La Prensa, Argentine Journal, Lauds State's Institute of Foreign Studies

La Prensa, Buenos Aires, Argentina, described as one of the best papers in the world, suggested editorially that Michigan State's institute of foreign studies is a model "for mutual understanding and general progress in South America."

The editorial commented the college for establishment of the institute and stated that all the graduates of the North American continent should imitate the action of those who have taken the first step toward the concession of scholarships.

Eremeto Montenegro of Chile, guest professor of the institute of foreign studies who was a correspondent for La Prensa, and Dr. Luis-Alberino Sanchez, a Chilean lawyer and editor, who also had connections with the South American press, may have influenced the editorial because of the interest they displayed.
