Directions for Using

MINUTE GELATIN

YOU can make many delicious salads and desserts with Minute Gelatin. These basic recipes and their easy-to-make variations may suggest other combinations. When you use this pure, unflavored, granulated gelatin in your own recipes, remember these special points:

1. One envelope of Minute Gelatin will jell 2 cups of liquid. At least 1 cup of the liquid should be boiling or very hot.

2. Mix Minute Gelatin first with a small amount (2 to 4 tablespoons) of cold liquid. (Count this as part of the 2 cups liquid required.) Then add the hot or boiling liquid and stir until gelatin is completely dissolved.

3. Flavorful, vitamin-rich fruit juice may be used as part of the liquid. If sweetened canned fruit juice is used, reduce the sugar in the recipe.

4. Minute Gelatin is an excellent extender for precious rationed canned fruits and vegetables. Use 1 to 1 1/2 cups diced fruit or vegetables to 1 pint chilled and slightly thickened gelatin mixture. Season or sweeten to taste.

5. Never use raw pineapple in gelatin dishes; use cooked or canned pineapple.

6. To unmold Minute Gelatin desserts or salads, dip mold to rim in warm—not hot—water, hold a moment, remove, and dry outside. Then invert serving plate on top of mold and turn over. Shake and lift mold from plate.
