Homemade Desserts
The Easy Way

Wouldn’t you like to pamper your family with homemade desserts every night? Those great homemade cakes they look forward to...those lavish parfaits and frozen treats they love...their favorite pies? Lovely idea, but you just don’t have the time? That’s what this book is all about—homemade desserts that take little time and trouble, and taste delicious. And pudding is the building block that starts them all, makes the making easy, the results spectacular. Each recipe has been carefully selected and tested for taste, flavor appeal and ease of preparation in the test kitchens of the General Foods Consumer Center.

• How long do they take?
So you can see at a glance about how long it will take to make a particular dessert, each recipe has an estimated preparation time noted above it. This time includes baking time or any cooling time that is required before the recipe can be finished. (Chilling or freezing time needed before serving is not included.)

• Which pudding to use?
There are two kinds of pudding used for most recipes—Jell-O pudding and pie filling, which requires cooking, or Jell-O instant pudding and pie filling, which needs no cooking. Both work beautifully, but each works in different ways, with different preparation directions. To avoid confusion between pudding types, we’ve put a symbol by each in the ingredient listing:

★ for Jell-O pudding, which requires cooking
☆ for Jell-O instant pudding, which requires no cooking

And, to see how best to use each type of pudding, follow these pudding pointers.

Pudding Pointers for Cooked Pudding ★ Jell-O® brand pudding and pie filling

• When you cook the pudding...
stir the mixture as it cooks and be sure it comes to a full boil. It’s best to use an aluminum or stainless steel pan which heats evenly, without hot spots.

• If cooking should be interrupted...
you can remove the pudding from the heat—for up to 15 minutes. Then resume cooking as directed.

• For a thicker pudding...
cook and stir the mixture to a full bubbling boil. The cooled pudding will be thicker, firmer.

• The microwave way...
may be more convenient and can be used for all but the lemon flavor. Combine pudding mix and milk in a 4-cup glass measuring cup or medium-size glass bowl and blend well. Place in microwave oven and heat 3 to 4 minutes. Stir with rubber scraper or wooden spoon and continue to heat 2 to 4 minutes longer, until mixture comes to a boil. Remove from oven and chill.
• After it’s cooked…
the pudding will be thin, but it will thicken as it cools. If you wish to avoid having a
film form on top, place plastic wrap directly on surface of the hot mixture.

• To cool quickly…
place the pan of hot pudding in a larger pan of ice water and stir frequently until
mix is cooled. Don’t use this method for pie filling, however; the set will not be firm
enough.

• To mold pudding…
cool the cooked pudding 5 minutes, stirring twice, then pour into a plain mold or
individual custard cups that have been rinsed in cold water. Chill. To unmold, dip
mold or cup in hot water.

• If you’re counting calories…
you can use skim milk or reconstituted nonfat dry milk instead of whole milk.
Pudding will be less rich, but you will save up to 35 calories per serving.

• For extra creamy pudding…
beat the chilled pudding with a rotary beater before serving.

• For extra rich pudding…
use light cream or half and half instead of whole milk.

Instant Pudding Pointers for Jell-O® brand instant pudding and pie filling

• Start with cold milk…
it makes for a better consistency in the finished pudding. Beat slowly, not vigorously,
then pour pudding into serving dishes or pie crust immediately after beating, unless
the recipe calls for setting and then beating.

• Even quicker…
is the blender method: put milk and pudding mix into container and blend at high
speed for 15 seconds.
Or the shaker method: use a 1-quart leakproof container, cover tightly and shake
vigorously for at least 30 seconds.

• Or use a fork…
just put mix into a 1-quart bowl and gradually add milk while stirring with a fork.
Stir for 2 minutes.

• If you’re counting calories…
you can use cold skim milk or reconstituted nonfat dry milk instead of whole milk.
The finished pudding will be somewhat leaner, but lower in calories.

• For extra rich pudding…
use cold light cream or half and half instead of whole milk.
What's for dessert? If that's a question you hear a lot and are tired of answering with ho-hum replies, then this section is for you. For here are family desserts you can put together in minutes, without special shopping or planning, and come up with terrific results—quick parfaits, fruited puddings, frozen treats that can make any family meal a special one. Just turn to the kitchen cupboard for the secret. Start with pudding, the base that all these homemade desserts are built on. Then add ingredients from the cupboard—coconut, canned fruits, chopped nuts, cookies, graham crackers, candies, flavoring extracts, cereal—to give it your own flavor touch. Our two “Desserts with a Plus” sections (pages 6-7, for desserts that are cooked; pages 10-11 for desserts that need no cooking) give you some ideas, and you can come up with your own using family flavor favorites.

Or, turn to the refrigerator for further inspiration. Try cream cheese, sour cream, cottage cheese, whipped topping, yogurt, ice cream—and suddenly simple pudding puts on elegant airs. Use pudding, too, to whip up easy dessert sauces; they can turn a simple dish of fresh fruit into a memorable dessert, an ordinary pudding into a family treat.

You’re a two-only family? Then finish your prepared pudding mix two ways, half with one flavor idea, half with another, so you have dessert for two meals. And if your family is on the large side, see our recipes, pages 12-14, designed to make a 4-serving package serve 6.

Better-Than-Ever Cakes
Pudding has revolutionized the whole world of cake baking, made cake from a mix taste better than ever. A few years ago home bakers discovered that adding instant pudding mix to cake mix gave cakes an extra richness and moistness, and a homemade taste that mix cakes never had before. Since then, that first cake with pudding added has been refined and made even better. Pudding and cake mix are the easy building blocks that have made such great results possible. In fact, cakes have never been so delicious, nor so easy.

On these pages you'll discover those very recipes that have changed home cake baking so. Start with the basic cake—using instant pudding mix to add moisture and a special flavor. Then add easy extras for flavor variations. “Cake With a Plus,” pages 20-21, shows you how to go about it. But that’s just the start. You’ll find more recipes and ways to make cakes that are standouts—with pudding as a start, then sour cream, fruit, even vegetables from the garden, to add special flavor to the cake.

As for what goes on top of the cake, that's simple. Most pudding cakes are so moist and rich they need no more than a simple glaze or a dusting of confectioners sugar. For some, the “frosting” is baked right on the cake—couldn’t be easier, or better. Sometimes it’s poured on, or poked through the cake. Or, for special occasions, you might want a more spectacular topping, and pudding helps there, too, with very easy-to-make cake toppings. Or, use a cake sauce, as in this homemade Cranberry Loaf Cake with its own sauce topping.

---

**CRANBERRY LOAF CAKE**

Over 30 minutes to prepare

1 package (2-layer) yellow cake mix
1 package (4-serving) Jell-O instant pudding—lemon flavor
4 eggs
1 cup (1/2 pt.) sour cream
1/4 cup oil
1/2 cup chopped nuts
1 can (16 oz.) whole berry cranberry sauce, broken into pieces
1 package (4-serving) Jell-O pudding—lemon flavor
1/2 cup sugar
1/4 teaspoon salt
1 tablespoon butter or margarine

- Combine cake mix, instant pudding mix, eggs, sour cream, oil and nuts in large mixer bowl. Blend, then beat at medium speed of electric mixer for 4 minutes. Fold in half the cranberry sauce. Pour into two greased and floured 9x5-inch loaf pans. Bake at 350° for 50 to 55 minutes, or until cake tester inserted in center comes out clean and cake begins to pull away from sides of pan. Do not underbake. Cool in pans 15 minutes. Remove from pans and finish cooling on rack.
- Measure remaining cranberry sauce and add water to make 2 1/2 cups. Combine pudding mix, sugar, salt and measured liquid in saucepan. Cook and stir over medium heat until mixture comes to a full boil and is thickened. Remove from heat. Stir in butter. Serve warm over cake slices. Makes 3 cups sauce.
HOMEMADE CAKE POINTERS

Want yours to be the best homemade cakes ever? Then follow the recipe directions carefully, beating just the time specified and baking at the correct temperature. If your cakes usually seem to take less or more time than the range specified for the particular pan used, you might want to have your oven’s thermostat checked for accuracy. Other adjustments may have to be made for these special circumstances.

If you’re using a pudding-included cake mix...

You probably will have to reduce the liquid ingredients. Reduce the water (or water substitute—such as orange juice or coffee) by 1/4 cup. If sour cream is used rather than water, reduce that by 1/4 cup. In some recipes no change is necessary and these recipes give the pudding-included cake mix as an alternate to the regular cake mix.

If you live in a high-altitude area...

You’re probably used to making baking adjustments. Best results will come from experimentation, but for these cakes the usual ingredient adjustments are these: add all-purpose flour to the mix, 1/4 to 2/3 cup (more for pudding-included mixes); add about 1/2 cup water (only 1/4 cup if using pudding-included mix); reduce oil to about 1/4 cup; and use large eggs. If sour cream is used, that amount should be reduced. And if any extra ingredients—such as raisins or nuts—are added, they should be finely chopped. Use the pan sizes recommended in the recipe and grease and flour pans well. In baking, raise the temperature about 25° for all but upside-down cakes, and test the cake carefully, as the baking time might be longer.

If you’re using a different size pan...

rather than the pan called for in the recipe, the baking time will change. Use the cooking times given for the alternate cake pans in the “Cakes With a Plus’ section, page 20, as a guide. Cakes baked in a smaller pan—8-inch rather than 9-inch layers, for example—will take slightly longer, 5 to 10 minutes. For all cakes, the best test of doneness is that the cake has begun to pull away from sides of pan and a cake tester inserted in the center comes out clean, or cake springs back when lightly touched.

HOMEMADE TOPPINGS FOR YOUR CAKE

Luscious finishing touches and you can make them from pudding mix and ingredients on hand. See more glazes, fillings on pages 25, 72, 80, 82.

Here's one of the quickest—and most popular—of pies, chocolate pie in a crunchy coconut crust.

CHOCOLATE-COCONUT PIE

Less than 15 minutes to prepare

1 package (6-serving) ☆ Jell-O instant pudding—chocolate flavor

2 1/3 cups cold milk

1 baked 9-inch quick coconut crust (recipe below)

1 cup thawed Cool Whip non-dairy whipped topping

• Combine pudding mix and milk in bowl. Beat slowly with rotary beater or at lowest speed of electric mixer for 1 minute. Pour immediately into crust. Chill 1 hour. Garnish with whipped topping and chocolate curls, if desired.

QUICK COCONUT CRUST: Combine 1/4 cup melted butter or margarine and 2 cups Baker's Angel Flake coconut. Press evenly into ungreased 8-or 9-inch pie pan. Bake at 350° for 20 to 30 minutes, or until golden brown. Cool. For ease in serving, dip pie pan in warm water for a few seconds before cutting.
EASY PIE POINTERS

Spectacular pies are no problem to make this easy pudding way. Just follow these directions carefully. Remember to refrigerate any leftover pie.

• If using cooked pudding mix...
For an 8-inch pie shell, use the 4-serving size pudding mix; for a 9-inch shell, use the 6-serving size and reduce milk to 2 ⅔ cups. Cook and stir the pudding mix and milk mixture to a full bubbling boil. Let stand 5 minutes, stirring twice, then pour into the baked cooled shell and chill 3 hours. The lemon flavor mix has different directions that call for eggs, sugar and water rather than milk. Follow package directions to make a basic lemon meringue pie. For an extra-special version, see page 58.

• If using instant pudding mix...
For an 8-inch pie shell, use the 4-serving size pudding mix (decrease the amount of milk to 1 ⅛ cups for chocolate, chocolate fudge and butterscotch flavors). For a 9-inch shell, use the 6-serving size mix (decrease milk to 2 ⅔ cups for all flavors except vanilla, lemon and butter pecan). Beat only 1 minute to blend, then pour into the baked and cooled pie shell right away. Chill 1 hour.

• Have the wrong size pie pan?
If your pie shell is smaller than that called for in the recipe, you can pour the excess filling into an individual tart shell or custard cup (lined with crumb mix, if you wish). If your shell is larger than that called for, you might add whipped topping to the chilled pie before serving. Or double the recipe and use excess for individual cups.

• As for the pie crust...
Our tested foolproof recipe follows. See, too, Quick Coconut Crust and Crumb Crust, pages 29, 31. Don’t like to make pie crust? You can buy excellent ready-made ones.

PIE SHELL

Over 30 minutes to prepare

1 ⅛ cups unsifted all-purpose flour  ½ cup shortening
⅛ teaspoon salt  3 tablespoons (about) cold water

• Measure flour and salt into bowl. Lightly cut in shortening with pastry blender until mixture resembles coarse meal. Sprinkle in water, a small amount at a time, mixing lightly with pastry blender or fork until all particles are moistened and cling together when pastry is pressed into a ball. Cover with damp cloth and let stand a few minutes, or chill.

• Roll pastry on lightly floured board into a thin circle (less than ⅛-inch thick). Line 8-, 9- or 10-inch pie pan. Trim pastry 1 inch larger than pan and fold under to form a standing rim. Flute edge.

FOOD PROCESSOR METHOD: Use steel blade of processor. Place flour, salt and shortening in processor bowl and blend, turning machine on and off, until mixture has consistency of coarse meal. With motor on, add cold water gradually until dough forms a ball. Then proceed as directed above.

BAKED PIE SHELL: Prick pastry very thoroughly on bottom, sides and in bottom curve, using a fork. To prevent shrinkage of pastry, place a second pie pan directly over pastry, or line pastry shell with brown paper or double layer of cheese cloth and partially fill with rice or dried beans. Bake at 450° for 15 minutes. Remove lining or pie pan and bake 5 minutes longer or until lightly browned. Cool before filling.

TART SHELLS: Cut rolled pastry into 5- or 6-inch circles. Carefully fit on outside of inverted tart or muffin pans. Trim edges. Prick thoroughly with a fork. Place pans on baking sheet and bake at 450° for 12 to 15 minutes, or until pastry is lightly browned. Makes 4 or 5.

CRUMB CRUST: Combine 1 cup fine graham cracker, chocolate wafer or ginger-snap crumbs and 3 tablespoons sugar. Mix in 3 to 4 tablespoons softened butter or margarine. Press firmly on bottom and sides of 8-inch pie pan. (For 9- or 10-inch pan, increase crumbs to 1¼ cups and sugar and butter to ¾ cup each.) For unbaked crust, chill 1 hour before filling. For baked crust, bake at 375° for 8 minutes; cool thoroughly before filling. To ease serving, dip pan in warm water before cutting.

Good Old-Fashioned Desserts
They're part of our tradition—desserts like these. Each comes with its own special memory. The Pineapple Upside-Down Cake your mother used to make for church socials. There’s a heavenly Almond Fudge Pie that could easily become “your” pie, the one everyone wants the recipe for. The rich German Sweet Chocolate Cake that will probably become a tradition at every family gathering.
