By the time a person has been in school a dozen years, he
may feel that he is an expert in his field. This is not true, however,
and even for those in the humanities, the feeling is often not
entirely a false one. The same may be said of the sciences, and
especially in engineering.

But the feeling may be a little
more prevalent in the sciences, because of the predominance of
theoretical work. However, as long as the work is done in a
practical manner, it may be considered valuable. If the work is
done in a systematic manner, it may be considered valuable.

AWS Council Revises Rules Granting Senior Privileges

By Leslie Seagraves

A council who will graduate at the end of this term was granted senior privileges by their class. This council found that the rules of the council were too strict and decided to revise them. The new rules will allow seniors more freedom on campus and will be more lenient than before.

Democrats Hint Walker to Drop Chairmanship

The Democratic Party has hinted that they might ask Robert Walker to step down as chairman of the party. Walker has faced criticism for his handling of the party's affairs, and the Democrats believe that he is not the right person to lead them.

Nazis Concede Loss of Town of Cervaro

Curtis of Fortress Village Puts Yanks Near Key City

ALLIED HQ., Algiers, Jan. 12 (AP)—The German high command announced today that Nazi troops had lost the fortress village of Cervaro after hard fighting, and it was considered possible here that American forces already were pushing on beyond Cervaro toward the key city of Caserta, only ten miles away.

Last official reports reaching headquarters said American troops were close in on Cervaro from the south, east and south, and that capture of that formidable German strongpoint held before Cassino was expected momentarily.

Confirmation Lacking

There was no official radio transmission that the village had been taken. Allied military sources said that so far they knew Cassino was still in German hands.

Cassino, far enough inland to serve as a buffer for American and British forces, is a strong point.

The British, who have been sending air support for the American drive into Italy, reported that the village had been taken.

Some Neared

Seventy air miles north from Cassino and on the main inland rail and highway that much of a service of railways northwestern to the Eternal City.

Did You Know There Are

"DOGS"

in the Clothing Business?

How it started — we do not know. But a "Dog" is the pet you have for ocular, and dog, and broken sizes. At A. F. R. Shop it carries a note of affection, like you would for a Lineo dog you loved, but who always got in trouble. Although the dogs are from the breed of breed — Hickey-Freeman, Timely and the dog owner knows how fast it would break his heart to feel all the pup's that belong him, and to tell you the honest truth — we made a mistake in taking some of these when we brought them home at all. Now, here's where you step into the show ring. We couldn't have a real January Clearance on clothing this year — too much we can't replace — but we're going to give you all our pets, and make them cheap enough to see that they get a new home. If our desire to mix a little fun with business makes you think there are not some swell clothes in this show — well, you'll be sorry when you see what your friends bring home.
