An astonishing

BLINDFOLD TEST

I never could quite settle in my own mind just why Crisco gave such delicious results until one day I happened to taste Crisco. Then I no longer wondered why Crisco foods tasted so much better.

I wish you would taste Crisco, too, just as it comes from the can. To prove to yourself what a great difference there can be in cooking fats, make this blindfold test:

Put a little Crisco on the tip of one spoon. On the tip of another, place a little of the fat you are now using; have someone blindfold you and give you first one, then the other, fat to taste.

Now, did you ever imagine there could be such a difference in the taste of cooking fats? You will appreciate at once what an improvement there must be in the taste and wholesomeness of pies, cakes, biscuits and fried foods when made with Crisco.
M. Ethel M. Blandford

Test

A test of your ability to concentrate.

You will receive a series of cards, each containing a sentence or a question.

You must read each sentence or question carefully and then decide whether it is true or false.

After you have read all the sentences or questions, you will be asked to write down your answers on a sheet of paper.

Good luck!
