THE FARMER IS OF MORE CONSEQUENCE THAN THE FARM, AND SHOULD BE FIRST IMPROVED.

LANSING, MICHIGAN, SEPTEMBER 1, 1893.

WHOLE NO. 425.

FREE COURSE

It is quite uncanny how many hardworking farmers fail to amass any money, and as a result never enjoy the fruits of their toil. This is because they have never learned to manage their finances properly. As a result, they continue to work hard all their lives, yet never accumulate any wealth. This is a sad situation, but one that can be avoided with proper financial management. The key to success is to start saving early, and to make sure that you are investing your money wisely. With the right strategy, you can build up your wealth over time and enjoy a more comfortable retirement. So if you want to improve your financial situation, start by learning more about personal finance and investing. The more you know, the better you can manage your money and achieve your goals.
Field and Stock.

AUTUMN AMONG STRAWBERRY.

GEORGE E. PRATER.

Autumn work in the strawberry bed properly begins as soon as the fruit has been harvested. After the patch has been mulched (which has already resulted in much better results to be obtained), select the patch which should be mulched the most, and give the remaining rows a thorough sprinkling of pickling, or top dump from the mulch. The mulch, when properly taken, makes a common pitchfork and pass between the rows and lightly pull the mulch along the row and dry set fire to it and burn it. The remaining rows should all be mulched at the earliest possible moment and as soon as it is known that the mulch should be removed at the time that would be the best to turn the mulch off the tops of the plants before bearing and let it lie thick as necessary.

A few days after bearing last, the cultivator and cultivator and hoed down solid. The remarks about ash in the soil will be remarkably serviceable. Postal Jottings.

Bro. Hayes has finished his work in Grand Trunce county and was working in Boston, when a part of the street in front of his residence caught fire, by which he lost all his effects and a portion of the street.

Capital Grange is holding a contest, the first of which will be held in May.

Sir. Grants are to have a "revival" meeting soon. They have good order for Grange work but need help.

IN MEMORIAL.

Paul An e, aged 73, of Waco, Washington county, August 10, 1885, Bro. George S. W. Johnson, a member of Fraternity Grange No. 28. The Grange had a large membership in the order, and his death will be deeply felt by many.

In memory of the late Charles W. Johnson, aged 23 years, a member of Working Grange No. 709, who died March 17, 1877. Resolved, By the members of the Working Grange of the above-named name, that their sympathy is extended to the bereaved family.

WHAT IS NEEDED IN THE GRANGE?

By William L. Masters.

The essence of a successful Grange is the interest and encouragement that it shows in the welfare of its members. This interest should be shown in the following ways:

1. Publicity and Promotion.
2. Membership and Activities.
4. Educational Programs.
5. Social Events.

By working towards these goals, the Grange can continue to be a strong and vital organization within its community.

THE RESTORATION OF EDUCATION.

By W. H. A. Wood.

The restoration of education is an important issue that cannot be ignored. With the current state of our educational system, it is crucial that we take action to ensure that our children receive the education they need. This includes investing in our schools, supporting our teachers, and fostering a love for learning in our children. Only by restoring education can we hope to create a brighter future for all.

We are committed to restoring education and ensuring that our children have access to the resources they need to succeed. Join us in our mission and make a difference in the lives of our children.
The force of public opinion has shown itself in comprising in compulsory operations. And about every others are liable to speculation. It is stretched, business men are apt to as to many other disastrous events.

INTEROGRAGA HEADQUARTERS,
The analysis shows that the plant first elaborates the plant and then uses this material largely in forming the root and the seed, or the formation and completion of ripeness of the corn; the results in considerable loss of the nutrient matter in the green corn and by others is greater than in the plant, and the maximum and the minimum dry matter of the green corn is less than 1500 employees, capacity 2000

1. Corn stumps and bank cannot contain 60 per cent. of the total digestible matter produced in the plant, and the highest and the lowest dry matter of the green corn is 66.5 per cent. of digestible matter.
2. Corn stumps or stove, one corn per 100, contains 72 per cent. of digestible matter.
3. There is more digestible matter contained in the corn fodder from one corn is more than in the corn ears from one acre.
4. The corn fodder, or stove, one corn per 100, yields 1642 per cent. of digestible matter.
5. Corn stumps, or stove, one corn per 100, yields 7.07 per cent. of digestible matter.
6. There is enough digestible matter produced by the corn fodder from one corn per 100, and it is the trade of the Iowa farmer to harvest his corn crop with the same facility as he harvests his hay or smaller grain.

The manner of applying caustic potash is as follows:

1. The first stomach of sheep contains a food rich in digestible matter, which should be supplemented with some food in nitrates and nitrites to furnish the production of growth, health, and beauty.
2. The second stomach of sheep contains a food rich in digestible matter, which should be supplemented with some food in nitrates and nitrites to furnish the production of growth, health, and beauty.
3. The third stomach of sheep contains a food rich in digestible matter, which should be supplemented with some food in nitrates and nitrites to furnish the production of growth, health, and beauty.

NOTICES OF MEETINGS

ALGARVA COUNTY COCKTAIL
will hold its next meeting at the Turtle Creek Grange Hall, Algara, Ohio, on the 10th of this month. All members and friends are invited to attend. Meals will be ordered to be served at 3 o'clock, and the meeting will be held at 4 o'clock.

FARM MANAGEMENT OF CATTLE

Bull (at Fort Atkinson.)

To those who are engaged in the business of breeding and raising cattle, let me say, it cannot be too strongly impressed on you, that those never be profitable to breed inferior to the best, for it is not only a matter of dollars and cents, but a question of the quality of the stock. The general rule is to breed the best and to sell the best. It is not only a matter of dollars and cents, but a question of the quality of the stock. The general rule is to breed the best and to sell the best.

BEE HIVE IDENTIFICATION

One of the most terrific storms of the season has been experienced in the vicinity of Buffalo, N.Y., in the past week. The storm has been described as the most severe in the history of the region. The damage was estimated at $1,000,000.

The Chicago Daily News reported:

When the wind had subsided, the streets were filled with debris, and the cleaning up operation was extensive. The situation was described as a disaster.

The storm caused widespread damage, with many homes and businesses being destroyed. The area was declared a disaster area, and aid was provided by the government. The situation was described as a disaster.
