#### Salaries for Student Council Officers

The question of whether or not to compensate Student council executive memory should be open to a lot more dis-clussion than was granted it by that body a few nights ago. "Pay Student council officiers" servamed some memory. "Pay Student council officers"" screamed some members. Kernield were inducted recently "Absolutely not!" And, tearing too much of a discussion, it was tabled.

A prior to be a new one at all, has definite merits which should be considered. Student council president and secretary, while working to their utmost now, could devote more time to their positions if they received salary. Now, with other jobs appearing, officers are forced to accept paying positions while they allow Student council work to wait.
After all, NYA workers are paid, athletes are compensated by being given jobs, and publicator members of Student.
Color Note: Superstitions go, claims the construction of the superstitions come superstitions go.

by being given jobs, and publication members receive a check every 15 days. Why should not executive members of Student council obtain financial compensation? Salaries would allow more time for the positions and would work for a still better class of officers. Council members will do well to reconsider this question when it next appears be-ligner them. fore them.
