About Mark Twain

Mark Twain is a recent addition to the Voigt Line, which has already become very popular in some sections, and promises to develop into one of our best known brands.

It is an extra special grade made from a prime selection of hard Spring wheat, and the distinctive qualities of this flour make it an easy favorite with the careful housewife.

Bread made from Mark Twain possesses a flinty crust, neither too dark nor too tough, but which cracks when broken. The loaf rises quickly, is of good size, and therefore represents the smallest possible loss of nutritive qualities due to the process of fermentation.

Where other flours fail to please, a trial of Mark Twain often satisfies the discriminating customer and leads to permanent business.
