magic Recipes
Let's start by explaining Eagle Brand "magic"

There's always a secret to every trick — and it's fun to know how magic recipes get that way.

Maybe you've used these recipes for 20 years without knowing the story. Maybe you're a new bride who has just discovered magic in cooking, to your delighted amazement.

Read on for the "magic" answer... And then read — and try — the recipes. That's the best way to appreciate magic cooking with Eagle Brand Sweetened Condensed Milk!

Why magic recipes are quicker — As you look over the recipes in this book, you'll see that many of them take no cooking at all! That's because Eagle Brand Sweetened Condensed Milk is whole milk blended with pure cane sugar, "cooked down" until it's double-rich. So, it saves you tedious blending and cooking — makes Eagle Brand recipes magically quick!

Why they're so sure — As any chef can tell you, careful blending and cooking is half the trick in making perfect desserts. Eagle Brand (already cooked down until it's creamy-smooth) blends quickly with chocolate, lemons, eggs, and other ingredients. And that's why even a child can get swirly frostings, perfect pie fillings, velvety ice creams every time with Eagle Brand recipes.

Why they're richer-tasting — The creamy richness of Eagle Brand Sweetened Condensed Milk is reflected in every magic dish. Chocolate ones surprise you with an old-fashioned "fudgy" taste. Puddings and pies have a richer flavor. No wonder new brides tell each other enthusiastically, "You must try those wonderful magic recipes!"

They save sugar, butter, cream, too!
Most of these magic recipes take no sugar, no butter. Even rich Bavarian creams, for instance, can be made with half the amount of heavy cream usually used.

important!

Make sure you use Sweetened Condensed Milk — It’s the kind you must use to succeed with the recipes in this book. It’s a blend of milk and sugar — thick, heavy, and rich. You have to remove the whole top of the can to pour it out.

Evaporated Milk won’t work in these recipes — Evaporated milk is milk alone — no sugar added. It’s thin enough to pour from a puncture in the can. Evaporated Milk is fine for many cooking uses — but it can’t succeed in the recipes in this book.

Whipped Borden’s Evaporated Milk may be used in place of heavy or light cream when making ice cream in an automatic refrigerator. When Borden’s evaporated milk is used, you may wish to use a larger quantity of flavoring than is indicated in the following recipes for heavy cream.

To whip Borden’s Evaporated Milk, chill thoroughly before beating. Pour undiluted evaporated milk into refrigerator tray. Place in freezing unit until fine crystals begin to form around the edges. Turn into chilled bowl; beat with chilled beater until stiff.

If you have Eagle Brand left over—you can use it all sorts of ways. For instance, if you make a small batch of ice cream, use the rest of your Eagle Brand in a fudgy chocolate sauce. Or, after you've made a baked custard, there'll be enough Eagle Brand for mayonnaise or salad dressing. And of course, it's always grand in coffee!

**How to keep Eagle Brand.** No refrigeration is necessary. Eagle Brand keeps indefinitely in the unopened can, so keep several cans on hand. Even after Eagle Brand is opened, it keeps much longer than fresh milk or cream. Leave it right in the can, cover with waxed paper or a saucer, and store in your refrigerator.

**How to measure Eagle Brand.** Pour it into a measuring cup or spoon and allow the milk to level itself. If a full can of Eagle Brand is called for, it saves work to pour it directly from the can. (Remember, you must remove the whole lid, because Eagle Brand is too thick and creamy to pour from a hole.)

**Children love it on bread.** Spread a little Eagle Brand Sweetened Condensed Milk on plain bread, and see how the youngsters go for it. It's good for them, too — helps put a little extra milk into their diet.
