Are you serving a Variety of Breads?

Wide variety in meats, in salads and desserts one takes as a matter of course. Are you neglecting the appeal of variety in breads? For breakfast, for luncheon, for dinner—there is no end to the delicious breads that are quickly and easily made. Breads that delight the family and add a touch of sophistication to the formal meal.
It is a mistake to suppose that it requires a "born knack" to bake—even the most inexperienced housekeeper will achieve splendid results if she follows these recipes carefully. Every one of them has been perfected through careful testing.

How to Use Yeast

In baking bread, one of the most important points to consider is the yeast. It should be pure, so that you can place absolute dependence upon it, and it should be complete so that you will be saved the time and bother of adding potatoes or sealed flour to start it.

Keep your yeast with care. Wherever possible, keep it in an ice-box, where it will be dry as well as cold. Where ice is not obtainable, and yeast cannot be procured fresh for each baking, it may be kept in good condition for a week or ten days in a cellar or other cool place. Wrap any unused portion carefully in tinfoil.
Yeast is a plant requiring warmth, air and moisture for its growth. An excess of either heat or cold kills it. In adding liquids to it, always see that they are lukewarm. The flour should also be warmed in cold weather.

When time counts in the preparation of any of these Breads, use additional yeast; you will save precious minutes in the "hurrying" of a meal, and also add to the quality of the Bread.

Though Fleischmann's Yeast may discolor at times, this in no way impairs its quality. So long as it is firm it is good to use.

When it becomes too soft to handle, do not use it.

Remember the name—Fleischmann's Yeast. Standard of Yeast Excellence for 53 years.

**MIXING**

Measure the liquid into a bowl and add the sugar. Sugar assists the fermentation. Next crumble in the required quantity of yeast. Allow to stand six or eight minutes, add the shortening and sift in slowly about one-half of the flour, or enough to form a smooth, light batter. Beat this thoroughly, so that the yeast may be well distributed, adding balance of flour.

The salt may be dissolved separately in a little water before being added, or it may be used dry as described in the recipes. The latter method is simpler, but has no other advantage.
KNEADING

The dough must not be chilled, therefore, knead quickly and lightly until it is smooth and elastic and does not stick to the fingers or to the board. In kneading, the dough should be pushed with the palms of the hands, fingers curved to prevent dough from flattening out too much. With every push it should be turned one-quarter way round and folded over. To be sure that all parts of the dough are kneaded, cut half through the center, turn inside out and knead again.

“THROWING”

Dough may be “thrown and rolled” instead of kneaded. This is simple and the results are very satisfactory.

Mix dough by stirring with hand (fingers spread) until particles cling. Remove dough from bowl and strike it with force against board (lightly floured). Keep hold of dough while striking it down on board. Roll like jelly roll, taking care not to tear dough. Pick up the roll of dough at one end, repeat throwing and rolling about twelve times, or until dough is smooth. This method takes five minutes.

RISING

After kneading or “throwing and rolling,” place dough in greased bowl and set in a warm place, free from draught. Cover bowl to pre-[12]
vent crust forming on dough which would cause a streak in the bread. Let dough rise until double in bulk.

MOULDING

Next, mould dough into loaves about half size of Bread pans, handling as little as possible and using no flour. Put each loaf in a well-greased pan and let rise again in warm place, free from draught, till double in size. To test if loaf is ready for oven, flour the finger and make an impression in loaf. If impression disappears, give loaf a little more time; if it remains, Bread will rise no more and should go in oven.

BAKING

Place in a quick oven where the loaf should brown in from fifteen to twenty minutes. Then reduce the heat and finish the baking more slowly. Bread is done when it leaves the sides of the pan.

An ordinary sized loaf will bake in from forty to fifty minutes. A large loaf should bake one hour. Biscuits and rolls require a hotter oven than Bread and should be baked in fifteen or twenty minutes.

MEASURING

Careful measurements are necessary in order to obtain good results. The cup in which the flour is measured should be used for measuring
the other ingredients. A standard cup contains one-half pint; 16 tablespoonfuls = 1 cup; 3 teaspoonfuls = 1 tablespoonful. All measurements should be level. Dry ingredients should be leveled off with a knife. A cupful of liquid is as much as the cup will hold without running over.

Things That Are Helpful To Know

After the loaf is baked, remove from pan and let it stand out of a draught until cold.

Sponges should not be permitted to get too light. They are ready when bubbles gather on surface and break occasionally.

Use only the best of flour—it is the most economical. In cold weather warm it slightly.

Lard, butter, fat, oil, Crisco or other prepared shortening may be used.

A bread mixer is a very convenient kitchen utensil.

To freshen stale bread, dip it for a second in cold water or cold milk and then re-bake it in rather a cool oven. One of the best ways to heat rolls is to put them in a paper bag in the oven for a few minutes.
IT is no more trouble to have fascinating new breads than it is to keep serving the same kind day after day.

The clever hostess knows the appeal of variety and uses it to add interest to her menus.
THREE KINDS OF

QUICK METHOD

2 cakes Fleischmann's Yeast
1 quart lukewarm water
2 tablespoonfuls sugar
3 quarts sifted flour
2 tablespoonfuls melted shortening
1 tablespoonful salt

The best Bread makers use QUICK METHODS. One cake of yeast will suffice, but two cakes produce quicker, stronger fermentation and better Bread.

Dissolve yeast and sugar in lukewarm water, add shortening, and half the flour. Beat until smooth, then add salt and balance of the flour, or enough to make dough that can be handled. Knead until smooth and elastic, or "throw and roll." Place in greased bowl, cover and set aside in a moderately warm place, free from draught, until light—about one and one-half hours.

Mould into loaves. Place in well-greased Bread pans, filling them half full. Cover and let rise one hour, or until double in bulk. Bake forty-five to sixty minutes.

If a richer loaf is desired, use milk in place of part or all of the water. This recipe makes three large loaves.

SPONGE METHOD

1 cake Fleischmann's Yeast
1 1/2 quarts lukewarm water
2 tablespoonfuls sugar
4 1/2 quarts sifted flour
2 tablespoonfuls melted shortening
1 tablespoonful salt

Five and one-half to six hours are required for this sponge dough method. If followed closely, it will give excellent Bread having a delightful keep-fresh quality. Where a richer loaf is desired, milk may be substituted in whole or part for the water.

Dissolve the yeast and sugar in one quart of the lukewarm water, and add one and one-half quarts of sifted flour, or sufficient to make an ordinary sponge. Beat well. Cover and set aside to rise for about one and one-half hours in a warm place.
When well-risen add the pint of lukewarm water, shortening, the remainder of the flour, or enough to make a moderately firm dough, and the salt. Knead thoroughly; place in greased bowl. Cover and let rise from one and one-half to two hours.

When light, mould into loaves and place in well-greased baking pans, cover and let rise again for about one hour. When light, bake forty-five to sixty minutes, reducing the heat of oven after first ten minutes. This recipe makes four large loaves.

The overnight straight dough method has one special advantage—the process is largely completed during the night and the baking may be done while the day is still young.

The ingredients specified will make six large loaves. If this amount of Bread is not needed, take just half the quantities called for. In that case the remaining half-cake of yeast can be kept in good condition several days by re-wrapping in tinfoil and keeping in a cool, dry place. Substitute milk for water if a richer Bread is desired.

Dissolve yeast and sugar in the water, which should be lukewarm in winter and cool in summer, add shortening and half the flour. Beat until smooth, then add balance of the flour, or enough to make moderately firm dough, and the salt. Knead until smooth and elastic. Place in well-greased bowl and cover. Set aside to rise overnight, or about nine hours.

In the morning mould into loaves. Fill well-greased pans half full, cover and let rise until light, or until loaves have doubled in bulk, which will be in about one and one-half hours. Bake forty-five to sixty minutes.
BREADS WITH COLOR AND FLAVOR

AMERICAN RYE

1 cake Fleischmann's Yeast 5 cups rye flour 1 1/2 cups sifted white flour
1 cup of milk, scalded and cooled 1 tablespoonful melted shortening
2 cups lukewarm water 1 tablespoonful salt

Rye Bread is particularly rich in protein—that most valuable body-building element.

Dissolve yeast in lukewarm liquid, add two and one-half cups rye flour, or enough to make sponge. Beat well. Cover and set aside in a warm place, free from draught, to rise about two hours.

When light, add white flour, shortening, rest of rye flour, or enough to make a soft dough, and the salt. Turn on a board and knead, or pound it five minutes. Place in greased bowl, cover and let rise until double in bulk—about two hours.

Turn on board and shape into long loaves. Place in shallow pans, cover and let rise again until light—about one hour. Brush with white of egg and water, to glaze. With sharp knife cut lightly three strokes diagonally across top, and place in oven. Bake in slower oven than for white Bread. One tablespoonful Caraway seed may be used if desired. This recipe makes two loaves.

NOTE.—By adding one-half cup of sour dough, left from previous dough, an acid flavor is obtained, which is considered by many a great improvement. This should be added to the sponge.

GLUTEN BREAD

1 cake Fleischmann's Yeast 1 tablespoonful sugar
1 cup milk, scalded and cooled 1 tablespoonful melted shortening
1 cup lukewarm water 3 cups gluten flour 1 teaspoonful salt

IMPORTANT.—For diet, double the amount of water and omit milk, shortening and sugar.

Gluten Bread is particularly desirable for use in the case of persons suffering from diabetes and other diseases where starch must be eliminated from the diet. Gluten is a body-builder, and is to wheat what lean is to meat—the big food value.
BREADS WITH COLOR AND FLAVOR

Dissolve yeast and sugar in lukewarm liquid. Add shortening, then flour gradually, and salt. Knead thoroughly until smooth and elastic, or "throw and roll." Place in well-greased bowl. Cover and set aside in a warm place, free from draught, to rise until light, which should be in about two hours.

Mould into loaves, place in greased pans, filling them half full. Cover, let rise again, and when double in bulk, which should be in about one hour, bake in moderate oven for forty-five minutes. This will make two one-pound loaves.

ZWIEBACK

1 cake Fleischmann's 1/4 cup melted shortening
Yeast 2 eggs
1/2 cup milk, scalded and 2 3/4 cups sifted flour
cooled 1/2 teaspoonful salt
2 tablespoonfuls sugar

Zwieback (twice-baked Bread) is toast par excellence. The second baking changes some of the starch to dextrine, which promotes ease of digestion.

Dissolve yeast and sugar in lukewarm milk. Add three-fourths cup of flour and beat thoroughly. Cover and set aside, in a moderately warm place, to rise for fifty minutes.

Add shortening, eggs well beaten, enough flour to make a dough—about two cups—and salt. Knead, shape into two rolls one and one-half inches thick, and fifteen inches long. Protect from draught and let rise until light, which should be in about one and one-half hours.

Bake twelve minutes in a hot oven. When cool cut diagonally into one-half inch slices. Place on baking sheet and brown in a moderately hot oven. It is better when the second baking is done twenty-four hours after the first, though it may be done sooner if desired.

OATMEAL BREAD

1 cake Fleischmann's 1/4 cup brown sugar
Yeast 2 tablespoonfuls melted
1/2 cup lukewarm water shortening
2 cups boiling water 4 cups sifted flour
2 cups rolled oats 1 teaspoonful salt
BREADS WITH COLOR AND FLAVOR

Oatmeal Bread provides a remarkable amount of nourishment at slight expense. Chopped nuts (one-half cup) give this Bread an even more tempting flavor. It is best when cut the day after baking. Use a very sharp knife.

Pour two cups of boiling water over oatmeal, cover and let stand until lukewarm; or oatmeal left from breakfast may be used. Dissolve yeast and sugar in one-half cup lukewarm water, add shortening and add this to the oatmeal and water. Add one cup of flour, or enough to make an ordinary sponge. Beat well. Cover and set aside in a moderately warm place to rise for one hour, or until light.

Add enough flour to make a dough—about three cups, and the salt. Knead well, or "throw and roll." Place in greased bowl, cover and let rise in a moderately warm place, until double in bulk—about 1 1/2 hours.

Mould into loaves, fill well-greased pan half full, cover and let rise again about one hour. Bake forty-five minutes in a hot oven. This recipe makes two loaves.

GRAHAM OR WHOLE-WHEAT BREAD

1 cake Fleischmann's Yeast
1 cup lukewarm water
2 tablespoonfuls melted shortening
4 cups Graham or Whole Wheat flour
4 tablespoonfuls light brown sugar or molasses
1 cup sifted white flour
1 teaspoonful salt

This recipe gives Bread of an excellent flavor and richness, which may well be served occasionally to give variety to the diet. Both Graham and entire wheat are highly valuable in the dietary since they stimulate the process of digestion and give the digestive tract needed exercise.

Dissolve yeast and sugar, or molasses, in lukewarm liquid. Add shortening, then flour gradually, or enough to make a dough that can be handled, and the salt. Knead thoroughly, or "throw and roll," being sure to keep dough soft. Cover and set aside in a warm place to rise for about two hours.

When double in bulk, turn out on kneading board, mould into loaves, and place in well-greased pans, cover and set to rise again—about one hour or until light.
Bake one hour, in a slower oven than for white Bread. This recipe makes two loaves.

**BRAN BREAD**

- 2 cakes Fleischmann's Yeast
- 2 cups milk, scalded and cooled
- 1 cup lukewarm water
- ½ cup molasses

Bran Bread made after this recipe will appeal to an epicure. The addition of one cup of raisins imparts richness and interest.

Dissolve the yeast in the lukewarm liquid. Add molasses and four cups sifted flour. Beat well. Then add the bran, shortening, balance of flour, or enough to make a dough that can be handled, and the salt.

Knead well, cover, let rise until double in bulk—about two hours. Divide into three loaves. Place in well-greased pans. Cover and let rise about forty-five minutes or until double in bulk. Bake forty-five minutes in a moderate oven.

**NUT BREAD**

- 1 cake Fleischmann's Yeast
- 1 cup milk, scalded and cooled
- 1 tablespoonful sugar
- 3 cups sifted flour
- ½ cup sugar
- 2 tablespoonfuls shortening
- white of 1 egg
- ¾ cup chopped walnuts
- ⅓ teaspoonful salt

Dissolve yeast and one tablespoonful sugar in lukewarm milk, add one and one-fourth cups flour and beat thoroughly. Cover and set aside in warm place fifty minutes, or until light.

Add sugar and shortening, creamed, white of egg beaten or enough to make a dough and the salt. Knead well, or “throw and roll.” Place in greased bowl. Cover and set aside for about two and one-half hours to rise, or until double the bulk.

Mould into a loaf or small finger rolls, and place in well-greased pans. Protect from draught and let rise again until light—about one hour. Loaf should bake forty-five minutes; finger rolls six to eight minutes. Makes one medium-sized loaf or one dozen rolls.
FANCY BREADS

2 cups milk, scalded and cooled 1/2 cup cocoa
1 tablespoonful sugar 1/4 cup butter

Dissolve yeast and one tablespoonful sugar in luke-warm milk; add three cups of flour and beat until smooth. Cover and set aside to rise in warm place until light—about one and one-half hours, then add butter and sugar creamed, eggs well beaten, cocoa, remainder of flour, or enough to make soft dough, and salt.

Knead lightly, place in greased bowl. Cover and set aside in warm place, free from draught, until double in bulk—about two hours. Mould into loaves; place in well-greased Bread pans, filling them half full. Cover and let rise again until light—about one hour. Bake forty to forty-five minutes. This recipe makes two loaves.

RAISIN BREAD

1 cake Fleischmann's Yeast 6 cups sifted flour
1 cup lukewarm water 4 tablespoonfuls shortening
1 cup milk, scalded and cooled 3/4 cup sugar
1 tablespoonful sugar 1 cup raisins

Dissolve yeast and one tablespoonful sugar in lukewarm liquid; add two cups of flour, the shortening and sugar well creamed, and beat until smooth. Cover and set aside to rise in a warm place, free from draught, until light—about one and one-half hours.

When well risen, add raisins well floured, the rest of the flour, or enough to make a moderately soft dough, and the salt.

Knead lightly, or “throw and roll.” Place in a well-greased bowl, cover and let rise again until double in bulk—about one and one-half hours. Mould into loaves, fill well-greased pans half full, cover and let rise until light—about one hour. Glaze with egg diluted with water, and bake forty-five minutes. This recipe makes two loaves.

Bring balance of the milk to boiling point and then add it to bowl containing the potatoes, salt, sugar and butter.

When sponge has risen and dropped back, add it to bowl containing the other materials, also add the egg well beaten, remainder of flour and mix all together thoroughly. Let rise in a warm place. Butter a baking sheet and drop the mixture from a tablespoon, as the dough should not be handled. Let rise again and bake from fifteen to twenty minutes. These ingredients will make 45 biscuits.
EVEN a change in shape makes bread more appealing to children. Imagine their delight with these Buns made with currants, raisins, nuts or cinnamon. They are nourishing as well as delicious. The older members of the family will be enthusiastic, too.

The quaint old-world custom of serving Hot Cross Buns on Good Friday has been widely adopted here. Serve them during Lent.

Dissolve yeast and two tablespoonfuls sugar in lukewarm milk. Add three and one-quarter cups flour, to make sponge. Beat until smooth, cover and let rise until light, in warm place, free from draught—about one hour. Add butter and sugar creamed, eggs well beaten, raisins or currants, which have been floured, rest of flour, or enough to make a moderately soft dough, and salt. Turn on board, knead lightly, place in greased bowl.

Cover and set aside in warm place, until double in bulk, which should be in about two hours. Shape with hand into medium-sized round buns, place in well-greased shallow pans about two inches apart. Cover and let rise again—about one hour, or until light.

Glaze with egg diluted with water. With sharp knife cut a cross on top of each. Bake twenty minutes. Just before removing from oven, brush with sugar moistened with water. While hot, fill cross with plain icing.

DOUGHNUTS ARE BREAD, TOO

DOUGHNUTS

4 1/2 cups sifted flour

1/2 cup sugar
3 tablespoonfuls butter
1/4 teaspoonful mace
1 egg
1/4 teaspoonful salt

Dissolve yeast and one tablespoonful sugar in luke-warm liquid, add one and one-half cups of flour and beat well. Cover and set aside to rise in warm place for about one hour or until bubbles burst on top.

Add to this the butter and sugar creamed, mace, egg well beaten, the remainder of the flour to make a moderately soft dough, and the salt. Knead lightly. Place in well-greased bowl. Cover and allow to rise again in warm place for about one and one-half hours. When light, turn on floured board, roll to about one-third inch in thickness. Cut with small doughnut cutter, cover and let rise again, in warm place until light—about forty-five minutes.

Drop into deep, hot fat with side uppermost which has been next to board. When a film of smoke begins to rise from fat, it will be found a good temperature to fry the doughnuts; or when the fat is hot enough to brown a one-inch square of bread in 40 seconds the temperature is correct. Fry to a golden brown, drain and roll at once in powdered sugar.

1 cup lukewarm water  
1 tablespoonful sugar

7 cups sifted flour  
6 tablespoonfuls shortening  
½ cup sugar  
3 eggs  
½ teaspoonful salt

Simply delicious! This recipe makes two large or three small rings.

Roll up lengthwise and place in a circle on a large, shallow greased pan or baking sheet. With scissors cut three-fourths-inch slices, almost through. Cover and let rise one hour, or until light, and bake twenty-five minutes. Just before putting in oven, glaze with egg, diluted with milk. Ice while hot with plain icing. (See recipe for icing on page 40.)
Millionaires in Health

Try This Recipe for Health
An easy way to banish old ills and restore the Vigor of Perfect Health

NOT a medicine, not a “cure-all,” Fleischmann’s Yeast is just a remarkable corrective food. In every cake are millions of tiny, living yeast plants. They purify the entire digestive and intestinal tract. They aid digestion. They clear the skin. They literally invigorate the whole body.

Taken regularly, Fleischmann’s Yeast brings release from constipation. Unlike harsh, habit-forming cathartics, yeast actually strengthens sluggish intestinal muscles. It checks putrefaction and prevents the absorption of poisons through the intestinal wall.

Eat two or three cakes regularly every day, one before each meal; on crackers, in fruit juices, water or milk—or just plain, in small pieces. For constipation, best results are obtained by dissolving one cake in hot water (not scalding) before meals and at bedtime. Dangerous habit-forming cathartics will gradually become unnecessary. All grocers have Fleischmann’s Yeast. Buy several cakes at a time—they will keep fresh in a cool dry place for two or three days.

“I SUFFERED FROM CONSTIPATION for many years on account of constant traveling. I am something of a soldier of fortune, having circumnavigated the globe several times and have lived in nearly every country of the planet. A friend in the Antipodes advised Fleischmann’s Yeast. Those cakes have kept me in the pink of condition and my constipation has vanished.” —Thomas Stapleton, San Francisco, Calif.

“LAST YEAR I BECAME TIRED AND LISTLESS, owing to the lack of proper exercise. I was also troubled with indigestion and my complexion lost its freshness. I was seriously alarmed. On a doctor’s advice, I began taking Fleischmann’s Yeast. I cannot praise it too highly. Every trace of indigestion vanished. My complexion returned. I still eat Fleischmann’s Yeast to keep fit.” —Eleanore G. Reade, New York City

“LAST FALL I WAS TROUBLED WITH SEVERE SKIN ERUPTIONS for some time. I tried numerous remedies in vain. They all failed to relieve me. Finally I was advised by a friend to try Fleischmann’s Yeast cakes. I began to eat Fleischmann’s Yeast and at the end of two months I was completely rid of my affliction. I highly recommend Fleischmann’s Yeast cakes to any person so troubled.” —Mabel C. Mackenzie, St. Peter, Nova Scotia

“AFTER SUFFERING FOR YEARS FROM SICK HEADACHES brought on by stomach trouble—sometimes two attacks in the same week—I was advised by a Denver doctor to eat Yeast. I began taking Yeast three times daily. I have been free from headaches for several months. Fleischmann’s Yeast certainly did for my stomach trouble what all other remedies failed to do.” —Edward A. Sproul, Denver, Colo.
