Up in a balloon boys, sailing in the sky
Raised aloft by SEA FOAM, how is this for high?

We'll visit every nation and tell them, as we roam,
That if they want to rise in life, they'd better use
SEA FOAM
HOUSEKEEPERS.

If your Grocer does not keep Sea Foam, ask him to procure it for you; and if he is obliging he will do so, and wisely retain a good customer. If your Grocer will not oblige you, please send us his name and address.

It is a credit to every storekeeper when he keeps Sea Foam. It shows his desire to please by keeping the best goods. It brings him other good trade. Paying trade. People who don't care to have the best goods, as a rule are not desirable customers. Keep always the best and finest goods.
SEA FOAM.

The Best Baking Powder In The World-Every Chemist who has analyzed it commends it. Every ingredient is pure. No doubtful things like Alum, or Ammonia, or Phosphate ever found in it. Never weakened by adulterations of Starch, Lime, Flour, Plaster, or anything else. Positively unequalled. Absolutely pure. Everybody likes it. Every cook prefers it. Doctors, Chemists, Clergy and Laity all commend it. Ladies who use it never tire telling of its wonders. All first-class stores sell it. Makes the best Bread; best Biscuit; best Cake, &c. Try it yourself.
We landed in Bold Hingland,
We met a bold dragoon.
What goods that bloomin' stuff? he said
We showed him very soon.

We slipped some underneath him,
And here it may be stated
We never saw a man so sad,
When he was elevated.
On Ireland's shore we met a friend
Whose given name was Pat
He had a lot of dynamite.
Said we, "What are you at."

I'm goin' to raise a ruction.
Well dynamite won't do.
Here's SEA FOAM can raise anything.
It's just the stuff for you.
RISING.

The greatest thing in this world to make a raise is Sea Foam. It works so nicely that every one in the family will get up early and be early birds, not to get the worm, but to get the early morning Sea Foam Biscuit; and every one will be in good humor with the breakfast—man, wife, children and cook. It works like a fairy charm. Nothing yet has been found to equal it in Power, Purity, Healthfulness and Certainty. It never fails. If any have not yet tried it ask your grocer for it and don’t let him work off other kinds on you. INSIST ON SEA FOAM.
WORKINGMEN.

By using Sea Foam in your families in making Bread and Biscuit your home in that particular will equal any home or palace on Fifth Avenue. Your Bread will be white and rich and pleasant and healthy. Your daily work will be made easier. Healthy for you and the wife and the children. It will often thereby save a doctor’s bill. Instead of pale, puny faces, your children will shine like rosebuds. Besides a barrel of flour makes more bread with Sea Foam. Double the strength of any other Baking Powder, and made only from the best pure materials.
In Germany, Prince Bismarck said "SEA FOAM was no good." That "nichts Americanish" was fit for German food.

But we made him just one pretzel with it. Then, said he, I'm wrong. I won't have Yankee pork, my boys. But send SEA FOAM along.
To Russia next; the Nihilists
Were at their usual game
Of chucking bombs, the Czar remarked,
"He thought it was a shame."

So we filled the bombs with SEA FOAM;
It made them all so light.
No matter where they threw them,
They flew up out of sight.
LOVE.

All who love their children should watch over their health and never permit the use of the common Baking Powders in their families. Sea Foam may cost a cent or two more than others, but is worth double. Those that have used it know it, and those who have not used it ought to try it. Some grocers will not keep the best goods, but rather than see you go to another store they will get it for you. Always remember that the best is really always the cheapest though you pay a trifle more for it.
A GOOD COOK.

By using Sea Foam you cannot fail in your cookery. It works quicker and better than any other Baking Powder. It never leaves a bad smell in the food. It saves time. It saves a good deal of labor. It does not require so much, and makes the Bread, Biscuit and Cake lighter and sweeter and healthier than can be made by anything else. It never fails to make light bread and healthy bread. Everybody likes it. It cures dyspepsia. Every cook should tell her mistress about it, and not let inferior Baking Powders ever come in her kitchen.
In Turkey the poor Sultan
Was looking tired and teased;
No matter what he did, he said,
Great Russia was displeased.

We told him to try SEA FOAM
He smiled and said: At least
They can’t make much objection
To that rising in the Y’East.
In Africa the cannibals
A fearful tale to tell
They were feasting on their mother-in-laws
And made a joyous yell.

We baked dough mixed with SEAFOAM
On this the wretches fed
The picture shows the consequence
It made them better bred.
HIGH OVER ALL.

Sea Foam is the only Baking Powder in the world that don’t grow stale and lose its power. It is always fresh and sweet as a rose. No Lime. No Phosphate. No Tartaric acid. No Ammonia. No Alum. No adulteration of any kind. Perfectly healthy. No lady ever failed in her cookery when using Sea Foam, but those ladies who use it beat all their neighbors with Bread, Biscuit or Cake. It is often observed that every good-looking lady uses Sea Foam. It makes them good-looking and also preserves their good looks by retaining their good health.
TRUTH.

Most of the Baking Powders that are so much advertised as made of Grape Cream Tartar and Soda are found by analysis to contain a very large proportion of Starch—often full half; also Alum; also Tartaric acid; also Ammonia, which is produced from vile sources, such as the refuse of gas factories and things too vile to print. (Look it up in your Encyclopaedia.) Ammonia is a poison, and in some countries it is a crime to use it in bread, &c. It should be so in America. Ammonia in Baking Powders can be detected by the smell when you open a fresh can or by heating it when not fresh or old.
And now, we're safely back again, so here our ditty ends. Remember what its moral is, and tell it to your friends.

Go straightway to the Grocers, there buy and carry home The best of baking powders; GANTZ, JONES & Co’s SEA FOAM.
