German Industrial City Hit as Allies Continue Campaign

American Heavy Bomber Attacks Set Record

London, Nov. 27.—(AP)—American flying fortresses, relying on the eighth air force’s best operational methods of the war, bombèd the industrial city of Salerno, end of the Allied attack on that site of a high-grade steel plating mill and a plant building metal alloy parts for German fighter planes. The American bombers, composed of seven different types, dropped 150 tons of bombs on the buildings, from 10,000 feet, while the shells fell from 14,000 feet.

Unnoticed Monuments Have Story to Tell

Landscape is not only the art of the painter but the drama of the sculptor, the architect, or the poet. Each of these has an immediate appeal to the eye and the emotions. The sculptor, with his sculpted stone, and the painter, with his painted canvas, each has a beauty and a power that is unique to the medium that he uses.

One of the most frequently seen of the sculptors is the sculptor of the stone. In the past, stone was the material used by the sculptor. In recent years, however, the sculptor has turned to other materials, and the sculptor of the stone is now more the sculptor of the metal, the sculptor of the wood, and the sculptor of the plastic. Each of these has a beauty and a power that is unique to the medium that he uses.

One of the most frequently seen of the painters is the painter of the canvas. In the past, canvas was the material used by the painter. In recent years, however, the painter has turned to other materials, and the painter of the canvas is now more the painter of the plastic, the painter of the wood, and the painter of the metal. Each of these has a beauty and a power that is unique to the medium that he uses.

One of the most frequently seen of the architects is the architect of the steel. In the past, steel was the material used by the architect. In recent years, however, the architect has turned to other materials, and the architect of the steel is now more the architect of the wood, the architect of the plastic, and the architect of the metal. Each of these has a beauty and a power that is unique to the medium that he uses.

One of the most frequently seen of the poets is the poet of the language. In the past, language was the medium used by the poet. In recent years, however, the poet has turned to other media, and the poet of the language is now more the poet of the music, the poet of the dance, and the poet of the visual arts. Each of these has a beauty and a power that is unique to the medium that he uses.
Spartans at War

BY ANNE COWAN

COLUMBUS, Ohio—Lauding victory following complete annihilation of the president's high administration, the National Guard pressed for the U.S. to take a lead in the battle for America's survival. The war was being won by the U.S. under the leadership of the new president, who was believed to be the right man for the job. The president had been in office for a relatively short time, but his leadership was already recognized as a turning point in the nation's history. His policies were aimed at strengthening the U.S. military and preparing for future battles.

The same junior ladies are offering a group subscription to the OCA to those of you who want to get in on the action. The end of the OCA is near, but work on the project is progressing. The ladies have been working hard to ensure that the OCA will be a success. The army is interested in whether the call for subscriptions will meet their expectations. So far, they seem to be happy with the level of interest. They are working on ways to increase participation and are planning events to attract more members.
