We Should Keep Football King

Will Michigan State make its football policy in the interest of student health? If so, it should be considered as a caution against the excesses which are often indulged in as a cure for a bad football habit. R. M. Shahn, a former president of the University, has written a plea for temperance in football which is well timed and well written. He believes that the purpose of the university is not to encourage excesses, but that they may be curbed. This is not meant as a reflection on the university, but rather an indication of the necessity for controlling the excesses which occur too often in the game of football.

Registration Notice

All students are reminded of the importance of registering for the next term. Registration is necessary for the proper functioning of the university and for the proper distribution of courses. The deadline for registration is November 25, 1934. All students should make sure that they are registered before the deadline.

Readers Speak

Our Student Life: Outside the Classroom

In This State, Education

Dennis and Swart, the present junior class, have written an article in which they discuss the value of education outside the classroom. They believe that education is not limited to the classroom, but that it is also important to have experiences outside the classroom. They give examples of how they have learned from their experiences outside the classroom.

Reading More Important Than Grades

A University graduate who graduated from Western University has written an article in which he discusses the importance of reading. He believes that reading is more important than grades, and that it is the most important activity for a university student.
