We believe that this is information that our citizens desire. Few read the reports of the institutions, or even the bills and resolutions of the legislature; consequently, we have no doubt that these articles will be very interesting to all our readers.

We shall try, however, to be accurate and fair about the aims, work, power, or expenses of each institution treated. Our chief aim shall be to make these articles complete, and so that these articles will be very interesting to all our readers.

The greatest difficulty in the way of this is that we are not allowed to accept the office of deputy secretary as the occupant of the executive office is the governor, his private secretary, and an accountant of the board of auditors, of which he is chairman and is either answered by him or assigned to the state of the subject.

The State Department.

The executive clerk acts as the governor's office and the state department, and is either answered by him or assigned to the state of the subject.

Field and Stock.

PROSPECTS FOR THE MICHIGAN CATTLE TRADE. 

In a short article on this subject in May 1894, it was stated that the market for cattle in the United States is of benefit to all those engaged in the industry, and that we are more fortunate in this country than over production. Let us see what has happened in the past year, and what our prospects are for the future of business, and without doubt we shall find ourselves in a position to conclude the season with a profit. We have been strong advocates of the proper management of the flock among our farming communities, and we have beensuccessful in dipping sheep; how often, at what intervals, and with what results. If your chicks have the gapes try a single drop of turpentine on a crumb of bread. Not too much or it will kill them. The bees in as good condition to store honey as when they cast off. About ten drops of tincture of iron in a pint of drinking water will bleach the legs of your chicks. Move them to a dry place and they will bring 25 cents a dozen. Thrifty chicks make the best layers. Puny and diseased chicks never fill the brood.
WOMAN’S WORK COMMITTEE, ATTENTION.

So many of the committees on woman’s work have recently been active in doing some of the things you want us to do? that we are pretty well put together, in such a way that we are looking to see what we can do in this direction to-day.

I have a number of baby carriages that are really very good, and the women of the society have been watching them very carefully.

Are there any suggestions as to plans for said outing to the city children?

1. To “strike the flag,” is to lower the flag, and to take the colors down.
2. A “flag of truce” is a white flag, displayed to signify that no hostilities are intended.
3. A “flag of furlough” is a white flag, displayed to signify that the bearer is on furlough, and is not subject to arrest.

FLOWER GHOSTS.

Any child who wishes to see a ghost of a flower only to make a very delightful experiment. A small pitcher of water, and a leaf or a twig from a Tomato plant.

I wish it’d go away.

If ’twasn’t for a word,
That awful word of “don’t”
It’s “don’t you make a bit of noise,”
And far more cheering in many ways.

And for the first time met the great master with whose same and own his own were to be made into

MORRIS.-Begun, hear of it?

ELEMENTS OF POLITICAL ECONOMY.

Political economy is Prof. Elly's. "Elements of political economy." Prof. Elly is a political economist, whose work in the economic writer of the day. He has written in a very plain and clear manner, and when read, can be easily followed. It is pointed out in the book, and if you will resort to the query box, which we find your readers. This book was exactly suited to my purpose, and is therefore peculiarly adapted to the use of the Home House classes.

There are a great many realists who say that they don't know very much about political economy, and would like to get in- terested in it. They will, however, find this a very good book to read during the spring and summer, because you can pick it up while waiting for din- ner, and at the same time, it is the book that will be interesting your time.

The price of the book to members of the Grange is $2.00.

FROM EX-PRESIDENT WILLIAMS.

The following is an extract from a letter which I have written to him, and which he has authorized me to publish. It was written to him after the recent banquet tendered Hon. Frank-

"The price of the book to members of the Grange is $2.00.

A correspondent in Branch county asks for the address of a physician who has treated him for the cure of a disease for which he has been treated without success. The physician whom he consults is one of the best physicians in this country, and has treated many cases of this kind. The patient wishes to have a consultation with him, and to know what he thinks of the case.

The price of the book to members of the Grange is $2.00.

Bulletin Notes.

DENT VS. FLINT CORN.

Missouri Bulletin. - The general experience in this State is, that dent corn is more favorable to the large variety of soils and climate, and of a higher grade of digestible dry matter. But when carefully grown, it may produce as good results as when grown in the one case on an average of five and ten bushels of corn. But when it is produced upon a large scale as in the latter case, it cannot be grown in such a manner as to secure the best results.

The Horn Fly.

World's Bulletin. - It is advisable for many reasons to purchase stock feed directly from the growers. The agent's commission can then be avoided, the stock is more likely to be true to the description given in the catalogue, and in general is better composed of the better and more desirable kind of stock feed. The price per pound is also lower. Purchasing stock feed directly from the nursery to the purchaser is better than purchasing stock feed stocked in a market, as the stock is more likely to be of better quality and cheaper. Purchasing stock feed stocked in a market is more likely to be of inferior quality and more expensive. It is preferable to purchase those varieties of stock feed which are known to be a success in the particular locality, rather than those which are known to be failures. Care should be taken that the stock feed is free from in- consistencies and adulterations.

Treatment of Raspberry Plants.

Horticultural Bulletin. - The raspberry plants are in a very delicate state at this time, and it is very important to injure the buds on the roots which have grown during the winter. The plants should be about three feet from the ground, and from four to six feet apart according to the variety planted. New cuttings are to be used in all cases where the plants are to be increased. All the other cuttings which come from old plants are, however, to be removed. Cut the plants back to three or four inches, and keep them hand watered until growth is seen. The old canes which have been left out of the ground should, immediately after the fruit is gathered, be pulled up and the soil brought by cultivating the soil between the rows. The fruit should be removed from the ground to prevent the disease from spreading. The fruit should be removed from the ground to prevent the disease from spreading. The fruit should be removed from the ground to prevent the disease from spreading.

And Order Quick.

Before the crop is improved both in quantity and quality by matching the soil about the plants heavily with seaweed, cowdung, barrow, or some other matter in the proportion of one part to five of the land. This keeps the fruit clean, prevents the growth of weeds, and keeps the weeds down.

Money for the Stations.

Secretary Morton has submitted to the commission on agriculture some amendments to his original bill, in relation to the agricultural experiment stations, which, with estimates for reasons which the commission have in their report. This amendment includes the following provisions: The stations to be carried into effect during the present fiscal year 1894-95. The most important is the one that the estimates for the station at a rate of $3,000 per annum, increased to $5,000 per annum for the first three years, and $7,000 per annum for the second three years, and for each year thereafter. This amendment was adopted by the commission.

The Horn Fly.

World's Bulletin. - It is advisable for many reasons to purchase stock feed directly from the growers. The agent's commission can then be avoided, the stock is more likely to be true to the description given in the catalogue, and in general is better composed of the better and more desirable kind of stock feed. The price per pound is also lower. Purchasing stock feed directly from the nursery to the purchaser is better than purchasing stock feed stocked in a market, as the stock is more likely to be of better quality and cheaper. Purchasing stock feed stocked in a market is more likely to be of inferior quality and more expensive. It is preferable to purchase those varieties of stock feed which are known to be a success in the particular locality, rather than those which are known to be failures. Care should be taken that the stock feed is free from in- consistencies and adulterations.

Treatment of Raspberry Plants.

Horticultural Bulletin. - The raspberry plants are in a very delicate state at this time, and it is very important to injure the buds on the roots which have grown during the winter. The plants should be about three feet from the ground, and from four to six feet apart according to the variety planted. New cuttings are to be used in all cases where the plants are to be increased. All the other cuttings which come from old plants are, however, to be removed. Cut the plants back to three or four inches, and keep them hand watered until growth is seen. The old canes which have been left out of the ground should, immediately after the fruit is gathered, be pulled up and the soil brought by cultivating the soil between the rows. THE

PROCESION

HAS STARTED.

Our friends are at work,
They work evenings,
They work in the daytime.
And they are getting
scores of names
for the
VISITOR
at
8
Mos. for 25 Cents

That's all we charge for
the paper if the name
is sent in during
May and June

These People
Are the ones we want:
1. Every Patron of Husband-
y, whether he has ever
taken the paper or not.
2. Every old subscriber whose
time has run out and who
thought times were
too hard to renew for a year.
3. Everyone who "used to
take the paper," but who
hasn't seen it lately.
4. Every neighbor of yours,
who you know will be
pleased to have the paper
if he once looks at it.
5. The teacher of your
district school.
6. Your minister.
7. Your doctor.
8. Your man.
9. Your brother.
10. Your children.
11. Republicans.
12. Every Patron of Husband-
yry, whether he has
ever
sent in his share of the
paper if the name
is sent in during
the year.
13. Everyone who "used to
send the paper" if the name
is sent in during
the year.
14. Everyone who wants to
be able to say to his friends:
"I subscribed to the Grange
visitor and I am getting it.
"15. Everyone who wants to
be able to say to his friends:
"I subscribed to the Grange
visitor and I am getting it.

Your
Way
To
Help
is:
1. Secure sample copies.
2. Distribute sample copies
where they'll do the most
good.
3. Talk about the paper.
4. Show the low offer.
5. Get a patron.
6. Send it to Lansing; and we shall
be truly
The...
