Reds Declare Withdrawal From Disarmament Talks

Senators Demand New Action
In Missile Race, U.S. Out of Step

WASHINGTON, D.C. - Senators leaders emerged Monday night from a prolonged conference meeting on U.S. military strategy and nuclear weapons policy and called for new action to keep the Soviet Union in line with President in the concept of global security. They were unanimous in their desire to permit the new Senate to act on bills to be reported from the Select Committee on Foreign Relations.

The Senate Debate, according to the House debate, was marked by a number of differences of opinion. The Soviet Union's claim to be a major power in the world was widely accepted, but there was little agreement on policy. The United States has been unable to achieve any significant progress in the Conference on Disarmament, and the Senate was unanimous in its belief that the United States must take a lead in the problem of arms limitation. The Senate was also unanimous in its belief that the United States must take a lead in the problem of arms limitation.

Kuznetsov Announces Decision
At R2-Nation Political Meeting

United Nations, N.Y. - The Soviet Union announced Monday that it would not participate in the United Nations Atomic Energy Commission, which meets in Geneva this month. The Soviet Union's decision was announced at a meeting of the R2-Nation Political Council, which is composed of the countries that have been members of the United Nations since 1945. The Soviet Union's decision was made in response to the United States' decision not to participate in the Atomic Energy Commission.

55 Cities Take Part
Off-Year Voting in 6 States
May Hint at Trends for '58

OFF-WESTMINSTER, Colo. - Mayors and other local officials in 55 cities in 6 states have voted in off-year elections, and the results may provide some indication of the trends for the 1958 elections. The cities include Denver, Colorado Springs, and Fort Collins, all of which are located in Colorado. The results in these cities may indicate which candidates are likely to win in the 1958 elections, and which issues are likely to be important.

According to Test

Soviets Say Dog May Return

Parachute
Means of
Conveyance

"Tula" Drinks
Liquids from Tube

Soviets announced yesterday that they had perfected a new method of conveying supplies to troops deep in enemy territory. The method involves the use of a new type of parachute, which can be used to drop liquids directly into the hands of the soldiers. This breakthrough in military technology is expected to revolutionize the way supplies are delivered to troops in remote areas. The new parachute is designed to hold a maximum of 50 liters of liquid, which can be easily poured out by the soldier. The parachute is made of a special material that is both strong and lightweight, and can withstand extreme temperatures. It is expected to be widely adopted by the Soviet armed forces in the near future.

Oklahoma Challenged
By Auburn

Tense drops to 3rd after upset of the Sooners last week. Oklahoma, which has been in the past three matches, looks to win the championship in the eight vital happening this weekend. The Sooners have a strong challenge in the form of Auburn, who is currently ranked 12th in the nation. The game is expected to be a close one, with both teams heavily favored to win. The outcome of this match will go a long way in determining the championship prospects for both teams. The Sooners have a strong offense and defense, while Auburn has a more balanced team with good offensive and defensive abilities. The match is expected to be a hard-fought battle between two strong teams, and it is likely to be a great game to watch. The winner will go on to face the number one team in the next round, and it will be a great test for both teams to see who is the best in the country.
Teamster Officials Get Trips, Presents

CODADEL) — The Teamster Union, as a part of the national convention, has granted a trip for six of its members to the Far East. The trip is being financed by the union's national headquarters, and is being arranged through the United Nations, which is providing the transportation.

The six members selected are:

1. Harry S. Moss, President of the International Brotherhood of Teamsters.
2. Fred T. Ford, President of the United Auto Workers Union.
4. William D. Brown, President of the United Food and Commercial Workers Union.
5. Charles A. G. O'Brien, President of the United Steelworkers of America.

The trip includes a visit to the United Nations headquarters in New York, a tour of the United States, and a trip to the Far East. The union has also provided a round-trip ticket for each member, and has paid for their expenses during the visit.

MSU, U of M Debate Ike's Effectiveness

A debate on the Eisenhower Administration's effectiveness is scheduled for next week at Michigan State University. The debate will be held in the auditorium of the university's academic center, and will be open to the public.

The debate will feature two teams, one representing the Eisenhower Administration, and the other representing the opposition. The debate will be moderated by a panel of judges, including a representative from the university's political science department.

Silverman to Talk On Traffic Safety At Youth Meeting

Roxanne Silverman, a traffic safety expert, will speak at a youth meeting on traffic safety. The meeting is being held at the MSU High School on Wednesday, March 22.

Silverman will discuss the importance of traffic safety and the role that young drivers play in promoting safe driving. She will also discuss the various programs and initiatives that are in place to promote traffic safety.

"I'm in a business nobody dreamed of three years ago"

To a company that develops new ideas. New materials. New techniques. New inventions. A company that is a leader in the manufacturing of electronic products.

"I'm in a business nobody dreamed of three years ago."

Diamond Making a Reality

The job is not easy, but a job that everyone should be proud of. The job is diamond making. A job that has been created by General Electric and now is a reality. The company has developed a new method to produce diamonds that can be used in various applications. The new method has been tested and proven to be effective.

Achieving Three Way Progress

General Electric's ability to take on and solve big problems in research and development as well as every phase of production is constantly creating challenging new opportunities for the 29,000 college graduates at the company. At GE, providing a health climate for a young man's self-development is a major goal. It is a goal that is achieved through the company's educational programs, which are designed to help the young man develop his skills and abilities.
