ROYAL

COOK BOOK

ROYAL BAKING POWDER CO.,
NEW YORK, U.S.A.
This is a new edition of the famous Royal Cook Book. This book has gone into literally millions of homes in the ten years since it was first published. Millions of women have found the Royal Cook Book to be what we intended it to be—a practical and trustworthy guide to good cookery.

The recipes include not only cakes and fillings, biscuits, pies, pastries, that you make with baking powder, but delicious meats, salads, entrées, fish and vegetables as well. They cover the whole field of cookery.

Every recipe has been carefully chosen and has been repeatedly tested by experts as well as practical home bakers. You will find the recipes accurate, economical, reliable and suggestive of new and interesting dishes to serve. Follow them exactly and you will find the foods themselves delicious.

THE ROYAL BAKING POWDER COMPANY
"Cream of Tartar Baking Powder is Best from a health point of view"

What do the experts think of various kinds of baking powder — experts in foods and experts in health? Do they really prefer one kind above all others? And if they do, what is the basis for their choice?

To answer these questions authoritatively specialists in many fields were recently asked what kind of baking powder they prefer and why.

Of the impressive numbers who expressed definite opinions—

86% of the Domestic Science Teachers in high schools, who answered
88% of the Directors of Home Economics in universities and technical schools, who answered and
88½% of the Food Specialists who answered said:
"I prefer Cream of Tartar Baking Powder:"
and
82% of the Hospital Dietitians who replied
81% of the New England Doctors who replied and
83% of the New York State Doctors who replied stated their opinion to be:
"Cream of Tartar Baking Powder is best from a health point of view."
The reasons that these teachers and food experts gave for this definite preference are very practical and are as important for every household as for the school or college class room.

"Results are better"—"Surer"—these are points the experts stressed most often.

"It is more healthful," they said—"It is purer" and "It leaves no bitter taste."

ROYAL
IS THE ONLY NATIONALLY DISTRIBUTED
CREAM OF TARTAR BAKING POWDER

Cream of Tartar is a natural, wholesome fruit product that comes from ripe grapes.

Because it has always been our own firm belief that cream of tartar is the best ingredient known for baking powder, Royal Baking Powder has been made for over 50 years with the finest cream of tartar obtainable, imported for Royal from Europe.

ALWAYS LEAVENS PERFECTLY

You can count on Royal Baking Powder to leaven perfectly every time. Housewives know from experience and experts have proved that Royal never fails.

In South America as well as North America, in the British Isles, in Africa, Royal Baking Powder is recognized as the standard for baking powder, indispensable to housewives with critical tastes in food.

It keeps its freshness, leavening power, and fine quality in all climates.

And how truly economical it is to use Royal. The cost of enough to make a whole layer cake miraculously tender and light is almost nothing when you consider the cost of the other ingredients.

For successful baking—for home-made cakes, biscuits, muffins, waffles, pastries delectably light and fine-flavored—be sure you always use Royal Baking Powder.

### How to Open Any Royal Baking Powder Tin

The point to begin cutting the label is indicated by the words "CUT * HERE." Insert the point of knife at the * and run knife around entire circumference where cover meets body of tin.

To open, place the tin in the upturned palm of the left hand; put the right hand, palm downward, over the cover, grasping the cover firmly. Give the cover a twist to right and then to left and it will come off easily.
How to Measure

All measurements must be accurate if you are anxious to have success and to get always uniform results.

The standard measuring cup holding ½ pint is intended wherever a cup is mentioned. This cup is marked in thirds and fourths. Standard teaspoons and tablespoons can be purchased and are best.

Where no standard cups and spoons are available use the same size cup (tea cup size) and the same size spoons when measuring the ingredients that go in the same recipe.

To measure one cup or one tablespoon or one teaspoon, fill cup or spoon full or as much as it will hold and scrape off excess with back of knife.

It is interesting to note that in an ordinary heaping teaspoon of Royal Baking Powder, for example, there are from 4 to 5 level teaspoons, and in an ordinary, rounding teaspoon of Royal Baking Powder, there are from 2 to 3 level teaspoons. A recipe calling for 4 teaspoons Royal Baking Powder would be approximately the same as that calling for one heaping teaspoon and a recipe calling for 2 teaspoons, would be approximately the same as that calling for one rounding teaspoon.

In all recipes in this book, where 1 cup, 1 tablespoon, or 1 teaspoon is called for, the level cup, level tablespoon or level teaspoon is meant.
GENERAL SUGGESTIONS

Where shortening is mentioned in the recipes it is understood that butter or lard, or an equivalent quantity of butter substitute or vegetable oil may be used.

MEASUREMENTS

All measurements for all materials called for in the recipes in this book are level.
The standard measuring cup holds one-half pint and is divided into fourths and thirds.
To make level measurements fill cup or spoon and scrape off excess with back of knife.
One-half spoon is measured lengthwise of spoon.
Sift flour before measuring.

BAKING

Regulate the oven carefully before mixing the ingredients. Many a cake otherwise perfectly prepared is spoiled because the oven is too hot or not hot enough.

Biscuits and pastry require a hot oven; cakes, a moderate oven.

When a cake is thoroughly baked it shrinks from the sides of the pan. A light touch with the finger which leaves no mark is another indication that the cake is baked.

If sour milk is used in any of the recipes in this book, add \( \frac{1}{3} \) teaspoon of baking soda for each cup of milk called for and use Royal Baking Powder just as indicated in each recipe. The soda should be sifted with the baking powder and other dry ingredients.

When baking at high altitudes make following changes:
Plain Cake, Page 10, change baking powder to 2 teaspoons and in altitudes over 7,000 feet reduce sugar to \( \frac{3}{4} \) cup.

All other recipes can be made satisfactorily exactly as indicated.

TABLE OF EQUIVALENT WEIGHTS AND MEASURES

| 1 saltspoon = \( \frac{1}{4} \) teaspoon |
| 3 teaspoons = 1 tablespoon |
| 16 tablespoons = 1 cup |
| 2 cups = 1 pint |
| 2 pints = 1 quart |
| 4 cups = 1 quart |
| 2 cups granulated sugar = 1 pound |
| 4 cups flour = 1 pound |
| 2 cups butter = 1 pound |
| 2 tablespoons butter = 1 ounce |
| 2 tablespoons liquid = 1 ounce |
| 4 tablespoons flour = 1 ounce |
| 1 square unsweetened chocolate = 1 ounce |
Bread and Rolls

ROYAL Baking Powder may be used instead of yeast to leaven bread. It does the same work; that is, raises the dough, making it porous and spongy.

Pastry and Pies

A PINCH of salt and a little Royal Baking Powder make pastry light, flaky and more digestible.

Pastry should rise in baking to double its thickness, and be in light flaky layers. The novice must learn to handle it lightly and as little as possible in rolling and turning. It is important to have all materials and utensils cold.

Pastry is better if allowed to stand in the icebox several hours before using.

Plain Pastry

2 cups flour
1/2 teaspoon salt
2 teaspoons Royal Baking Powder
1/2 cup shortening
cold water

Sift together flour, salt and baking powder; add shortening and rub in very lightly with tips of fingers. Add cold water very slowly, enough to hold dough together (do not work or knead dough and handle as little as possible). Divide in halves; roll out one part thin on floured board, and use for bottom crust. After pie is filled roll out other part for top. Cover pie; press edges together; trim off pastry and bake.

Rich Pastry

1/2 teaspoon Royal Baking Powder
1/2 teaspoon salt
1/2 cup shortening
cold water

Frozen Desserts

How to Freeze

SCALD can, cover and dasher, adjust can in freezer; put in dasher; pour in the mixture to be frozen and fasten cover (the can should never be more than ¾ full); adjust crank and turn once or twice. Fill space around can to within an inch of top with ice and salt (three parts crushed ice to one part salt), packing hard. Turn slowly at first, increasing speed when mixture begins to stiffen. Add more ice and salt as required. When mixture is very firm, wipe off cover, open can and remove dasher; scrape frozen mixture from dasher and sides of can, and pack down solidly; cover with paper and replace can cover. Put cork in opening in cover. Pour off salt water if there is danger of its getting into the can. Fill up over top of can with ice and salt (four parts ice to one part salt). Cover freezer with heavy blanket and keep in cool place until ready to serve.

Cool and add fruit, which has been put through food chopper. The fruit is a matter of taste. It may be 2 tablespoons raisins, 1 tablespoon citron, 1 tablespoon cherries, 1 tablespoon blanched almonds and 1 tablespoon candied pineapple. Freeze, but not too stiff; put into mold and pack in ice and salt until ready to serve.

Grape Sherbet

Warm grape juice, and in it dissolve sugar; mix thoroughly with ice cold milk; freeze at once. This makes a lilac colored sherbet.

Lemon Sherbet

Mix juice and sugar, stirring constantly while slowly adding very cold milk. If added too rapidly, mixture will curdle. However, this does not affect quality. Freeze and serve.

Meats

Roasting
Wipe meat with damp cloth. Trim and tie into shape if necessary. Put some pieces of fat in bottom of pan, and season meat with salt and pepper. Have oven very hot at first and when meat is half done reduce heat. Baste every 10 to 15 minutes. If there is danger of fat in pan being scorched add a little boiling water. Roast from 10 to 15 minutes for each pound of meat, as it is desired rare or well done.

Broiling
The rules for roasting meat apply to broiling, except that instead of cooking it in the oven it is to be quickly browned, first on one side and then on the other, over hot coals or directly under a gas flame, turning every minute until done. Meat an inch and one-half thick will broil in 8 to 15 minutes. Season after it is cooked.

Pan Broiling or Frying
Put meat to be broiled or fried in very hot frying pan, with very little or no fat. Turn every few minutes until cooked. Season and serve immediately. Steaks and chops may be pan-broiled without any fat in the pan. For thin gravy pour a little boiling water into pan after meat is taken out.

Boiling and Stewing
Fresh meat for boiling should be put into boiling water and boiled hard for about 5 minutes; reduce heat and boil gently about 20 minutes for each pound. Salt and spices may be added for seasoning. A little vinegar put into the water with tough meat makes it tender. The broth of boiled meat should always be saved for soups, stews or gravies. Salt meats should be put in cold water, which as soon as it boils should be replaced by fresh cold water, repeating if necessary until meat has palatable flavor when done. Salted and smoked meats require about 30 minutes slow boiling, to each pound. Vegetables and herbs may be boiled with them to flavor. When cooked keep hot until required, if they are to be served hot; if they are to be served cold, cool in liquor in which they were boiled. Very salt meats, or those much dried in smoking, should be soaked over night in cold water.

Pot Roasting
Tough cuts of meat may be first browned in fat, then half covered with boiling water and cooked slowly either in oven or in iron kettle on top of stove. This method requires long, slow cooking.

Beverages

How to Make Coffee

The best method of making coffee, as determined by the Better Coffee-Making Committee of the National Association of Coffee Roasters, is as follows:

“Fill a kettle with fresh cold water and put it on to boil. Place over an open china teapot, kept just for coffee, a clean, wet, old linen napkin, or a new square of unbleached muslin, letting it sag toward the center. Put into the depression 4 heaping tablespoons (for 4 cups of coffee) of finely pulverized coffee. This fine pulverization is very important. Ordinary ground coffee will not do at all, and gives weak infusions.

“When the water in the kettle is boiling fiercely, pour it through the coffee slowly until 4 cups have gone through, or a trifle more for 4 cups of coffee.

“Cover and take at once to table.

“Wash the cloth immediately and keep it in a jar of cold water, never permitting it to get dry, and freshening the water every day. Keeping the cloth sweet is essential. Every effort should be made to this end. The least souring ruins the coffee.

“Follow these directions strictly, paying especial attention to having the coffee very fine, like flour, and the water boiling, and you will have excellent coffee even though you buy cheap blends.”

Boiled Coffee

For 4 cups. Beat half an egg white with 3 tablespoons cold water; add 1/4 cup ground coffee and stir until moistened; put into scalded coffee pot; add 1 quart boiling water and boil 5 minutes. Add 1/4 cup cold water and allow to stand 3 minutes to settle and serve.

Cocoa

The usual rule is 2 teaspoons cocoa, 1 teaspoon sugar; 1 tablespoon cold water and 3/4 cup milk to each cup. Mix cocoa with sugar and cold water; cook over slow fire until thick; add milk, and boil 1 minute.

Cocoa Syrup

- 2 cups water
- 2 cups sugar
- 1 cup cocoa
- 1/2 teaspoon salt

Stir water and sugar in saucepan until dissolved; boil 5 minutes; mix cocoa with cold water to make a paste and add to boiling syrup; boil slowly for 10 minutes; add salt. When cold put into bottle or glass jar in refrigerator. Take 2 tablespoons of syrup for each glass or cup of milk. Serve with whipped cream.

Served either hot or iced, this is a nourishing and delicious beverage.
Water for tea should be freshly heated and just boiling. Teas are of different strength, but a safe rule is 1 teaspoon dry tea to 1 cup water. Scald teapot; put in dry tea and cover for 1 minute. Add boiling water and cover closely. Allow it to stand 3 to 6 minutes and strain off into a second hot pot.

Chocolate
Cut into small pieces 1 ounce unsweetened chocolate; add 1 tablespoon sugar and 2 tablespoons hot water. Boil all together till smooth; add gradually 2 cups scalded milk; cook in double boiler 5 minutes. If desired add ¼ teaspoon vanilla. Serve with whipped cream.

Candies
Cream Candy
2 cups sugar
2 tablespoons vinegar
1 teaspoon lemon extract
1 teaspoon cream of tartar
Add a little water to moisten sugar; boil with vinegar and cream of tartar without stirring, until brittle when tried in cold water. Add flavoring; turn out quickly on buttered plates. When cool enough to handle, pull until white, and cut into pieces.

Butter Scotch
2 cups sugar
2 tablespoons water
2 tablespoons butter
Boil without stirring until brittle when tested in cold water. Pour out on buttered plates to cool.

Butter Taffy
3 cups brown sugar
¾ cup molasses
¼ cup water
¼ cup vinegar
4 tablespoons butter
1 teaspoon vanilla extract
Boil sugar, molasses, water and vinegar. When crisp in cold water add butter and cook 3 minutes. Add vanilla and cool on buttered pans and break into pieces.

Chocolate Caramels
2 cups molasses
1 cup brown sugar
1 cup cream or milk
¾ pound unsweetened chocolate
4 tablespoons butter
Put all ingredients into kettle. Boil until it hardens in cold water; add 1 teaspoon vanilla and turn into greased tins. When nearly cold, cut into small squares.

Creamed Nuts
2 cups confectioner’s sugar
white of 1 egg
1 teaspoon vanilla extract
2 teaspoons cold water
walnuts or other nuts
Mix sugar, unbeaten egg white, vanilla and water into a stiff paste. Shape into little balls, press between halved walnut or other nut meats.

Stoned dates and large seeded raisins may be filled with this cream, or it may be mixed with chopped nuts, shaped into bars and cut into squares.

Peanut Brittle
2 cups chopped roasted nuts
3 cups granulated sugar
Put sugar in frying pan. Stir over slow fire. It will lump, then gradually melt. When pale coffee color, and clear, add nuts and pour quickly on greased tin. When cold break into pieces.

1½ cups sugar or maple syrup
1 tablespoon butter
3 tablespoons water
3 quarts popped corn
Boil sugar or syrup with butter and water until it spins a long thread; pour this on corn and if desired shape into balls.

**Fireless Cookery**

THE Fireless Cooker has become an important factor in the home. The principle employed is the preservation of heat by the use of non-conducting materials. The device ordinarily used is a rectangular box lined on all sides with some substance which will prevent escape of heat, with spaces or wells for the insertion of stone or metal discs or radiators and vessels containing food to be cooked.

Among the advantages of this method are: the improvement in flavor by slower cooking with little opportunity for evaporation; improved appearance of food that is subject to shrinkage when cooked by ordinary methods; saving in labor, as the cooking practically takes care of itself. Dinner may be prepared in the morning, placed in the cooker, and without further attention be ready to serve at any time after 3 or 4 hours. While the time required for cooking is longer than in the usual methods, the actual time consumed in preparation of a meal is considerably reduced.
DIRECTIONS

Prepare food for cooking as usual. Place in special vessel, designed to fit into wells of Fireless Cooker, and heat on range or over gas flame until ordinary cooking temperature is reached. Put into cooker with one or more radiators which have been heated for 10 or 15 minutes over hot fire. For roasting, radiator should be hot enough to brown a pinch of flour immediately. Close cover, fasten lightly so that the steam may escape and allow cooking to proceed for time specified in recipes.

For baking cake, apples, etc., proceed as for roasting. The time required for baking is slightly longer than that specified for regular ovens. For cake ordinarily baked in a moderate oven, heat radiators hot enough to brown a pinch of flour in half a minute.

The Fireless Cooker is especially convenient for the preparation of cereals, meats, vegetables and other dishes that are ordinarily boiled or roasted. Remember that foods should be thoroughly heated before putting into cooker.

Cereals

Prepare cereal for cooking in double boiler as usual. Boil over fire for 5 minutes; place in larger vessel of boiling water in cooker and allow it to remain 4 or 5 hours or longer. If placed in cooker at night it should remain warm enough to serve for breakfast.

Steaming

For recipes see "Boston Brown Bread," "Steamed Fig Pudding," "Poor Man's Pudding," "Christmas Plum Pudding," etc. Prepare and mix ingredients as directed. Put into greased molds and place in shallow pan of boiling water over very hot radiator in cooker. Fasten cover tight and cook for 5 to 6 hours.

Soups

Place ingredients in vessel; cover with cold water; bring to boil over free flame and boil 5 minutes. Fasten cover and transfer to cooker, using one hot radiator in bottom of well. Cook 3 or 4 hours and season when ready to serve. For ingredients and special directions for preparing soups, see "Soups."

All measurements are level. Four level teaspoons of baking powder about equal one heaping teaspoon as heretofore used.

Roast Meats

Prepare and season meat in usual way. Place in large dry vessel; put very hot radiator in bottom of cooker well; place vessel containing roast on radiator, and place another very hot radiator on top. Close cooker and fasten. Allow it to remain about one-half hour per pound of meat.

The roast may be browned in a very hot oven before putting into cooker or just before serving.

Boiled or Stewed Meats

Prepare meat for cooking as usual, searing in frying pan if desired brown. Place in large vessel and cover or partly cover with boiling water, boiling with cover fastened tight for 10 or 15 minutes over free flame. Transfer to cooker, using one hot radiator underneath. Cook 2 or 3 hours, season and serve.

Vegetables

Prepare vegetables as usual. Place in vessel with small quantity of boiling water. As there is little evaporation in fireless cookers, allowance does not have to be made for loss by evaporation. Boil over free flame for 5 to 10 minutes. Transfer to cooker, using one radiator in bottom of well. Cook 3 or 4 hours, remove from cooker, season and serve.

Invalid Cookery

ALWAYS prepare food for the sick in the most careful and attractive manner. In sickness the senses are unusually acute and far more susceptible to carelessness and mistakes in the preparation and serving of food than in health.

Barley Water

2 tablespoons pearl barley
2 quarts cold water

Wash barley, soak several hours in cold water and boil gently in same water for 2 hours; or put into double boiler and cook for 4 hours or until reduced one-half. Lemon juice and sugar or salt to taste may be added if desired.

Pineapple Juice

Peel a very ripe pineapple, cut into small pieces and put through fruit press or potato ricer to extract all juice. Strain and serve with cracked ice.
Egg and Orange Juice

1 egg white
juice of 1 orange
sugar

Add orange juice sweetened to taste to egg white and beat well. Chill on ice and serve cold.

Beef Tea

1 pound lean beef
1 cup cold water

Cut beef up into small pieces or put through meat chopper. Put into fruit jar; add water and allow to stand 15 to 20 minutes to draw out the juice. Place on trivet or rack in pan of cold water; heat very slowly for about 2 hours. The water must not boil. Season, strain, cool and remove fat. Beef tea may be served hot or cold.

Scraped Beef

Scrape meat with sharp knife from lean beef cut from round until nothing but connective tissue is left. Form into small balls and broil slowly for about 2 minutes. Season and serve. For sandwiches do not cook but spread between thin slices of bread and season.

Spanish Cream

2 cups scalded milk
4 egg yolks
1/4 cup sugar
2 tablespoons granulated gelatine
1/4 cup cold water
1 teaspoon vanilla extract
1 pint cream

Pour scalded milk very slowly over egg yolks and sugar which have been mixed together. Cook slowly in double boiler until thick and smooth. Pour over gelatine which has been soaking in 1/4 cup of water. Chill, add vanilla and beat with egg whip until thick. Add the cream which has been whipped and chill in molds.

Gluten Muffins

2 cups gluten flour
3 teaspoons Royal Baking Powder
1 egg
1 tablespoon butter
2 cups milk

Sift together flour and baking powder; add beaten egg and melted butter to milk and add. Mix well and bake in greased muffin tins in moderate oven about 35 minutes.

Preserving and Canning

In addition to the foregoing, many of the soups, broths, jellies, ices and plain drop cakes found in the preceding pages are suitable for invalids and convalescents.

General Directions

(Material adapted from U. S. Food Administration and N. Y. State Department of Agriculture.)

Canning

Canning is the operation of preparing sterilized food so that it will keep indefinitely.

The custom of canning fruit in syrup is based on the improvement in flavor and texture which sugar gives to fruit. Sugar is not necessary for its preservation. Success depends upon thorough sterilization—that is, killing the organisms which cause food to spoil, and then sealing carefully to prevent their entrance. Fruit may be canned in water, in fruit juice and in syrup.

Preserving

The only difference between preserving and canning fruit is that sugar is always used in preserving, while in canning it is used in smaller quantity or not at all. In preserving the old rule of equal weights of sugar and fruit may be followed.
Directions for Canning by Open-Kettle Method

By this method which is generally used, for preserves, jams and marmalades, food is completely cooked and poured boiling hot into sterilized jars.

Prepare fruit, which may or may not be peeled, and cut into pieces depending on the variety. Blanch or scald peaches and similar fruits to loosen skin and chill by plunging into cold water. Cook slowly in as little water as possible or in fruit juice or fruit syrup until done. Fill the sterilized jars, seal and invert.

Directions for Canning by Can-Cooked Method

By this method uncooked or partly cooked food is packed in can or jar, covered with liquid and both jar and contents sterilized.

Pare fruit if desired or blanch or scald in boiling water a small quantity of the fruit at a time. (See time table.) Do not blanch cherries, sour cherries excepted, berries or plums.

Chill outside of the blanched fruit by immersing it for a few minutes in a vessel of cold water. Remove skin from such fruits as peaches.

Pack firmly in clean, tested jars to within one-half inch of top. Fill jars to within inch of top with boiling water, fruit juice, or syrup. Place a new rubber on each jar, adjust cover and partly seal. Place jars on false bottom of water bath and sterilize for required time. (See time-table.) If the hot-water bath is used, jars should be immersed in sufficient boiling water to cover tops to depth of about 1 inch. Do not begin to time the sterilizing until water boils. Keep water boiling during sterilizing period.

Remove jars from sterilizer. Seal them and invert to cool. Avoid a draft on jars, but cool as rapidly as possible.

Wash and label jars. Wrap in paper or store in a dark place to prevent loss of color of red fruit.

Vegetables may also be canned by this method.

Use of Sugar in Canning Fruit

Sugar is used in canning fruit for the purpose of improving flavor and is not necessary for preservation.

Thin syrup—1 part sugar to 2 parts water for sweet fruits.

Medium Syrup—1 part sugar to 1 part water for berries and medium sweet fruits.

Thick Syrup—2 parts sugar to 1 part water for sour fruits.

To make syrup add sugar to boiling water. Stir until all sugar is dissolved, then boil 2 or 3 minutes.

Canned Peaches

Scald sound, firm freestone peaches, a small number at a time, in boiling water just long enough to loosen skins; dip them quickly into cold water and slip off skins. Cut peaches in halves, and remove stones. Have ready a syrup made by boiling sugar and water together until sugar has dissolved, using 1/2 to 3/4 cup sugar to each cup water. Allow about 1 cup syrup for each quart jar of peaches. Put in 1 cracked peach pit for every quart of syrup.

Can-cooked Method.—Pack peaches in overlapping layers with rounded side uppermost and blossom end facing glass. Fill each jar with hot syrup and adjust rubber, cover and upper clamp, thus partly sealing jar. Place jars on a rack in hot water to cover tops to a depth of 1 inch. Bring water to boiling point, and boil pint jars 16 minutes, quart jars 20 minutes. Remove jars, seal and invert to cool.

All measurements are level. Four level teaspoons of baking powder about equal one heaping teaspoon as heretofore used.
Open-kettle Method.—Cook peaches in syrup until tender; then with sterilized spoon slip them carefully into sterilized jar; fill jar to overflowing with syrup. Adjust rubber, cover, seal immediately, and invert to cool.

Canned Cherries
Wash. Cherries should be pitted before being canned in order to conserve space. Can sweet cherries as berries. Blanch sour cherries 1/2 minute, in boiling water. Dip in cold water; drain and pack closely into hot sterilized jars. Cover with boiling water or boiling medium syrup. Loosely seal. Sterilize 16 minutes in boiling water bath. Remove jars at once, tighten covers, invert to test seal and cool.

Canned Pears
Wash and peel fruit and follow directions for canned peaches.

Canned Berries
Blackberries, blueberries, huckleberries, raspberries, loganberries, gooseberries and strawberries should be canned as soon as possible after picking. Hull or stem; place in strainer and wash by lifting up and down in pan of cold water. Pack into hot sterilized glass jars, using care not to crush fruit. To insure a close pack, put a 2 or 3 inch layer of berries on the bottom of jar and press down gently with spoon. Continue in this manner until jar is filled. Boiling water or boiling thin or medium syrup should be poured over the fruit at once. Loosely seal. Sterilize 16 minutes in boiling water. Remove jars, tighten covers, invert to test seal and cool.

Asparagus
Asparagus for canning must be fresh and tender. Select tips of uniform size and maturity and wash. Cut into lengths according to containers to be used. Scrape off scales, tough outer skins and hard ends and tie in bundles large enough for one jar.
Immerse the lower ends in boiling water and leave them immersed for 5 minutes, then the entire stalks, leaving them in 1 to 3 minutes longer.

Beans
Green String Beans and Wax Beans.—The beans should be tender and fresh, and graded according to size and washed. Leave whole or break in uniform pieces. Blanch 5 to 10 minutes until the pod will bend without breaking. Cold dip, drain well and pack into hot jars. Add salt and cover with boiling water. Loosely seal and sterilize two hours in boiling water. Remove when time is up, tighten covers, and invert to test seal.

Corn
Make careful selection of tender, juicy sweet corn, at best stage for table use. Can as soon as possible after gathering. Remove husks and silk; blanch tender ears 5 minutes, older ears 10 minutes. Cold dip and cut from cob but not too close. Pack at once into hot sterilized jars. As corn swells during sterilization, leave space of 1 inch at top. Add salt and cover with boiling water. Be sure that water penetrates through corn to the bottom of jar. Loosely seal and sterilize three hours in boiling water. Remove when time is up, tighten covers, invert to test seal and cool.

Jams
Jams are usually made with small fruits or with chopped large fruits. Cook slowly with an equal weight of sugar until thick; put into sterilized tumblers or jars and seal.

Raspberry Jam
Pick over berries. Mash a few in bottom of preserving kettle; continue until fruit is used. Heat slowly to boiling point and add equal quantity of heated sugar. Cook slowly 45 minutes. Put into sterilized jars.
Blackberry, gooseberry or other berry jam may be made in this way.
Royal Baking Powder Leaves No Bitter Taste

Plum Conserve

4 pounds plums
1 cup seeded raisins
2 oranges
sugar
juice of 1 lemon
1/2 pound walnuts

Wash plums; remove stones; add raisins and oranges which have been sliced very fine. Measure and add 3/4 cup sugar to each cup fruit and juice. Put into kettle, cook slowly about 45 minutes or until thick like jam, stirring to keep from burning. Add lemon juice and chopped nuts. Pour into sterilized jars.

Chow Chow

1 quart small white onions
1 quart small cucumbers
2 heads cauliflower
3 green peppers
1 quart vinegar
6 tablespoons mustard
3 tablespoons flour

Spiced Currants

3 lbs. white sugar
5 lbs. ripe currants

Boil currants one hour, then add sugar, spices and one-half pint vinegar, boil one-half hour longer. Pour into jars and store.

Jellies

Heat and mash fruit until juice runs readily. If fruit is not entirely broken up rub through coarse sieve. Pour into sterilized jelly bags of unbleached muslin or doubled cheesecloth and drain thoroughly but do not squeeze. Take 3/8 cup sugar for each cup of juice. Boil juice 8 to 20 minutes (berries and currants less than other fruits); add sugar which has been heated in oven; stir until sugar is dissolved and boil about 5 minutes. Pour into hot sterilized tumblers. Hard fruits like apples and quinces should be cut up, covered with cold water and cooked until tender before turning into jelly bags.

Remove stems from tomatoes; cut into small pieces. Put all ingredients together in kettle and allow to simmer slowly until cooked down to one-half. This will take about four hours.
