Thumbs Down

A proposal making a portion of South Campus more like a military reservation by introducing saluting among the cadre is expected to be acted upon by Colonel Cindor, Commander of MSC Army ROTC, in the near future.

A similar plan was to be submitted to Colonel Bond, but the cadre and air force engineers were prepared to act on the proposal. Under the new plan, the area on the south side of the Red Cedar pond would be subject to the proposed saluting regulations.

Under the new plan, saluting would be advanced regulations. Junior cadet officers will salute superior cadre officers and the cadre's old saying, "If there's more saluting, it will be the South Campus watchword. However, a student cadet must not salute the regulations will be in effect only between 8 a.m. and 5:30 p.m.

Already, students in uniform are required to saluting regular cadets and air force officers in that general area. This, the service explains, is not to make students feel inferior, but it is a way of life under ROTC.

The plan has been in the making since last spring. A "Letter" of the Manuscript was given to the cadet air force wing commander. The formal drawing of the plan was then completed with the proposal presented to the approval of the department heads before it was issued to instructors.

Colonel Bond will set up the Air Corp unit to enforce the new policy until he returns from a trip to Williams Field next week.

The reason, Colonel Bond, cadre army regimental commander, for approving the plan was that students attending the military will have a better concept of the saluting procedure, while the cadets going to summer camp will have some practical knowledge of the plan, he said.

As at the Army ROTC's spokesman officially commented that the plan was a step in the right direction, replacing the old system of saluting even at West Point. The only time it is permissible to salute in the parade ground is a question, but the plan similar to the one proposed was being carried out at other colleges and universities when it was inserted, even for campers, saluting and are required to wear their uniforms all the time in which they are male-female.

This is one for reasons why we are against this whole proposal. A student, even though he is standing under the sky, still saluting, is really a soldier. Regardless whether he goes into the armed forces after his graduation or not, at Michigan State for one reason—to get an education.

The same plan was presented to Colonel Helms, former cadre army, the other week.

If this plan that looks horrible on the surface, goes through, it will start the only time we have been saluting, or to make the whole campus. We are not against saluting, but the situation is. Many of us would not let it if it wasn't for the ROTC group.

We feel, however, that the essential cadre command functions should remain unchanged. The ROTC projects. Nothing could cause a major disaster among the public, and the public would be in the air force, some of the cadre may take advantage of their new acquired standing and make more use of it than building up the status on the purpose of repeat and repetition. It is possible, says the service, however, by trying to add a little spirit to the situation, the following points plan in the changing of appearance and then other projects could be inserted, much more practical and valuable, to either the cadre or the student cadre officers.

We trust that Colonel Cindor reviews the new proposal and makes a sound decision, and discretion and turn thumbs down on the plan.

Worthwhile

The sale of Easter seals will provide therapy treatment for more than 100 crippled children in Ingham County.

And now students are planing at least a small part in the Easter seal sales.

The College VFAA and a plan in all living units on campus called for the addressing of Easter seal envelopes.

The envelope was a postcard. 5000 envelopes have been sent to the dormitory, to the student's offices, and other places.

First thousand more will be sent out soon.

If it is not filled, it will be by volunteer workers, it will make the Ingham County Crippled Children's Association.

Students working on the project are to be commended, but still more can be done.

In addition to addressing envelopes, students should have the cards that will help rehabilitate a handicapped youngster.

One-Woman 'School'

"As far as we can figure, there is just one cost at Ingham College. She is an extremely attractive young woman named Dorothy Ann Greiner. She has received national recognition for her outstanding music, and her picture appears in the Magazine "The Times" which runs once a week.

We like her, but we kind of wonder if there isn't any more costs there.

The Water Carnival Theme Contest Is On . . . .
Win A $50 War Bond
• Only M.S. students may enter.
• No more than two students can submit one entry.
• No limit on number of entries you may submit.
• Contest ends midnight, Feb. 15.

DIRECTIONS ....
Write your theme idea and then in 300 words or less—tell why you think it should be selected for this year's Water Carnival.

The submit 30 ideas for float titles. Last year's winner was "Quack Me Mister." Two of the float titles were "Boys Will Be Boys" and "You Can't Take It With You."

Write your name and local address on an envelope and place your entry in it. Then drop it in the Theme Box at the main desk in the Union.
Colorado Blanks Pucksters, 3-0

Visitors Take First Win Of Twin-Match Series

JACK ROSE

In a game featuring the names of the hockey team Drury
Hall for this year, the Tigers from Colorado College
blanked Michigan State's hockey team by a score of
3-0.

The game was played in the first of a two-game series.

The game was much closer than the score indicates.

The Tigers didn't seem to be the current series leader in the
real sense, as they fell to the Tigers in the 1935 quick game in Little more than a
minute. But in the 1936 game, they fell to the Tigers by
in the first period when Drury had a 1-0 lead after 1:26
minutes. They scored nine in the second period on
four goals that were scored.

The Tigers were leading in the third period on a goal
by the third player. The Tigers made the final whistle
in the third period on a goal by the third player.

The fields of research and development
include ingenuity of the chemical engineer

Research and development work in
chemical engineering often involves
many different and varied areas of
interest, some of which is fundamental.

The chemical engineer equipped
with fundamental knowledge is
chaired with the study of many
problems, ranging from the design
and operation of processes to the
control of chemical reactions.

The chemical engineer is
concerned with the development
of new and improved processes and
products, and with the application
of these processes and products to
new and improved products.

The chemical engineer is
also concerned with the study of
the chemical and physical properties
of materials used in chemical
engineering processes.

The chemical engineer is
concerned with the study of the
behavior of materials in chemical
engineering processes.

The chemical engineer is
concerned with the study of the
ability of materials to perform
their intended function.

Emergency CD Action Outlined
First Step Would Curb Hysteria, City Official Says

How would you be protected if an atom bomb were dropped on Lansing tomorrow? John M. Patrick, East Lansing city manager, said the first step in Civil Defense officials would be to curb hysteria, through radio and newspaper publicity.

"The public would have to be protected from several possible conditions. People would have to be warned against taking the wrong action in a panic situation."

Negotiators Await New Red Plan

MUSKOGEE, Okla.--The multi-nation armistice talks between nations in Korea were pressed Tuesday when the participants, delegates, announced that they would submit their work to the U.S. government for approval.

In a statement to the press, the representatives said they would not seek a final peace settlement until the United Nations had approved their work.

If a Peace Plan Is Approved, Would It Have\'s Effect?\'s

The delegates, representing the nations of the United Nations, have agreed to submit their work to the United Nations for approval. The representatives said they would not seek a final peace settlement until the United Nations had approved their work.

Postpones Query

WASHINGTON--President Eisenhower postponed negotiations for a four-power conference to consider world peace, saying there was no point in convening such a conference if there was no immediate possibility of a cease-fire in Korea.
