michigan Farm Bureau Federation is the strongest power in the nation.

To point the path of progress out and be the farmer's friend.

At any rate, sometimes it's one thing to think that you're doing something right with your hand, but the Michigan Farm Bureau Federation has been in existence since 1876, and the Michigan Farm Bureau Federation is the strongest power in the nation.

Farm Bureau Mutual's Fire-Safety Awards

One-third of all fires reported on farms result from carelessness or from people who don't know what to do with fire. The most common kinds of fire are heating system fires, electric fires, and cooking fires. These fires can be avoided by proper installation and operation of heating equipment, by proper use of electric appliances, and by careful supervision of cooking operations.

In the past, Farm Bureau Mutual has offered fire-safety awards to farmers who have worked hard to prevent fires on their property. These awards have been given to farmers who have installed smoke detectors, fire extinguishers, or other safety equipment. The awards have helped to raise awareness of fire safety and to encourage farmers to take steps to protect their property from fire damage.

One of the features of Farm Bureau Mutual's fire-safety program is the Fire-Safety Award Plaque. This plaque is given to farmers who have made a special effort to prevent fires on their property. The plaque is a symbol of pride for the farmer and a reminder of the importance of fire safety.

Other membership awards for 1957 are:

1. Three trophies for highest percentage of membership on time as of October 15, 1957. These trophies will be given to the county with the highest percentage of membership on time as of October 15, 1957. They will be awarded to the county that attains the highest percentage of membership on time as of October 15, 1957.

2. Two trips to American Farm Bureau Federation meetings for each county in Michigan. These trips will be given to the county with the highest percentage of membership on time as of October 15, 1957.

3. Five of the best counties in Michigan for the 1957 Michigan Farm Bureau Mutual Insurance Company. These awards will be given to the counties with the highest percentage of membership on time as of October 15, 1957.

4. Five of the 19 Farmer of the Year awards to be given to the counties with the highest percentage of membership on time as of October 15, 1957.

5. Five of the 19 Farmer of the Year awards to be given to the counties with the highest percentage of membership on time as of October 15, 1957.

6. Five of the 19 Farmer of the Year awards to be given to the counties with the highest percentage of membership on time as of October 15, 1957.

7. Five of the 19 Farmer of the Year awards to be given to the counties with the highest percentage of membership on time as of October 15, 1957.

8. Five of the 19 Farmer of the Year awards to be given to the counties with the highest percentage of membership on time as of October 15, 1957.

You still pay these "temporary" wartime taxes

During World War II, Congress legislated special taxes on the automobile fuel, and the freight charges on railroads and other forms of public transport. One reason for these special taxes was to discourage the use of these transportation facilities in wartime.

The tax was ended more than ten years ago, but these taxes are still collected. They are still an extra 2 per cent to 4 per cent on everything that you buy, and the cost of the freight charges on everything that you buy, and the cost of the freight charges on everything that you buy.

The reason for these "temporary" wartime taxes remains the same. They are still in effect for the purpose of deterring the use of these transportation facilities in wartime.

We are paying more than we should for these taxes. They are still a burden on our economy, and they must be ended. The taxes are still collected, and they must be ended.

The Home Garden

SOWING SEEDS INDOORS

K. L. B. CHAPMAN

A greenhouse is the ideal place to start vegetables and flower seeds one to two months before the last frost of the year. If you do not have a greenhouse, you can start seeds indoors in the home, where the hands are kept in the seeds.

Containers used for indoor sowing should be clean and free from disease. The soil should be well drained and contain ample amounts of nutrients. The soil should be kept moist and the temperature should be maintained at a minimum of 60 degrees Fahrenheit during the growing season.

HOW TO SOW SEEDS INDOORS

1. Select the correct type of seed. Some seeds require special treatment before planting. Others may be sown directly in the ground. See the seed packet for planting instructions.

2. Prepare the seed starting medium. Use a mixture of soilless potting mix and sterilized soil. Mix the two ingredients together and water thoroughly.

3. Place the seed starting medium in the cell pack and cover with a thin layer of soil.

4. Water the seed starting medium immediately after planting. Keep the medium moist until germination occurs.

5. When the seedlings emerge, carefully pull them from the cell pack. Transplant each seedling into individual pots filled with fresh seed starting medium.

6. Water the seedlings and keep them moist until they are established.

7. When the seedlings are large enough to handle, transplant them to the garden. Cell packs can be used as seed starting containers.

The Michigan Farm Bureau is a member of the National Farm Bureau Federation, a federation of 50 state Farm Bureau organizations and several country Farm Bureau associations. It is the leading farm organization in the United States, representing more than 1 million members. It is the 14th largest organization in the world.

Ideas to Improve Our Organization

These resolutions on "Our Farm Bureau" were adopted at the 88th annual meeting of the Michigan Farm Bureau held at Lansing, Michigan State University, September 6 and 7, 1968.

Membership and Program. We are proud of the fact that Farm Bureau policy is developed at the "grass roots" level by discussions held in over 1,584 Community groups and by resolutions presented at the annual meetings of our 66 County Farm Bureaus.

Therefore, we urge that lawmakers to reach their goals and thereby play their part in reaching the state goal of 70,222 members. Of our members, 1,584 will be elected for a term of two years by the Michigan Farm Bureau Women, those elected shall be elected for a term of two years.

Amend Article VIII Section 1, paragraph 4, by changing the word "bureau" to "women." The director nominated by the Michigan Farm Bureau Young People shall be selected for a term of two years by the Michigan Farm Bureau Youth Program. Women's shall be elected for a term of two years.

Amend Article VIII Section 10, paragraph 8, by adding the words "Michigan Farm Bureau Women." The next words appear in the above Article. The amendment above shall take effect on January 1, 1969.

Policy Development and Education. We believe a complete comprehension of agricultural problems, agriculture, must have the thinking of our members as an important factor in our policy development. The members of our State Farm Bureau are a part of a Community group, has been convened in County Farm Bureau annual meeting and has become a part of our organization by their participation in our voting delegates.

We urge all Community groups to continue their participation in the organization by electing a delegate to the Michigan Farm Bureau annual meeting. All Community Farm Bureau groups are encouraged to make the active participation by their members the keynote of their program and the principal of our state or national organizations and to provide active support.

Let's Not Forget

We urge all Community groups to keep in mind the importance of the Michigan Farm Bureau annual meeting and to support and promote active participation in this important event.

Farm Bureau Women. We urge the women's committee of the Michigan Farm Bureau to consider the need for more educational programs designed to meet the needs of Women's organizations and to provide active support.

The solution to many farm problems may be found in the roots of agriculture, and we urge all Farm Bureau women to consider this fact in their work and programs.

We urge all Community groups to be active in the promotion of the Michigan Farm Bureau annual meeting and to take an active part in the carrying out of the policies of our organization.

Your Farm Bureau Services Department answered the problem with its line of hog and pig feeds. An outstanding example of how this answer is Pork Mark 35% available from any Farm Bureau feed store in Michigan. You can depend on it for maximum pork production at economical cost. Use your known grains for best results, at lower costs.

For FB Members Having Blue Cross

Background of the plan: Under the current setup, only a relatively small number of the 1.5 million group plans offered by Blue Cross Blue Shield are self-insured, with the rest being underwritten by insurance companies. This dual structure results in a lack of control over medical costs for the consumer and can lead to higher premiums.

The new plan aims to shift more responsibility to employers by requiring them to cover a larger portion of the costs for insured employees. This would potentially reduce premiums for those covered.

The plan has been met with mixed reactions, with some employers welcoming the chance to control costs and others expressing concern about increased financial burden.

For those interested in learning more, additional resources on this topic are available online, including articles and reports from reputable news sources.

The underlying principle of the plan is to reduce the overall cost of healthcare by encouraging employers to take a more active role in managing medical expenses.

The implementation of this plan would require careful consideration of its potential impacts on both employers and employees, ensuring a balance is struck between cost savings and access to quality healthcare.

If you have any further questions or need additional information, please do not hesitate to reach out.

Good luck with your decision-making process!

Thank you for choosing Michigan Farm Bureau for your insurance needs.
Proposed: A Milk Marketing Act for Michigan

Community Farm Bureau Discussion Topic for February

Background Material for Program in February by 1990 Community Farm Bureau Discussion Groups

Community Farm Bureau

March 1990

1. Our discussion topic for February has been changed. The delegates at November state convention will discuss the proposed Michigan Milk Marketing Act since this matter is to be before the State Legislature.

2. Since this is to be in the Senate in Lansing during February, discussion of the matter must start soon. The change in topic has been approved by the State Topic Committee.

3. Farm Bureau has no established position with regard to this matter. If one is to be determined, the sentiment of the members must be known.

4. The reader must remember that the viewpoints and arguments presented here are not necessarily those of the writer nor the Farm Bureau. They have been gathered from persons who favor and oppose passage of the bill.

5. Whether you are a dairy farmer or not, it concerns you. (A) You use milk. (B) The interests of all farmers should be protected here. (C) Future state action could possibly touch on your own field of agriculture.

Background Facts

1. What are the advantages of milk marketing? It is possible to control the output of a product like milk. It is important in human health. It is perishable, and in perishable produce it is perishable, specific quantities are needed. Milk, then, can be marketed on the market for milk. The price of milk should be fair, not too much and not too little. The price should reflect the market's demands and the producer's costs of production. In the case of milk, government demand does not exist.

2. The world's milk surplus, which is reaching its peak, can be sold at prices lower than the cost of production. There must be a world market for milk. The surplus cannot be sold in the United States, for that is a small market compared to the world market. If the surplus milk is to be sold, it must be sold in the world market.

3. Michigan Dairy Farmers Pool

4. The Michigan Dairy Farmers Pool has a pool of surplus milk which can be sold at a price lower than the cost of production. The price is determined by the market, not by the producer.

5. Michigan Dairy Farmers Pool

6. The Michigan Dairy Farmers Pool has a pool of surplus milk which can be sold at a price lower than the cost of production. The price is determined by the market, not by the producer.

7. Michigan Dairy Farmers Pool

8. The Michigan Dairy Farmers Pool has a pool of surplus milk which can be sold at a price lower than the cost of production. The price is determined by the market, not by the producer.

9. Michigan Dairy Farmers Pool

10. The Michigan Dairy Farmers Pool has a pool of surplus milk which can be sold at a price lower than the cost of production. The price is determined by the market, not by the producer.
