"Round About the Campanile"

By G. L. Berketh

AT BANDON

The taking down of the Campanile by the engineering students is complete. A committee of 15 students, including four members of the faculty, was selected last week to institute a camouflage program which will cover the campanile with green material. The design for the camouflage will be made by the architectural students and the material will be purchased by the engineering students. The camouflage will be applied to the campanile during the coming weeks, and will be visible from the top of the campanile.
