This reproduction of the DEL MONTE can is to familiarize you with the important, distinctive feature of all DEL MONTE packages—the RED DEL MONTE SHIELD—it is your guarantee of goodness, purity and quality, covering a complete line of fruits, vegetables, prunes, raisins, catsup, olives, jellies, jams, preserves and many other varieties.
FOREWORD

At this particular time, when food conservation is receiving such serious consideration, the importance of canned fruits and vegetables, in a properly regulated diet, is becoming more of a factor each day. In preparing the recipes in this book, "Good Things to Eat," I have, therefore, been particularly careful in my study and consideration of the methods of preparing and serving these foods.

Comparatively few people realize the economical value of canned fruits and vegetables and the unlimited variety of ways they may be served in practical and wholesome dishes, dainty salads and desserts as a variation in the daily menu.

It is perhaps safe to say that canned fruits as well as vegetables are, by the majority of people, invariably served just as they come from the can, and this, in time, becomes monotonous and lacking in appetite appeal.

Therefore, my one thought and aim has been to lend variety and tastiness to the daily menu, combining these with healthfulness, and, I believe, I have succeeded in giving you recipes that will be a very real help to you. Each recipe I have originated with this in view, and each has been prepared and thoroughly tested by me. If the directions that I have given are followed, you may rest assured that each dish will prove a success.

In this connection, however, it might be well to say that in the description of these recipes where "one can" is mentioned I
refer to the generally recognized standard can of each particular variety of fruits and vegetables. In fruits, the No. 2½ can is the customary size one generally finds on the grocers’ shelves; likewise, for such vegetables as tomatoes, pumpkin, etc. For varieties such as corn, string-beans, peas, etc., the No. 2 can is the one you ordinarily and commonly find sold. With proper judgment, there should be no difficulty in this respect in preparing these dishes.

I wish particularly to mention the fact that the unfailing quality and goodness of Del Monte Products have greatly facilitated my efforts and made my work in preparing these recipes for you more interesting and pleasurable.

From the standpoint of health, Del Monte Products are perfectly prepared and afford the housewife the possibility of having the choicest and best of orchards and gardens to meet every demand of this important part of the daily dietary.

In closing let me assure you that I know Del Monte Products are all that is claimed for them, and I personally assure you of their goodness, purity and quality.

CALIFORNIA’S FINEST FRUITS AND VEGETABLES

California, so rich in romance and tradition, is particularly favored with many beautiful names that hark back to the days when the Spanish padres reared their quaint old missions in many of its mountain valleys. Of these none is so typical of the love these gentle folk bore for their adopted home as “DEL MONTE,” meaning “of the mountain.”

The first of California’s cultivated fruits came with the padres, who converted virgin valleys into gardens where pears, peaches, grapes, olives and other fruits grew luxuriantly; in fact, these primitive plantings may be considered the forerunner of the now world-famous fruits of California— the finest of which are today carefully selected and packed under the “DEL MONTE” Brand.

California is a land of distance and extreme in its climatic conditions. It has practically every degree of temperature and climate; its elevation varies from sections below the level of the sea to mountain peaks of perpetual snow, and it has every character of soil, from yucca sand wastes and alkali deserts to the richest and most fertile valleys in the world.

There are thousands of fruit-producing acres in this wonderful State, but soil, temperature, moisture and general climatic conditions are such controlling factors in the production of quality fruits, it is not surprising to find the finest of California fruits restricted to certain sections and valleys where all these conditions are ideal for each respective variety.

In pursuance of the Del Monte quality policy “packed where grown,” adopted many years ago to meet these peculiarities of nature, our many modern canneries are not only established in all the important localities of California where preferred varieties of fruits and vegetables grow to their highest degree of perfection,
California covers an enormous area, equal to the combined areas of New York, New Jersey, Massachusetts, Rhode Island, Vermont, New Hampshire, Maine, Connecticut, Delaware and Ohio.

It has almost every degree of temperature, elevation and character of soil including those which are peculiarly favorable to the cultivation of fruits and vegetables - thousands of California’s acres producing these products.

In the selection of fruit from the districts where each variety is grown to its highest degree of perfection, the packers of Del Monte, with over sixty establishments, occupy an enviable position in securing fruits of quality for which the Del Monte Brand is justly famous.

The packers of Del Monte have one or more canneries or dried fruit establishments in the districts in California, indicated thus (•). They also have many canneries located at other points on the Pacific Coast, and in adjacent States, as well as in the Hawaiian Islands.
but, likewise, at other strategic points on the Pacific Coast, including Alaska, the home of our great salmon industry, and the Hawaiian Islands where the most delicious of pineapples grow.

Back of this organization is a rigid system of inspection and supervision following every step of the process from the growing of the product itself to the time it is sealed within the can. This organization includes many of the most experienced fruit canners in California—men and women who have made fruit canning methods a lifelong study and know what good fruits are and how they should be packed.

Aside from our own orchards and farms in California and our own pineapple plantations and canneries in the Hawaiian Islands, where our products are grown and canned under direct supervision, our experts are constantly encouraging other growers to raise fruits and vegetables in such a way that they will be suitable for the high standard of quality maintained for the Del Monte pack.

Truly may it be said that Del Monte fruits are "packed where they ripen the day they are picked," and could you but visit one of the Del Monte canneries, you would begin to understand how Del Monte Products retain so wonderfully the natural flavor that seems to bring the very breath of California's orchards and sunshine to your table. Our business is national in its scope and a real service to you. It has required years to bring it to its present state of efficiency, and the superior quality of our goods has been attested and acknowledged through awards, medals, and honors received at scores of Expositions the world over. It is only when you realize the thousand and one important details of our business that you can begin to understand why the red Del Monte Shield on every package is your assurance of goodness, purity and quality throughout a full line of canned fruits and vegetables.

COMPARATIVE FOOD VALUE OF RAISINS

Every day, dietitians and physicians are recommending the more extensive use of raisins in the daily menu. This is due to certain inherent, laxative properties and to the remarkable percentage of energizing matter in this fruit. The U. S. Department of Agriculture has recognized these properties in the following comparison of food values:

1 lb. of Raisins equals 1 1/2 lbs. of beef
1 lb. of Raisins equals 4 3/4 lbs. of fish
1 lb. of Raisins equals 1 lb. of bread
1 lb. of Raisins equals 4 1/4 lbs. of potatoes
1 lb. of Raisins equals 4 lbs. of milk
1 lb. of Raisins equals 2 lbs. of eggs
1 lb. of Raisins equals 6 lbs. of apples
1 lb. of Raisins equals 5 lbs. of bananas

The economy of making the raisin a staple of the diet is strongly emphasized by a comparison of relative prices with the above tabulated foods. Aside from their nutritive food values, raisins properly used and prepared, lend an appetizing touch to an unlimited variety of dishes. In fact, there is hardly any cookery where raisins cannot in some way be used.

All first-class grocers handle Del Monte Brand, but if by any chance your grocer does not have in stock some certain variety that you require, request him to get it through his jobber. Or if you will send us your grocer’s name and address, we will mail him a complete list, together with sizes of cans and other details with which he should be familiar.

**Del Monte Apricots** are brought to you with all the exquisite taste of the tree-ripened fruit. Comparatively few sections of California, however, produce apricots suitable for the high standard of quality maintained under the Del Monte Brand. Packed Halves, Slices and Whole.

**Del Monte Berries:**—“Berries all the year round” is an expression indicative of the bounty of California. Del Monte Berries
are packed only at the height of the season, when size and flavor have reached their maximum. Blackberries, Gooseberries, Loganberries, Raspberries and Strawberries—all are packed in nothing but their own delicious juices and pure granulated sugar.

**DEL MONTE CHERRIES:** The excellence of Del Monte Cherries is due to the careful selection of quality fruit from the best cherry districts in California. Three varieties are packed: Black Tartarian, Royal Anne and White.

**DEL MONTE GRAPES:** California is known as the Vineland of America for its many varieties of wonderful grapes. Here, from vineyards of many years cultivation, are selected the delicately flavored Muscatels for the Del Monte Brand. Delicious to eat served out of the can or may be used in many ways in dainty salads and desserts.

**DEL MONTE PEARS:** The exquisite flavor of the California Bartlett Pear is retained in all its delicacy through the Del Monte way of selection and packing. Whether served ice cold for breakfast or in a tasty salad or dessert, their flavor seems to bring the very breath of California’s orchards to your table.

**DEL MONTE PEACHES** are the finest grown in the most favored peach districts of California. Three varieties are packed in Halves—Yellow Clings, Yellow Frees and White Clings. Sliced Yellow Clings and White Clings are also packed. Extraordinarily large Yellow Clings are specially packed as “Melba Halves” for those who want particularly large peaches. Whole Peaches are also packed in tall cylinder cans.

**DEL MONTE PLUMS:** California is noted for its great variety of plums. Under the Del Monte Brand three varieties are packed: Green Gage, Egg and De Luxe. All are equally good, but the De Luxe variety, a sweet purple plum, is a most delicious fruit for breakfast.

**DEL MONTE STEWED PRUNES** are the very best of California’s Prunes. They contain a large percentage of sugar, are exceptionally fine flavored, are specially prepared in a heavy sirup and are ready to serve as they come from the can.
DEL MONTE "KALIPAK" PRUNES:— The finest quality of California Prunes, dry cooked and packed solid in the cans without sirup. Delicious as a confection and may be eaten as they are, or may be easily and quickly prepared in many delicious ways for the table. Del Monte "Kalipak" Prunes are replacing the old-style dried prunes in millions of homes on account of their ease of preparation and their sanitary manner of packing.

DEL MONTE PINEAPPLE is Hawaiian and the very best of Hawaiian. It is picked just when the warm semi-tropical climate of the Hawaiian Islands has perfectly ripened it, and packed immediately in such a way that all of its natural flavor is preserved. Del Monte gives you all the rare deliciousness of Hawaiian Pineapple right out of the field. Nothing more delicious as a fruit for breakfast or as a dessert or in a salad for lunch or dinner. Packed in three ways, Sliced, Grated, and in small pieces, called Tid Bits.

DEL MONTE PRESERVES, JELLIES AND JAMS are absolutely pure and are prepared from fully ripened fruits and berries and granulated sugar. Packed mostly in glass and in many varieties—Apricot, Blackberry, Cherry, Fig, Loganberry, Orange, Peach, Plum, Raspberry and Strawberry.

DEL MONTE CHERRIES—(Maraschino Type). Prepared from fully ripened Royal Annes from the best cherry districts in California. The finishing touch for fruit punches, salads, cakes, ices and confections. Packed in various sized bottles.

DEL MONTE CRANBERRY SAUCE is prepared from selected Cape Cod Cranberries and granulated sugar, and is ready to serve with your turkey.

DEL MONTE HONEY is absolutely pure and the finest variety of Wild Mountain Sage, packed both strained and with comb.

DEL MONTE RIPE OLIVES:— Every one who visits California is carried away with the deliciousness of California Ripe Olives. They appeal instantly to discriminating epicures and those who like good things to eat. Under the Del Monte Brand are packed the very
best of selected Mission and Manzanillo varieties. They are selected as to size: Medium, Large, Extra Large and Mammoth and packed in cans as well as glass.

**DEL MONTE OLIVE RELISH:** – An appetizing relish made from Ripe Olives and especially delicious for sandwiches, salads and meats.

**DEL MONTE ARTICHOKE**S are ready to serve right out of the can as a salad with mayonnaise, mustard or French dressing. May also be served in other innumerable ways. Packed according to size running one, two, four or six to the can.

**DEL MONTE ASPARAGUS:** – Asparagus is grown to a degree of perfection in California unequalled in any other part of the world, but only the rich Delta Lands of the Sacramento River of California produce that thoroughbred stock so characteristic of the quality of the DEL MONTE Brand. Once you taste its goodness, you will realize how the DEL MONTE way of selection and packing brings to you all the natural deliciousness of California’s Delta Land Asparagus.

In large cans both the Green and White varieties are packed in several sized spears — Giant, Colossal, Mammoth, Large and Medium. The short spears, known as “Tips,” are packed in small cans, both White and Green, graded as to size of spear — Giant, Mammoth, Large, Medium and Small.

**DEL MONTE PEELED GREEN CHILI PEPPERS:** – Nowhere in the world do chili peppers thrive so well and reach such size and quality as in Southern California where the DEL MONTE kind are packed. They are used in soups, meats, stews, sandwiches, egg dishes and especially in the preparation of Spanish dishes.

**DEL MONTE RED PIMIENTOS** are rapidly becoming a staple in every household. These ripe sweet peppers are grown in the warm climate of Southern California and only the most perfect ripe red fruit is used for the DEL MONTE Brand. Their use is similar to that of chili peppers, but they are particularly delicious and desirable for stuffing, for salads and garnishes.
DEL MONTE MISCELLANEOUS VEGETABLES: — Del Monte stands for such vegetables as only the most favored garden sections can grow. They are so carefully selected and packed with such discriminating care that they reach you as delicious in taste as fresh vegetables from your own garden. All staple varieties are packed: — Lima Beans, String Beans, Wax Beans, Beets, Cabbage, Carrots, Corn, Hominy, Peas, Pumpkin, Sauerkraut, Spinach, Sprouts, Squash, Succotash, Sweet Potatoes, Tomatoes and Turnips—all Del Monte in quality, delicious, wholesome and most economical.

DEL MONTE TOMATO SAUCE is prepared from selected red ripe tomatoes, fresh peppers and other pure seasoning ingredients. Unexcelled for hot or cold meats, soups, macaroni or other pastes, boiled or baked beans and rice. It also makes a delicious cocktail sauce—in fact may be used in innumerable ways.

DEL MONTE CATSUP: — There is no purer or better catsup made than Del Monte. Its formula has been developed after the result of years of experience with the assistance of experts of high national standing in the manufacture of this product. Del Monte Tomato Catsup is prepared from fresh, vine-ripened California tomatoes, and so blended and seasoned as to meet the approval of the most discriminating taste.

DEL MONTE RAISINS are the dependable kind for your Plum Pudding, Mince Meat, Fruit Cake, Raisin Bread—in fact, for all purposes where good raisins are wanted. Whether the delicately flavored, thin-skinned seedless variety—the meaty sweet Muscatels, automatically seeded by machinery, or the fancy clusters for the fruit and nut dish—all are the very best raisins that California produces.

MANY OTHER VARIETIES of staple food products are packed under the Del Monte Brand, and each is given that discriminating care in selection and packing that so characterizes the quality of every item in the line.

Look for the Red Del Monte Shield on every can as it is your guarantee of quality and satisfaction.

CALIFORNIA PACKING CORPORATION.
THE RIGHT WAY TO OPEN CANS

Comparatively few people know how to properly open a can. When opening a can of Pineapple, or especially Asparagus and Salmon, we wish to emphasize the advantage of opening the can around the side directly under the rim or cover instead of on the top. The old method of sticking the opener in the top too often results in injury to the hands and in mutilated contents. The new method gives you a smooth instead of a jagged edge, from which the contents may be removed from the can without injury.

Sliced Pineapple, Salmon, Asparagus and various other varieties of canned products cannot properly be removed from a can unless the opening is made on the side.

Therefore, to properly open a can: - First remove the label so as to expose the seam on the side of the can, lay the can on its side and insert the opener directly next to the seam and close to the top, as shown in Figure I, then hold the can firmly on the table in an upright position and work the opener away from the seam until you have cut entirely around the can, as shown in Figure II.

You can then turn back the entire top and remove the contents in perfect condition.

The "Home Can Opener," shown in these illustrations, may be obtained from your grocer or hardware dealer.
