

Vanguard Develops Trouble

2nd Stage Scene of Difficulties

Has Static in Electronic System

CAPE CANAVERAL, Fla. (AP)—Trouble was reported today in the second stage "brain" of the Vanguard rocket being tested for an attempt to propel an American baby into space.

An informed U.S. Navy official said technicians are working around the clock to get the bugs out of the second stage which houses the control and guidance systems of the Vanguard rocket. This stage has never been tested previously.

The trouble in the electronic system has been eliminated, he said, but it may cause the rocket to lose its flight and force its landing.

"If we can lick this problem we think we've got it made," he said. "If the second stage works correctly the chances of getting the satellite into orbit are very good."

Washington, the defense department has emphasized that it is not certain the first stage will start firing.

Putting a satellite into orbit is the prime purpose of the test. Of course, such a result would be welcome because of the additional data which could be gathered, the department said.

The test is intended primarily to check the complete launching equipment and to gather performance data.

A satellite put in an orbit 200 miles above the earth's surface could stay up for a year, calculations indicate. The lower the orbit the shorter the time the satellite could stay aloft.

The calculations on a satellite are based on the density of the atmosphere at various heights. Even the extremely thin atmosphere at 200 miles would drag on a satellite to slow it down and end its career in the sky.

Presently, the scheduled zero hour for the effort to give the Vanguard a boost is 5 a.m. Wednesday. The Navy source said it is possible the firing will come off an hour or so later.

The Vanguard rocket is a grapefruit-sized satellite in the case of the Vanguard. It is about 10 feet long and 2 feet in diameter. It is scheduled to be launched just two months after the Russian satellite Sputnik II with its passenger was launched.

The United States launched 12 of these small globes in 1957.

Postmaster William A. Burgess said Saturday, "We hope to keep up our good record on the Christmas mails by getting everything processed and delivered well before Christmas Eve." He stated that much depends on people's cooperation in getting Christmas cards and gifts during the next few days.

Burgess asked special cooperation in making sure that return addresses and the recipient's address are plainly typed or written on all labels and tags.

Business firms were asked to postpone the mailing of circulars and catalogs until after December 25th to keep the mails clear for the Christmas rush.

Pictured is the Voodoo jet, piloted by Capt. Ray W. Schreengost Jr. of Kittanning, Pa. which set a new record in a coast to coast flight. The trip was made in 3 hours, 13 minutes and 34 seconds.

Because of Tight Money Policy

AFL-CIO Suggest Deferment On Wage Increase Demands

ATLANTIC CITY, N.J. (AP)—A moratorium on demands for wage increases during 1958 was suggested today by the 3½ million member AFL-CIO building and construction trades department.

Department President Richard J. Gray said he was proposing this "moratorium" policy because of inflation and its resulting shortage of money and cutbacks in construction.

He said the Eisenhower Administration is advocating a tight money policy which is aimed at slowing down construction.

A one-year moratorium on wage increases, he said, would be a step toward stabilizing wage gains and "obtaining full employment through increased production."

In conjunction with the proposed moratorium he proposed creation of a building and construction industry committee to urge related industries such as lumber and cement to join in the wage increase suspension.

It would also work out a program for increased production activity including an effort to force abandonment of "tight money" policies.

Gray made the remarks to the opening of the department's 49th regular convention representing 10 international unions, 594 local and county councils and 29 state councils.

The AFL-CIO starts its convention here Thursday.

Gray also urged rescinding the AFL-CIO suspension of the Teamsters Union and recommended a special executive committee meeting to deal with jurisdictional problems unless they are solved by next March 31.

The moratorium proposal will be presented by the department's executive committee at its regular quarterly meeting next month, Gray said.

In calling for the moratorium, Gray said the department must recognize the basic policy of increasing money supply for the increased cost of living.

He referred to inflation as the "number one problem facing the nation today" and said it creates a shortage of money which means construction cutbacks and unemployment.

He said the money shortage, he said, and the Federal Government's building construction program has been stymied due to a lack of available money.

He also noted failure of Congress to adopt a school construction program and said cutbacks in federal slum clearance-construction programs have reduced movement of that program to a "snail's pace."

Spanish Club to Hold Annual Yuletide Party

Spanish club will hold its annual Christmas party tonight at 7:30 p.m. in the International Center.

Latin American dancing, refreshments and singing will be featured. The party will be capped by the breaking of the traditional piñata.

All those interested in Latin American social customs and music celebration are invited to attend.

Freshman Honorary Holds Rush Smoker

The Eta Epsilon, national freshman honorary fraternity, will hold a rush smoker at 7 p.m. today in Old College Hall.

Smoker men, who have received a 3.5 all-estate average at the end of their freshman year are requested to attend. Coffee and donuts will be served.

Finally, Burdell challenged the jury panel on grounds it was improperly instructed and had become prejudiced against the side Beck by news accounts of his son's trial.

Judge Revelle, in denying the motions, said he would recess Beck's trial long enough for Burdell to argue to motion in federal court, if he makes one.

Beck will be defended by Charles S. Burdell and John J. Kenney, the name Seattle lawyer who handled his son's case.

Burdell asked first for a delay so Beck could go to Washington, D.C. to testify in the trial, after starting Monday, challenging the election of James R. Hoffa of Detroit as Beck's successor.

Then the defense attorney asked a postponement so he could go into federal court seeking an order to halt the trial so Beck could leave for Washington.

Finally, Burdell challenged the jury panel on grounds it was improperly instructed and had become prejudiced against the side Beck by news accounts of his son's trial.

Judge Revelle, in denying the motions, said he would recess Beck's trial long enough for Burdell to argue to motion in federal court, if he makes one.

Stevenson Excludes Conference

WASHINGTON (AP)—Adlai E. Stevenson said Monday he doesn't plan to join the U. S. delegation to the NATO summit conference in Paris this month, but he left the door open to an invitation.

"I have not been invited and there hasn't been any discussion of that," the 1952-56 Democratic presidential nominee told reporters.

Stevenson said his job as honorary adviser on the U. S. policy to be put forth at the December meeting of North Atlantic Treaty countries' leaders will be completed within another week or 10 days. Then, he said, "I will go about my business."

Whether Stevenson will be invited to the Paris meeting hasn't been decided, the State Department said.

Stevenson spoke to reporters after an hour-long meeting with House Speaker, Harbo (D-Tex.). He said he had been invited to the NATO summit conference in Paris this month, but he left the door open to an invitation.

Stevenson said Monday night he had accepted an invitation to attend a meeting of the New York Bar Assn. Dec. 9, on the assumption his work here would be over by the end of the week.

He added, however, that he would certainly consider any request from the administration that he participate in the Paris talks.

Dr. Theodore Von Karman, NATO's air defense chief, warned Sunday that Russia could have an intercontinental ballistic missile capable of great damage even if the missile is not completely perfected.

Possibility of An Indonesian Relation Cut

THE HAGUE (AP)—An American diplomatic informant said Monday night the Dutch government expects Indonesia to sever diplomatic relations soon.

Indonesia, in a previous article, had indicated its intention to sever relations with the Netherlands, but the Dutch government had not yet decided to do so.

DU PONT

JOB FACTS FROM DU PONT

DU PONT PERSONALIZED TRAINING STARTS SAME DAY YOU DO: PREPARES YOU FASTER FOR ADVANCEMENT

Your Classroom Learning Is Applied Immediately to Industrial Problems

Training at Du Pont is tailored to the individual. It begins the day you join the Company and continues throughout your career. Its purpose is to give you as much responsibility as you can handle at the outset, and to prepare you for future advancement.

Personalized Development
When you join Du Pont you are given a specific assignment at once. You learn informally in consultation with your supervisor and others assigned to the same project. This headstart on responsibility permits a new man to move ahead according to his abilities. He gets to know Du Pont and his job quickly.

Job Evaluation
This approach at Du Pont is supplemented by frequent meetings and seminars and by formal job evaluation.

THERE'S A BIG FUTURE IN DU PONT RESEARCH
In 1956, Du Pont spent \$77 million on research. And over the past 25 years, \$1 has been spent on research for every \$3 invested in new production facilities. This activity promises plenty of room for the young research man to grow.

Right now, Du Pont engineers and scientists are working on hundreds of new research projects. Many work in the Experimental Station near Wilmington, Del.; others are busy in laboratories in nine more states.

SEND FOR INFORMATION BOOKLET ON JOB OPPORTUNITIES AT DU PONT
Booklets on jobs at Du Pont are yours for the asking. The subjects of particular interest to young graduates include: mechanical, civil, metallurgical, chemical, electrical, instrumentation and industrial engineers; atomic energy, technical sales, business administration, research and development. Write, mentioning the subject that interests you. The address: Du Pont, Room 2494-C, Nemours Building, Wilmington 98, Delaware.

NOTICE - STUDENTS WITH CARS

We can't bring our 7 hour dry cleaning and shirt service to the campus, but our new DRIVE-IN is located only a short distance away at 3025 East Saginaw, opposite Frander Shopping Center. Fast, convenient hot-dry and dry cleaning service. In at 9 - out at 4.

Cagers Overpower Butler, Win 74-55

Green Hits 30 Points In Conquest

Olson, Walker star on defense

By LARRY WROBLEWSKI
State News Night Editor
Center John Green, known for his defensive play last year, gave notice that this year he will be known for his offensive prowess as he pumped 30 points in leading Michigan State cagers to a 74-55 victory over Butler University Monday night.

Inconceivable Green led the Spartans' offense throughout the entire game. He counted for 20 of the 34 points.

While setting for his highest point total, his personal high was 23 points against the Spartans. Green did not shoot the backboards in 23 rebounds, 15 of which were held.

The Spartans by winning, lose a Butler jinx and now the overall series stands at seven wins and four losses with Butler holding the upper hand.

Before a live crowd of 7,430 at the arena, showed signs of a game that would be a close one. At the 6:55 mark of the first half the Spartans led 24-18.

However, the cagers sparked a drive, individually overcame the lead.

Clark Flarty Anderson, star of the Spartans, shot a 14-20 mark in the first half, leading the Spartans to a 24-18 edge.

Anderson, who scored 24 points and 11 rebounds, was the Spartans' star in the first half when he was out for 15 minutes.

Immediately the Spartans began to play the brand of ball, a trademark of last year's conference champs and NCAA finalists.

With 29 left on the clock Anderson pumped in a one-point shot to crowd at 27-24.

With 38 seconds to play Anderson stepped in a jump and scored it with a foul covering the cagers into a foul shot at the intermission.

Anderson's statistics checked out as follows: 13 out of 17 attempts for 24 points, 11 rebounds, 10 fouls and 42 percent.

Opening the second half Anderson decided to start the same combination which put the Spartans ahead.

Anderson scored on a jump and the cagers began to change their margin.

Anderson and Olson's field goal shooting with Hedden's two-point shooting and Green's layup shot Anderson's crew into a commanding 50-38 position.

When Green was replaced by Chuck George with 1:59 remaining a thunderous ovation greeted the 6'7" star for a job well done.

In the flying seconds guard Jim Souffer notched a free throw and the cagers had beaten a tough Butler outfit, 74-55.

Backing up Green in the scoring department was Quince with 16 points, and Anderson and Hedden each totaling nine markers.

For the losers guard Bob Hedden, who slipped in 23 points in Butler's win last season, was held to 18.

Major Leagues Select 11 Players From Minors

COLORADO SPRINGS, Colo. (AP)—The major leagues Monday selected 11 players from the minor leagues in their annual draft for total cash outlay of \$135,000 as the National Assn. officially opened its 56th annual convention.

At the same time, the Directors of the Pacific Coast League selected for their teams in the draft 11 players from the Pacific Coast League, including pitcher, two outfielders, two infielders and a catcher—all from the three top minor leagues—represented an increase of 10% over last year's selections when the majors shelled out \$100,000.

A player drafted from the Pacific Coast League costs \$15,000, from the American League \$10,000 and from the National League \$10,000.

Of the 11 major league players selected, the only one to be selected from the Pacific Coast League was pitcher, two outfielders, two infielders and a catcher—all from the three top minor leagues—represented an increase of 10% over last year's selections when the majors shelled out \$100,000.

Green's Play the Difference

Our strength at the center was the downfall of Butler.

Coach Flarty Anderson said following the game that the Spartans' strength at the center was the downfall of Butler.

John Green was the difference maker in the game.

The Bulldogs are a smart team which rarely makes many mistakes and Green was the difference maker in the game.

In giving a quick run down on the rest of his career Anderson related that Larry Hedden and Jack Oulgele were up to their top performance and the usual starter jitters were experienced by both Bob Anderson and Dave Scott.

Indiana Dropped By Ohio Boats In Upt. 76-68

INDIANAPOLIS (AP)—Ohio University's crew team won the Indiana regatta at the University of Indiana Monday night, 76-68.

Indiana had the two best crews of the regatta, the 1957 champions.

Varsity Meeting

Varsity Club members are urged to attend a meeting slated for Wednesday night at 7:30 in the Varsity Club Room, according to Max Gorenbach, club president.

A veteran right-hander, who had previous trials with the Athletics and Indians, Gray won four and lost three with the Padres last season.

Washington, who had first draft selection by virtue of their last year finish in the American League in 1957, chose Bob Malmkus, a Milwaukee-owned infielder from Wichita, a 26-year-old second baseman, who had a brief trial with the Braves last summer.

Chicago drafted Bill Gude, a 24-year-old pitcher from St. Paul of the AA, who had a brief trial with the Braves last summer.

The Braves drafted a pitcher from the AA, who had a brief trial with the Braves last summer.

The University of Texas beat Southern Methodist 14-0, the first time they met in a football game in 1916.

EARN YOUR MASTER'S DEGREE AND PREPARE FOR AN EXECUTIVE CAREER IN RETAILING

Graduate School of Retailing
University of Pittsburgh

HERE ARE CAREERS FOR ENGINEERS— WITH EVERYTHING YOU WANT!

RAPID GROWTH
The demand for telephone service has doubled in the past ten years. And in the years ahead millions more will be spent for new buildings, more circuits, new equipment and improved systems.

BIG OPPORTUNITY
In this vibrant, fast-moving business, good engineers find frequent chances for promotion. Opportunities are almost unlimited for mechanical, industrial, chemical, civil, electrical or architectural engineers.

GOOD PAY
Salaries are good to start and keep getting better with regular and frequent increases. You earn as you learn and all our executives come up through the ranks. Promotions are based on performance—not "pull."

AND MORE!
Here is interesting, exciting, important work. And few businesses offer you so much security, yet so much variety. Act now! Write Mr. K. A. Newman, 1365 Cass Avenue, Detroit 26, or call him at WOODWARD 1-1235.

DECK THE HALLS

The days grow short, the night grow long, the weather cold, and a light frost appears on the ground. Christmas is nigh, and soon your young minds turn to the festive season of Christmas.

Let us examine first the person who has everything? Well, when you encounter this dilemma, the best thing to do is to be the best. Ask yourself the question: Does he truly have everything? Does he, for example, have a girlfriend? A job? A car? A house? A lot of money? A lot of friends? A lot of fun? A lot of love? A lot of life?

There is, incidentally, quite an interesting little story about how Prometheus found the fire. Before Prometheus' invention, mankind was in a state of barbarism. People got their fire from old places. The best they could do was to steal it from the gods. Prometheus, a great philosopher of Frankfort-on-Main, kept thinking there must be a more efficient way to make fire. Finally, in a flash of inspiration, it came to him. Why not build a device to contain the fire and keep it from spreading?

Well sir, he built precisely such a device and named it after his beloved wife Stove. Prometheus' first Stove, it must be confessed, was less than a triumph, his mistake was in building it out of paper. The next Stove, built of wood, fared hardly better. Not until he made one out of metal could the Stove really be called a success.

(But even then the Stove was not entirely satisfactory. The trouble was that the Stove filled up with ashes and became useless after a few weeks. It remained for Prometheus' son Frederick to recognize that problem. He invented a mechanism to remove ashes from the bottom of the Stove and was thereafter known to posterity as Frederick the Grate.)

But I digress. We were discussing Christmas gifts. This year, as every year, a popular gift is the smoking jacket. And what do the smoking jackets smoke? Why, Marlboro, of course—every man jacket of them. And why wouldn't they smoke Marlboro? Why wouldn't anybody with a taste bud in his head? You get such a lot to like in a Marlboro—filter... flavor... flip-top box.

Here is no filter to hollow the cheeks and bug the eyeballs; here is a filter that draws nice and easy. Here is no flavor to pale and pall; here is a flavor ever fresh, ever restful. Here is no flimsy pack to crumble and shed its precious cargo; here is a sturdy box that keeps each cigarette plump and pristine.

Speaking of smoking, the year's most unusual gift item is a brand-new cigarette lighter that never needs refilling. You are scoffing. You are saying you have heard such claims before. But it's true, I promise you. This new lighter never, never needs refilling! The fuel supply lasts forever.

Of course, there are certain disadvantages. For one thing, the lighter is rather bulky—170 feet long and three stories high.

But look on the bright side. As the fuel runs out, you can run rooms in it.

Good to give, good to receive, or Christmas or any other time, a pack of Marlboro cigarettes, always makes the perfect gift. So keep your eye on the red and white throughout the holiday season.

France, Britain Accused Of Deterring UN Action

UNITED NATIONS, N.Y. (AP)—Soviet Arabia accused France and Britain Monday of entering into an "unholy alliance" aimed at preventing effective UN action on both Algeria and Cyprus.

The accusation was made in the 82-nation UN Security Council, where the United States was asked to exercise its veto to prevent a resolution on Algeria.

The committee is debating Algeria's new constitution, which the British and French are opposing. The UN Security Council is expected to vote on the constitution in the next few days.

The committee is also debating Cyprus, where the population is predominantly Greek. The Cyprus issue is also being discussed in the Security Council.

U.S. Ambassador Henry Cabot Lodge is expected to speak here on Algeria in the next few days. He is expected to urge the UN to take action on the Cyprus issue.

Lodge is also expected to speak on the Cyprus issue. He is expected to urge the UN to take action on the Cyprus issue.

Two Students Win Knapp's Scholarships

Two students from Michigan State University have won the Knapp Scholarships for the coming year. The winners are John J. Egan and Robert L. Smith.

The Knapp Scholarships are awarded annually to two students who have demonstrated exceptional academic achievement and leadership. The scholarships are named in honor of Dr. J. H. Knapp, a former president of MSU.

Egan is a senior in the School of Business Administration, and Smith is a senior in the School of Education. Both students have been members of the Phi Kappa Phi Honor Society.

The French insist upon a ceasefire as a first condition, to be followed by elections and negotiations on Algeria's political future.

Ambassador R. S. S. Gamewell of Geneva, a member of the Asian African bloc, urged the French to change their mind and accept the offer of Tunisia and Morocco to mediate the Algerian conflict.

He appealed to the allies of France, especially Britain and the United States, to use their good offices to bring about a solution.

He urged Britain and the United States not to view the Algerian issue as a test of East-West strength, and added: "A free Algeria would contribute to a solution of problems in that whole area."

Ken Carlin, 45-year-old Australian mining engineer, waves from hood-bow of his amphibious jeep upon arrival in San Francisco. He crossed the Pacific in the sea-going vehicle to Alaska and motored down Alaskan highway from Anchorage.

First All-Civilian Use of Reactor Scientists Fire Furnace To Split Uranium Atoms

SHIPPINGPORT, Pa. (AP)—Scientists Monday fired in the huge atomic furnace at the nation's first full-scale major nuclear station. It was the day after the reactor was turned on in the world's pioneer reactor.

The splitting of uranium atoms in the Shippingport plant marked the first major step before production of commercial quantities of electricity.

Anyone Seen Sputnik?

CAMBRIDGE, Mass. (AP)—An American and British scientist said the carrier rocket that launched Sputnik I plunged to earth last weekend.

The scientist, a British physicist, said the rocket was seen falling from the sky in the North Atlantic Ocean. He said the rocket was seen falling from the sky in the North Atlantic Ocean.

Several small power reactors now are operating in the United States, but none is rated at more than 4,000 kilowatts.

A 100,000-kilowatt power plant at Kluver Hall, England, is the largest in the world. It started operating in the fall of 1956.

The target date for full operation is indefinite, but is expected sometime before the end of the year.

The Shippingport reactor may power a city in the future. It is expected to produce 100,000 kilowatts of power.

They base this belief on the rapidly shortening time it took the rocket to enter the globe. By Saturday the time had dropped to 85 minutes, nearly 10 minutes less than when the rocket was launched by Russia Oct. 4.

YM-YWCA Plan Christmas Party

A Christmas Christmas party will be held at the YM-YWCA on Saturday, Dec. 7, at 7:30 p.m.

Explosion Sealed Within Mountain

WASHINGTON (AP)—A powerful explosion sealed off a tunnel in a mountain in the state of Michigan. The explosion occurred on Monday, Dec. 2, at a tunnel under construction for a new road.

The explosion was caused by a gas leak from a tunnel. The explosion sealed off the tunnel, trapping several workers inside.

MUSG Committee Plans Open Meet

The Michigan University Students Government (MUSG) committee will hold an open meeting on Wednesday, Dec. 4, at 7 p.m.

On Michigan Highways Drivers Trail '56 Figure In Total Traffic Fatalities

Michigan is having its own traffic fatalities. The number of traffic fatalities in Michigan for the year 1956 was 1,136.

Power of the device was estimated at 1,000 to 1,500 tons or TNT, similar to a bomb.

It determines on Sale In Male Living Units

Research has shown that the number of living units in male living units is increasing. This is due to the fact that more men are living in single units.

MSU Finance Probe

(Continued from Page 1)

Strange in the speech, also called for a check on lobbying activities of MSU officials pending legislative approval of budget requests.

Attacking lobbying techniques, Strange said university officials rallied county agents and alumni through the state last winter to "pressure" their legislators to support money demands.

"It looks to me as though some of these lobbying activities are on the border of fraud," Strange charged.

"I shouldn't think of what side they are on. I am convinced that taxpayers in my district would follow the whistle-blower Michigan State University if they had the facts. And I am going to do everything in my power to see that those who are guilty are punished," he said.

Strange said he was sure that Michigan State University, as a constitutional body, must be run as a business as it sees fit. He said, however, that he might press for a constitutional amendment requiring state-supported schools to open their books "for public inspection and bar spending of education funds on lobbying and press agency."

Cowden commented: "We believe that we are operating and have always operated in strict conformity with state and federal laws, which have provided for research and extension work in both agriculture and home economics for more than 40 years."

Projects undertaken by home agencies are subject to prior approval by Federal authorities, and to periodic auditing by Federal inspectors.

"All of the facts relating to the matter about which Mr. Strange is quoted as complaining are open to him and to all other interested parties. We have nothing to hide. We are confident that the facts will make a clear picture of our activities, including a highly successful record to the people of Michigan."

Hannah to Hold Senior Reception

President Hannah will hold a reception 7:30 a.m. Wednesday at Convocation House for all incoming graduate students.

All eligible seniors are asked to attend this traditional event.
