The idea of giving the Russians any idea for future farm plans, the Exhibition would be a big step forward in demonstrating what is behind the Russian farm. It would give Russia a taste of the past democracy has been planned, is in contrast to the Communist method.

The Exhibition is not just a superficial venture of the farm industry; it is as practical an Exhibition as has ever been held. Outlining agricultural leaders will speak at the fair.

Four hundred fifty farmers' plans will demonstrate the types of air power on farmers. Modern, self-propelled farm machines will be shown.

Radio, television, radio and television especially for agricultural products will be on exhibit. The latest trucks for every kind of work, new, equipped with modern farming and agricultural vehicles will be shown.

The show will include complete display of electrical-automobile equipment for every farm shop will be available.

There are only a few of hundreds of exhibits planned. It is fitting that Michigan State, founded in 1855 as the first agricultural college in the country, should have a place in the exhibits.

The Committee of Farm Mechanization will tell the story of how farm mechanization has helped to make possible the modern farm.

If there is any chance of allowing the group of Russian farm experts to visit the Exhibition, it should be seized.

The Student Farmers Commission is in charge of arranging the fair and should be given this possibility.
