Demand For Library Books Show Increase

With university on winter break and with about 3000 students still in residence, demand for library books is on the increase. Although it is generally true that students take a heavy load of books during the last week of classes, the relatively small number of students remaining has made the demand this week much higher than normal. The increase is greatest in the subject of English, where the number of books loaned has doubled this week. In business and economics, the number of books loaned has increased by 50% over the same period of last year. In science, the number of books loaned has increased by 25%. In history and social science, the number of books loaned has increased by 10%. The number of books loaned in the arts and humanities has increased by 5%. In physical education, the number of books loaned has increased by 2%.

Smoke a Lucky

Choice tobaccos—and no loose ends—make Luckies burn smoothly

This young lady is one of a small army of inspectors. Her job is to see that Lucky Strike is made just as we have always made it to exact standards we set. Every Lucky Strike she sees is full weight, full packed, round and firm—free from loose ends. And no Lucky that she examines leaves without this test. That's why each and every Lucky draws so easily—burns so smoothly.
