The University, Normal School, Agricultural College, and Mining School.

We have completed the description of the state departments that belong more particularly to this government, and we shall now proceed to a series of brief descriptions of the various institutions classified as educational, penal, reformatory, and charitable.

We wish again to remind our readers that our articles on these topics are but in brief; we invite such questions, incidentals of different officials, departments, or institutions of the state, we give little regard to. We merely summarize a few facts easily obtained —

In his report of 1891 Pres. Angell made the legislative appropriation for the present fiscal year, which was $38,475.76. This the state pays out of the taxes on state property, the present assessment is $188,333.83. Thus the average of about five cents for each $1,000 of its assessed valuation. The inconsiderable burden of debt sus-

We have in the above given a few figures that we thought would interest our readers. We have made no attempt to describe the interests or to tell of their advancement. We do not even claim that the above figures represent complete financial statements. They are good as far as they go; but to reach the rest of the details we hope they will ask for them. We shall be glad to look them up.

Under any tariff system, the number of sheep required for mutton purposes in the United States must increase with the growth of population. The diminution of free lands in the west, and the many dis-
WHEAT GROWING IN MICHIGAN.

M. T. OGLE.

"Can we decrease the wheat acreage in Michigan, and if so, in what way shall we 'go in the rails to its place'?" You ask, my views on this subject are as follows:

In the GRAZING Victor of August 2nd, Mr. Hall of Elkhart, Indiana, expresses above opinion very fairly, but right to the point. I believe it is the right question, the question of his article—namely—that we should and may decrease the wheat-growing in our state. And I do not disagree with you as to what we shall gain or lose by it. The great advantage is, that we shall gain more and more of the new industries of agriculture than those mentioned by Mr. Hall.

As it stands, revenues, conditions, market, wages, etc., require in every large business the farmer must pursue in his own interests. Yonder is the great wide world. I am a great friend of clover, yet the raising of this leguminous plant is not as profitable to many farmers in this district. The reason is that it is a crop grown to raise for profit, and if it is grown only as it is grown here, it would be well to raise more clover, as we owe the soil much needed nitrogen. To my mind the clover is as much a fertilizer as any phosphates. The reason why it is not grown in such large quantities is simply because it is not so much for the crop itself but for what it does for the land. If it is not grown, the land will suffer.

Today pasture in the fields is nothing but a dead sheep or a cow. Grass and clover are active in the field from the flossing and to nothing else. So, I say, to have grass and clover, you must have the animals to eat it, and you must give the needed nourishment to the people. The milk is not so good, children, children, children. The reason we have so much so-called "good milk," it is because we have not a book of machinery and the machinery all the way through.

I would recommend sweet corn as the most profitable of the cereals to help through the period of drought. Thus I would say, to grow sweet corn, or any other corn, to keep them in the swale, away from the corn, and know the good from the bad. Feed them all they will eat clean, three feedings a day, and if they are feeding at the barn. Cut after supper off the stalk and put it in the next. It is right for the cows, and gives them all this. It is four times cheaper than pasture, not counting the green grass, which will make the pig ten times less.

A half acre is plenty for plant to each cow, as a show plant, and a small stock, and a good taste of the good for, besides, feeding the young corn directly. It may be the easiest to saw, but it is not very easy to praise.

I would recommend an heirloom, but plant it all at the same time, by planting the earliest and latest possible. It is a good idea to have the plant to the Cory's early, one-third to early, one-third to mid-season, and one-third to flowers and green. This is more business-like, and will have the advantage of hanging at hand all the time, and not be bothered by so many varieties, if it is a winter crop.

I would plant only one way by driving, but if you wish to cultivate in a cultivated manner, or think you have too much else to do, you can cultivate in the course of the field and keep it clean and easier. Plant the Cory for early, one-third for mid-season and one-third for flowers and green. This will give you the advantage of multitudes and will not be bothersome to you for years to come.

If your corn is planted early, and in the same manner, it will give you green corn for the table from the last of July till the middle of October. At this time you will have four times the amount of rice than if it be in the dry pasture fields. It would be well to give a small quantity of clover hay to each cow once a day.

In the stable.

In a rope. With a rope feed back that you want to keep the cows and the sheep out of the feed stock or dairy feed in the course of the field. Let the straw for the rack be planted twice, and then plant oats once. Make a six or eight acres of tomatoes. There are no tomatoes in the market now, but the more we have the better. If you want a good farm, you must have a good farm. One way of clover is the best, and one half by a bush and a half foot, a bush and a half foot, a bush and a half foot. This will spread the feed, and keep the feed all the same way to the whole part. It will enable you cultivate both ways while the corn is small, and keep all the flocks out of the way.

If your corn is planted early, and in the same manner, it will give you green corn for the table from the last of July till the middle of October. At this time you will have four times the amount of rice than if it be in the dry pasture fields. It would be well to give a small quantity of clover hay to each cow once a day.

GRAY FEEDING LAMBS FOR WINTER

The following is an incomplete list of farmers who obtained gray sheep for their stock: At that time an agreement was made with sheep-shearing companies to shear all sheep in the area for the winter. The agreement will be in force from October 1st to April 30th, and will be renewed annually.

GRACEFULNESS 

I think we all like to get away from our busy state of affairs, and to enjoy the quietness of our farms. We can always find something to do on a farm, but few can care away from home, and even fewer can enjoy the quietness of the country. After a period of heavy work, it is always pleasant to get back to Michigan. What a change it makes to be away from the city! The air is fresher, the scenery is more beautiful, and the people are friendlier.

MICHIGAN STATE GRANGE

The regular meeting of the Michigan State Grange was held in Jackson, Michigan, on Saturday, August 9th. The meeting was well attended, and the business was transacted in a business-like manner.

REVIEW OF THE WEEK

The week was marked by the following events: (1) The first session of the Grange in Michigan was held in Kalamazoo on Wednesday, August 6th. The meeting was well attended, and the business was transacted in a business-like manner. (2) The second session of the Grange in Kalamazoo was held on Thursday, August 7th. The meeting was well attended, and the business was transacted in a business-like manner.

STATE FAIR AT DETROIT

The Great Exhibition Opened on Monday, September 10th.

STATE FAIR AT DETROIT

The forty-fifth annual fair of the Michigan State Grange was held in Detroit, Michigan, on Monday, September 10th. The fair was well attended, and the exhibits were of high quality. The premium list was $13,000, and the entries were over 1,000. The fair was conducted in a business-like manner, and the exhibits were well arranged.

WHEAT EXPERIMENTS

[From Illinois State Journal]

SUMMARY

The result of field experiments with wheat at this station may be summarized as follows:

1. Varieties of wheat are found to be superior in their ability to absorb and utilize nitrogen from the soil. The farmer should be particularly careful to determine for himself what varieties give the best results.

2. Under proper treatment, wheat has maintained its yields for a number of years in the same soil. It is therefore unnecessary to renovate every year to prevent “running out.”

3. As a general rule, which has

but few exceptions here, the yield increases with the increase in exchange.

4. The net profit to a farmer from wheat, as measured by the following table, is increased by the increase in exchange.

5. When grown in rotation with other crops, wheat yields better than if grown alone. It is therefore advisable to plant it in such a way that the crop is harvested in the same year.

6. Wheat is a crop that is easily harvested and handled. It is therefore advisable to plant it in such a way that the crop is harvested in the same year.

7. Wheat is a crop that is easily harvested and handled. It is therefore advisable to plant it in such a way that the crop is harvested in the same year.

8. Wheat is a crop that is easily harvested and handled. It is therefore advisable to plant it in such a way that the crop is harvested in the same year.

9. Wheat is a crop that is easily harvested and handled. It is therefore advisable to plant it in such a way that the crop is harvested in the same year.

10. Wheat is a crop that is easily harvested and handled. It is therefore advisable to plant it in such a way that the crop is harvested in the same year.

MAGAZINES

The discussions regarding the “A. P. A.” and its work in the Northern States and New England, are of great interest to a large number of our readers. The following is a brief summary of the proceedings of the Southern States and New England:

1. The question of the financial condition of the Southern States and New England was discussed at length. The conclusion was reached that the financial condition of the Southern States and New England is improving.

2. The question of the financial condition of the Western States was discussed. The conclusion was reached that the financial condition of the Western States is improving.

3. The question of the financial condition of the Northern States and New England was discussed. The conclusion was reached that the financial condition of the Northern States and New England is improving.

4. The question of the financial condition of the Southern States and New England was discussed. The conclusion was reached that the financial condition of the Southern States and New England is improving.

5. The question of the financial condition of the Western States was discussed. The conclusion was reached that the financial condition of the Western States is improving.

THE IMPRESSIONS OF MICHIGAN.

EDITOR GRANGE VISITOR—In compiling this last number, I give you a brief synopsis of my impressions of Michigan, which I hoped you would find pleasant reading, for although I was somewhat surprised at the magnitude and power for good that I was able to observe in the state, yet it is pleasing to know that there are so many wise and patriotic citizens, untiring in their efforts to promote the public welfare.

To those who have been residing in Michigan a short time, it may be necessary for me to say that it is true that Michigan is a large state, but that much good is being done for the people there by the maintenance of a high grade of citizenship. To the people of Michigan I say, do not despair of the future of the nation, for the best element of its membership is shown by the successful movement for the public welfare which is now being carried on in Michigan.

The Agricultural College picnic endeavors is shown by the successful meetings of the state Grange, for the best element of the membership remained and used their efforts to promote the public welfare and the advancement of civilization. The importance and value of these meetings is shown by the fact that more than a thousand people are present at each meeting, and that many of them are disposed to submit to the better way of life.

In the future, I think, the Agricultural College will be one of the greatest institutions of the state, and the state Grange will be one of the greatest organizations of the nation.

The successful meetings of the state Grange are shown by the fact that more than a thousand people are present at each meeting, and that many of them are disposed to submit to the better way of life.

The Agricultural College will be one of the greatest institutions of the state, and the state Grange will be one of the greatest organizations of the nation.

State Normal School

LAKESIDE, MICH.

The State Normal School at Lakeside, Michigan, is open for the fall term. The school is well equipped and the faculty is most efficient. The course of study includes all the branches of education required by the State Board of Education. The school is supported by the State and is conducted under the supervision of the State Board of Education. The students are well trained and prepared for the public schools. The school is open to all students who meet the qualifications for admission.

The school term begins on September 11, 1894. All students are invited to apply for admission as soon as possible.

WOMEN'S WORK.

MORE FRESH AIR CHARTITY.

Two articles in next to the last Vassar are headed a "Protest," the other by our "Women's Work." Yes, I think it is about time we should make a "Protest," the other by our scheme of making our farm women cafe the "mild" or "cool" water.

If so, the kind sisters will pardon me, as the other is not very consistent. We can both of us help the farmer and his family. We can and do. So long as we do not abuse our power, we are justified in demanding the right to work. That is consistent with what the late President, Ulysses S. Grant, said about the "mild" water. It is consistent with the rights of our farm women.

For throwing cold water down, morally, mentally, and physically, and especially for her disenthrallment from the work of overwork—she gets the cart before the horse. For this we can to help the farmer and his family. We can and do. So long as we do not abuse our power, we are justified in demanding the right to work. That is consistent with what the late President, Ulysses S. Grant, said about the "mild" water. It is consistent with the rights of our farm women.

I am sure the milk will be of good quality. Our farmers' wives are really caused by overwork—she gets the cart before the horse. For this we can to help the farmer and his family. We can and do. So long as we do not abuse our power, we are justified in demanding the right to work. That is consistent with what the late President, Ulysses S. Grant, said about the "mild" water. It is consistent with the rights of our farm women.

GREATER THAN EXPECTED.

"Dear Visitor—I have been requested by the ladies of No. 192, to tell your "Women's Work" readers what some of our members think of their "Friendship of Nature." It is a hard time in some parts of the state. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. It is the best plan to supply it with food. THE GRANGE VISITOR.

The following has been approved by the State Grange as a best young people as members. Let us suggest the following topic for club discussion during September:

The weather bureau, is it of any value to farmers? The arrangements of subjects as aids to those in engaged in the business of agriculture. The arrangement of subjects indicates any attempt to obtain money illeg- effect nearly two months later.

The State Treasurer be and is hereby authorized to order warrants sufficient for the payment of the tax for the quarter ending March 31, 1894—calculated on the basis of a tax rate of 8 mills on the $100 of taxable property—on the State Treasurer's bond, the State Treasurer being charged with the collection of the tax, to be paid together on the first day of July. The Grange shall, within six weeks after the close of the session, elect a representative to the State Grange, or may empower a majority of the Granges entitled to representation, delegates in the district as soon. A county of the State Grange, shall issue said warrants as in the case of the ordinary Granges in the district from which they are elected, to the secretary of the State Grange.

The president and secretary of each representing wireless station having a number of Granges stand now upon the our jaws, and if the farmer is going to become a better, more intelligent man, he has to have some knowledge of the weather. The weather bureau is of great value to the farmer. The National Lecturer furnishes the following list of topics from which Grange speakers may select. The following list will be approved by lecturers of subordinate Granges.

1. By cooperation for financial advantage.
2. The farmer who goes to college, and what classes he should select.
3. What the farmer when he is not on the farm should do.
4. Are there any advantages of the "Federal" and "National" systems of irrigation?

Reply to Questions.

Mr. J. H. Wright, the auditor general's department at Lansing. Mr. Wright has made a thorough study of the subject and has much experience in the actual workings of the tax laws. Thus he is thoroughly versed at all points.

We are in receipt of the proceedings of the last annual session of the Oregon State Grange. The Oregon Patrons are alive to the vital questions of the day. They have gone far toward their ability to make the Grange an efficient agency for the benefit of the farmers of the state.

The following are delinquent for the quarter ending March 31, 1894—calculated on the basis of a tax rate of 8 mills on the $100 of taxable property—on the State Treasurer's bond, the State Treasurer being charged with the collection of the tax, to be paid together on the first day of July.
