Jell-O Gelatin first grandly shimmered its way into American dining rooms in 1897. Just how many brands in your kitchen go back over 70 years? Very few, you can be sure, and fewer still have continued to grow in popularity the way Jell-O Gelatin has each year.

Just why is this? Well for one thing, housewives liked it so much they turned their imaginative attention to Jell-O, invented all sorts of ingenious recipes using it, and contributed them to the very first Jell-O Gelatin recipe book—50 years old now if it's a day. Since then, this wonderfully light, wholesome dessert with its luscious fresh fruit taste has grown to an exciting array of refreshing flavors and become America's all-time family favorite.

*Joys Of Jell-O* includes lots of familiar old recipes and lots of new ones, too. Hundreds of recipes for desserts, salads, relishes, and confections chosen from the thousands in existence. Some are plain and very simple to make; some are glorious as the 4th of July, but they are still pretty simple to make.
Jell-O Gelatin’s long-time popularity comes from many good things. Its lightness is one — a big one. Jell-O Gelatin is so light it seems to make any meal sit a little lighter. Its fresh fruit taste, so much like the fruit that inspired it, is utterly satisfying. And it’s easy to fix in all kinds of ways — some we’ll wager that have never entered your mind.

The bounty of Jell-O doesn’t end with its lightness, good taste, convenience, and versatility. Jell-O Gelatin is nutritious and low in calories, just 81 calories per half-cup serving. It sits as lightly on your conscience as it does on top of any meal. You can add fresh vegetables or fruit, or even a marshmallow or two, and eat and eat.

ANSWERS TO SOME QUESTIONS

How in the world do you unmold Jell-O so it looks like the molds in the advertisements? The last chapter of this recipe book will clear up this question. It will also tell you how to whip, flake, and cube Jell-O Gelatin. And that’s not all. It’s full of time-saving tips and tricks on how to make Jell-O. So why not have some for dinner tonight? Whether you eat lavishly or just a little ... there’s always room for Jell-O.

**CHERRY-GLAZED HAM**

*An ever-so-simple, beautiful red glaze that makes a ham festive.*

1 smoked picnic ham
Whole cloves
1 package (3 oz.) Jell-O Cherry Gelatin
½ cup firmly packed brown sugar
1 cup boiling water

Bake ham according to directions given on wrapper, removing ham from oven about 45 minutes before baking period is finished. Remove rind, score fat, and garnish with whole cloves. Dissolve Jell-O Gelatin and sugar in boiling water. Pour about a third of the mixture over ham and return to oven. Allow to bake remaining 45 minutes, basting frequently with remaining gelatin mixture.

To serve hot, slice ham and serve, using drippings in pan for sauce. To serve cold, place ham on serving platter and cool; then chill for several hours. Meanwhile, pour drippings into a cup or bowl and let stand a few minutes; then skim off fat. Pour remainder into a shallow pan. Chill until firm. Just before serving, flake or cube and place around ham.

**NOTE:** To glaze a large smoked ham, use 1 package (6 oz.) Jell-O Cherry Gelatin, 1 cup firmly packed brown sugar, and 2 cups boiling water.

**Glazed Ham Slice:** Prepare glaze as directed for Cherry-GLAZED Ham. Place a 1½-inch thick ham slice in shallow baking dish, stick a few whole cloves in ham, and pour on ½ cup glaze. Cover and bake in moderate oven (325°F.) 30 minutes. Then uncover and bake 30 minutes, basting frequently with remaining glaze.

**HERB-GLAZED SANDWICHES**

Your luncheon or tea sandwiches stay fresh and flavorful under a glaze.

*Or 12 to 14 appetizer-size sandwiches.

Combine water, peppercorns, bay leaf, and dried dill in a saucepan. Cover and simmer about 10 minutes; strain. Dissolve Jell-O Gelatin, salt, and cayenne in the hot liquid. Add vinegar. Chill until syrupy.

Place sandwiches on a rack and pour syrupy gelatin over them, allowing about ¼ cup for each large sandwich or 2 tablespoons for each small sandwich. Chill until glaze is firm. Makes about 1¼ cups glaze.

GLAZED SWEET POTATOES
An easy way to prepare delicious "candied" sweet potatoes.

1 package (3 oz.) Jell-O Orange Gelatin
1/4 cup firmly packed light brown sugar
Dash of salt
1 cup boiling water
1 tablespoon butter
1 can (1 lb.) sweet potatoes, sliced or quartered
*Or use 6 to 8 cooked sweet potatoes.

Dissolve Jell-O Gelatin, sugar, and salt in boiling water in skillet. Add butter and bring to a boil, stirring constantly. Add sweet potatoes; cook over medium heat about 15 minutes, basting frequently. When syrup thickens and is glossy, remove from heat. Serve hot. Makes 3 to 4 servings.

ORANGE-GLAZED DUCK
A glistening, easy orange glaze for golden roasted duck.

4- or 5-lb. oven-ready duck
Salt
Celery stalks
1 cup water
8 whole cloves
1 package (3 oz.) Jell-O Orange Gelatin
1/2 cup firmly packed brown sugar
1 teaspoon vinegar

Rub duck inside and out with salt. Then pin skin at neck over back of duck. Place celery in body cavity; draw opening together with poultry pins and lace twine around pins. Prick thoroughly with a fork. Place breast side up on rack in a shallow pan. Insert meat thermometer in thigh muscle next to body. Roast in a slow oven (325°F.) 35 to 40 minutes per pound, or to 185°F. on thermometer.

Meanwhile, bring water and cloves to a boil. Remove from heat; stir in Jell-O Gelatin and sugar until dissolved. Add vinegar. About 45 minutes before duck is finished roasting, pour drippings from pan. Then pour 1/2 cup gelatin over duck. Finish roasting, basting frequently with remaining gelatin. Makes 4 servings.

FROSTED GRAPES
A lovely garnish for salads, meat platters, and desserts—or serve them as delicious desserts.

2 pounds seedless grapes
1 egg white, slightly beaten
1 package (3 oz.) Jell-O Gelatin (any fruit flavor)

Dip small clusters of grapes, one at a time, into beaten egg white and allow excess to drain off. Then sprinkle with Jell-O Gelatin. Chill until dry, about 3 hours. Use as garnish or dessert.

NOTE: If desired, frosted grapes may be stored in refrigeration overnight.

EASTER EGGS
Colorful "eggs" to serve in a nest of green coconut on Easter or to use as garnish around salads all year

1 package (3 oz.) Jell-O Gelatin (any fruit flavor)
1 cup boiling water
1/2 cup cold water
8 egg shells
*To remove yolks and whites, crack small end of each uncooked egg slightly. Pick away enough shell so that yolk and white will drop out. Rinse inside of shell with cold water. Or pick a small hole in end of egg shell and prick a tiny hole with pin in opposite end; then blow out yolk and white. After rinsing shell, cover tiny hole with tape.

Dissolve Jell-O Gelatin in boiling water. Add cold water. Place egg shells in egg carton. Pour gelatin into shells, using funnel or small pitcher. Chill overnight. Crack shells slightly, dip quickly in warm water, and peel off. Serve in nests of shredded lettuce or green Tinted Coconut (page 78), or use as garnish around potato and other salads. Makes 8 eggs.

NOTE: Use egg yolks and whites in scrambled eggs for Easter breakfast.

**STRAWBERRY GLAZE**
(Pictured above)

A luscious, beautiful glaze for pies, cheesecakes, and other desserts.

1 package (3 oz.) Jell-O Strawberry Gelatin
1 cup boiling water
1 package (10 oz.) Birds Eye Strawberries

Dissolve Jell-O Gelatin in boiling water. Add frozen strawberries and stir until berries separate and mixture thickens. Spoon over top of cooled highly fluted 9-inch cream pie or a 9- or 10-inch cheesecake. Chill until firm. Makes 2 1/4 cups glaze.

**Fresh Strawberry Glaze.** Prepare Strawberry Glaze, adding 3/4 cup cold water instead of frozen berries; chill mixture until slightly thickened. Then add 1 cup sweetened sliced fresh strawberries; spoon over pie. (For 10-inch pie, 1 1/2 cups berries may be used.) Makes about 2 1/4 cups.

**FIG-BERRY PRESERVES**
The color and flavor of strawberry gelatin is added to fig preserves with this easy-to-make recipe.

3 cups mashed figs (about 20 medium figs) *
2 packages (3 oz. each) or 1 package (6 oz.) Jell-O Strawberry Gelatin
3 cups sugar

If dark figs are used, preserves will be a deep purple color. For lighter preserves, figs may be peeled.

Thoroughly mix figs, Jell-O Gelatin, and sugar in a large saucepan. Bring to a boil over medium heat and continue boiling for 3 minutes, stirring occasionally. Pour quickly into glasses. Cover at once with 1/2 inch hot paraffin. Makes about 6 medium glasses.

**NOTE:** This recipe may be halved to fill about 3 medium glasses—use 1 1/2 cups mashed figs, 1 package (3 oz.) Jell-O Gelatin, and 1 1/2 cups sugar.
SEVEN MINUTE FROSTING

Gelatin flavors and colors a fluffy frosting with no extra work for you.

2 egg whites, unbeaten
1 1/4 cups sugar
1 package (3 oz.) Jell-O Gelatin (any fruit flavor)
Dash of salt
1/2 cup water
2 teaspoons light corn syrup

Combine all ingredients in top of double boiler. Beat about 1 minute or until thoroughly mixed. Beat over gently boiling water at high speed of electric mixer or with rotary beater 7 minutes, or until frosting will stand in stiff peaks. (Stir frosting up from bottom and sides of pan occasionally.) Remove from boiling water and spread on cake immediately. Makes about 7 cups, or enough to frost tops and sides of three 8-inch layers (generously), three 9-inch layers, two 10-inch tube cakes, or about 30 cupcakes or the tops only of about 5 to 6 dozen cupcakes.

DIVINITY PASTELS

Lovely candies, that are flavored and colored with fruit flavor gelatin.

3 cups sugar
3/4 cup light corn syrup
3/4 cup water
2 egg whites
1 package (3 oz.) Jell-O Gelatin (any fruit flavor)
1 cup chopped nuts
1 cup Baker's Cookie Coconut (optional)

Mix sugar, corn syrup, and water; bring to a boil over low heat, stirring to dissolve sugar. Continue boiling, stirring occasionally, until a little syrup forms a hard ball in cold water (or to 252°F on a candy thermometer)—about 15 minutes. Meanwhile, beat egg whites until stiff but not dry. Then add Jell-O Gelatin, 1 tablespoon at a time, and beat until mixture will stand in stiff peaks.

Then pour syrup in a thin stream over the egg white mixture, beating constantly. Continue beating until mixture will hold its shape and loses its gloss—about 10 minutes with electric mixer. Add nuts; quickly pour into a well-greased 9-inch square pan, or drop by teaspoonfuls onto wax paper and allow to dry. Let stand in pan until firm enough to handle—about 10 minutes. Cut into 8 strips, roll in coconut, and cut each strip into 10 to 12 pieces. Roll in coconut again. Allow to dry about 2 hours. Store in a covered container. Makes about 7 dozen candies.

NOTE: If candy becomes too stiff during beating, add few drops hot water.

PARTY TOPPING

A flavorful, pastel topping—use as you would whipped cream.

3 1/2 tablespoons (half of a 3-oz. package) Jell-O Gelatin (any fruit flavor)
1/2 cup boiling water

Dissolve Jell-O Gelatin in boiling water. Chill until slightly thickened. Beat egg whites until foamy throughout; gradually add sugar and beat until stiff peaks will form. Then gradually add gelatin, beating until well blended. Serve on cake, puddings, and other desserts. Makes 3 cups.

TINTED COCONUT

 Flavorful as well as colorful coconut to use as a garnish on desserts.

2 tablespoons Jell-O Gelatin (any fruit flavor)

cookies, puddings, and other desserts. Makes 1½ cups.

NOTE: Dissolve remaining Jell-O Gelatin in 1 cup hot water. Add ½ cup cold water. Chill until firm—about 3 hours. Makes 1½ cups, or 3 servings.

PASTEL MARSHMALLOWS
Tender, light confections you can use as you would those you buy.

1 package (3 oz.) Jell-O Gelatin (any fruit flavor)
3/4 cup boiling water
1 cup sugar
3 tablespoons light corn syrup
Confectioners' sugar

Dissolve Jell-O Gelatin in boiling water in a saucepan over low heat. Stir in sugar until dissolved. (Do not boil.) Blend in corn syrup. Chill until slightly thickened. Line an 8-inch square pan with wax paper; grease with butter or margarine. Then beat gelatin mixture at highest speed of electric mixer until soft peaks will form, about 5 minutes. Pour into pan. Let stand in refrigerator overnight.

Then place mixture on board heavily dusted with confectioners' sugar. To remove wax paper, dampen surface and let stand a few minutes; then peel off paper. Dust top with sugar. Cut into 1-inch squares. Roll cut edges in sugar. Makes about 6 dozen.

1 envelope Kool-Aid Instant Soft Drink Mix (any flavor)
1 cup sugar
2 cups boiling water
2 cups cold water

Dissolve Jell-O Gelatin, instant soft drink mix, and sugar in boiling water. Add cold water. Pour into ice cube trays, small paper cups, or frozen pop molds. Insert wooden sticks or paper spoons diagonally in each ice cube section or at an angle in molds or cups for handles. (If desired, pops may be partially frozen before handles are inserted.) Freeze until firm—2 to 3 hours. Makes 20 to 24 pops.

Double Orange Pops: Dissolve 1 package (3 oz.) Jell-O Orange Gelatin and 1/2 cup sugar in 2 cups boiling water. Add 2 cups orange juice. Then freeze pops as directed above.

For molding, flaking, and cubing

Jell-O Gelatin is really kid stuff to prepare. However, we have some things for you to do with it that are distinctly adult. Do you know, for example, that you can flake Jell-O, cube it, whip it, layer it, scallop it, and crown it, as well as turn it out in glorious molds? Well, you can. All these things you can do with Jell-O change it somewhat. Oh, it’s still delicious, still light, still filled with fresh fruit taste—but somehow it seems a little more exotic. How about it?

TIPS ON PREPARING JELL-O GELATIN

Some tricks used by the experts to make gelatin molds more beautiful.

To prepare Jell-O Gelatin, dissolve the gelatin completely in boiling water or other liquid—for a clear, uniformly set mold, gelatin must be completely dissolved. Then add cold liquid—or use several ice cubes, see Speed-Set Jell-O Gelatin (page 82).

To double a recipe, use two 3-oz. packages or one 6-oz. package of Jell-O Gelatin and twice the amounts of the other ingredients except salt, vinegar, and lemon juice—you’ll find about $1 \frac{1}{2}$ times the amounts of these ingredients are sufficient.

For large molds, decrease the required liquid about $\frac{1}{4}$ cup for each 3 ounces of Jell-O Gelatin. (This has already been done in many recipes in this book for your convenience.) A firmer consistency makes mold less fragile, less likely to crack.

For soft-set Jell-O Gelatin, increase liquid about $\frac{1}{2}$ cup for each 3 ounces of Jell-O Gelatin—this is too soft to unmold, but has excellent eating quality.

To add fruits and vegetables, chill the gelatin until very thick, not set, before adding other ingredients. If gelatin isn’t thick enough, fruits and vegetables may float or sink. (Do not add fresh or frozen pineapple, figs, mangoes, or papayas or frozen fruit juice blends containing these fruits—an enzyme in these fruits, when fresh, keeps Jell-O Gelatin from setting. When cooked or canned, these fruits are excellent in Jell-O.)

To mold Jell-O Gelatin, pour it into molds or serving dishes—a 3-oz. package without fruits or vegetables makes 2 cups, a 6-oz. package makes 4 cups. Chill until firm—see chart on page 88. (Any metal pan, bowl, cup, or can may be used as a mold.)

To layer gelatin mixtures, chill each layer until set, but not firm, before
adding the next layer—if the first layer is too firm, the layers may slip apart when unmolded. Many layers may be built up in this way. Except for the first layer, the gelatin mixtures should be cool and slightly thickened before being poured into mold—if mixture is warm, it may soften the layer beneath and mixtures may run or mix together.

To make special designs, foods can be arranged in gelatin to make a simple mold more decorative in two ways:

**Simple way:** Chill gelatin until thick; then pour about ¼ inch gelatin into mold. Place a design of fruits or vegetables in gelatin. Chill until set, but not firm. Then pour remaining cooled gelatin into mold.

**Expert way:** Pour about ½ inch of gelatin into mold; chill until set, but not firm. Cool remaining gelatin. Arrange design on set gelatin, cover carefully with a few spoonfuls cooled gelatin to anchor design, and chill until set, but not firm. Then pour remaining cooled gelatin into the mold.

To chill gelatin molds, leave mold in refrigerator until firm (see chart on page 88). Since metal chills more quickly than glass, gelatin in metal molds will be firm in less time than gelatin in a glass mixing bowl or serving dish. To hasten chilling, chill the mold a few minutes in a pan of ice and water before placing in refrigerator. For storage overnight or longer, it’s wise to cover the gelatin to prevent evaporation and drying.

To make one serving, dissolve 1¾ tablespoons Jell-O Gelatin in ½ cup boiling water. Chill until firm.

### SPEED-SET JELL-O GELATIN

An easy trick—substitute ice cubes for cold water in preparing gelatin to shorten the required chilling time.

To use ice cubes, dissolve Jell-O Gelatin in boiling water as directed on package; then add ½ tray ice cubes (7 to 10, depending on size) for 3-oz. package Jell-O Gelatin or 14 to 20 ice cubes for 6-oz. package Jell-O Gelatin. Stir about 3 minutes to melt ice, or until gelatin is thickened. Remove any unmelted ice. Pour into serving dishes or individual molds. Chill until soft-set and ready to eat from dishes, about 30 minutes, or until firm enough to unmold, about 1 hour.

To use ice and water mixture, dissolve Jell-O Gelatin in boiling water as directed on package; then substitute a mixture of ice cubes or crushed ice and water for the cold water, stirring until ice melts completely. Chill.

To add fruits or vegetables or to whip, let gelatin stand 5 or 6 minutes to thicken after removing unmelted ice. Then fold in ingredients or whip (see directions on page 84). Chill until firm.

To use premeasured frozen mold, freeze ¼ cup water in a 2- or 3-cup mold for 3-oz. package Jell-O Gelatin or 1½ cups water in a 1-quart mold for 6-oz. package Jell-O Gelatin. Then dissolve Jell-O Gelatin in boiling water as directed on package and pour the hot mixture over ice in mold. Stir until ice is dissolved, or until gelatin starts to thicken. If ice does not melt completely, remove unmelted pieces before chilling mold. To add fruits or vegetables, freeze water in a larger mold to allow space for added ingredients and allow gelatin to stand 3 to 4 minutes to thicken before folding in the ingredients. Chill until firm.

### TIPS ON UNMOLDING JELL-O GELATIN

The art of unmolding gelatin is easy to learn—it just takes a little practice. Before unmolding gelatin, make certain that gelatin is completely firm—it should not feel sticky on top and should not sag toward side if mold is tilted. If gelatin is firm, dip a small pointed knife in warm water and run tip of it around top edge of mold to loosen. Or moisten tips of fingers and...
(a) Before unmolding gelatin, run knife tip around top.  
(b) Or pull from edge of mold gently with moist fingers.  
(c) Dip mold just to rim in warm water for 10 seconds.  
(d) Lift from water and shake gently to loosen gelatin.

Gently pull gelatin from top edge of mold. When using disposable metal cans as molds, puncture bottoms—this makes it easier to unmold the gelatin because it eliminates any vacuum in cans, which are usually deeper in relationship to top surface than other molds.

Moisten top of gelatin and a chilled plate—the moist surfaces make it easier to slide the gelatin into the center of the plate after it has been unmolded.

Dip mold in warm water—do not use hot water as it will melt the gelatin. (If oven-proof glass, china, or paper containers are used as molds, the water should be slightly warmer.) Working quickly, dip the mold just to the rim in the warm water—about 10 seconds. Lift from water, hold upright, and shake slightly to loosen the gelatin from mold.

Invert moistened plate on mold. Always unmold gelatin on a chilled or

(f) Invert mold and plate together; gently remove mold.

cold plate or platter—a warm plate will melt the gelatin.

Then invert plate and mold together. Lift off mold carefully—if gelatin doesn’t release easily, dip the mold in warm water again. If necessary, move gelatin to center of plate.

NOTE: If desired, try this new way of unmolding gelatin. Oil mold slightly; then place a 1-inch strip of aluminum foil across bottom and up sides, letting it extend as tabs on both sides. Smooth foil to remove wrinkles and press to shape of mold. Add gelatin and chill until firm. Then moisten top of gelatin and a plate, place plate over gelatin, and invert together. Gently pull one of the tabs to break vacuum in mold; then remove mold and the foil strip.

Prepare Jell-O Gelatin (any fruit flavor) as directed on package and chill until very thick. Then beat with rotary beater or electric mixer until mixture is fluffy and thick—about double in volume results in the best eating quality and flavor.

To shorten the chilling and beating times, chill the gelatin until slightly thickened. Then place the bowl of gelatin in another bowl of ice and water before starting to beat.

Pour whipped gelatin into molds or shallow pan, or add cubes of Jell-O Gelatin (page 85) or fruit and pour into molds. Chill until firm. Unmold, cut in squares, or spoon into serving dishes; serve with fruit or a custard sauce, if desired. A 3-oz. package makes about 4 cups, or 4 or 5 servings; a 6-oz. package makes about 8 cups, or 8 to 10 servings.

Snows: Prepare whipped Jell-O Gelatin, adding unbeaten egg whites to the thickened gelatin before starting to beat. Use 1 or 2 egg whites for a 3-oz. package Jell-O Gelatin, or 2 or 3 egg whites for a 6-oz. package.

HOW TO WHIP JELL-O GELATIN
(Pictured on page 80)

One of the easiest things you can do to change the texture and appearance of Jell-O Gelatin—just whip it until thick and fluffy.
HOW TO CUBE JELL-O GELATIN
(Pictured on page 80)

Brightly colored cubes that are delicious served alone, with fruits, or in desserts and salads.

1 package (3 oz.) Jell-O Gelatin
(any fruit flavor)
1 cup boiling water
3/4 cup cold water

*For very firm cubes, cold water may be reduced to 1/2 cup. For softer cubes, cold water may be increased to 1 cup.

Dissolve Jell-O Gelatin in boiling water. Add cold water. Pour into a shallow pan. Chill until firm—at least 4 hours or overnight. (Cubes hold their shape best when gelatin is chilled overnight.) Then cut in cubes, using sharp knife which has been dipped in hot water. To remove cubes from pan, apply warm wet cloth over bottom of pan; then remove with spatula. Or quickly dip pan in warm water and invert on wax paper. Serve in sherbet glasses with cream or fruit, if desired. Makes 4 servings.

HOW TO FLAKE JELL-O GELATIN
(Pictured on page 80)

Delicate flakes of Jell-O Gelatin set off fruit or cream beautifully.

1 package (3 oz.) Jell-O Gelatin
(any fruit flavor)
1 cup boiling water
3/4 cup cold water

Dissolve Jell-O Gelatin in boiling water. Add cold water. Pour into a shallow pan. Chill until firm—at least 4 hours. Break into small flakes with a fork or force through a ricer or large-meshed strainer. Pile lightly in dishes. Top with fruit or ice cream, if desired. Makes 1 1/4 cups, or 4 servings.

Peach Melba Sundae: Prepare flaked Jell-O Raspberry Gelatin, using two 3-oz. packages or one 6-oz. package. Spoon gelatin flakes into dishes, making a depression in the middle of each. Drain a 1-lb. can of peach halves; place a peach half, cut side up, in each dish. Top with scoop of ice cream. Makes 5 to 8 servings.

FLAVOR DUETS

Create new Jell-O Gelatin flavors and colors by combining two favorites.

2 packages (3 oz. each) Jell-O Gelatins (2 fruit flavors—see note)
2 cups boiling water
2 cups cold water

Dissolve Jell-O Gelatin together in boiling water. Add cold water. Pour into 1-quart bowl, individual molds, or dessert dishes. Chill until firm. Makes 4 cups, or 8 servings.

NOTE: Preferred flavor combinations include lemon with any red flavor, lemon with orange, raspberry with orange, lemon with orange-pineapple, and any two red flavors.

EASY TRICKS

Many special treats can be made with a simple trick or two and easy-to-make Jell-O Gelatin.

Marshmallow Mold: Prepare 1 package (3 oz.) Jell-O Gelatin (any fruit flavor) as directed on package; chill until almost set. Divide 12 diced marshmallows between 4 serving dishes and spoon on gelatin. (Marshmallows will try to pop toward surface.) Makes 4 servings.

Carousels: Prepare any fruit flavor Jell-O Gelatin as directed on package; pour into serving dishes. Chill until almost firm. Then insert several animal crackers into the gelatin around sides of dishes. If desired, insert a thin, red and white striped candy stick or soda straw in center of dish. Chill until firm. Makes 4 servings.
Soft Drink Dessert: Prepare any fruit flavor Jell-O Gelatin, substituting a carbonated soft drink for part or all of the water—use two 6- or 7-oz. bottles or a 12-oz. bottle of cola, ginger ale, root beer, or other soft drink and add water to make up the remainder of the required liquid.

Scalloped Dessert: (Pictured on page 80) Prepare any fruit flavor Jell-O Gelatin as directed on package; pour into sherbet glasses. Chill until firm. Then make scalloped borders around edges by scooping out spoonfuls with a ½-teaspoon measure. Top with prepared Dream Whip Whipped Topping or whipped cream, filling scallops. Garnish with the scooped-out gelatin.

Crown Mold: Prepare two 3-oz. packages or one 6-oz. package Jell-O Gelatin (any fruit flavor) as directed on package. Pour 2 cups gelatin mixture into a 1½-quart crown-shaped or other fancy mold; chill until set, but not firm. Meanwhile, chill remaining gelatin until very thick; then whip until fluffy—see directions on page 84. Pour whipped gelatin over clear gelatin in mold. Makes about 6 cups, or 8 to 10 servings.

Frosted Beverage Glasses: Dampen edge of each glass with a moist, not wet, clean cloth. Dip in Jell-O Gelatin (any fruit flavor), right from package, to coat rim. Use on glasses for soft drinks, milk, or iced tea.

Cut-Outs: (Pictured on page 80) Prepare 1 package (3 oz.) Jell-O Gelatin (any fruit flavor) as directed on package, reducing cold water to ½ cup. Pour into a 9-inch square pan, or to ¼-inch depth in other shallow pans. Chill until firm. Then cut designs, using cutters that have been dipped in warm water. Transfer cut-outs to top of pudding, whipped gelatin squares, or other desserts, using a broad spatula dipped in warm water. If only a few cut-outs are desired, flake remaining gelatin with a fork—see directions on page 85.

Candy Stripe Parfaits: (Pictured on page 80) Prepare 1 package (3 oz.) Jell-O Gelatin (any fruit flavor) as directed on package; chill until very thick. Meanwhile, prepare 1 envelope Dream Whip Whipped Topping Mix as directed on package. Then layer gelatin and prepared whipped topping in parfait or other slender glasses, ending with topping. Chill until serving time—at least 2 hours. Makes about 4 cups, or 6 to 8 servings.

Golden Ring Cupcakes: Prepare two 3-oz. packages Jell-O Lime, Orange, or Orange-Pineapple Gelatin as directed on package; chill until slightly thickened. Drain a 1-lb. 4½-oz. can sliced pineapple; place pineapple slices in bottoms of six 10-oz. baking cups. Cover each with ½ cup gelatin and top with a packaged individual sponge cake shell, flat side up. Pour on remaining gelatin. Chill until firm. Makes 6 servings.

TILT-TOP DESSERT

(Pictured on page 80)

A simple dessert with just a touch of creativity to make it different.

1 package (3 oz.) Jell-O Gelatin (any fruit flavor)
1 cup boiling water
1 cup cold water
1 cup whipped cream or prepared Dream Whip Whipped Topping

Dissolve Jell-O Gelatin in boiling water. Add cold water. Chill until slightly thickened. Measure and set aside ½ cup gelatin. Then fill 4 or 5 stemmed sherbet dishes or small glasses about two-thirds full with remaining gelatin. Tilt glasses so gelatin will set at a slant by catching base between bars of rack and leaning glasses against wall of refrigerator. Chill until firm. Meanwhile, fold whipped cream into ½ cup of the reserved gelatin. Then set glasses upright; fill with cream mixture. Garnish with the remaining clear gelatin. Makes about 3 cups, or 4 or 5 servings.
MULTI-STRIPE DELIGHT

Layers of Jell-O Gelatin form a color spectrum that delights eye as well as palate.

Prepare several fruit flavors of Jell-O Gelatin as directed on packages, using as many packages and flavors as will fill your finest crystal bowl or stemmed glasses—a big brandy snifter was used for the photo. (If capacity of the bowl is unknown, fill it with water; then measure the water and use a 3-oz. package Jell-O Gelatin for each 2 cups required to fill the bowl.)

Layer the flavors in the bowl—see directions for layering Jell-O Gelatin on page 81. If desired, stemmed glasses may be tilted in refrigerator by catching base between bars of rack and leaning top against wall. Chill until firm. Garnish with Frosted Grapes (page 76), if desired. Plan on 4 servings from each 3-oz. package of Jell-O Gelatin used in the bowl.

One of the nicest things about Jell-O Brand Gelatin is that it’s so many different things all at once. It’s cool like ice cream. It’s light like chiffon pie. It’s smooth like pudding. It’s refreshing like sherbet, and it still tastes like fresh fruit all at once. Jell-O is everything you want a dessert to be. That’s why we say, Jell-O is the best of everything.

Available in 4 and 8 serving sizes.
