"ART-GARLAND"
THE LEADING
Base-Burner
OF THE WORLD.

In the "ART-GARLAND" for this season, every feature of utility, economy and convenience which is claimed for other base-burning stoves will be found successfully combined. New and handsome ornamentation for this year.

Its special features of merit is as follows:

- Great radiating surface and heating capacity.
- Extraordinary illuminating power, being at least double that to be found in other stoves. Patented Revolving Fire-Pot, which has stood the test for six seasons.
- Hot-Air Circulating-Flues of double the ordinary capacity.
- Specially constructed bottom flue system; in short all of the features which have heretofore made "GARLANDS" so popular, and a great many new features which cannot be here enumerated.

An adequate description of this wonderful production is practically impossible. It possesses all of the time-tried features of merit, and is so strikingly beautiful, and so replete with new features, that it easily outranks any base-burner that has ever been made.

IT MUST BE SEEN TO BE APPRECIATED.
