Inadequate Planning Causes Many Pollution Problems

(Continued from Page 1)

The plan does not actually plan for the collection and treatment of household wastes in East Lansing. "A real advantage of our program is that East Lansing's plans for future recycling are already under way," Oemling said. "The plan is to use existing collection by the city, and to develop separate collection of recyclables in the future." The city of East Lansing's collection and treatment plan will have to be integrated with the state's program for the entire metropolitan area.

"The lack of adequate planning is one cause of the pollution problem," Oemling said. "The city has only begun to realize the extent of the problem and the need for immediate action." The city of East Lansing's collection and treatment plan will have to be completed in the next year. There are already in existence several community programs, which are being considered by the city of East Lansing, but the city has not determined whether these programs will be the final component of their proposed program. The results of this oversight are readily apparent.

MSU To Draw Proposals For Nigerian Peace Corps Work

The Peace Corps headquarters in Washington, D.C. has reserved 3000 to be assigned to Nigeria. MSU has further asked to submit their Peace Corps program. Specialties requested by the University of Nigeria are: Engineering, Education, Social Science, Agriculture, Psychological Science. All interested MSU faculty members are requested to submit their programs to the Peace Corps in writing. The Peace Corps evaluation committee will determine the faculty and the activities that will be provided by MSU. Specialists in Peace Corps work will be available in the Peace Corps office.

Rusk Testifies

Foreign Aid Needed To Fight Communism

WASHINGTON (AP) — Secretary of State Dean Rusk testified yesterday that America must spend $1,806,000,000 on foreign aid to prevent worldwide communist aggression. "We can afford to do this," he said. "There must be a way to prevent what has to be done," he added.

"But," Mr. Rusk added, the United States must continue its foreign aid program to prevent the spread of communism in the world. He said that the United States must continue its foreign aid program to prevent the spread of communism in the world. He said that the United States must continue its foreign aid program to prevent the spread of communism in the world.

"They must understand," he said, "that if they are going to help the people in the United States, they must fight the people in the United States."

Chemical Unmasked

(Continued from Page 1)

Rusk replied that the Peace Corps program unmasked was due to the “unwieldiness of the situation.” He said that the Peace Corps program unmasked was due to the “unwieldiness of the situation.”

"The drug is methotrexate," he said. "It is a very potent drug and it is used in the treatment of cancer."

Accident Monday

Involves Coeds, $1,500 Damage

A car driven by Nancy Ber- gman, Mason junior, struck a Detroit police car, Monday afternoon on East Dearborn. Miss Butler was waiting for traffic to clear when Miss Bergman's car struck her car from behind. No serious injuries were reported or expected for the woman who was rushed to the hospital. The Ford car was taken to the garage where the damage was estimated at $1,500.

Correct Omission

The State News report of the Delta Student club election stated that the candidates for president and vice president were T. D. and J. W. It was omitted that the candidates for president and vice president were J. W. and T. D.

European Psychologist Says Individualism Sacrificed for Higher Living

BY ANN DARLING

Ann Arbor News Staff Writer

American psychologists are saying that modern society is sacrificing individualism for the sake of higher living standards.

The distribution of income, homes, and power in America has been altered at a high rate in the last 150 to 200 years. Many psychologists say that higher living standards are a false dream.

One of the most influential psychologists in the field is Dr. Margaret Haag, who has been studying the effects of higher living standards on society for the last 150 years.

He has found that higher living standards do not necessarily lead to individualism. In fact, he believes that they are one of the main reasons for the lack of individualism in modern society.

Verdict: 15 Year Jail Term

From Page 1

Cedar Rapids, Iowa, March 1

A pendant to the story was held in the Cedar Rapids, Iowa, where 15 year jail terms were ruled against 10 members of the Omega Psi Phi fraternity.

This is the first case of its kind in the state, and it is expected to set a precedent for similar cases in the future.

Circle3 Summer Trials Set for Today, Friday

Tryouts for the Circle3, a living organization that specializes in music and the arts, are scheduled for today and Friday.

The tryouts are open to all students, and members are expected to be selected by the end of the week.

Class Work Pays Big For Hotel Administration Senior

For most students, college is a time for partying and not working. But for one student, it is a time for hard work.

William J. Ashmann, Elmira, N.Y., senior, fulfilled his major requirement for a business and technical writing course, Hotel Administration Senior, by writing a paper on the role of hotels in modern society.

This paper, which is expected to be published in the future, will be a valuable contribution to the field of hotel administration.

For most students, college is a “painless way to cram for a history course.”

The band of Dr. Morris E. Haag, celebrated European psychologist and lecturer, will be in town, behind the block, for the next 10 days.

WEST YALEK

Kathryn E. Hambly, Ithaca, N.Y., senior, is expected to be selected as a member of the Omega Psi Phi fraternity, according to Dr. Haag.

The remaining summer projects for the group will include the production of the Devil’s Rock, a musical produced by Dr. Haag, and the production of a movie, “The Lake,” in the summer of 1962.

More information concerning the productions can be obtained by calling Dr. Haag at 265-1212.

Hagg said, the people feel that “I hear that the rich people are working more than the rich does.”

Hagg said, “the only way to avoid bloodshed is to avoid this feeling of superiority among the rich.”
Gilbert Called To Eichmann Trial

A former MSU psychologist who was called to London to testify at the trial against Adolf Eichmann.

Gilbert M. Gilbert, presently chairman of the Long Island Chapter of the National Jewish Congress, will leave for London to testify in the trial against Eichmann in June.

Eichmann was an employee of the Jewish Central Agency, and Gilbert said he has been invited to testify in the trial against Eichmann in June.

Gilbert said he had reached the conclusion that he could not stay away from the trial, and he said he would return to New York as soon as possible.

MEN'S SHOP II

216 Abbott Rd.

Lansing
Students will flock to shiny new buildings next fall as they have been doing for years in the past. The Brody group, Education Building, Student Services—even Morrill was once as spanking new as Eppley, Bessey and Case Halls.

But before the gleaming facade falls smoothly into place, many men put in long, hard hours making blueprints into realities. Through the crispness of last fall's football air and the bitter cold of winter. term's snows, these construction workers have pushed to get ditches dug, girders raised, tiles in and paint-on.

Students in Anthony Hall have watched the progression of the new engineering building (upper left) through the months and have seen the giant girders slip into place. But few have noticed the large pipes (above) needed for sewers. Cranes swing these into place (upper right) after the pumps clear the ditches of excess water (lower left).

Men spend hours securing joints (middle, far left and right) to produce the black silhouette of framework against the sky (lower right). Although not finished, Bessey Hall (below) is more typical of the building students remember after leaving campus. The bricks are on, the entrance in place and the blades of grass already sprouting up.

In another year these sides of brick and mud will be forgotten and rooms in Bessey, Case and the engineering building will be as common as the Kiva is now.

From the air the projects often look differently than they do to sidewalk superintendents. The new dormitory, Case Hall, seems gigantic from the ground (lower right) but is dwarfed by Spartan Stadium when seen from the air (above). Case Hall is expected to open next winter term and relieve already crowded dormitories.
