Katanga President's Arrest Dissolves Confederation Hopes

Boughton Abandons Campaign

Drugs Drive For Student Vote In Selection Of Dean

By HOWARD BOLMUS

The leader of the Congo's richest province was arrested today and charged with complicity in the Katanga rebellion. The arrest of Tshombe, a long-time opponent of the Congolese government, came as a surprise to many observers who had expected him to play a key role in the future of the country.

Tshombe was arrested at his home in the capital city of Leopoldville. He was taken to the prison in the city center. The provincial capital is Kinshasa.

The arrest came after a meeting between Tshombe and President Lumumba. The meeting was held at the presidential palace.

Lumumba said that Tshombe had been arrested because he had violated the law. He said that Tshombe had been involved in a plot to overthrow the government.

Tshombe's arrest is the latest in a series of events that have led to the collapse of the Katanga rebellion. The rebellion began in April and has been led by Tshombe.

The rebels have been fighting for control of the province, which is rich in minerals.

The rebels have been supported by some foreign countries, including France and the United States.

The government has been facing increasing pressure to take action against the rebels.

The arrest of Tshombe is a major blow to the rebels.

University Profile

Dr. Greer of Humanities

Dr. Thomas Greer has a long association with the humanities department, particularly the development of military history of the Army Air Forces in World War II, and has been an active participant in the Army Air Corps Historical Society. He has also been a member of the University College Alumni Association since 1947 and has been an active participant in the development of the American doctrine of air power. -

Library:

Dr. Greer has contributed to the development of the humanities department by producing several articles and reviews. After the war he was chief of the military history branch, where he became interested in the history of warfare. In addition to his expertise in military history, Dr. Greer has also been a member of the Universitiy College Alumni Association since 1947 and has been an active participant in the development of the American doctrine of air power.

Special Concert Performances

In addition to the programs presented by the Concerts for the Humanities, the Orchestra of Amsterdæm, the Netherlands Chamber Orchestra, and the Dutch Military Concerts have continued to produce outstanding music organizations.

Gradual Valuation

The gradual valuation of properties has been set for this year with the purpose of ensuring a fair assessment of the market value of each property. A comprehensive list of the valuation is available at the Office of the Assessor.

Sounds of Holland Featured Over WKAR

Eighteen hours of radio programming will be featured over WKAR, beginning at 6:00 PM on Friday, May 27th. The program will include the music and sounds of Holland.

Mail Orders Accepted

Coupons may be exchanged for a special showing of etchings of the Netherlands, arranged in cooperation with the Netherlands Consulate General, and drawings by the Dutch artist. The event will be held in the studio of the Radio-Philharmonic Orchestra, honoring the late Edward Van Heeswijk, who was a director of the orchestra and conducted the concerts.

Weisinger: MSU Future Planning

(Continued from Page 1)

in the future.

“We are trying to involve the students in all aspects of planning,” said Weisinger.

Advisers that are on faculties are in the loop and have been very helpful in the planning process.”

“The key to the success of this plan is not just a plan for something that is going to happen in the future, but a plan for something that is already happening.”

On campus, the student government is working closely with the administration on the planning process.

“Art and music are very important to the student body,” said Weisinger.

“I have a feeling that when we look back on this period, we will see that these are the years when the University really came into its own.”

Van Horn, also praised the planning process.

“We are trying to involve the students in all aspects of planning,” said Van Horn.

“I have a feeling that when we look back on this period, we will see that these are the years when the University really came into its own.”

Weisinger and Van Horn both expressed hope for the future.

Hopes to Return

Congolese Seek Dignity, Says Recent Missionary

"Independence is the hope of the people in the Congo," said of Daniel Deer.

They look to independence as a means to end poverty, to development, and to democratically elected governments.

Wednesday's visit was the first time that President Kasavubu had met with a Congolese missionary.

The Congolese are looking for a way to preserve their language and culture.

However, there are less universities than there were before independence, and the education is not as extensive or as rigorous as before.

The Congo Literacy Rate is Now 40% for Men and 10% for Women.

The Congo has been built up on the foundation of the rubber industry.

But independence brought new problems.

Deer and his wife plan to return to the Congo when they are able.

During their visit, they gave a slide presentation about the current situation in the Congo.

The presentation was well received by the Congolese people, who were eager to hear the missionary's perspective.

The missionaries have been working to improve conditions in the Congo, and they hope to continue their work in the future.

The Congo has been affected by the war in neighboring countries, and the future of the country is uncertain.

But the missionaries remain hopeful, and they continue to work towards a better future for the Congolese people.

The trip to the Congo was a meaningful opportunity for the missionaries to see firsthand the challenges facing the Congolese people.

They were struck by the resilience and determination of the Congolese people, who continue to work towards a better future despite the many difficulties they face.

The missionaries expressed their admiration for theCongolese people and their commitment to continue working towards a better future for the country.

They ended their visit by sharing a meal with the Congolese people, and they were heartened by the warmth and hospitality they received.

The missionaries expressed their hope that their visit would help to raise awareness of the challenges facing the Congolese people and encourage continued support for their work.

They look forward to the next opportunity to return to the Congo and continue their work towards a better future for the country.

Educational TV: Help Or Hindrance at MSU?

By LINDA BAGGE
State News Staff Writer

Student and faculty members of Michigan State University were asked what influence television would have on student opinions. A coed asked. "I was told TV is to be key their lectures to the average coed." "As it is, students need someone piloting all the time. They are isolated from the world in the sense that they're not really in society because they finally get out of a job." "If not, others need to be inspired or interested, some said. "But what's to become of students who are inspired or interested, unless they were proctored," Assistant Professor of English stated. "I tend TV lectures."

Urey Gives New Idea Of Solar System Origin

WASHINGTON.—A new picture on formation of the solar system, including a firm idea on how the earth and the moon came into being, was advanced Wednesday by Nobel prize-winner Harold Urey, chemist of the University of California.

"We have a new origin to the earth," Professor Urey said. "It is supported by the National Academy of Sciences, a student of the earth's formation, as an explanation of the earth's gravitational pull."

Dr. Urey, the University of California professor of chemistry, stated that it all started from a giant supernova star, and that the earth and moon formed a planet that at one time was captured into an orbital position.

"The earth was fully formed, then, was captured into an orbital position," Dr. Urey continued. "As a result, it came close to the moon.

"All the oxygen we breathe on earth is the result of some species of microorganisms," Dr. Urey said. "In the oceans of the earth, there are now about 12 billion tons of oxygen."

Dr. Urey further stated that the earth is an "oblique" body, and that the moon was formed from a "sodium water" mixture. "An orbiting sodium water mixture is formed from a "sodium water" mixture," Dr. Urey continued. "It is expected that the earth and moon are formed from a "sodium water" mixture."

"The earth and moon are formed from a "sodium water" mixture," Dr. Urey stated. "It is expected that the earth and moon are formed from a "sodium water" mixture."

Limey Says

"I think it would be a good idea for the professor of English to teach English." "I think it would be a good idea for the professor of English to teach English." "I think it would be a good idea for the professor of English to teach English."

A Musical Arabian Night

At 8:45 p.m. on Thursday, April 27, the East Lansing Civic Theatre will present the musical "A Musical Arabian Night," starring Martha Hyer and Roger Moore. The show is based on the novel by Robert Louis Stevenson and was adapted for the stage by Arthur Freeland. The story follows the adventures of a young English sailor who is shipwrecked on a desert island and must use his wits to survive. The musical features songs and dances inspired by Middle Eastern cultures, creating a unique blend of music and storytelling. Tickets are available at the door or through the Civic Theatre's box office. For more information, call 517-332-1777.

Awards

The winners of the 1989 Michigan State University Student Government Awards were announced at a ceremony held on April 25. The awards recognize excellence in leadership, service, and academics among Michigan State University students. Among the winners were the Student Body President, the Student Body Vice President, and the Student Body Treasurer. Other awards were given to students in academic, service, and leadership categories. The ceremony was held in the Union Ballroom, and the winners were selected by a committee of faculty and staff.

The Michigan State Conservatory Club

The Michigan State Conservatory Club presents "Conservatism and Ethical Values" on Tuesday, May 2, at 8:00 p.m. in Room 33, Union Building, Michigan State University. The lecture series explores the principles of conservatism and their relationship to ethical values. The lecture will be given by a guest speaker and will be moderated by faculty members. The event is free and open to the public.

In West Virginia

Food Stamp Program Begins

Elkton, W. Va. - The state department of public assistance is scheduling its first food stamp program in the area. The program will operate on a first-come, first-served basis and will provide coupons to eligible applicants. The coupons will be redeemable at local grocery stores. The program is designed to assist low-income families in meeting their food needs. For more information, call the Department of Public Assistance at 1-800-555-3300.

LEVI'S TOLD the state department of public assistance interviewers that retail bids for food stamps have been increased and that the program will be expanded to serve more West Virginians. The increase in retail bids will provide more opportunities for families to purchase food stamps, and the expansion will help more families access the program. The program is expected to be fully operational by June 1, and applications are being accepted now.

Contemporary Forum Meets

An organization meeting of the Contemporary Forum of the Michigan State University will be held on Tuesday, May 3, at 12:30 p.m. in the Union Ballroom. The meeting is open to all members of the forum and will include a presentation by a guest speaker. The forum is a group of faculty and staff members who meet to discuss issues of contemporary significance. The meeting is free and open to the public.

For Regional Development

Shippers Missing the Boat

"We have to go foreign in trade," he said. "In that industry and transportation, there are administration problems that have not been resolved regionally." He is a member of the American Historical Association and serves at the lake head. He is now working on a history of the African-American contributions to the growth of the canal. He said, "We have not cooperated regionally, and I think it's a real problem."
Spartans Need Batting Punch

Total of 16 Singles in 3 Games

Spartan batting has suddenly lost the touch of hitting the long ball. Early analysis of Michigan State's 1958 baseball program showed the Spartans to be particularly potent with the bat, though short elsewhere, especially in hitting.

It still holds true. The Spartans found themselves leading twice yesterday afternoon in the second inning, but were unable to increase the score and fell by a score of 6-2 to Indiana.

Don Live-sparger (r.) and Tom Riley (l.) are two sources of worry to Duffy Daugherty's Spartans in the forthcoming season. Riley is a do-it-all center fielder with a .340 batting average in the 1958 season. Live-sparger is a second baseman with a .310 average and a good arm.

Both players have been key players for the Spartans in the past, and it's likely that they will continue to be important contributors to the team's success.

Frosh Gridders Slow Starting; Standouts Missing From Drills

“Fundamental errors” were cited as the cause of Michigan State's 2-0 loss to Ohio State last weekend. The Spartans were dominated by the Buckeyes in every phase of the game and were unable to recover from an early 1-0 deficit.

Tom Riley (l.) and Don Live-sparger (r.) are two sources of worry to Duffy Daugherty's Spartans in the forthcoming season.

Yankees Beat Tigers, 13-11

The Yankees, led by Mickey Mantle, dominated the Detroit Tigers in the 13-11 victory. Mantle's three home runs and 11 RBIs led the Yanks to victory.

Frosh standouts are unlikely to show in this game. Football season starts and Groce spokes only those Frosh who were able to make it on the team's first in the season. The Frosh, led by Groce and Fleming, will still maintain some interesting work.
A week ago Sheila Hulihan, a freshman from Flushing, N.Y., got the urge to go over the rapids of the Red Cedar by the Electrical Engineering bridge. She decided to do it and headed for Van Hoek to get some sort of raft. She found a cheap surplus one-man job that seemed to suit her purpose. Sheila planned the expedition very carefully, deciding that she did not want to fall in the polluted Red Cedar if she could help it. So she went to a spot above the rapids and proceeded to test the currents by throwing cereal boxes into the river. They were weighted with stones so they would sink somewhat and give a more accurate estimation of the currents below the surface.

The next step was to find a male companion to go along for the ride to help in case things did not go as planned. Tony Tamburello, Buffalo, N.Y. freshman, who was curious about the cereal boxes being thrown into the river, was standing nearby. Sheila casually asked if he wanted to shoot the rapids with her and naturally he consented.

Their adventure began at 2:30 last Sunday afternoon when they boarded the precarious little craft above the rapids. As they approached the rapids their confidence seemed somewhat shaken but all went well and they made it. However, when a short distance was an overhanging branch that had not been planned on. They almost capsized but Sheila saved the day and balanced the craft as Tony struggled to stay in and get under the branch. Finally making it to shore safely but somewhat wet, they both agreed that it had been fun.

When asked what she plans to do with the raft now, Sheila, who is a Fisheries and Wildlife major, said she plans to paddle up river later this spring and get a suntan in solitude. She also plans to christen the raft the "New Yorker". She may even shoot the rapids again.

The pair found the one man raft to be a tight squeeze!
