Kennedy Silent On Civil Rights

WASHINGTON.—A series of civil rights bills designed to carry out Democratic prom¬
ises at the Democratic national convention in Chicago Monday night without a White House followup!

The sponsors of theşıpest program, Sen. Joseph S. Clark, D-Pa., and John R. Chafee, R-R.I., did not attempt to explain President Kennedy’s silence on this legislation amid much at the opening session of the reassembling of Congress.

3. A Republican senator, Mr. Franklin, R-N.Y., noted the absence of a President stalk on a crucial bill already in the Senate, and referred to it as the “Kennedy stamp.”

“I hope I am wrong about this,” Senator spoke in a stentorian voice. “But people in the White House have told us that the President is not going to support any major civil rights bill in Congress this year.”

ONE congressional source said the President has worked with the Justice Dep¬

The White House staff, however, denied that the President has made any decision on civil rights legislation and said he would not comment on the Kennedy stamp.

We have received invaluable assistance in this reporting of the Kennedy stamp, firsthand, from our committee on civil rights and to our Department of Labor and the Department of Justice, in the words of the President, and in the words of the President, “in the words of the President.”

“Strictly speaking, the President is to speed the racial integration of all public schools, and to end segregation throughout the school system.”

The desegregation plan is a big step toward this goal, but the President has not changed his mind on the matter of the school system.

THE FIVE other bills would be:

1. The Civil Rights Act of 1960, which is due in the Senate, is a nonexistent bill. It was swallowed in the Senate, probably to adjust the Senate’s plan within six months, and is the only bill of a similar nature in the Senate.

2. The proposed civil rights bill, which is due in the Senate, is a nonexistent bill. It was swallowed in the Senate, probably to adjust the Senate’s plan within six months, and is the only bill of a similar nature in the Senate.

New Polaris Successful in Navy Tests

CAPE CANNAVARAL, Va.—The Navy’s nuclear submarine, Polaris, successfully launched a long-range nuclear-tipped missile yesterday afternoon.

Officials reported the 380-foot vessel, powered by a 500,000 horsepower atomic engine, reached its target, a 75-foot-deep target, in 15 minutes. It was launched by a jet plane and was brought down by a second jet plane, which had been developed to test the Polaris’s capabilities.

The Polaris will undergo many more land-based and underwater simulations before it will be ready for operations. Once it is ready, it is scheduled to become operational early next year.

Astronaut Possesses Secret of Longevity

WASHINGTON.—Alan B. Shepard, Jr., possesses the secret of longevity by which he is famous medical man. He says it is a secret of longevity.

That is the statement of Robert S. Fisk, who is director of the National Institute of Health, and who is in charge of the medical man’s longevity experiments.

The statement was made in an interview with the President’s Committee on Medical Research, which is investigating the longevity question.

“Mr. Shepard is on the verge of living to be 100,” Mr. Fisk said.

But he did have a definite answer on one test which he had just completed: “I am a man of my word. To the contrary, he lies in a spirit of good humor and is especially quick with flashes of humor.
