50 ways of serving CREAM OF WHEAT
A Food Rich in Energy and so Easy to Digest!

CREAM OF WHEAT is an ideal food—as wholesome as creamy, fresh churned butter, as delicate in flavor as fragrant, new baked bread, as easy to digest as pure, sweet milk.

It is wonderfully rich in energy, yet it imposes no extra tax upon digestion.

For Cream of Wheat is made of the best hard wheat—of that part richest in energy-producing elements which scientists call carbohydrates. And these of all food substances are most easily and quickly digested.

Many foods are rich in energy; many others are easy to digest. But the combination—high energy, quickly released for use, at so little cost to digestion—this is the great value of Cream of Wheat.

After the long fast during the night, the body is in need of a food which will tone it up quickly for the day's work. Your vital morning need is energy. This Cream of Wheat supplies abundantly.

Breakfast Dishes

VARY the breakfast cereal by some of these new ways of serving it. Something new means so much to a child, and even the man of the house is apt to speculate on breakfast with pleasure—if your menus offer more variety.

The water in which the cereal is cooked should be rapidly boiling and the cereal poured in slowly, stirring constantly; in this way there will be no lumps. Fifteen minutes is sufficient time to cook Cream of Wheat for adults and older children. Since all cereals are more digestible for babies if cooked for a longer time, we suggest cooking Cream of Wheat one hour for infants.

Left over cereals may be scrambled with the breakfast eggs and chopped green pepper, parsley or minced ham added.

Creamed eggs may be served on top of buttered Cream of Wheat.

Fresh fruits and berries in season are delicious served with Cream of Wheat. The delicacy of its flavor blends well with all kinds of fruit.

Minced ham, chicken or other meats may be mixed with Cream of Wheat for breakfast.

Bacon, sausage or ham may be served with buttered Cream of Wheat and gravy, for those who like a hearty breakfast.

Bread

THE useful old New England axiom to the effect that every woman and girl should know how to make good bread is sadly out of date these days, for most housewives find neither the time nor the desire to make their bread. Whether they make it or not, it is only fair to the family to vary the monotony by baking frequently batches of quick breads.

Muffins make a delightful variety at the luncheon meal—which is a troublesome one to plan at the best.

Baking powder breads should be mixed up quickly and baked in a hot oven. They are better served hot, but can be reheated very successfully by dampening the top slightly, covering with a paper and heating.

If sour milk is on hand it makes delicious muffins, waffles and pancakes. Substitute for the sweet milk in recipes and use soda instead of baking powder —(1/2 teaspoon of soda to 1 cup of sour milk.)

If waffles are baked on an electric griddle no grease is needed.

Nuts or blueberries may be substituted for the dates in the date muffins and make a pleasing variation.

Vegetables

Here are just a few ways that are a little different in the serving of vegetables. They are especially nice for luncheon dishes and can be gotten together very quickly.

The addition of Cream of Wheat to the luncheon menu will help the children in their afternoon classes. You will find that you have more energy for the endless little jobs that fill your afternoon and are less tired when you have dinner ready.

All vegetables should be cooked in boiling salted water. Asparagus and cauliflower should be boiled gently to keep them from breaking into pieces. Rice, macaroni, and spaghetti should be cooked in rapidly boiling water to prevent sticking.

Soda should not be added to brighten the color of beans, peas or asparagus, as it destroys the vitamins which they contain.

Strong flavored vegetables like onions and cauliflower should be cooked uncovered. A covered vessel causes the vapor to condense; which makes the odor stronger.

When vegetables are scorched, the pan containing them should be set immediately in cold water and allowed to stand for a minute or two. The vegetables should then be transferred to another pan without scraping the bottom; in most cases this will remove all taste of burn.

Salads

There is an old saying that "food is half eaten by the eye". This is particularly true of salads and a light touch must be used in their arrangement. The leaves of lettuce should be placed on the plate in such a way that they will curve crisply around the other salad materials. The other chief requirements of salads are that they must be very cold and that the seasoning must blend well with the materials used.

Dressings should be added just before serving as the vinegar wilts the lettuce.

The salad plants, since they are not to be cooked, must be cleaned very carefully. Each leaf should be separated and the whole plunged into very cold water and allowed to stand for a short time. This will crisp as well as clean it. It should then be drained and dried.

The larger, coarser outside leaves of lettuce should not be thrown away. They may be shredded to use under the salad the next time.

Mayonnaise can be made with the whole egg instead of the yolk with much less chance of curdling, even when the oil is poured in rapidly.

Desserts

MOST housewives are accustomed to think of dessert as an accessory rather than a food. It is poor economy to leave out the dessert which is needed to round out the meal as well as to top it off.

Cream of Wheat lends itself readily to molding without the addition of gelatine, corn starch or other thickening ingredients. The puddings are so attractive in appearance, so good in flavor and so simple to make that they are bound to be favorites with all.

The plain Cream of Wheat puddings may be served in an infinite variety of ways. They may be served cold with cold sauces, crushed fresh fruit or chopped canned fruit or they may be served cold with hot sauces, such as chocolate, vanilla, lemon and innumerable others.

In molding Cream of Wheat the mold should be wet in cold water before the pudding is poured in, so that it can be removed from the mold readily.

If whipped cream is to be used with the puddings, it is better to add a little sugar and flavoring.

The ease with which these puddings can be made is sure to endear them to every housewife; also the fact that they take few or no eggs makes them valuable when eggs are high.
