WHO SAID NESTLÉ'S FOOD?
LETS ME TASTE IT!
YUM! BUT IT'S GOOD
MY TURN NOW

GIVE THE BABIES NESTLÉ'S FOOD
The mother who uses Nestle's Milk Food for her child places her trust in a diet for infants which has been known as a standard the world over, for more than 25 years. Nestle's Food is not an experiment, but a tested and tried substitute for mother's milk, which has received the endorsement of the most eminent physicians in the world, and has been awarded 26 first prize medals at the leading expositions of Europe, America and Asia. The manufacture of Nestle's Food is not a secret. It is made in Vevey, Switzerland, of the rich, pure milk of Swiss Cows—the richest milk in the world—scientifically combined with specially prepared wheat and enough sugar to sweeten. The addition of water only is required to prepare it for use. The expense of adding milk is thus saved, and what is far more important, the great danger arising from impurity in the milk is avoided.

Nestle's Food is a natural food, containing the requisite elements for forming firm flesh, strong bone and rosy cheeks, and furnishing a nourishing and wholesome diet, closely resembling human milk. Especially during the hot weather of summer is Nestle Food invaluable. It has proved itself to be the only food which will be retained by the infant during the various summer complaints, dysentery and Cholera Infantum. Nestle's Food is sold in one pound cans by all druggists, price 50 cts. If you have any difficulty in obtaining the Food, write us and we will see that you are supplied. Our book "The Baby"—a carefully written and beautifully illustrated book on the subject of baby life will be mailed free to any one on request.
