## Court Upholds Verdict Of Hoffa's Injunction

WASHINGTON (AP)—The U. S. court of Appeals Monday refused to lift a two-week old injunction against James R. Hoffa, leader of the Teamsters Union.

The Appeals Court ordered a new trial of charges that Hoffa and other Teamsters leaders had conspired to rig the election of Hoffa to the presidency of the Teamsters Union.

The injunction was granted Oct. 21 by Federal District Judge F. Dickinson Letts. The Appeals Court said Letts may have gone "farther than necessary" in some of his conclusions at this stage of the case.

The Appeals Court, made up of Judges Wilbur K. Miller, Charles F. Fahy and George T. Wallington, said however the injunction order was a "proper exercise of judicial authority."

In one respect the Appeals Court differed from the Letts injunction. Letts had banned the Teamsters from acting or spending money except in line with the Union's 1938 constitution.

The Appeals Court, affirming the injunction, said that none of the constitutional changes voted at the contested convention should be subject to a pending trial of their legality.

Letts has not yet set a trial date, but probably will do so soon. The Appeals Court invited Hoffa to seek again to have the injunction dissolved if there is any unfair trial date.

Hoffa, Beck and other Teamsters chiefs have been charged in testimony before the Senate Rackets Investigating Committee with misusing their Union funds and otherwise abusing Union powers.

Hoffa faces perjury and wire tap indictments in New York and Beck is under indictment in Seattle charging that he evaded more than \$250,000 in Federal Income Taxes.

There are some doubts that the convention legality case can be tried before Dec. 5, the date the AFL-CIO convention opens in Atlantic City.

The AFL-CIO already has suspended the Teamsters on corruption charges. Hoffa's AFL-CIO demands that Hoffa be ousted completely from the Teamsters rank, still serving as President pending the trial before Letts.

Hoffa was born in a small town near the city of Karkhov, Russia. At the age of 14 he was given 1,000 rubles and sent to Karkhov to learn the hardware business.

Instead he used the money to look passage to America. He arrived in the U. S. in 1906 with only 3 rubles in his pocket and unable to speak a word of English.

After trying his hand at several occupations, he went to New York. At the age of 18, driven by a desire to emulate Oscar Hammerstein, he and a partner formed the Van Hugo musical society. They booked programs for labor clubs and workers.

By the 1930's Hurok had brought over from Europe the Salzburg Opera Guild, the Vienna Choir Boys and the original Don Coscoks. He also brought Marian Anderson back to this country to Town Hall where she first received recognition in her own country.

Mattiwilda Doubt, who recently appeared at MSU, is also one of Hurok's discoveries. In addition to being a consultant to NBC, Hurok is responsible for the telecasts of "The Sleeping Beauty" and "The Festival of Music." He has also written several books of memoirs.

## Reds Declare Withdrawal From Disarmament Talks

### Senators Demand New Action

In Missile Race, U. S. Out of Step

WASHINGTON (AP)—Senate leaders emerged Monday night from a seven-hour Pentagon briefing on U. S. missiles and rocket progress and called for new action to keep the United States in step with Russia in the conquest of space.

Senate Democratic Leader Lyndon B. Johnson of Texas replied with an unqualified "no" when asked whether the top level conference with defense department officials had altered his opinion that the United States has "not kept in step with the needs of our times."

Johnson had made the statement before reaching the Pentagon shortly before noon for a session with Secretary of Defense McElroy and his principal officials in the missiles field.

The lengthy meeting, scheduled before Russia's launching of Sputnik II, came amid other expressions of concern by members of Congress that the United States is exploring the mysteries of space.

Sen. Bridges (R-N.D.), who attended the session along with Johnson, and Sen. Russell (D-Ga.), told reporters that the country needs a "top coordinator of all activities in the scientific research and development of missiles and space vehicles."

Bridges was asked whether he favors a cabinet level official for all scientific and research matters. He said he was opposed to the establishment of a new cabinet position, then made his remark about the need for coordination of all technical and scientific activities bearing upon the development of new age weapons and devices.

Russell agreed with Johnson that the Pentagon briefing by successive teams of military scientists had given the legislators "a lot of technical information."

He declined specific comment on what might be done to step up American missile progress, saying he had to be "assimilated" this information before saying anything and that he would have to be "a lot of odds and ends together" before reaching any conclusions.

Two vacancies in the U. S. House of Representatives will be filled—one in New Jersey's 2nd District caused by the death of Rep. E. Millet, a Republican, and the other in Pennsylvania's 13th district caused by the resignation of Rep. Samuel K. McConnell Jr., a Republican. The GOP is expected to retain both seats.

The race for Governor in New Jersey is between Gov. Robert B. Meyner, a Democrat seeking another four-year term, and State Sen. Malcolm Forbes, a magazine publisher for whom Vice President Nixon campaigned last autumn. Meyner, showing will have an important bearing on his chances of getting on the Democratic Presidential ticket in 1960.

The Congressional race in the state's 2nd District will be decided between Democrat Hubert W. (Gene) Margate and Republican George G. Hays. Governor Greenwood has endorsed Hays.

Standing in line sometimes isn't as boring as the old Army men used to claim. Waiting for their Waterloo yearbook group picture to be snapped Monday night, sorority sisters of Alpha Chi Omega burst into song to the delight of other line standers.

## 75 Cities Take Part Off-Year Voting in 6 States May Hint at Trends for '58

WASHINGTON (AP)—Voters in six states will turn out today to elect two governors, three legislators and mayors in more than 75 cities.

The off-year balloting may give party chiefs some idea of how the wind is blowing for the Congressional Elections in 1958.

Gubernatorial contests feature the elections in New Jersey and Virginia, with Democrats given the edge over Republican opponents carrying President Eisenhower's endorsement. The two states, with Kentucky, will also elect their legislators.

Two vacancies in the U. S. House of Representatives will be filled—one in New Jersey's 2nd District caused by the death of Rep. E. Millet, a Republican, and the other in Pennsylvania's 13th district caused by the resignation of Rep. Samuel K. McConnell Jr., a Republican. The GOP is expected to retain both seats.

The Congressional race in the state's 2nd District will be decided between Democrat Hubert W. (Gene) Margate and Republican George G. Hays. Governor Greenwood has endorsed Hays.

Virginia's gubernatorial contest pits former Atty. Gen. J. Lindsay Almond Jr., a Democrat, against State Sen. Ted Dalton, GOP National Committeeman. Dalton polled in 45 per cent of the vote in a test for the governorship four years ago.

Their campaign has been devoted almost entirely to the school integration issue. Backed by the powerful Democratic organization of Sen. Harry Flood Byrd, Almond supports a "massive resistance" doctrine against racial integration. Dalton advocates locally administered pupil assignment plans which he contends would stand up better against court challenges while permitting token integration of white and Negro students.

Massachusetts' gubernatorial contest pits former U. S. Senator John F. Fitzgerald, a Republican, against State Sen. Joseph P. Cahill, a Democrat. Cahill, who has served as governor for two terms, is expected to retain his seat.

The race for Governor in New Jersey is between Gov. Robert B. Meyner, a Democrat seeking another four-year term, and State Sen. Malcolm Forbes, a magazine publisher for whom Vice President Nixon campaigned last autumn. Meyner, showing will have an important bearing on his chances of getting on the Democratic Presidential ticket in 1960.

### Kuznetsov Announces Decision

At 82-Nation Political Meeting

UNITED NATIONS, N. Y. (AP)—The Soviet Union announced Monday its withdrawal from all disarmament negotiations being carried out under present UN machinery.

The new Soviet policy was disclosed in the United Nations as two Russian satellites—the latest sent into space by an improved power source—orbited around the earth.

Soviet Deputy Foreign Minister Vyacheslav Kuznetsov made the announcement to the UN's 82-nation political committee. He said the end of three weeks of disarmament debate.

Many delegates were shocked by the sudden Soviet move which appeared to bring an end to any more disarmament negotiations in the immediate future.

Kuznetsov said he had been instructed by his government to make the announcement.

The Soviet government contended that all attempts to speed up the disarmament talks by the UN's political committee have been entirely frustrated. Kuznetsov declared.

Under those conditions the Soviet government urged that any further participation in the work of the Disarmament Commission and its sub-committee in their present composition.

The Soviet Union has proposed that future UN disarmament talks take place in an 82-nation "Little UN Assembly."

Kuznetsov declared that setting up a permanent Disarmament Commission made up of all member states of the UN would interfere with a new and more effective disarmament negotiations.

The Western Nations are opposing a 32-nation Disarmament Commission which would be set up in London last August. The subcommittee, made up of the United States, Britain, France, Canada and the Soviet Union, has been trying to reach a 1957 disarmament agreement since 1954.

Some Western sources privately raised the question of as to the value of the 24-power Disarmament Commission in view of Russia's withdrawal from the subcommittee. This would leave only the four Western powers to talk disarmament among themselves.

WKAR-TV Show On Architecture Features Mexico

The second presentation in "Latin American Architecture" is scheduled on WKAR-TV for tonight at 9 p.m.

This program, presented in documentary style, will feature the recent creative and imaginative developments in Mexican architecture, such as El Escorial, an experimental museum designed by Manuel Gomez, a former Mexican sculptor now residing in Mexico, and several interesting churches designed by Felix Candela.

A highlight of the show will be the University City project in Mexico City, a winter favorite of many local students.

Presented by Dr. Donald Peck, Executive Coordinator, and directed by Robert Page, the third "American Architecture" show will be narrated by Charles Cassel.

Comm Skills Prof To Give Lecture

Dr. Hans Wigge, comm skills department, will lecture on "The English Curriculum in German Schools" at an open meeting of the department Thursday, at 12:45 p.m., 32 Union.

Dr. Wiebe is director of the English language and literary curriculum at the University of Waterloo, Germany, and is visiting professor in comm skill department. The meeting is open to faculty and students.

**Dr. Robert M. Herbst Named Chairman**  
Dr. Robert M. Herbst, Chemistry Department, was recently elected chairman of the Division of Natural Chemistry of the American Chemical Society.

Dr. Herbst taught at New York University and Columbia University before joining the MSU staff in 1947.

# Soviets Say Dog May Return

## Parachute Means of Conveyance

'Laika' Drinks Liquids from Tube

MOSCOW (AP)—The dog spinning around the world in Sputnik II may be parachuted back to earth for study by scientists. Soviet Planetary officials announced Monday.

Soviet writers, relating the tales of their scientists in fiction, predicted the second earth orbit in little over a month. It would be a means of studying about space and such rapid-breathing creatures as plants, mollusks and insects in future experiments to determine the genetic and biological effects. This raised the possibility of parachuting space-borne creatures to earth.

A spokesman of the state committee for cultural relations with foreign countries gave a name to the world's first outer space creature. A tiny fuzzy dog about the size of a rabbit about 3 1/2 years Sunday (the name he said is Laika (little bitch) which was the name of a breed known for its stamina.

Laika, a female, and Laika had escaped the shock of being launched more than 1,000 miles into space and was shown as well equipped on conventional liquids through a tube while the half-ton projectile, built from the satellite's fuel tanks, was said to be sending back regular data on Laika's heartbeat, breathing and blood pressure. Sputnik II orbit about 2,000 miles an hour.

The state committee for cultural relations with foreign countries made the suggestion she might be ejected and parachuted back to earth in the near future. Conditions, however, were not stated.

The dog would be a point set west at about 190 to 230 miles. The parachute point out is set west at 1,036 miles.

Scientists also suggested the dog's heat would be used to heat the problem of the satellite's steady into the earth's atmosphere so that the rocket could be recovered.

Meanwhile, the 1,120-pound satellite presumably had passed the 21st circuit of the earth Monday night.

It was making a lap every 96 minutes.

## Affects Some 7,000 Employees

# Pan American Union Strike Could Stop Missile Testing

BROWNSVILLE, Tex. (AP)—A Chemical Union Board Monday announced its executive committee has set a date for a strike which could cripple Pan American Airways and possibly halt the guided missile testing program at Cape Canaveral.

The Pan American Division Board of the International Brotherhood of Chemical Workers, Inc., announced the strike would affect some 7,000 Pan American employees, including about 1,000 workers at the missile testing center.

Walter T. Coleman, general chairman of the Union, charged the company with trying to "hide behind our own loyalty to our country and the defense program as a means of dealing on a sub-par basis with us."

Coleman said the board, which opened a 3-day meeting at Brownsville Monday, felt there was no other action left open to it. The vote was unanimous, he said. He said the strike could, with the support of other unions, shut down the missile testing operation at Cape Canaveral.

He also told newsmen that a strike also would paralyze the sprawling airline operations throughout the world.

He said the board had taken into consideration the possible effects of a strike on the nation's guided missile program and its satellite race with Russia.

Coleman said the Union and Pan American disagree on its position. Representation of Cape Canaveral employees, application of an arbitrator appointed by the state.

## Early to Compare Old Football Gear

Comparisons of football uniforms old and new, and their protective devices, will be discussed and discussed by Ken Early, MPAI equipment manager, on "Football Spent" at 8:30 tonight over WEAH-TV.

Bill Youngman, MPAI football coach, will discuss football equipment, and the Football Board, which enables the audience to watch each individual player separately.

The highlights of last week's State Wisconsin game, and highlights of the past MPAI vs. Notre Dame game of '51, will be shown on film.

## U.S.-British Offer Voice To Allies

In Future Use Of Nuclear Power

LONDON (AP)—Informed diplomats said Monday night the United States and Britain have agreed to offer their allies a voice in future decisions governing the use of atomic and hydrogen weapons.

Informants said President Eisenhower and Prime Minister Macmillan reached that understanding at their Washington meeting last month. It would mean no nuclear weapons would be triggered off without the consent of the Western allies.

This idea, the informants said, has been coupled with a broader program for pooling all the national defense efforts of the allies to expedite research, development and production with the aim of beating the challenge of Russia's Sputniks.

The proposals are presently under review by 41 governments among the members of the North Atlantic Treaty Organization (NATO) committee which governs nuclear matters in Europe and December.

They also are likely to be included in the member nations of the free nation Baghdad pact which the United States is an associate member, and of the eight-nation South East Asian Treaty Organization (SEATO).

The Eisenhower-Macmillan plan is pictured as envisaging the creation of:

1. A NATO nuclear weapons stockpile which would be shared between those nations. It would be used to deter the possibility of Soviet attack.

2. A NATO central collecting force under the Supreme Allied Commander in Europe, U.S. Gen. Dwight D. Eisenhower. The force would be specially trained in the use of all types of nuclear weapons from H-bombs to atomic artillery.

3. A NATO political high command with powers to share the responsibility for all nuclear actions relating to the use of nuclear weapons.

The U.S. Air Force estimates it has about 1,000 planes in the inventory capable of day and night.

## British Author To Lecture

Dr. William B. Ewald, British anthropologist and educator, will lecture on "The Study of Social Structure in Changing Communities: The Case of the Middle East" at 8 p.m. in the Library South State Lecture.

The lecture is sponsored by the Michigan State University anthropology faculty. Faculty and students in the social sciences are invited to attend.

A graduate of the University of London, Dr. Ewald has done extensive studies in Africa. He was head of the Department of Education in Tropical Areas at the University of London for 15 years and has been a visiting professor at Northwestern and Cornell universities.

Dr. Ewald is the author of several books on education and social patterns in tropical areas and was named by the History List of King's College '51 for his outstanding work in the fields of anthropology, social anthropology, and education.

Dr. Ewald is one of the most distinguished in the field of anthropology in the United States. He has a number of publications.

## Young Farmers Begin Short Course Classes

A total of 134 Young Farmers Short Course students began their eight week class session this week according to Vernon Larson, club professor in the Short Course Department.

Students from Michigan, Missouri, Ohio, Illinois, Indiana, New Jersey and California, South America, registered Monday and are being housed in Agricultural Hall.

The late start was due to the fact that many students were traveling and arriving late. There are 41 new students and 91 persons in their second year. They take 11 hours of class per week.

## Veterans Association Has Reserved Section

Members of the Veterans Association will enjoy reserved seating at Saturday's football game according to club spokesman. Vets who wish to sit in the section should take their activity books to organization room 2 Union.

**Interviews for career opportunities as sales representatives with Burroughs Division Burroughs Corporation NOV. 13, 1957**

Get the full story on a rewarding future with the important Division of our expanding firm. As a sales representative for Burroughs Division, you will be looked up to in your community and you'll be a solid asset to business men who need your help in solving their figuring, accounting and systems problems. The products you'll handle are the ones that have made the name Burroughs famous. Good starting salary with income potential as you sell in your own territory. Excellent company benefits. Burroughs practical training. Every opportunity to enjoy the pleasures of success early as a sales representative for Burroughs Division, Burroughs Corporation, Detroit 2, Michigan.

Contact your college placement office now for your appointment.

# Teamster Officials Get Trips, Presents

WASHINGTON (AP)—The Senate Hackets Investigating Committee heard Monday that picket lines that labor troubles disappeared like magic after employers kicked in thousands of dollars to Teamster Union officials.

During trips, Christmas presents and a joint to the Rose Bowl football game in California were said to have helped ease the money.

The testimony from three Flint, Mich., business men, now on Chairman McClellan (D-Ark.) of the Senate Committee to remark.

"It seems to me that we're developing a pattern of what seems to be a payoff to union officials to have them disregard the rights of the working man."

Much of the testimony dealt with what the witnesses described as the valuable help of Labor Relations Associates (L.R.A.), a Chicago labor consultant firm headed by Nathan Shefferman. The committee has

## 2 Ex-Convicts Face Possible Kidnap Rap

Two ex-convicts faced possible kidnapping and armed robbery charges Monday in the hearing and trial of a University of Michigan student and a service station attendant.

Assistant Prosecutor Leo A. Parbat said warrants would be issued today against John H. Quetz, 23, and William B. George, 28, both of Lansing.

The pair was arrested by State Police near Jackson Monday. State Police said they were carrying \$375 stolen two hours earlier from a Lansing gas station.

Earlier, State Police got a call from Alan Robinson, 21-year-old U of M student from Traverse City, who said the pair had beaten and robbed him of 46 cents and a wrist watch after he had hitchhiked a ride with them here.

Robinson said Quetz stabbed at him with a pocket knife while the car sped toward Clinton County, and told him repeatedly, "I'm going to kill you."

Robinson and he escaped into a woods after the pair stopped the car, forced him outside and started to beat him.

Assaulted in the gas station robbery was Claude Pettit, 50, of Lansing. Pettit identified Quetz and George as the two men who forced him to open the cash register at the service station where he is employed.

State Police Detective Clifford Donaka said Quetz is on parole from an armed robbery sentence and George has served time on a breaking and entering conviction.

## MSU, U of M Debate Ike's Effectiveness

Two MSU students clashed with a pair of University of Michigan students Monday night on WKNB-TV's "Controversy" on the issue "The Eisenhower Administration - Masterful or Mediocre."

The event was a split team debate with one member from each school debating pro and one con. After a formal discussion, the program turned into a question and answer period with direct audience participation and telephone.

Representing MSU were Riehl and Melrose, Garrettsville, Ohio, graduate student and Bill Tillotson, Elko, sophomore. Murray Howall, of the speech department served as moderator.

"Controversy" is produced by the MSU Forensic Union under the direction of Dr. Huber E. Linkswirth and Jack Caldwell. It is the only weekly college debate program in the nation.

Colleges and universities throughout the Midwest have been engaged to participate in the 23 shows planned for this year.

Scheduled for next week is a debate with Flint JA on "Expanding Higher Education." A humorous topic is scheduled for Dec. 2, "Classwork Interfering with College Education." On Dec. 23, the 2nd annual debate on the reality of Santa Claus will be presented.

Audiences for the programs are composed of members of discussion and debate classes and other interested students.

A reflection of the enthusiasm created by the debate is shown by the questions which are telephoned in during the show for the students to answer.

## Silvernale to Talk On Traffic Safety At Youth Meeting

Leone Silvernale, assistant director of the MSU Highway Traffic Safety Center, will give the keynote address and act as a resource person at the Upper Peninsula Teen-Age Highway Safety and Driver Education Conference, Thursday at Northern Michigan College.

An discussing "The Need for Urgent Traffic Safety Program," Silvernale will point out that young persons have most at stake in this program because they have an approximate 20 years of driving ahead of them. During this time each of them will drive on an average more than half a million miles.

He will tell the group that while Americans are about the best drivers in the world on an accident per mile basis and are improving each year, because more miles are driven each year, the number of accidents continues to increase.

This makes it necessary to continually seek methods of improving driver training, more traffic law enforcement, traffic control, high school driver education courses, public information, traffic engineering and motor vehicle engineering. Silvernale concludes.

The conference is sponsored by the Northern Michigan College in cooperation with the Upper Peninsula Newspaper Publishers, Campus Police, Marquette Police Department, American Automobile Assn. and the Automobile Club of Michigan.

## Latin to Lecture At Spanish Club

Mrs. C. E. Caban, Puerto Rican exchange teacher, will speak at the Spanish Club tonight at 7:30 p.m. in the International Center.

Mrs. Caban, who arrived here in September, is currently teaching math and science at C. W. Orr Junior High School in Puerto Rico.

Previous to being taught at Roosevelt High School in Puerto Rico, she was in the U.S. Army.

Latin American dancing will follow Mrs. Caban's talk. Refreshments will be served. Everyone is invited to attend.

Just over an average of 300 pounds during the spring and summer months.

Local 299 is the home local of James R. Hoffa, President-elect of the International Teamster Union and a target of the Senate Committee in its investigation of corruption in union-management relations.

Graff said he paid a total of \$9,931 in 1954-55 to George Kamenow of Detroit, until recently an agent for the Shefferman firm.

At Kamenow's suggestion, Graff said, he told the Teamster Union he had retained the Shefferman organization.

Committee counsel Robert F. Kennedy asked:

"And you never heard from the Teamsters again?"

"No," Graff replied.

In reply to detailed questions about the money he said he had paid out, Graff said some went for a fishing trip to Canada, some went to buy some Christmas presents for what I assumed were union officials," and some went to take six Teamster officials and their wives to a 1954 convention in Seattle.

Graff refused to agree that the money was used to prevent organization of his 10 salesmen. He did agree with Sen. Mundt (R-SD) that the payments were to "avert labor trouble."

## 'Y' 1961 Club To Discuss Religion, Jazz

"Religion and Jazz" will be featured at the meeting of the University YMCA-YWCA "1961 Club" meeting tonight, at 7 to 8:30 p.m. at the Y House, 314 Evergreen. The 1961 Club is the Y freshman group and the group invites all students interested to attend this special program presented in conjunction with the Fine Arts Festival.

The program will feature a transcription of a national television program on religion and jazz, presented in 1955 by the Reverend Alvin Kershaw, Oxford, Ohio Episcopal rector who gained national fame as a contestant on the \$64,000 Question TV show, answering questions in the field of jazz.

He will discuss jazz as a serious effort to speak musically about aspects of real life such as joy, sorrow, rejection and love, death, loneliness, and celebration, and the close relation of this to religion.

Discussion and further examples from recorded jazz will be conducted by Robert M. Walker, YMCA executive.

A motorist is injured every 13 seconds, the National Safety Council estimates. One person is the victim of a motor vehicle accident every 13 minutes.

The Naval Aviation Cadets Choir pose beside one of the planes used by the famous Blue Angels in their death defying stunts. The choir will be here Saturday to sing at the game and at a concert with the Glee Club at Kellogg Center.

## To Present Varied Program Naval Aviation Cadet Choir To Sing at Kellogg Center

The U.S. Naval Aviation Cadet Choir, one of the finest A Cappella choirs in the country, will appear Saturday in the Big 19 room of Kellogg Center at 8:15 p.m. The group is slated to start their performance with their stirring theme song, "Mighty Navy Wines."

The 60 Navy men will team in this performance with the 63 voices of the Glee Club.

The choir will sing many varied types of songs. These will include J. S. Bach's "Let Every Tongue Adore Thee," "In Thee I Sing," as arranged by Peter Tkach, "O Bone Jesu," by Palestrina, "The Lord's Prayer," by Malotte, "Song of the Jolly Roger," by Childleigh and Candish.

Also on the program will be "Prelude" by Bartholomew, "Lullaby" by Webster and arranged by Shaw, "Brothers, Sing" by the Glee Club, "The Glee Club" by Moore, the choir's Alma Mater, Navy Blue and Gold, with a solo by Cadet W. C. Gossett, and "Eternal Father," by Dukes.

The group has appeared throughout the nation and has sung at Ed Sullivan's "Toast of the Town," the Tennessee Ernie Ford show, and other well-known shows.

Membership in the choir is completely voluntary. For the cadets there are expected to keep on their regular flight training while they are in the choir.

Turnover in the choir is very fast because of heavy loss at graduation, but it is felt that this is not a detriment and more a symbol of advancement.

Singing Navy also have the choir will also perform in the program activities on Saturday. They will sing the National Anthem during the flag raising ceremony.

The choir is one of four groups formed this year by the command at Naval aviation training. The other groups are the Blue Angels, the naval aviation flight team, the aviation cadet drill team and their band.

The drill team and the band are slated to perform at halftime ceremonies at Saturday's game.

## Thing Sneaks Into Camp; Soldiers Observe Object

WHITE SANDS PROVING GROUND, N.M. (AP)—The Army Monday reported that a huge, oval object "bright as the sun" was spotted Sunday hovering near bunkers used in the first atomic bomb explosion.

The sightings were made 17 hours apart by two different military police patrols on this southern New Mexico missile testing range. The first atomic bomb was launched off on the northern edge of the area July 16, 1945.

The commanding officer of the MP's said none of the men had heard radio reports or newspaper accounts of similar sightings in Texas.

Both sightings were in the area of abandoned bunkers used by technicians who observed the

world's first atomic explosion.

First Lt. Miles F. Penney of Post 1, Jervis, N.Y., commanding officer of the station, said that about 90 miles north of the headquarters and some 20 miles from the site of the atomic bombing, a huge, oval object was seen by a two-man patrol at around 8 p.m. (MST) Sunday.

Penney said he had accompanied some of the MP's to the site Monday in an effort to find some physical evidence of the object's visit, but found nothing.

## "I'm in a business nobody dreamed of three years ago"

"In a company that develops new ideas by the thousands," says 30-year-old William K. Gardner, manager of General Electric's Main, Mass., Diamond plant, "a young man's career progress need not be limited by his particular field. In my five years with General Electric, I've gained valuable experience in several different fields, and each assignment has helped me to move ahead. Right now, I have an exciting job. I run the world's first diamond-making plant—a business nobody dreamed of three years ago."

**Diamond Making a Reality**

The job Bill Gardner holds is an important one, created because General Electric has the scientific and technical resources needed to seek out new knowledge and swiftly translate it into products that people want and need. In 1955, the company announced a major scientific breakthrough—the production of real diamonds in the laboratory. Today, little more than two years later, General Electric is making and selling quantities of these diamonds for civilian and defense use.

**Achieving Three-Way Progress**

General Electric's ability to take on and solve big problems—in research and development as well as every phase of production—is constantly creating challenging new opportunities for the 29,000 college graduates at the company. As we see it, by providing a healthy climate for a young man's self-development in whatever area he may choose, we encourage not only his own progress, but that of the company and the nation as well.

Educational Relations, General Electric Company, Schenectady 5, New York

**WILLIAM K. GARDNER** received his B.S. in Mechanical Engineering from Purdue University (1949). He joined General Electric's Metallurgical Products Department in 1952.
