THE FAMOUS ROUND OAKS

STOVES, RANGES AND FURNACES WITH A GOOD CHARACTER

MANUFACTURED BY THE
ESTATE OF P. D. BECKWITH INC.
DOWAGIAC, MICHIGAN

Makers of Good Goods Only
There is only one thing to be said in favor of a poor heating stove—It makes a man forget all his other sorrows.

There is one heating stove that has never failed to please and satisfy every user.

Its reputation is world wide.
It has friends everywhere.
If you don’t know it, investigate.
It is the most nearly perfect heating stove ever made.
Burns any kind of fuel.
Holds the fire—all night—sure.
Its the genuine Round Oak.

Booklet fully describing this most famous stove sent free upon request
The FAMOUS GENUINE ROUND OAK

Made in Numbers 12, 14, 16, 18, 20, 22 and 24
FOR HARD OR SOFT COAL, COKE OR WOOD

The Number indicates the diameter of the stove, in inches, through the body, actual measurement.
Made in Numbers 14, 16, 18, 20, 22 and 24

FOR HARD COAL

Showing magazine for hard coal, low-down fire pot, anti-clinker grate, hot-blast linings and one-piece air-tight bottom. Hot-blast draft not to be used with hard coal.
The GENUINE ROUND OAK

Made in Numbers 18, 20, 22 and 24
WITH EXTRA HALF SECTION

The Round Oak with extra half section has greater heating capacity than any other stove made. For churches, schoolhouses, stores and halls. This is also made with full sheet upper section when desired.
Above cut shows the famous clinkerless coal fixture used in the Round Oak. Burns hard or soft coal and coke equally well. Wood can also be burned in this fixture, if desired. The rim discharge at bottom of basket allows the refuse to pass out and not clog the fire. This cannot be had when single fire pot is used. The cone grate holds the fire to the outside, giving more heat, and also avoids the formation of cinders and clinkers, thus keeping the fire clear and in shape to do good work at all times. The fire-bowl extension protects the lower end of the sheet-iron body perfectly and forms the hot-blast draft. It is arranged so as to pass through the feed doors, and can be put in without taking the stove apart.

Wood grate illustrated herewith should be substituted for the coal fixture when wood is to be used exclusively.
The BECKWITH
AIR-TIGHT

Made in Numbers 18, 20, 22 and 24
FOR WOOD ONLY

A large, handsome, efficient wood heating stove. It has the Round Oak bottom and draft door—the only air-tight bottom that will stay tight and always hold the fire. It is lined with cast iron. It has large feed door and extra good sized opening in top for chunks. A good dependable stove. You may rely upon it. It is guaranteed.
The New Round Oak Base Burner

The best made and fitted stove of its kind.
The greatest heater known in this type of stove.
The habits of heat now understood and exemplified in the New Round Oak.
Heat units enormously increased by convection curves and heat pockets by which the hot gases are forced into contact with outside surfaces.

New principles. New ideas. Greater efficiency and a great saving in fuel.
42% more radiating surface.
140% more circulating flue heating surface.
200% more circulating flue area.
The handsomest—the most efficient—the foremost base burner for hard coal. Investigate.

New and interesting booklet sent on request. Tells all about the new method.
The NEW ROUND OAK BASE BURNER

Made in Numbers 41, 51 and 61
FOR HARD COAL
Fire Pots, 14, 15 and 16-inch
A COMPARISON between the Round Oak three flue base burner and a standard three flue base burner of other make—same size.

Total area of flue surface with which products of combustion come in contact: **Round Oak, 2,703 sq. in.** Standard, 1,890 sq. in.

Extra heating surface in the Round Oak 813 sq. in. Percentage of increased heating surface in the Round Oak over a standard base burner, same size, other make, 42 per cent.
The Round Oak Room Heater heats by circulation. It equalizes the heat in all parts of the room like a furnace, and makes a first-class heater for schoolrooms, churches, stores, and large halls. It gives perfect satisfaction and we guarantee it fully. It is to be used as a room heater and not as a furnace.
The Incomparable

The ROUND OAK CHIEF
STEEL RANGE

It is Made in All Styles and Sizes

FOR COAL OR WOOD

7, 8 and 9-inch Griddles.  16, 18 and 20-inch Ovens.  Duplex Grate.
YOU actually save money by investing in a strictly first-class, genuinely good, warm-air furnace like the Round Oak on the start.

Of the proper size, correctly installed, it will last a lifetime in perfect condition—saving all expense for repairs and giving you perfect service.

It burns less fuel and gives more heat than any other furnace construction. It will save its extra cost over the cheap furnace in a very short time—leaving you with a sound and satisfactory furnace, constantly saving for you every day it burns.

It weighs about twice as much as the usual furnace of competing size. In fine workmanship, in material, and principle of construction it is unassailed. Look up its record, send for our catalogues. Let us make good.

In the usual residence perfect warm-air heating can be done superior to steam or hot water in every respect, particularly in quality of air, expense of installing and fuel burned. We prove up by what we have done. Investigate.

We make furnace plans free, with no obligation attached.

*Furnace Book, Warmth and Comfort, sent free upon request*
It is Made in Twelve Sizes

FOR HARD OR SOFT COAL, COKE OR WOOD

Just as good a furnace as the Round Oak is a stove
If you are going to need a stove, range, or furnace, it will pay you to buy good Round Oaks. They save fuel, do their work perfectly, cost no more than imitations, and outlast them all. It doesn’t pay to experiment—Round Oaks are time tried and tested, and have a good character.

Be sure to look them up. They are by far the cheapest in the long run.
