Farm Bureau and Agr'l Education

CLARK L. BRODY

When the farmers of the nation initiated the State and American Farm Bureaus in 1919 and 1920 they created an interest in Agricultural Extension far beyond what had existed before.

I experienced this rapid change toward more active cooperation of farm people as County Agricultural Agent of St. Clair County.

During the previous four years a few forward looking farmers had worked with me to interest others in utilizing the results of research recommended by the Michigan Agricultural College and the U. S. Department of Agriculture.

Performing numerous World War I emergency services had developed many friendly contacts, but the resulting interest in an Extension program was largely passive.

Only about 100 people had manifested a feeling of responsibility for its continuation by carrying a 50 cent membership in our informal county farm bureau. 始剧

However, we experienced a revolutionary change when this group of cooperating farmers readily became the nucleus of the Michigan and American Farm Bureaus in December 1919.

Under their leadership 2,300 members were enrolled in St. Clair County Farm Bureau with yearly dues of \$10 pledged for three years. They converted our small Extension County Council into an incorporated unit of the state and national Farm Bureaus.

This sudden seizure of the reins of farm influence by hundreds of farmers practically drafted the County Agricultural Agent to work with the membership in County and State Farm Bureaus. Simultaneously it multiplied my opportunities to interest farmers in Extension projects far beyond what could be realized under former conditions. They were soon calling on my office for such a variety of services that little time remained to initiate projects myself.

Proposed Constitutional Convention

Advocates Would Write Own Rules?

> STANLEY M. POWELL Legislative Counsel for Michigan Farm Bureau

There has been considerable confusion as to the exact details of a proposal which is being developed for submission in the form of a petition to amend the constitutional convention article of the Michigan Constitution.

I had supposed that this thing was pretty definite although various radio and newspaper reports didn't hang together too well as to just what is provided in the amendment.

Wide publicity was given to the fact that Governor Williams several days ago became the No. 1 signer of the petition. Imagine my surprise when I found that what he signed was only a proof copy of the proposal in a tentative form which had not been accepted and approved by the state Board of Canvassers and the Election Division of the Secretary of State's office.

National Program AFBF Names **5** Objectives For 1960

The new frontiers facing farmers and other Americans today are no less challenging than the frontiers faced by the forefathers, Charles B. Shuman, President of the American Farm Bureau told State Farm Bureau leaders January 7 at Chicago. Mr. Shuman spoke at the opening session of the 1960 national Farm Bureau program kick-off.

Attending the meeting were 144 state Farm Bureau officers and staff members. Presidents of 2 State Farm Bureaus attended Michigan Farm Bureau was represented by President Walter W Wightman, Clarence E. Prentice secretary-manager, Dan E. Reed. associate legislative counsel, and Mrs. Marjorie Karker of Womer RUSSELL HARTZLER, left, of Michigan Farm Bureau.

Campaign is for 5,131 Members

Published Monthly by Michigan Farm Bureau

Nine Regions in World Series Contest To Determine Champions for **Membership Work**

> ROGER FOERCH Coordinator of Organization Dep't, MFB

February is the month for completing the job of getting 72,927 members for Michigan Farm Bureau by March 1, 1960.

We have done well to roll up a total of 67,796 as of January 26.

We need 5,131 more!

For 70 County Farm Bureaus that means three renewals or new members for each of 25 working days in February.

There are probably 2,000 or more of our friends who haven't yet renewed their membership by mail. If you know one, ask him to renew. There are many farmers waiting to be invited to join Farm Bureau. We enrolled 4,962 new members in 1959!

Every Farm Bureau member is invited to use the Application on page 6 of the Michigan Farm News to enroll a member.

We have a "World's Series" contest being conducted by membership workers of the nine membership regions the week of February 15-19. New members and renewals count as runs.

County Farm Bureaus and Roll Call managers will set a certain day of that week for their part in the Membership World Series. The teams:

1-Restoring government to

Even some of the most conservative individuals became active supporters of the annual appropriation for the County Agricultural Agent by the Board of Supervisors.

Supervisor John Shepherd who had led strong farmer opposition to the appropriation from the beginning became my close friend and advisor.

However, this sudden affiliation of Agricultural Extension, a public agency, with the militant, privately controlled Farm Bureau was to lead to some later problems.

Soon after I came to the Michigan Farm Bureau staff in 1921 we became engaged in controversial issues such as the initial 2c gas tax, legislative reapportionment and school policies.

In these battles the Farm Bureau's involved relations with the County Agricultural Agents weakened its influence and invited criticism from our opposition. At the same time this close connection with the Farm Bureau was proving detrimental to Agricultural Extension.

The situation led to the setting up of County Advisory Councils for Extension forces in place of the County Farm Bureau, and discontinuing the payments of any portion of County Extension salaries from Farm Bureau funds.

We welcomed the change and it in no way disturbed our friendly cooperative relations.

The Farm Bureau's strong interest in agricultural research and education was reaffirmed by the 41st annual convention of the American Farm Bureau in December, 1959 when the delegates said:

"An adequate agricultural research program is one of the vital needs in American agriculture today."

The delegates from 49 states unanimously re-(Continued on Page 2)

May Renew Old Battles

STANLEY M. POWELL Legislative Counsel, MFB

The stage is being set to battle again over several of the same issues which were centers of controversy in the 1959 legislative session

The first bill introduced in the Senate is the same subsidy proposal for city and suburban bus lines we had in 1959. It was the only bill passed that year in pite of Farm Bureau opposition. It was vetoed by Governor Williams in line with our recommendations to him and efforts which we made to arouse other substantial groups of highway users and citizens to take similar action. The Michigan Farm Bureau has opposed all raids on highway funds. It would be unfair to utilize revenue collected from all motorists to subsidize bus lines serving a few industrial communities.

ROGER FOERCH Coordinator of Organization Dep't, MFB

As I begin this article, there is only one thing on my mind, only one project that keeps coming back, no matter how many things need to be written about-MEMBERSHIP.

There are nine counties over goal as of this date, Jan. 26. Here they are in the order of their accomplishment:

1. Iron	6. Benzie
2. Delta	7. Charlevoix
3. Emmet	8. Missaukee
4. Wexford	9. Marguette-Alger

- 5. Montmorency

The "Top 10 Club" this year has some new rules. The Club will consist of only the counties going over goal in the shortest length of time, so here they are:

1.	Emmet	6. Missaukee
2.	Wexford	7. ?
3.	Montmorency	8. ?
	Benzie	9. ?
5.	Charlevoix	10. ?

As you can see, there is still room for four more counties. WHO WILL THEY BE? I hope that the location of these counties will be a challenge to the rest of the state.

I mentioned the above thing first because it is the most important. To do anything, we first need an organization, and an organization is made up of members. This is our job NOW!

| count of the new members writ- but not least, we will be winding What Has Been Happening? ten by our Insurance Agents, I up the membership campaign. (Continued from Page 1)

affirmed the Farm Bureau's support of Agricultural Extension:

"We urge the Extension Service to keep abreast of technological developments in agriculture, improve on-the-job training programs for extension workers, and adapt its operations to the changing needs of modern agriculture."

Our Michigan Farm Bureau is strongly supporting the efforts of the American Farm Bureau and working for a more adequate research program in our own state.

At our annual meeting of the Michigan Farm Bureau in 1958 over 700 delegates in a unanimous resolution said:

"From 1940 to 1955 Michigan's share of the national agricultural market declined from 2.7% to 2.2% which reduced potential income of Michigan farmers by \$1,500,000.

They urged the Legislature in 1959 to provide our Michigan Experiment Station with "financial support necessary to keep Michigan farmers competitive with our neighboring states."

MICHIGAN BELL TELEPHONE COMPANY

In registering Michigan Farm Bureau's continued support of Agricultural Extension they said, "New truths are of little value until they are made available to farmers" through Extension and other means.

Adequate programs along these lines can be realized only if we work aggressively for the enactment of sufficient funds to sustain them.

The College of Agriculture of Michigan State University is our key institution for making agricultural research and Extension effective for Michigan farmers.

Farm Bureau people need to be persistent in asserting their influence to get the best qualified citizens elected to the Board of Trustees of Michigan State University.

We need to be active in our local political units and work in both the Democratic and Republican Conventions to nominate high type individuals for the biennial spring elections.

Political parties constitute the agencies through which the voters register their choice of trustees for Michigan State University. It is essential that the people be provided with the best qualified candidates from which to make their selection.

I am glad to report that over many years the deliberations of the Board of Agriculture and Trustees, whether consisting of Democrats or Republicans, or both, have been singularly free from political partisanship.

Certainly, party politics should always end with the election. They have no place on the boards of control of our institutions of higher learning which are training our young people for their responsibilities in the future.

The active support the Farm Bureau has given institutions and policies of agricultural education over the past 40 years has been a basic factor in the advancement of farm people and constructive citizenship.

"My steers make market weight 3 weeks sooner since I paved my feed lot with concrete!"

Says ALFRED ASK, Triumph, Minnesota, eteran teeder of choice and prime cattle

'I put steers into the lot at 650 pounds. On concrete, they double their weight 21 days earlier-and do it on less feed. Besides that, I save at least 30 minutes a day getting feed out, plus cutting my cleaning time in half." On concrete, you can always get feed to cattle easily, even in the worst weather. And in the dry season, there's less dust. Cattle stay healthy the year around.

A concrete feed lot makes cleaning easy, fast. Tractor scoops don't tear it up. No refilling. Concrete is a lifetime investment in efficiency. Yet initial cost is low.

mechancially. Harvesters are in Robert Massey, federal egg gradfinal stages of development. der, weighs and breaks out a

Farm Bureau Is Not Afraid to Be Counted

(Editorial from Saginaw News) country needs more of them! Of all the major farm organizations in Michigan, we know of none which speaks out with greater clairty on prime subjects of current importance to all state citizens than does the Michigan Farm Bureau. In saying that we do not exclude the major political

parties. The 40th annual convention of the Farm Bureau continued to reflect the lively and alert awareness of the membership to matters vital to the concerns of Michigan.

One of the most admirable qualities of this widespread organization is its readiness to take a stand or position on important issues.

The stand may be controversial, but it is most generally constructive because it has been reached with thoughtfulness after exhaustive discussion by local clubs whose combined view are communicated to state delegates.

Another Farm Bureau strength is its dedicated interest in state affairs ranging far beyond ingrown preoccupations with self-serving aids to agriculture.

This is a tribute to the leadership which for years has embraced a position that farm operation can and will succeed without special aids if sound economic and social institutions prevail elsewhere.

The Farm Bureau has reaffirmed its desire to move as rapidly as possible toward elimination of government controls over farm operations "to allow the law of supply and demand to govern prices of farm products.

This key resolution speaks for the sound spirit and independence that once was attributed to all American farmers, Unfortunately not to all of them today. But the Farm Bureau is speaking with an increasingly loud voice in the state and national affairs because of the vigor of the spirit of its members. The

Take issue as you or we may with some positions of the Michigan Farm Bureau, you or we will do so only because its positions are set forth without hedging or evasive qualifications.

Consider some of its stands: 1-Farm price supports will not solve farm surpluses. Eliminate them as rapidly as possible, restore the law of supply and demand, and eliminate government controls.

2-Submit both questions of a penny increase in the sales tax or a state income tax to a vote of the people.

3-Oppose a constitutional convention. Submit, instead, any proposed amendments to voters for individual consideration.

4-Oppose reapportionment of senatorial districts on a population basis because of concentration and resultant legislative control within a few counties.

5-Oppose Federal aid to education and compulsory health insurance.

This farm organization also has called for liquidation of the State's deficit and provision for new revenues to be drawn from "a broad and equitable base."

The Farm Bureau doesn't say what type of taxation it prefers, probably because of divided membership opinion. It is noteworthy that Farm Bureau officers and delegates do not purport to speak for a view lacking membership substatiation.

In that respect also, Farm Bureau is perhaps one of the most truly democratic functioning organizations in existance.

In separate counts, at another time, we would take is sue with some Farm Bureau stands. But it is our intention here to salute a vital organization whose objectives are both purposeful and worthy of all Michigan citizens' attention.

FARM BUREAU "High Analysis" PLANT FOOD and **Michigan Certified Hybrid** SEED CORN

Would You Like a Greater Profit? HERE IS WHAT TO DO TO GET IT:

- 1. Test your soil to find out which analysis of Farm Bureau Granulated Plant Food should be used to obtain maximum yields.
- 2. Use Farm Bureau "High Analysis" Plant -Food at the levels recommended by your soil test. Use recommendations of M.S.U. or your County Agent.
- 3. Increase your plant population by using Farm Bureau's Michigan Certified Hybrid Seed Corn. Plant at rate of 16 to 18,000 plants per acre except on light sandy soils.
- 4. Use minimum amounts of tillage.
- 5. Side-dress your corn with Farm Bureau's Central Farmers brand Ammonium Nitrate when plants reach 4 to 6 inches in height.
- 6. Use only the weed killers sold and recommended by your local Farm Bureau Fertilizer and Seed dealer. Apply ONLY the amounts of weed killer recommended on the application instructions found on the weed killer container.

Today everyone must obtain higher yields to get increased profits. That's why you should use proven seed and plenty of proven plant food. Farm Bureau's "High Analysis" Granulated Plant Food and Farm Bureau's Michigan Brand Certified Hybrid Seed Corn are both proven and adapted for Michigan growing conditions. Insist on the BEST ... Insist on plant food and seed with the Farm Bureau emblem appearing on the bag. It's your guide to quality products coupled with economy.

Many of program to discover new meththe problems and shortcomings ods of diagnosing and eradicatprogram are due to changes in from Michigan herds. the methods of procurement, The USDA has allocated apmilk and dairy products.

Programs

We believe that the Michigan provided the required facilities State Department of Agriculture are made available. should be charged with the responsibility of co-ordinating and directing the complete job of inspection of fluid milk and manufactured milk on a state-wide basis.

Where local units of government have inspection systems and are doing an acceptable job of fluid milk inspection, they should continue doing such inspection work in a co-ordinated state program.

The Director of Agriculture to such local inspection agencies the responsibility for making the milk inspections in a specific area

This local agency could be deputized to enforce all the laws relative to milk production and handling, for the enforcement of which the Department of Agriculture is responsible.

Such a program would provide the most economical and efficient means of insuring a complete and effective job of inspecting the production and handling of milk.

Inasmuch as milk inspection is for the protection of the public, we oppose any effort to shift the cost of inspection to the producers.

Health Regulations & Milk Marketing

We oppose the interstate move-

Notice of Annual Meeting

FARM BUREAU MUTUAL INSURANCE CO.

The annual meeting of the policyholders of the Farm Bureau Mutual Insurance Company of Michigan, a corporation, will be held at its office, 4,000 North Grand River Avenue, Lansing, Michigan, on Wednesday, February 24, 1960, beginning at 1:30, for the following purposes:

- 1-To receive reports from officers and management.
- 2-To elect directors.
- 3-To consider such other matters as may properly come before the meeting.
- February 1, 1960 BLAQUE KNIRK Lansing, Michigan

President

You Name It-We've Got It!

Ever see a rocket riding the highway? Or a tankful of flour? Or a load of oxygen? . . . Most people -when they think of trucks - think only in terms of the van or pick-up models they see carrying miscellaneous freight. These are in the majority, it's true. But it takes literally dozens and dozens of different types of trucks — many very special and very costly - to serve America's broad and bustling economy ... Trucks are designed to transport almost every kind of cargo you can imagine — and to do so safely and efficiently. That's why it's truly said that everything you eat, wear or use - and more - comes to you by truck!

Start Action on Farm Bureau's 1960 Policies

County Leaders at Gaylord & Lansing

"If we can prevent government from wresting the labors of the people under the pretense of caring for them, we shall be happy."

-Thomas Jefferson

Leaders in the Michigan Farm Bureau and County Farm Bureaus have started action on the Farm Bureau's national and state legislative programs for 1960.

This action is designed to help the entire membership of more than 72,000 farm families take part in 1960 in the legislative and election battles to come on these matters:

National

Farm Programs ederal Aid Programs Inflation

At Gaylord January 20 County Farm Bureau officers, Legislative Committee chairmen and committeemen, Citizenship Committee chairmen and committeemen of the County Farm Bureaus north of the Bay-Muskegon line met with Michigan Farm

At East Lansing January 21 the same leadership for County Farm Bureaus south of the Bay-Mus kegon line met with MFB leaders to start the Farm Bureau's drive in behalf of its position on these questions.

We present statements made and discussed at these meetings on each of the six questions:

Farm Bureau and Farm Programs

CLARENCE E. PRENTICE Secretary-Manager of MFB The major objective of Farm reau is to make it possible for rmers to earn high family inme, preserve freedom and iminate government regulaon of farming.

Farm Bureau opposed the heat bill H. R. 7246 in 1959 on ese grounds;

1-The wheat problem cannot solved by reducing acreage id giving high support payents that increase yields;

2-This means more governent in agriculture, not less.

State Reapportioment Constitutional Convention

Reapportionment of State Legislature

STANLEY M. POWELL Legislative Counsel, MFB

For many years the Michigan Farm Bureau membership held that no county should have more than 25% of the seats in the Legislature.

In 1952 we moved to the position that: 1-The House of Representa-

tives should be apportioned on the basis of population. 2-The Senate should be ap-

portioned on the basis of both area and population. This is the Michigan Plan supported by the Michigan Farm Bureau and other groups. It was written into the State Constitu-

tion in the election of 1952. The CIO proposal in that election to reapportion both Houses of the Legislature strictly on the basis of population lost. It lost in all but two of 83 counties.

Of course, the Michigan Plan continues to be under heavy fire from groups who want to reapportion both House and Senate strictly on a basis of population, or who want to abolish the State Senate.

Either of these proposals would center control of the Legislature in four or five counties in southeastern Michigan. So we have a continuing battle.

Situation in 1960. The AFL-CIO continues to drive for reapportionment of the Senate on population basis.

population apportionment of the Michigan Legislature based on the 1950 census would give 51.4% of the representation to four counties in southeastern Michigan. That figure is expected to be higher in 1960. The Legislature will reapportion the House after the 1960 census.

We Need 72,927 **Members This Year**

Will you invite a farm family to join Farm Bureau? Nearly all of us joined Farm Bureau because SOMEBODY INVITED US! People will join for the same reasons you did and thank you for the invitation.

Farm Bureau membership provides an organization to work for legislation farmers want; oppose legislation they don't want. An organization to build marketing services. One that provides many farm supply services. In addition, Farm Bureau membership makes

curity legislation in election years. The Forand bill-H. R. 4700-provides hospital, surgical and nursing home care for So-Security recipients. Estimated cost the first year, \$1.1

Inflation

WALTER W. WIGHTMAN President, Mich. Farm Bureau There are several main causes for the inflation we have: 1-Deficit spending on the

part of the U. S. government. It has balanced the budget five years in the last 15 years. 2-Private debt expansion. 3-The continuous increase in

wages and prices. As wages and prices go up, we price ourselves out of our own and foreign markets. Thirteen

years ago U.S. industry has \$13 billion invested in industry abroad. Today the figure is \$25 billion and means about 1,000,000

jobs gone in the U.S. Between 1940 and 1960 the ederal debt has increased from

\$51 billion to \$285 billions. State and private debts have increased in about the same measure.

The Communists say that to get control of a government there are two steps: Get that government hopelessly in debt, and get control of its agriculture.

The United States has been collecting more than 25% of the national income in taxes, and that is the danger line. We're eating up our capital.

Federal aid in many instances is another way of saying that 1-Eliminate allotments and billion over a four-year period you are using your own money, and maybe coming out on the short end of the deal.

There is a federal aid school are in addition to the Defense bill at Washington that will cost

turn of the century.

IN THE SERVICE OF THE his farm income and became FARMER is the autobiography of a man, Clark L. Brody, and an organization, the Michigan Farm Bureau. The story of one is inseparable from the story of the other.

Mr. Brody grew up on a farm in the 1880's and '90's when men still farmed as their fathers and grandfathers had. His family experienced "exploitation" of the farmer, he witnessed the rise of the Populists and the Grange, and he saw William Jennings Bryan exercise the sympathies of the farmer.

After he had studied scientific farming at the Michigan Agricultural College, Mr. Brody began to farm on his own. He took up educational extension work to supplement

Address ... RFD No. Post Office

In constitutional government t is essential that minorities have protection against willful action of majorities. A majority can take care of itself.

Michigan's pattern of apportionment follows the pattern in Congress. The House is elected on a basis of population, and the Senate is elected with relationship to area and people.

Constitutional **Convention** Issue

STANLEY M. POWELL Legislative Counsel, MFB

The drive for a constitutional convention for Michigan attacks an "old Constitution." As a mat-er of fact, the State Constitution has been amended 60 times by the voters since it was adopted in 1909.

About half the proposals offered have been adopted, the other half rejected.

So the people do weigh these matters.

Some of the things that advocates of a constitutional convention want are things farmers and the Farm Bureau would not like to see happen.

A few years back Democrats wanted a constitutional convention and Republicans were opposed. Now they have flipped positions.

Democrats are now opposed because they want their own brand of reapportionment of the Legislature first.

Present situation. The League of Women Voters and the Junior Chamber of Commerce have joined forces to circulate petitions to place the question of calling a constitutional convention on the ballot April 1, 1961.

Farm Bureau Position. The Farm Bureau resolutions on this subject indicate, that Farm Bureau will oppose signing the petitions, will oppose the changes proposed in the calling of the convention, and will urge that the voters vote "NO."

The plan of action for a constitutional convention as pro-posed by the League of Women one eligible for these special services:

1-Blue Cross-Blue Shield hospital-surgical-medical protection on the GROUP PLAN through Farm Bureau. 50,000 member families have it! Group plan provides far more benefits than individual plan.

2-Farm Bureau Mutual automobile, farm liability insurance.

3-Farmers Petroleum Cooperative Direct Distribution of motor and heating fuels at savings if DD is operating in the county.

APPLICATION FOR MEMBERSHIP

I hereby apply for membership in the

County Farm Bureau, Michigan Farm Bureau, and the American Farm Bureau, and agree to pay the annual membership dues of \$12.00.

It is agreed that 50 cents of this sum shall be for a year's subscription to the Michigan Farm News; that \$1.00 is to be applied as my annual dues to the American Farm Bureau Federation of which 25 cents is for a year's subscription to the Nation's Agriculture.

Present Day Issues in School Reorganization

Community Farm Bureau Discussion Topic for February

Background Material for Program in February by Our 1,572 Community Farm Bureau Discussion Groups

> DONALD D. KINSEY Coordinator of Education and Research

During the 19th century the one-room country school became so deeply rooted in American tradition that it seemed as secure as the Rock of Gibralter. Most American children received their training within its walls. But then-most of the population were farmers.

So confident were rural people that the little country school house would stand forever - unchanged, that they designed a "standard school" building - a "final answer to school building needs." But changes are as sure and as powerful as the movements of a glacier.

The twentieth century saw many new developments - among them the automobile. City folks massed in dense centers of population and soon outnumbered country folks.

Early Consolidations. The motor car has had a powerful effect on the school systems. In the early 1900's it was unthinkable to send a child more than two or three miles to the schoolhouse. Today, in some localities, children travel fifty miles or more to reach the school.
