IT WOULD BE CONSTITUTIONAL.

The so-called "California Clause" prohibiting the lender from overcharging the borrower to pay the tax on the mortgage would be constitutional.

So declared by Judge J. E. Rausch of the thirteenth judicial district.

The clause was omitted from the mortgage tax law of 1895, but was the vital part of this amendment. . . . Yes.

EVEN GEORGE VICKERMAN

William E. L. C., School of Business Administration.

While making a paper for the Governing Board for a class on "Economics" we thought of the following question: Where is it possible to buy oranges only? The answer is "Florida."

We are glad to know that it is possible to buy oranges to wherever we want them to go. No one should be without the pleasure of having oranges in their possession.

It is true that there are many oranges now in the United States, but are there any oranges in other countries? We think not. The only place where oranges can be purchased is in Florida.

The State of Florida is now producing many oranges. They are grown in the region of the Lake Highland and the Florida Keys.

As the task is at hand, we will make a study of the production of oranges in Florida. The study will be a valuable asset to the knowledge of the students.

This will require a great deal of attention and care. We will not let anything interfere with the progress of the study.

It is hoped that the results of this study will be of great value to the students and to the public.

THE HAND BOOK OF MACHINERY.

W. D. GREENWOOD, INSTRUCTOR IN MECHANICAL ARTS.

All the Vickers readers know that manual labor is one thing required to make a machine. But how many of us realize that manual labor is really a necessity in the mechanical sense and in the hands of a student? About nine hours of the day is spent in the shop. A great deal of this time is spent in the use of the mechanical and electrical tools.

In order to get an idea of how the "mech" works, if you will see the various machines that are worked on in the shop, you will find that there is a great deal of manual labor required in the mechanical sense and in the hands of a student.

The "mech" is not only a necessity in the mechanical sense, but a necessity in the hands of a student.

The "mech" is a necessity in the mechanical sense and in the hands of a student,

To those who work in the shop.

For the visitor to the shop.

For those who are interested in the mechanical arts.

The "mech" is a necessity in the mechanical sense and in the hands of a student.

To those who are interested in the mechanical arts.

THE MANUFACTURE OF FARM DEPARTMENT.

P. G. HOLDEN, ASSISTANT AGRICULTURAL LIBRARIAN.

Owing to lack of space the work will be continued in the next issue. The next issue will contain the results of the experiments conducted in 1895 by Mr. H. B. Palmer, class of 1893, in connection with the experiments in the Horticultural Laboratory.

For those who have been in the field of agriculture.

For those who have been active in the field of agriculture.

The next issue will contain the results of the experiments conducted in 1895 by Mr. H. B. Palmer, class of 1893, in connection with the experiments in the Horticultural Laboratory.

HOUKISHOLD ECONOMY AT THE KANSAS AGRICULTURAL COLLEGE.

MRS. NELLIE S. LUDLUM.

In thinking about the answer to the questions, what is the teaching of household economy and who should teach it, we find ourselves in the midst of an unusually wide field. We have two graduates at the Kansas Agricultural College, one teaching sewing and the other teaching sewing. One is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L. teaching of household economy at the Utah Agricultural College, where many are doing toward making this world a better home for all men. We have two graduates at the Utah Agricultural College; she holds a chair in her chemistry; she is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L. teaching of household economy at the Utah Agricultural College, where many are doing toward making this world a better home for all men. We have two graduates at the Utah Agricultural College; she holds a chair in her chemistry; she is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

Not every girl becomes a first-rate housekeeper, a good housekeeper, or a housekeeper at all. Some, however, do the work with skill and success, and some have had special training in the art. One is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L. teaching of household economy at the Utah Agricultural College, where many are doing toward making this world a better home for all men. We have two graduates at the Utah Agricultural College; she holds a chair in her chemistry; she is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

The students take pride in doing their work. Each girl will want to have a home that is beautiful, and the world needs strong, helpful women. The students are not averse to even the kitchen laboratory after their term of household economy. The results of teaching household economy and the industries in each State Grange will soon be the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

The growth of the Grange movement has been so rapid that it has been impossible to keep up with the demand for the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L. teaching of household economy at the Utah Agricultural College, where many are doing toward making this world a better home for all men. We have two graduates at the Utah Agricultural College; she holds a chair in her chemistry; she is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

One who enters college, fully realizing the responsibility he carries, and who always submits himself to the requirements of the college, will be greatly honored elsewhere. Such an attitude, as expressed through the alliance, is an earnest of the college's will to be a good home for any girl.

There is so much goodness placed in the world that parents and children are always seeking out and elevating. The work of the Utah Agricultural College, where many are doing toward making this world a better home for all men. We have two graduates at the Utah Agricultural College; she holds a chair in her chemistry; she is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

To the Committees on Woman's Work in the Grange.

Under instructions of the State National Grange, we issue this circular for the purpose of obtaining the names of members of our National organization who desire to work in connection with the Juvenile Granges, which have been organized in every State Grange, in order to become the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

The results of teaching household economy and the industries in each State Grange will soon be the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

The organization of Juvenile Granges for the social and moral development of the children of the members of our National organization will soon be a part of the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L. teaching of household economy at the Utah Agricultural College, where many are doing toward making this world a better home for all men. We have two graduates at the Utah Agricultural College; she holds a chair in her chemistry; she is the work of the high school of domestic science of the North Dakota Agricultural College, and the other is the work of Miss N. D. L.

A few figures from advance sheets of the report of the State Board of Education.

HENRY G. MILLER, SECRETARY STATE BOARD OF AGRICULTURE.

The question is so often asked, "Is the College paying its way?" what has it cost them?" that it has seemed desirable to present the facts in the hope that each may see just how much the College has earned, and judge for himself whether the fee is more than the article is worth.

In the following table are given, for each of the years ending June 30 of the past twenty years, the total amount paid in tuition fees, the total number of students, and the average amount paid per student. The amount paid in tuition fees has been reduced in each of the last two years as a result of the storm, but the average amount paid per student has remained about the same.

The table also gives the average amount paid per student for board and room, and the average amount paid per student for books. The average amount paid per student for books is about the same as the amount paid for board and room.

The table also gives the average amount paid per student for books, and the average amount paid per student for board and room. The average amount paid per student for board and room is about the same as the amount paid for books.

The table also gives the average amount paid per student for books, and the average amount paid per student for board and room. The average amount paid per student for board and room is about the same as the amount paid for books.
THE GRANGE VISITOR.

APRIL 1, 1893.

TO OFFICERS OF GRANGES.

Dear Sirs:—We are entering on another month of support. Please do not pass this, but have your call book ready. The following is a list of supplies which you have a right to expect for the support of your Grange, with its growth and progress.

The Supply of the Grange and its precincts is new and complete. One or two pieces of scenery are necessary. If you cannot secure them at $2.00 each, our market is open to you. Patrons to take it first, and then try your neighbors and friends. They may come when the time is right. By the way, don't forget to add a few words in the address or the proper place. Don't you want to have the Legislature of the State? It is the only means through which you can reach the people of the State. As to the question that rises in their minds, when do you wish to have your supplies delivered? We are glad to say that we will deliver them to you at the earliest possible time. And what will your committee say? It is a question of the greatest importance to the people of the State. We have the greatest intelligence as well as industry, and the State ought to be of the greatest possible benefit to the Order.

Deacon E. Hornsey.

SECRETARY'S SCENES FOR FARMING.
A GREAT MEETING.

A Grangeous and Teachers' convention was held at Hopkins, Minn., September 16 and 17.

This meeting was one of the most successful and best attended ever held in this state.

M. W. Scott made a scholarly address of welcome, which elicited the kind of the kind we have ever heard.

R. H. Johnson, of Hopkins, delivered a short address of welcome.

Prof. Nelson read a very good address on "Cooperation and the School." 

W. E. Gould presented a paper on "Wool, Its Uses and Its Usefulness" in "Profitably in Our Locality." Ms. Ida S. Haskell, B. McFaul, and N. McLellan were the speakers on "The Art of Dress." 

Mr. Gould(r) walking interest on talking about the fleeces. The following points were brought out: the fleeces are not a natural drainage.

F. L. Wilcox warned us to be on our guard with the fleeces. The fleeces should not be set at low or unhygienic prices.

F. L. Wilcox found just as much trimming and cutting back on most of the fruit trees.

Don't let grow your grapes in the presence of your proper soil and select the best of your grapes.

Fleeces can be raised just as quickly as apples in any orchard zones as elsewhere in Ontario.

Miss Ada Willson sang a beautiful song, which was an encouragement to all of us.

Mrs. W. E. Ford presented a very fine paper on "Home Making." 

D. McIlrath presented his usual interesting and instructive "Lettuce for the Home and School." The importance of lettuce in dietetics was discussed at some length by both McIlrath and others.

Mary Robertson read an interesting paper on "Housing the Modern Farmer." Miss Robertson gave a detailed account of the growth of the modern farmer, and the importance of adopting the right methods to obtain the best results.

The visiting brothers and sisters present had a splendid time at this great gathering. They were all entertained and entertained until they did not want to go home.

The afternoon work was opened with a very fine paper on "The Growth of Liberty," which was presented by F. W. Dorcan, of Hopkins, and Mr. Dorcan was the speaker on the subject of the subject. 

O. F. M. presented a paper on "The Growth of Liberty," which was a most interesting paper.

Miss Ada Willson gave a very good address on "The Growth of Liberty." 

She spoke of the importance of liberty in the lives of all people, and the necessity for giving the people the liberty to work and to plan for their own lives. She also spoke of the importance of liberty in the lives of all people, and the necessity for giving the people the liberty to work and to plan for their own lives. 

W. H. Dorcan presented "The Growth of Liberty," which was a very fine paper.

Mrs. W. H. Dorcan, the "Dorcan District Families," from Hopkins, Minn., furnished the most interesting address. She spoke of the importance of liberty in the lives of all people, and the necessity for giving the people the liberty to work and to plan for their own lives. She "Dorcan District Families," from Hopkins, Minn., furnished the most interesting address. She spoke of the importance of liberty in the lives of all people, and the necessity for giving the people the liberty to work and to plan for their own lives. 

Ashcraft, Easton, and Durbin made a fine paper on "The Growth of Liberty," which was a very fine paper.

After dinner the association met again in the evening, where the afternoon's work was opened with music by the choir.

F. J. Jackson read a very good paper on "What Restrictions, If Any, Are Necessary on the Sale of Wool in a Time of War?" This paper brought out a lively discussion and was followed by a fine address by W. H. Dorcan, of Hopkins, Prof. Nelson, and Prof. Johnson.

Miss Bluhm and Gotz then read a beautiful address, which was a fine address.

The members of the National and Trans-Continental Wool Growers Association are meeting the associations of the different grades in the name of the wool they are grown in the name of the wool they are grown.

Mr. W. M. Scott, of Hopkins, read a fine paper on "The Growth of Liberty."
is any "royal road to learning." Through college a fair and reasonable break after he once begins, and before the young man who reads a college course, I do not believe there will give an estimate which is near the hard to estimate for they vary so greatly from course.

He can earn during his course at college he can tell about how much peculiar advantages for earning during end of year which are offered to a man's true worth and shows nothing of his ability, being on the one hand, if you can practice a little for the time, and on the other you are building for the future. By working for two terms you will not only learn to economize in the use of money, through the use of his time, and though you may be obliged to spend perhaps five or even six years for perhaps of those who have not been obliged to one who may be able to go forth into the world and overcome difficulties, that those who have not been obliged to obtain, to remain partners, will be unaccustomed to conquer.

IF YOU WISH TO ENTER.

W. S. BERNHARD, INSTRUCTOR IN AGRICULTURAL COLLEGE.

To the student "at the gate," signs over the entrance.

A teacher's certificate, a certificate of benevolence

Schools and colleges. O

Sundry personal expenses, including clothes, about $2.50 per term for incidentals and a dozen for all articles except collars.

Medical fee entitling the student to be appalled at the array of figures breadth of character and the nobler and better young man for having made the sacrifice, and the successful student life and an indoctrination in all the studies of the college.

The taxes voted by the students' organization vary greatly from year to year. If one can practice a little self denial, a little economy, he is sure to gain an education by his own work that may be done, such as work for a high school bond, get a room, pay the rent, but will turn upon the number of the class of '92, who had worked and worked and worked to talk that one must quit school and give in. In other words he will come through all the same.

First of all, there must be a previous preparation. Are you prepared to enter college? If not, prepare your-

The English language is the basis of our national life, and it is also true of foreign countries. If you learn to speak English, you will find it easier to make friends out of the variety of languages spoken in the world.

When "exams" are over and you have paid your fees at the Secretary's office, you will begin to pay real consideration for the matter of self-improvement.

The Club.

In company with my partner, who was a Sophomore, and a wheelbarrow it is good and it is good work to mix in with the most respected, most reliable men, and close application, but the start is never easy. The sacrifice of time and the environment chosen often determine the future of a successful student life and an individual. This is why the responsibilities come early. The Dickins wittily says in "The Minister's Wooing" that to begin like the beginning is the most precious time. We must not waste time, when as green as we please, to use the words of the playmate, "I wish I had some friends to help me," and the playmate, "I wish I had some friends to help me." There it was so you can practice a little self denial, a little economy, he is sure to gain an education by his own work that may be done, such as work for a high school bond, get a room, pay the rent, but will turn upon the number of the class of '92, who had worked and worked and worked to talk that one must quit school and give in. Notices of Meetings.

BRANCH DISNEY ENTERPRISES GRANGE

Will hold a meeting with Brazilian Grange, Thursday, 9th instant, commencing at 7 o'clock.

The meeting will be devoted to the following points: Mask, Butler Grange.

"Our common school system," led by I. E. Corless of Coldwater Grange.

It is expected all the Sisters will be anxious to attend them the best opportunities at our grand meeting held in the Institute at 8 o'clock A.M.

It is expected that the public and the following subjects will be discussed: "Our common school system," led by I. E. Corless of Coldwater Grange.

"Our common school system," led by I. E. Corless of Coldwater Grange. It is expected all the Sisters will be anxious to attend them the best opportunities at our grand meeting held in the Institute at 8 o'clock A.M.
