Misunderstood Identity

I. A question of a sudden rise in the land of milk and honey, and the

response is a wave of large-scale immigration. The operator couldn't

get a clear reading of the situation, but the news is good and the

prediction is for an increase in immigration. The story is one of

people moving to a land of opportunity. The operator couldn't

get the full picture of the situation, but the news is good and the

United States Enters Russian-Polish Dispute

This month, the United States entered into the Russian-Polish dispute, which has been

the subject of much international attention. The United States, following our neutrality,

entered into the dispute as a show of support for the Polish cause. The dispute centers

around the question of Polish territory, specifically the area of the Western Uplands,

which was ceded to Poland by the Treaty of Versailles. The United States was

concerned that the Polish claim to this territory would lead to drawn-out negotiations,

which would be detrimental to the peace and security of the region. The United States

took the position that the territorial claims of the Polish government were invalid and

should not be entertained. This position led to the United States entering into the

dispute.
